Part I

Introduction

Chapter 1

Introduction

Welcome to the Stuff of Legends tabletop role playing game system. This is a high octane tabletop RPG, with both strong balance and easily customizable character generation. We're sure you're gonna have a great time with it, whether you are a player or a gamemaster(GM).

We've paired a powerful combination of tracks and easy to read ability lists to make a very quick to learn system that lets you make the character you want to make. We've paid close attention to make sure there aren't any weak choices; every character is valuable in and out of a fight.

Full Support for Combat, Roleplay, and Exploration

A player character(PC) in The Stuff of Legends is just as much at home trading blows with fearsome foes as they are exploring a dangerous dungeon, or talking with the leader of a region. We provide a tight, tactical combat experience, but also systems that give players power and agency between combats. PCs are set up to be active agents in the world, enacting change in a variety of ways according to their own skillsets.

Our design goals

- **Track Based:** The majority of a character's power in combat comes from track selection. This allows a lot of power to define how your character works with just a few meaningful decisions.
- **Balance:** No one class, group, power, or ability should be The Best or The Worst. It removes the ability to have meaningful middle ground, and is the enemy of fun over a long campaign in a group setting.
- **Setting Independence:** This system can handle a variety of different settings. We provide a default setting, but in the future, we aim to explore other settings.
- **Lack of Attrition:** Gradually wearing down resources simply makes PCs less heroic and encounters less impactful.

- **Deep Skill Checks:** A skill check can sometimes just be a quick pass/fail, but sometimes it can be so much more. In the moments where a skill check really matters, there's more control and depth about what a success is and what a failure is without complicating the core mechanic when it's not needed.

Why We Did This

There's a few of us who weren't happy with the games on the market - the d20 class based systems which constrain your choices to a handful of pre-made classes, the rules light narrative systems that have a very high creative overhead, and the points based game systems that have a lot of freedom, but a large learning curve for figuring out all the abilities and a heavy reliance on the GM to making sure nothing is broken. None are bad on their own, but none of them were the perfect answer for us.

What we wanted to see wasn't there, so we set out to make a game we would love to play. We hope that you enjoy it as much as we do!

What You Need

Playing The Stuff of Legends requires a few supplies. The first is a hex grid. This is a grid of hexagons on which the battles will play out. Typically about 1 inch hex grids are a good size, but the size doesn't impact the game. Often people will get special maps that can use dry erase markers, but you can just print off some on paper, or find your own alternative. A square grid can be used if preferred. The next are dice. D20s are most relevant, and each player should have at least 1. Other dice depend on your character. Several d6 are most common, and the easiest to acquire, and other dice sizes can be replicated with a d6 if need be. The ideal set is a set of standard polyhedral dice, which consist of a d4, d6, d8, d10, d12, d20, and often a second d10 for percentile dice. Many players also enjoy having a miniature figurine for their character to represent their location on the battlemat, and the GM can employ a range of figurines for the enemies, but any kind of distinguishable marker can be used, such as small slips of paper with a name on them.

An alternative to all of this is an online service, which allows for the map, dice, and figures to all be

handled digitally. They would be known as virtual tabletops.

For the Veteran Gamer

The Stuff of Legends system uses a lot of unique concepts in its core ideas. While there are some links between this system and other systems, such as the use of hit points, d20, etc . . . , a lot of concepts are greatly modified. To the best of our knowledge, “This is like <your favorite system> except . . .” does not provide a meaningful viewpoint, as there is no system similar enough.

In the process of making all this, we found a lot of traditions and expectations of game design that were baked in, that we’ve largely tossed out in order to make a modern game system for the modern gamer.

This can cause confusion for players familiar with systems that use similar concepts. For example, some systems use smaller encounters as a form of attrition to wear the party out, exhausting their options. As a result, healing is a limited resource. In our system, the expectation is that each combat encounter starts with everyone at full HP.

If you try to skip through the rules and rely on past experience with Other Systems, you’re not going to get the full experience. Take a little bit of time and read through the Combat Mechanics and Skill Checks chapters before jumping in, you’ll adapt pretty quickly.

Table Etiquette

Stuff of Legends is a collaborative roleplaying game. This means you are working with other people to solve problems, overcome obstacles, and, most importantly, have fun. This means you need to share the spotlight, let other people contribute, and make sure you don’t monopolize the table. Every group has their own dynamic, but make sure your dynamic is one everyone is happy with. One person making all of the decisions could be fine if everyone else prefers a more passive role, but if they want to be more proactive but aren’t assertive enough to get the party to listen, that’s a problem. If you are the one always taking charge, make sure everyone else is able to get their fair say. Players should try to cooperate as much as possible, but the GM should also try to keep an eye on the dynamics and try to smooth over any rough spots.

Chapter 2

Character Overview

Characters in The Stuff of Legends are... the stuff of legends. They are exceptionally talented individuals who can have a profound impact on the world around them. Even at low levels, they are made of the right stuff, and as they grow in power they can write their own legends. Player Characters in the Stuff of Legends matter.

Roles and Tracks

Roles and Tracks are the main things which define a character. Roles define their broad set of competencies, and Tracks define how they fight. These two things alone will tell you a great deal about a char-

acter. They are complimentary, and neither is more important than the other.

A character will have a few roles, which give a description of their skillsets. "Survivalist Street Rat", "Ambassador of Generica", or "Entrepreneurial Conman" are examples of roles. They tell you a lot about who a character is, and what types of skills they will possess. There are three types of Roles. Character roles are the most important, and are created to represent your character concept. Your class role represents skills stemming from your fighting abilities, and summarizes your track combination. Detail roles are smaller roles that cover things like your species, nationality, gender, or other setting specific qualities.

Each character will have three tracks. Tracks give a

progression of combat centric abilities, and are divided into major, minor, and innate tracks. Major tracks determine your main, most significant actions in combat, while minor tracks give complementary actions to go alongside them. Innate tracks give you passive abilities that do not require actions to use, making you stronger, tougher, or more nimble. The combination of tracks you pick are the biggest part of how your character will fight. For instance, someone with Warrior, Shield Master, and Steel Mountain would be an imposing knight, encased in a massive set of armor, and they protect themselves and others with a shield, while slaying their opponents with sheer martial skill. In contrast, someone with Enchanter, Illusionist, and Buff Spells will be a trickster mage, toying with their enemies minds and senses, while weaving magical protections around themselves.

Features

Features are additional combat skills you have beyond your tracks. They help you customize your

character beyond what your tracks give you, but don't determine your core fighting strategy. They may allow you to do things like summon weapons out of thin air or protect those near you.

Perks

Perks are additional Roleplay abilities you have beyond your role. They offer specific, concrete abilities you may have to solve problems outside of combat. They may grant you superhuman abilities or magical powers, add new capabilities, or further define your character.

Summary

Your character's Roleplay abilities are mainly determined by Roles, with Perks to supplement them. Your Combat abilities are determined by your Tracks, with Features to supplement them.

Part II

Rules

Chapter 3

Roles and Skills

Roles

A role defines what skills and knowledge your character has. A role is a description of both your role in the party and in the world. For instance, Phantom Thief Fox, "Retired" Toad Clan Ninja, and Royal Assassin would all be roles with a similar function, but suggest different shades of how they fit into the world. A role should describe your character, but you and the GM should both agree on what types of things the role would enable you to do. For instance, if you wanted to pick someone's pocket, the Thief role would definitely be applicable, while it may not be covered by Assassin, but either would be able to pick a lock or sneak around undetected.

Each role will have a rank between 1 and 5, representing your skill from hobbyist to demigod.

Role Rank Meaning

Rank	Meaning	Total Cost
0	Unskilled	0
1	Apprentice	1
2	Professional	2
3	World Class Expert	4
4	Legend	6
5	Demigod	9

A rank 3 role is more than competent and can deal with the vast majority of challenges in the world. Rank 4 and 5 moves into the realm of supernatural competency and mythological import.

Role Checks

Role Ranks

When a character takes an action that requires the application of a specific role to succeed at, the GM will determine the difficulty rank of that task. This difficulty rank is compared to the role rank of the character; if they have an equal or higher role rank, they have the abilities needed to perform the task, and are successful. If they do not, they fail.

If a character has an appropriate role, their role rank is the value of that role. If they have additional roles that would also be appropriate, they take the highest rank, and add a single +1 bonus for having a

supporting role, regardless of how many supporting roles you have, to a max of 5.

It is possible to try to improve your role rank for the task at hand, potentially allowing you to succeed at a task you otherwise wouldn't, or to get an even better outcome than normal. To do so, make a Skill Check (pg. 8); if successful, your role rank is counted as 1 higher.

The role ranks are as follows:

Role Rank Meaning

Rank	Meaning
0	Everyday things that literally anyone can do
1	Anyone may be able to figure it out
2	Requires proficiency
3	Would challenge a professional
4	Completing this task would be spoken of in future ages
5	A task suited to a demigod
6	Pushes the limits of reality

Knowledge

Knowledge works just like roles. The information is assigned a rank based on how obscure it is, and whether or not it's known is determined by the character's role ranks.

Before You Roll

You don't invoke roles to solve problems; instead, you state what your character is doing, and your role may help you achieve it. When necessary, your GM will ask you to make a role check. For example, you want to get through a locked door.

Wrong - Player: "I use my thief role to unlock the door".

Right - Player: "I try to pick the lock." GM: "That will use your Thief role."

Determining Role

Once you have determined that you are checking a role, the GM determines which role would be used. If none of the character's roles are applicable, then

they have a rank of 0. The chosen role is the Relevant Role. If multiple Roles could be applicable, the one with the highest modifier is used.

Skill Checks

Skill checks are used to push your performance beyond the norm; to do things beyond what is easy and comfortable. The GM sets the difficulty of this check based on how strenuous the situation is. There are 3 categories which make a check harder, which are scored on a scale of 0-3.

Time Pressure - How fast does this need to get done.

- 0 - Take as much time as you need
- 1 - Something bad will eventually happen
- 2 - Something bad will happen soon
- 3 - We need this done yesterday.

Adverse Conditions Something about the situation which is directly interfering with performing it.

- 0 - Ideal conditions
- 1 - Minor inconvenience, such as poor lighting
- 2 - Major Interference, such as being in a moving vehicle with turbulence.
- 3 - Full Disruption, such as a ship being tossed around in a storm.

Stress - Things about the situation which make it emotionally stressful, but don't directly hamper the task. Foreseen consequences of failure can add to stress.

- 0 - Peaceful.
- 1 - Minor annoyance, like a mosquito or hot weather
- 2 - Major annoyance, like people screaming at you
- 3 - significant danger, like someone shooting at you

The goal number is 10+ the sum of these modifiers. The gm will state what these factors are, but not their exact modifiers (i.e. you need to pick the lock before the guard gets back, it's hard to see, and if you get caught you are in serious danger). The players may be able to estimate the difficulty based on this, but won't know it exactly.

In turn, the characters may find extra advantages.

Assistance - Assistance from someone with an applicable role adds their role rank to your check.

Preparation - If given enough advanced notice, a character may prepare to perform this specific task, with a +1 modifier for each time step longer than the base task they spent preparing, up to a +3. The player must be able to explain what they are doing that will help.

Resources - If a helpful resource is available, like specialized tools beyond what is normally needed to perform the task, a modifier can be applied based on

how good the tool is, up to +3. Using an improvised tool, like a hairpin instead of a lockpick, gives a -1.

The player then rolls a d20 and adds their circumstantial modifiers to it, and the GM tells them if it passed the goal number or not. If it passes, the role is effectively 1 rank higher for this task.

Opposed Checks

First, compare the Role Ranks of both characters, after any skill checks. If one character has a higher rank, they win. If their ranks are tied, both make an additional skill check, with the same bonuses that would have gone into the check to determine their rank; the winner of this roll wins the opposed check.

Greater Successes

If a task is succeeded with a greater rank than the difficulty rank, you can improve the quality of the success by 1 for each rank you beat it by. Some example improvements are listed below. Others may be granted by the GM, based on context.

- **Speedy** - Decrease the time step by 1.
- **Quality** - Produce a higher quality outcome.
- **Efficiency** - Uses fewer resources.
- **Easy** - Can perform the task for additional time step.
- **Trailblazing** - Decrease the difficulty rank by 1 for others attempting the task.
- **Sneaky** - The difficulty rank of noticing the task being performed increases by 1.
- **Performance** - Make the task seem to be more or less difficult to onlookers by 1 rank.

Making a Role Check, step-by-step

Step 1: GM declares a role check is necessary.

Step 2: GM determines relevant role

Work with the GM to decide which, if any, of your roles are relevant.

Step 3: GM determines base timeframe

Is this something you can do in a few seconds? Will it take a few minutes of work? hours? Will it take weeks or months to complete? Work with the GM to clearly establish the expected timeframe.

Step 4: GM determines Difficulty Rank

The GM determines what rank required is for the task, and informs the player.

Step 5: Skill check The player decides if they wish to perform a skill check to boost their skill rank.

Step 6: Results First, the GM determines if the net skill rank is enough to succeed. If it is not, the character lacks the skills to perform the task. If it is, they determine how many greater successes they get. The player then chooses how to spend those successes.

Time Steps

There is a scale of how long things take, divided into steps. Many effects will allow something to take longer, be quicker, last longer or shorter, etc. This often moves the tasks a number of steps along this chart.

Time Steps: Instant → 1 Second → 10 seconds → 30 seconds → 1 minute → 5 minutes → 10 minutes → 30 minutes → 1 hour → 2 hours → 4 hours → all day → 2 days → 4 days → 1 week → 2 weeks → 1 month → 3 months → 6 months → 1 year → 2 years → 5 years → decade → 2 decades → 4 decades → century

Common Interactions

These are role uses which come up frequently and serve as examples to help you and your GM understand what different levels of a Role can accomplish.

Simple Checks

Simple checks are simple to resolve. They only take a single role check to resolve, but more importantly, they only have two outcomes: Either you're a winner, or you're not. If necessary, multiple simple checks can be chained to create more nuanced outcomes or to build up complex actions, but players should have some sort of choice or interaction between each step in the chain.

Rank	Lifting	Climbing	Escaping	Opening
0	Picking up a large backpack.	A Sturdy Ladder	Quickly removing a tight sweater.	A tightly sealed jar.
1	Carrying a large box, completely full of books.	A free hanging rope	A pair of regular hand-cuffs.	Picking standard issue handcuffs
2	The caber toss	The side of a cliff, with appropriate climbing gear and frequent hand holds.	Some well tied ropes.	A typical lock with an appropriate pick set.
3	Lifting a car with one hand, so you can work on its underside with the other.	A windy cliff, with no gear and a cumbersome backpack.	A padlocked straight jacket, while under-water and upside-down.	A well-made lock with a pair of bobby pins.
4	Lifting a train with one hand, so you can work on the underside.	The side of a glass skyscraper, with no equipment.	A solid metal box buried in several meters of concrete.	A bank vault
5	Holding up the sky.	The underside of a smooth ceiling, with greasy hands.	A magical warding array, in a pocket dimension, inside a second warding array.	A magical seal
6	Throwing something up the gravity well of a black hole.	A light summer shower.	Reality.	The gates of heaven

That's All There Was, There Was Nothing More

Sometimes characters are faced with tasks that are well below their skill level. For the most part, these are easy to handle: The character quickly accomplishes whatever they were trying to do, and does so with style, before moving on with their lives. There may not be anything worthwhile the higher ranks adds to that situation.

Focused Analysis

A focused analysis zooms in on a single element of a scene (a person, place, thing, or complicated meta-physical concept within it) to learn more about it. The goal of focused analysis is to gain a detailed description or to use existing information to synthesize an answer to a narrowly tailored question.

Unlike Simple Checks, focused analysis can produce a spectrum of information, depending on how successful a character is.

Rank	Analyzing Evidence	Cold Reading
0	Following clear footprints, realizing a bloody dagger is the murder weapon	Figuring out the crying person is sad
1	Finding fingerprints	Figuring out the broad reason someone is crying, like having lost someone
2	Blood spatter analysis, matching bullets to their gun	Figure out general details about who they lost, like their name and relationship
3	Detecting poison in the victim's blood	Figure out the personality of the deceased person
4	Tracing dirt to the part of town it came from	Deduce a personal detail that seemingly nobody but the deceased should know
5	Tracking the sequence of events based on residual heat	Deduce a deep secret about the deceased
6	Deducing the killer based on a psychological profile derived from the exact motions used while stabbing the victim	Make reference to specific scenes the deceased shared with their loved ones, in detail

Big Picture Interactions

Big Picture interactions are all about where you're at or what's going on. They're primarily used to determine what your options are and to discover points of interest, but they can also incorporate implied actions or related actions that don't merit any screen time. Whether you're searching for hidden passages, trying to take stock of an uncharted wilderness, or trawling the city's seedy underbelly, the defining characteristic of a Big Picture interaction is that you don't have a specific target to point at. They should also leave players with more options or things to consider.

Rank	Investigation	Survival	Networking	Detect Magic
0	A dead body with the killer standing over it, red handed	A new city, with a full wallet and map.	A party with an attentive host.	Currently active magic with obvious sensory effects; glowing symbols and patterns floating mid-air.
1	A sloppy crime scene where the criminals made no effort to cover their tracks	A temperate forest, with camping gear and supplies.	A new job.	Detecting a high concentration of active magic in the area, without relying on obvious effects.
2	A crime where the criminal took basic precautions	A winter forest, with just the clothes on your back and some basic tools.	The underworld in a familiar city.	Detecting quiescent, but not actively hidden, magic or active magic at a small distance.
3	A clean crime scene by a professional hitman looking to leave no evidence	Naked on a desert island.	The underworld in a new city, where you don't speak the local language.	Tracing large scale, environmental, magic patterns; Detecting actively hidden or weak magical effects; searching for specific magical effects, on the other side of the city, with active focus.
4	A dead body with the killer standing over it, red handed, only that is a scapegoat	A completely unknown alien planet, after crash landing.	A city that is actively hostile to you, or in which you know nothing of local language or customs	Detecting magic long after it was cast and ended. Mentally sorting through a city's worth of magical effects. Keeping track of a single, personal scale, enchantment as its wearer moves about a city.
5	A crime committed by seemingly impossible, previously unknown means	Hell, after insulting the local ruler.	A city in hell, full of devils trying to trick you.	Detecting magic on a global scale. Detecting magic that was cast in the distant past. Detecting the ambient circumstances of a magic's casting.
6	A crime committed with time travel such that the crime never happened	The surface of a black hole, so your friend can throw something out of it. After the end of everything, so you can rebuild.	God himself	Detecting traces in the magic used during the creation of the world

Opposed Checks

In these cases, what matters is how your rank compares to your target. Sometimes the success of your role use isn't just dependent on your skill, but your skill relative to the task. These may be relative to the rank of another character's role, a spell level, or some other factor. Some outcomes may require you to have a relative rank greater than the target, or be easier and allow one lower than the target. An opposed interaction can also be one of the other types of Interactions.

Analyze Magic	Relative Rank	Disguise	Pickpocket
Learn the general use of the magic	-1	Hide your true identity	Item is small, light, and hanging out to be easy to grab
Learn the rank of the spell, its duration, and general means to counteract it	0	Hide that you are disguised	Item is pocket sized and in a pocket
Figure out the exact wording of the effect	+1	Hide that you are disguised despite significant changes to your height /weight	Item is heavy and secured to their person
	+2	Hide that you are disguised despite major morphological changes	Item is worn by the victim

Social Interactions

Social interactions are generally handled by the Social Encounter rules ([pg. 16](#)).

Chapter 4

Roleplaying Rules

General Roleplaying Flow

When out of combat, players are free to declare actions for their characters as they wish. There is no order, no turns, though the GM may focus on certain characters as the situation demands. The GM describes the current situation, the players describe their characters actions, and the GM dictates the results of those actions.

Many actions the characters take are simply automatic. You greet someone on the street, walk down to the bar, open the door to go in, order a drink, and sit down at the table, all without any complications. Others require specific abilities on the part of your character. The most common form for this to take is a role. Many actions that require a role are simply automatic, given that role is at a high enough level, whilst others may just be out of reach and require a skill check to boost your role rank. Other actions will require special abilities on the part of the characters, but if they have them then it just works.

It is recommended that players try to operate in terms of actions rather than roles. You should remain aware of your character's capabilities so you know what types of actions are reasonable, but you should try to pick the lock with a hairpin, which your thief role gives you the skill to pull off, rather than open the door with your thief role. A role or skill is not a verb. You don't use 'thief' to hide from the guard, you duck behind a bush, or blend in with the shadows, or brace yourself against the top of the wall so you are above his head, etc. then your thief role tells you if you succeeded.

GMs, if your players do try to invoke roles directly, try asking them exactly what they are using the role to do.

The Utility of Perks

Perks are a collection of abilities that are a collection of 'utility belt' powers - they work in various situations and help further define you capabilities. They grant specific abilities that you can utilize, and can include supernatural abilities or magical spells.

Practical Utility

Using Combat Abilities Out of Combat

Practical utility is using the abilities you have in practical, expedient ways. If you have a Fire Elementalist TRACK, why can't you start the campfire by careful, controlled applications of flame? If you're a healer, your practical utility of using magical mending means on the hurt NPC and his broken ribs is very easy to justify.

If they are combat abilities, they cannot be used indefinitely, however.

Combat Abilities are a higher degree of intensity than most Roleplaying abilities and cannot be maintained, if a Combat Ability is used out of combat successively it will start the FATIGUE Timer (See Combat Mechanics/Fatigue). If you reach FATIGUE 12 you cannot use any further combat abilities. After you are done using combat abilities you may use Post Encounter Recovery if you are not in an encounter to restore your resources and energy.

Other Subsystems

While the above description covers the majority of what players will do over the course of a campaign, some situations benefit from more specific rules. We offer rules here for social encounters, assassinations, projects, and chase scenes.

Overland Travel

Overland travel is movement that is used to cross distances measured in miles. This is used to determine how long it takes to travel between two places, how often you need to stop and rest, etc.

You can walk for 8 hours a day without penalty, and will cover 5 miles per speed you possess. Abilities that increase your speed for a short time or must be activated for additional movement are typically not relevant for such distances, but any movement bonuses or abilities that work continuously do apply. Inhuman Endurance allows for continual use of running, and hence doubles the distance traveled.

Moving through large areas of difficult terrain, such as a forest with no trails, will also slow you down

to half speed without abilities to negate the penalty.

Vehicles, mounts, or other forms of transportation may offer their own overland travel speeds. A group of people will generally need to travel at the speed of its slowest member, unless they have a way to carry or otherwise speed them up, but those with more speed can use that to scout ahead or explore near the path.

Traveling for more than 8 hours leads to exhaustion, which will inflict penalties until you get a full night's rest. This can be very risky if there is danger of being attacked. Someone with inhuman endurance can travel for 16 hours without exhaustion, and a character with no need for sleep can travel for 24 hours a day. A vehicle may be able to travel continuously with appropriate rotation of drivers

Downtime

When dealing with downtime, we recommend thinking of it in terms of activities, not Minutes and Hours. When you want to give your players some down time, tell them they have a number of activities to spend as they please. 1-3 for a relatively short break or up to 10 for something more substantial; beyond that you're better off discussing long term projects. Your players can then choose to spend those activity slots on major activities, minor activities, or trivial activities.

Major activities take an entire slot and represent actions that can have a significant and lasting impact. This could mean scouting the surrounding area, reinforcing a town's fortifications, or working on crafting something.

Minor activities take one-third of a major activity slot and represent helpful actions that don't take as much time and will have a more limited impact. They can represent things like eating a meal with the troops, to boost morale; crafting generic, disposable, items, like a new brace of throwing knives; or performing maintenance on the party's equipment.

Trivial activities don't take up any slots, but also aren't expected to have a meaningful impact on events. Their main purpose is to serve as an opportunity to add flavor.

Specific Downtime Uses

These uses are in no way meant to be limiting or exhaustive, they simply represent some common uses that are worth calling out.

- Crafting Downtime is the main way to account for crafting progress.
- Earning Money This can cover a wide range of things, from finding odd jobs in town, to doing some freelance work, crafting things for sale, to selling your services. You need access to an appropriate activity, and how much you can earn depends on a relevant role rank. You earn 1|2|3|5|8 \mathcal{M} based on your rank per major activity.
- Learning Languages See Languages (pg. 21) for details
- Preparing preparation bonuses
- Survival tasks. This can include scouting the landscape, foraging or hunting for food, or cooking food. These can alleviate the need for supplies, or even enable being able to rest safely in the first place
- Relaxation and entertainment. Sometimes you just want to play some cards or strum the banjo by the fire. This can bolster your mental state, reducing how stressful (pg. 8) skill checks are for the next day.
- Sentry duty. Prevents being ambushed while resting
- Networking. Forge connections and improve relationships with people you can communicate with.

Crafting

When players want to create something, there are four questions the GM must answer. It is similar to a role use, with some additional considerations.

1. What skills are required?
2. What does it cost?
3. How long does it take?
4. What equipment is needed?

This process may happen once, or be a complex enough creation to break down into a number of components. If it is broken down, each piece may have their own answers different from the end product. Each smaller part would then be crafted individually.

Skills Required

This determines what the applicable role is, and what rank it needs to be. The GM should judge it like any other role use - what level of experience would be needed to make this?

Cost

For most things, the materials needed are easily purchased, and so the players just need to worry about the \mathcal{M} used to purchase them. If there is a particularly hard to get component, the GM can call that out as an additional cost. Conversely, if the player already has something that would work, they can use that to reduce the cost.

A good rule of thumb is for the \mathcal{M} oney cost to be related to the skill rank required. 50 \mathcal{M} for rank 1, 125 \mathcal{M} for rank 2, 250 \mathcal{M} for rank 3, 500 \mathcal{M} for rank 4, 1000 \mathcal{M} for rank 5, and 2000 \mathcal{M} for rank 6. These prices are completely up to the GM, and can be much higher for very large things. Efficient greater successes can half the cost.

Time

This is how much downtime must be spent on creating the item.

A good rule of thumb is for the time to be related to the skill rank required. A rank 1 item will take 2 activities to create. Each rank above 1 will double this, so a rank 2 requires 4, a rank 3 requires 8, a rank 4 requires 16, a rank 5 requires 32, and a rank 6 requires 64. Speedy greater successes can half the time.

Equipment Required

This is not generally a question of specific tools, but rather access to facilities. Do the players need access to a forge? A workshop? Or is it something that can be made while sitting around the campfire? If so, the time required for crafting can only be spent while there is access to these facilities.

Examples

Adapting an alien weapon

The party has acquired an alien weapon, which is cool and they want to use it, but it's designed for the aliens. They want to adapt the weapon to be usable for them.

Skills required- Rank 1 in some kind of weaponsmithing skill. The functional parts of the weapon aren't being tinkered with, so the modifications don't need a ton of skill

Cost- The weapon doesn't have any overt mechanical effects, so the end result would cost 10M as a mundane item. Since the weapon being modified is a component, we can deduct the cost to just be a few M.

Time- As a rank 1 effect, this will take 2 activities.

Equipment Required - Metalworking tools, suitable for being carried in a toolbox.

Making a boat

The party comes across a river, and wants to boat down it. They think about making a raft, or more of a rowboat.

Skill required- Rafts are simple and would just take rank 1 in something woodworking related. A rowboat is more complicated and takes rank 2.

Cost- Both options need only wood, and they are in a forest and able to harvest that wood themselves.

Time- A raft is larger than most rank 1 things, so the time will be upped to 4 activities. The rowboat will similarly be upped to 8 activities.

Equipment Required- The raft can be made with basic axes, the rowboat will require a set of woodworking tools

Making cannons for a castle

The party is trying to shore up the defenses of a castle, and want to build some cannons.

Skill required- Casting a cannon is a complex task, requiring expert level skills, so it's a rank 3 blacksmithing task.

Cost- The skill required is rank 3, but the materials needed are relatively simple, so 100 M per cannon. The cannonballs are a consumable mundane item so will be 1 \mathcal{M} each.

Time- As a rank 3 item it will take 8 activities to create a cannon.

Equipment Required- Access to a full forge.

Building a city wall

The party wants to build a wall around a city.

Skill Required- Rank 1 stonemasonry. Building a simple wall is not complex.

Cost- While a wall is simple, it is very large. So large that we'll give it a 100x multiplier, 5000 \mathcal{M} .

Time- The time shall receive the same multiplier, and require 200 activities.

The best builder ever attempts this. He has a rank 5 role, and succeeds a skill check to bump it up to rank 6, earning 5 greater successes. He uses three of the greater success on doing it faster, to only need 25 activities, and the other two greater successes on decreasing the cost to 1250 \mathcal{M} . He then aids the other party members to succeed at a skill check so they can work on it too, and between the 4 of them they can do it in 6 activities.

Missing Components

If the thing a player wants to craft requires something they lack, it presents a problem to solve. How are they going to get that thing? Answering this question is important, but the player needs to balance doing so with the needs of the rest of their group. See Table Etiquette (pg. 2) for more detail.

Crafting for Profit

These crafting rules are meant to enable larger than life crafting, making things within the timescale of an adventure that would realistically take months or years to make. Taking them literally when crafting things to sell would also yield a greatly exaggerated scope of earnings. Crafting things for profit instead follows the "Earning Money during Downtime" rules.

Social Encounters

Sometimes, a conversation is just a simple conversation, or it's insignificant enough that a single check is all that's needed to succeed. Other times it's an intense debate that carries a lot of narrative stake. This subsystem is intended for that latter case.

It works by giving the GM a model of the NPC's mind and a way to modify it based on what the PCs say. This also helps inform the players about what types of statements will help them.

The NPC has a series of objections, reasons why they don't want to do what the PCs say. The PCs' arguments will create incentives, reasons for them to cooperate, and change the priorities of objections and incentives, in order to swing their decision around.

Objections and Incentives

First, establish what the players are trying to accomplish. Then list out the reasons the NPC would not help them. These are objections. Also list any reasons the NPC has to help the players. These are incentives.

Each objection and incentive are not equally important. They are split into levels based on how important it is to the NPC.

1. **Minor effect.** Short term effects, simple pleasures or discomforts. Minor injuries, like cuts and bruises, which are inconvenient and painful but not terribly important. Small efforts, loss of 'face', possible embarrassment, minor usage of resources, annoyances, time-wasting.
2. **Major effect.** Long term, but probably not permanent effects. Illness, long time commitments. Broken bones, sprains, injuries that

take time to heal and are somewhat incapacitating until they do. Effects that use a lot of the NPCs resources, contradicts their ideals, and will cut off opportunities with other people.

3. **Life changers.** Permanent effects, major life goals, financial ruin, lost jobs, crippling injury.
4. **Life or death.** Own life.
5. **Willing to die for.** Well-being of family members. Strong ideals. Fate of the world. Fates worse than death.

The Debate

The PCs and the NPC engage in a normal conversation. During the conversation, the players may learn about the NPC's objections, offer new incentives, or move objections or incentive up or down a tier. This is not done by declaring your intended effect, but by making a relevant argument. Depending on what is said, the player rolls an insight, persuasion, or charm check, and if successful they succeed with their statement. The PCs may also make progress in the conversation through less direct means, such as ingratiating themselves to the target to increase their relationship, convincing them of facts which will lay groundwork for future statements, or which will indirectly change their evaluation of their objections, gather information, etc.

Each incentive counters an objection of the same tier, and visa versa. If the highest tier has an objection, they still refuse. If the highest tier is an incentive, they concede. If it's a tie, the NPC will concede if they have a positive relationship with the PCs.

PC vs PC Social Encounters Don't do it! These rules are for adjudicating NPC reactions. A player should decide how their character reacts to any given statement, whether it's a NPC or another PC making the argument.

The Skills

There are 3 commonly used skills in social encounters: Persuasion, Insight, and Charm.

Persuasion is used to convince someone else your statement is true. Even if you threaten them, they may consider it a bluff if you cannot persuade them you have the means and willingness to hurt them. Your role rank is modified by the believability of your claim, from +2 for something completely obvious to -2 for something completely unbelievable. On top of that, your relationship with the person is another modifier, from +2 to the most intimate of lovers to -2 for the fiercest of enemies. This is an opposed role check vs a relevant role. A role can be relevant due to generally being useful at detecting deceit, or due to being knowledgeable about the topic.

The Ring of Truth - If what you are trying to convince someone of is true, your opponents insight and savvy can work in your favor. Instead of having to beat the opponents rank, you can use the higher of your rank or their rank vs a rank 1 task.

Insight is used to learn more about the opponent. It can tell you what their objections are, what their goals are in the conversation, or if they are hiding something. The rank is modified by the time known, from -2 for someone you don't even know exists, to +0 for someone you just met, to a +2 for someone you have known for a lifetime. This is opposed by their relevant role for masking that information, and you get 1 piece of information for each success. You may be able to get another piece of information if they say or do something illuminating.

Charm is used to improve your relationship with the other person. The rank is modified by the absolute value of your current relationship modifier, plus the number of times you have charmed them during this exchange.

Lasting Consequences

Some of the actions taken during a social encounter may last beyond the encounter. Threatening to kill someone may be an easy way to create

a tier 4 incentive, but once you are gone they may try to retaliate, such as by calling the cops. Leaving an encounter on a positive note could foster a future ally. If they discover they have been lied to, it may harm their opinion of the PCs. Oftentimes, how a social encounter was won is just as important as whether it was won.

Failure

A social encounter is failed when the NPC is no longer willing to listen to the PCs. This can occur after a certain time limit, a certain number of failed checks, or after the PCs have exhausted their supply of new arguments.

Example

The party wants to get into the nightclub, so they can confront its evil owner who runs a slave trafficking ring. The bouncer at the door doesn't want to let them in.

The bouncer has a tier 3 objection to letting them in: he will lose his job, which is his livelihood.

This encounter could play out in a variety of ways.

- The party pulls out weapons and threatens him. They make their persuasion check because it's very believable that they will use the weapons. This creates a tier 4 incentive, as he wants to stay alive, so he lets them past. However, as soon as they are out of sight, he calls the boss and warns him.
- The party tries to bribe him. They offer him \$20, which he refuses, as that would only be a tier 1 incentive, and doesn't overcome his tier 3 objection. They then up it to \$500, which becomes a tier 2 incentive. They then try to convince him that nobody would find out, and they succeed their persuasion check. He drops his objection to tier 2, but he is still on the fence. The cute rogue flirts with him a bit, and passes a charm check, and so he decides to let them in.
- The party tries to convince him that his boss is evil. They tell him about the boss's evildoings, and present evidence they have gathered about it to make it more believable. They pass their persuasion check, and he believes them. He has a strong moral stance against slave trafficking, so this forms a tier 3 incentive. At the same time, he finds working for a slave trafficker distasteful, so his objection based on being fired drops to 2. He not only lets them in, he escorts them to the boss's private elevator.

Rank Modifier Tables

Table 1. The Relationship Modifier.

The Relationship Modifier is how well the NPC likes the PC in question. This is a fluid, changeable value that takes many factors into account. How long they've worked together, doing favors for the NPC or perhaps even saving their life can all affect this. If they are a member of an organization, your standing with that organization will influence their starting relationship. This includes an organization you are both in together.

Known details about you can also change this, either positively or negatively, depending on their opinion of those details.

Pick a relationship modifier, according to the following scale. Nothing can bring this below -2 or above +2

Total	Name	Example
+2	Intimate	Someone with whom you have an implicit trust. Example : A lover or spouse.
+1	Ally	Someone on the same team, but with whom you have no personal relationship. Example: A cleric of the same religion or a knight serving the same king.
+0	Just Met	No relationship whatsoever. Example: A guard at a castle or a traveler on a road.
-1	Enemy	Someone on an opposed team, with whom you have no personal relationship. Example: A cleric of a philosophically-opposed religion or an orc bandit who is robbing you.
-2	Nemesis	Someone who has sworn to do you, personally, harm. Example: The brother of a man you murdered in cold blood.

Table 2 : Believability Judgement

The believability of the issue being proposed. This is judged according to the person's being persuaded judgements, and may be unrelated to the actual reality of the situation. Someone in rags proclaiming they are the king is hard to believe, even if it is actually the king. How much the person wants to believe the fact is also a strong factor. People are more likely to ignore an inconvenient truth to favor a comforting lie. Having supporting evidence (real or fabricated) can increase the believability as well. Nothing can bring this below -2 or above +2

Modifier	Name	Description
+2	Obvious	The fact is plain to see, and they want to believe it. Convincing someone you are the king after they are escorted through your castle to your throne room, where you sit on the throne in full regalia and attendants.
+1	Reasonable	The topic at hand seems rather plausible. Example: Telling a general that the enemy is going to attack at dawn.
+0	Uncertain	They honestly can't tell if you are being honest or not. It may be true, but they have no particular reason to think it is.
-1	Unreasonable	It seems pretty unlikely that you are telling the truth. Claiming to be a celebrity.
-2	Unbelievable	There is no conceivable way the issue could be true. Telling someone a solid gold castle just appeared outside full of maidens who are calling their name.

Table 3 : Time Known Modifier

Nothing can bring this below -2 or above +2

Modifier	Name	Description
-2	Unmet and unknown	A trained criminal psychologist trying to understand an unknown killer.
-1	Unmet and very little known	They have a reputation that precedes them, or have a record that was looked up. Knowing only that they have a modus operandi, or seeing a consistent pattern in their actions.
+0	Just Met	First time meeting, face to face.
+1	Known for over a year	A close friend or acquaintance you see a lot.
+2	Known for a lifetime (or more!)	Family members. Destiny linked reincarnations across cycles.

Chase Scenes

Chase scenes are a staple of a good adventure. Whether it's a car chase, running down a suspect on foot, a high octane speeder chase through the woods, running away from the giant monster, or chasing down a fleeing foe, chase scenes are important.

The Distance Track

This is used to represent the relative distance of the various members of the race. A typical track will have 10 spaces, though more or less may be used depending on the circumstances. The creature(s) being chased are called chaseds, and the ones doing the chasing are the chasers. If a chased is 10 slots ahead of the nearest chaser, they get enough of a lead to escape. If a chaser ends up 10 slots behind

the chased, he falls out of the chase. If a chased would move off the end of your track, you may instead move everyone backwards.

Starting the Chase

Place the chased with an appropriate lead. This may be one space ahead on the track if they started nearby, such as enemies fleeing a combat, or several spaces if the chase starts while they are far away.

Chase Speed

The chase speed of each character is determined by dividing their combat speed by 6. A character with a higher chase speed often has a distinct advantage if given space to run clearly, but can also suffer greater setbacks if things go wrong.

Vehicles

Each vehicle (or MOUNT) is a character for the purposes of a chase. Its chase speed is determined by the speed of the vehicle, and all characters on the vehicle move with it. A character may choose to leave a vehicle, in which case they are placed on the chase track next to the vehicle and become their own character again. Similarly, if next to a vehicle on a chase track, they can get on it and use it. The time it takes to do so is determined by the GM, see Adjudicating Actions.

Turn Order

Each round, the chased(s) go first, followed by the chasers.

Scenarios

A chase will travel between several scenarios. A scenario is a section of the scenery which has an influence on the chase. A crowded market is a different scenario than some dark back alleys, which is different from a forest, which is different from a dark cave, etc. The scenario determines what types of actions are available, and the consequences of them. A chase through a city may allow someone to climb up to the rooftops and chase from up high, but that action is meaningless in a cave. The more detailed a scenario is, the better. Even within the same type of terrain, scenarios can vary a lot. A forest may have an area of thick undergrowth, a clearing, a cliff, a river, or a swamp as different scenarios, for instance. A chase in a cave may go through mines, over a chasm, past lava pools or hot springs. Scenarios can also switch between terrains entirely, with an appropriate transition. Running out of the city gate may take the chase into the desert. A chase through the forest may lead to a cave, or a cave may lead to an opening back to the surface.

The GM decides what scenarios are involved. The more creative these are, the more interesting the chase will be.

Chased

On the chased's turn, their first choice is where to run to. Most of the time, each round will go through one scene, and lead to a new scene on the next round. The GM will tell the chased which scenarios are available for them to run to. This may only be the one they are currently in, if it's a long scenario that will take multiple rounds, or a choice of several new scenarios. 2 is a good number of options, but more can be presented if desired. For instance, the chased comes upon an intersection. To their left is a crowded market, and to their right is the abandoned warehouse district. They can choose where to go, and hence can steer the chase to advantageous scenarios for themselves.

If there are multiple chases, they can choose their scenario differently. If so, see Splitting the Chase.

Next, they choose an action to interact with the scenario to their advantage. This is largely freeform. They can utilize their abilities, interact with the environment, try to shoot at the chasers, etc. See adjudicating actions for how to handle the results of these actions.

Chaser

After the chased goes, the chasers take their turns, starting with the person closest to the chased on the track. They are presented with the scenario that the chased chose, and have to pick their action. This is also largely freeform, and is handled the same way as the chased actions.

Adjudicating Actions

The members of the race have taken an action. It's up to the GM to determine if this action is possible in the given scenario, and to figure out the result of this action. Many actions fall into common groupings. The players should not be declaring which grouping it is, they should just declare the action. Actions which do not fall into these categories are still possible, but we have no specific suggestions for the outcomes.

By default, each character advances one on the chase track. A character taking no specific action does so.

Sprint: A character may sprint. They move an additional number of spaces equal to their chase speed. This may be used 1 time appropriate role rank. If they fail to deal with an obstacle, this extra movement is removed and their penalty is doubled.

Create Obstacle: A character may create an obstacle, such as knocking over trashcans behind them. Each character behind them must react to this obstacle appropriately, and make a role check if needed. A failure on the check or to react appropriately moves them back by their chase speed. Note that some scenarios have innate obstacles, and everyone, chased included, must deal with them.

Attack: A character may attempt to attack another character. An attack can target a creature 1 space away for every 6 of it's range. To do so, the attacking character must forgo it's space of movement. Make the attack roll. If it hits, the target loses 2 spaces. An

attack with a lesser effect makes them lose 1 space on a miss. Effects that stop the target make them unable to take their movement next turn, and SLOW effects can drop their chase speed.

Alternative Route: if the chased can predict the chased's destination, either through player deduction or character knowledge, they may attempt to find a shortcut. This brings them out of the race for several rounds, but they can reenter several spaces ahead of where they were when they return, at least 1-2 spaces per round. Bear in mind that leaving for a shortcut means they are not present to ensure the chased does not escape. A chased coming out behind on an alternative route doesn't necessarily mean it was slower; they could have come out ahead and the chased changed course to avoid them.

TELEPORTING: Most in combat TELEPORTS are not significantly faster than running, though they may be useful for bypassing obstacles. If they have a longer range TELEPORT, such as an out of combat TELEPORT, they will generally need to anticipate where to go, and is basically taking an alternative route.

Take the High Ground: whether it's climbing to the rooftops, swinging through the tree branches, or just flying, a character may want an alternative route through a scenario. This often takes a space of movement to achieve, and may require a successful role check to accomplish. This gives the character a different perspective on a scenario, and may let them bypass obstacles, but may come with its own set of obstacles. Running along rooftops may avoid the overturned cart, but require role checks to avoid falling. A chased in the high ground may not be catchable by someone still on the ground. A scenario may force them out of the high ground, or they may choose to come down on their own. The high ground can also give a better perspective if the chased tries to hide.

Hiding: The chased may hide if they have enough of a lead. This takes a role check, as per the sneaking rules. If it succeeds, the chasers don't know where they went, and the chase itself tends to end, though they may be able to find the chased and resume the chase. A failure to hide lets the chasers catch up to 2-3 spaces away.

Ending the Chase

in addition to a the chased getting too far ahead, the chased may reach their destination, or they may be caught. The destination occurs after a set number of rounds pass, often ten. Catching a chased occurs when a chaser reaches their space. At this time, the chased may fight, starting a combat. Other chasers start approximately 6 hexes away per space behind they are. A chased may also just surrender. If neither occurs, the chaser has to stop the chased. *note about vehicles*

Splitting the Chase

If the chased go in different directions, each chaser must decide which chased to go after. Split them into their own chase tracks, and run both chases at the same time, doing a round of one then a round of the

other. The chase can remerge if they go back to the same scene, such as when they are trying to get to the same goal

Races

A race is like a chase scene, except it does not end if someone catches up. Instead, the chased/chaser designations switch. The winner is the one who reaches the goal first. Depending on the race, different actions may be allowed. If there is a set course, the chased may not have a chance to choose each upcoming scene. If it's doing laps, a smaller set of scenes may be repeated several times. Shooting at other contestants may be fine in a death race, but in most races it's disallowed.

Assassinations

Sometimes your goal is to kill someone through subterfuge and conniving, rather than outright battle. If you can get your victim in a vulnerable position, killing them can be simple, without invoking combat rules for the attack. This generally means finding the target in a position where they are not ready for combat, are unaware of the danger, and are not innately beyond human durability. Assassinating a dragon probably won't work, since a dragon is never particularly vulnerable by virtue of being a dragon, for instance. This could change if you found an item that your target is vulnerable to.

The actual process of performing an assassination is generally involved for any significant target. Approaching the target is a task in and of itself, whether it involves infiltrating their base and reaching their bedroom in the dead of night, integrating ones self into their inner circle of associates, or stationing oneself at a venue they will appear at. Gathering information and preparing for the approach ahead of time is likely necessary. The target's bodyguards and allies may also be vigilant against such attempts, and able to thwart them if noticed.

After the assassination is made, escape is likely necessary. This may involve sneaking away again, fighting their guards, reaching a pre-arranged extraction point, etc.

How much opposition exists will depend on the significance of the target. Different targets may have different levels of vulnerability. An easy target may walk around by himself at night commonly, a hard target may only be vulnerable when in his bathroom at the center of his fortress of doom after having removed his legendary armor, or can only be killed by the crimson blade of Azure which previously bound them to the underworld in ages past.

Assassinating PCs

Don't. Unless the victim is being written off intentionally, it doesn't work well for the game or story. It doesn't matter if the assassin logically got through a lot of challenge to pull it off, it just makes the players feel cheated. A failed assassination attempt can start an encounter, or act as an ambush, but instantly killing the target is meant to be the culmination of the PCs efforts, not a cheap way to end a PC.

Languages

While this doesn't come up in every game, many settings feature a diversity of cultures, and with it comes a variety of languages being spoken throughout the world. Knowledge of a language consists of ranks, just as roles do.

1. You can understand the basics of what is being said, and make yourself understood in basic terms, but you aren't fluent.
2. You can converse fluently in the language and understand common speech, but idioms and slang will confuse you.
3. You speak the language as well as a native, understanding subtle nuances of the speech. You no longer have an accent, and can think in this language.
4. You are extremely eloquent in the language, capable of creating complex and deep poetry, compelling speeches, and the like.
5. Your mastery of the language is so amazing that scholars centuries from now will study your writing.

Your native language starts at Rank 3. Each relevant role rank can increase a relevant language by 1 rank. The GM may add additional baseline languages to the setting that everyone would know, such as Trade Tongue (Rank 1), or Empire English (Rank 3) at an educated colony.

Learning New Languages

In order to learn a language, you need access to that language. This could be another speaker of the language, books or recordings of it, immersion in the culture, etc. This source must be at least as fluent as the language point you are trying to learn.

It takes 300 hours of practice with a language to increase its rank or gain its first rank. This can be dedicated practice, such as specifically studying it at night, or it could be more naturalistic, from using the language in daily life. Your total Language Ranks summed together accelerate this by 20 hours per rank. If you have a relevant role for learning the language, reduce this time by 30 hours per rank.

If a language is particularly difficult, such as an alien language that's never been translated, this base time may be doubled.

Putting it all together: a Heist

As an example of how everything plays together, let's examine a classic heist. There is a goal, either mandated by an external force or implicitly decided upon by the party. There are likely varying levels of success, such as stealing the gem without anyone being aware, stealing the gem while keeping your identities secret, stealing the gem and escaping with your identities exposed, stealing the gem and escaping only to have someone else steal it, stealing the gem and getting caught afterwards, etc.

There are several stages which tend to occur. These are not explicitly defined, but are just an observation about how players will tend to approach the problem, in the model of a classic heist movie.

The first stage is information gathering. Doing research in a library, scouting out the area from afar, bribing an employee for information, the point is to get as much forewarning about what will be faced as possible. This can involve projects to acquire certain types of information too. The GM can use this time to plan out what types of obstacles are present, and should be mindful of what level of information the players have and make sure what they will encounter is compatible with it. This doesn't mean all of their information has to be correct, but there generally shouldn't be anything that they should have learned about with their research but they didn't. A team that gathers a lot of information will face fewer surprises.

An obstacle in this sense is anything that may impede the party. It could be as simple as a locked door, a room full of guards, a surprise encounter with the baroness, anything that the party will need to deal with.

The second stage is planning. Based on what is known, the players come up with a plan on how to pull off their scheme. This mainly involves the players plotting and scheming. The GM can use these plans to further refine what he needs to plan. He may not have considered what the back alley would have contained, but when the party starts planning to use it, he can be prepared. This doesn't mean he should be countering the party's plans, just be prepared for the direction they will take.

The third stage is preparation. The party acquires any extra equipment the plan would require, practices any key skill checks to get a preparation bonus, and otherwise setting everything up ahead of time.

There may be some projects involved for more elaborate preparations.

The fourth stage is the execution. At this point they will be faced with a series of obstacles, which they will overcome using their skills and abilities, and based on how they handle each one they move on to additional obstacles until they have succeeded or failed. Handling any given obstacle could involve sneaking, social skills, combat, or whatever other approach the party devised. Their solution may change what other obstacles they end up facing, based on the natural consequences of their actions.

Example Session

The party has decided they want the azure gem. They already know it is kept in the museum, so they decide to scout out the area. They get some tickets to the museum, and go on a tour to discover the general layout of the building, and see what kind of security devices they can spot. They also look out for guards and see what they are equipped with. Afterwards, they get a hotel room overlooking the museum, and watch the external security for several nights.

Then they start planning. They decide they will try to use a hang glider off their hotel roof onto the roof of the museum. From there, the party will send one person to another wing of the museum to create a distraction. From their knowledge of the guard patrols, they know the guard which will walk by the gem has a patrol that takes him into that wing, so he can be neutralized or delayed there to create a window of opportunity. While that is happening, they can open the skylight above the gem, and lower their thief down towards the gem. They have identified a laser network above the gem, and so the thief will use their acrobatics to avoid touching them. Once lowered, they will swap the gem with a glass replica, and pull the thief back up. Sealing the skylight behind them, they will retreat to the back of museum and scale the wall in a gap in the guards pattern. If everything goes well, nobody will even realize the gem is missing!

They then extend their hotel reservation through the night of the heist, buy a hang glider, rappelling equipment, a glass cutter, sealant, black catsuits, and create the fake gem. Creating the fake gem ends up being a minor project, but is completed without difficulty. The thief sets up a dummy laser grid and practices moving through it safely. They also pack up some existing supplies, like civilian clothes to change into during the escape.

The night of the heist arises, and they gather on the roof of the hotel. After some surveillance to make sure there are no surprises, they hang glide off the roof. This is a tricky maneuver, so they make skill checks to land them where they need. One of them, Sally, fails the check, and overshoots the roof. They decide to adapt the plan and send Sally to distract the guard. Sally makes her way along the museum

grounds to the other wing, using a successful sneaking check to avoid detection.

Improvising on the spot, Sally changes into her civilian clothes, and stashes her illicit gear in a bush. She then messes up her clothes some, works up some tears and smudges her makeup, making a disguise check to appear like a woman in distress. From there, she waits until the guard she is to distract approaches the area, and runs up to the door and starts trying to open it frantically and then starting pounding on it and screaming for help. This ends up being a convincing check with a high believability modifier, but she convinces the guard she needs help, and he rushes to open the door and let her in. She then provides a blubbery tale of a man trying to attack her, and suggests the guard go and find him. She convinces him of her situation, and the guard's sense of justice creates an incentive to help her, but the objection of his duty to guard the museum is too strong for him to leave to do so. She tries to de-emphasize the objection by telling him that it's okay, nobody will think he did anything wrong, but fails her check. She then asks if he can just stay and protect her, then, which he agrees as it doesn't mean he has to leave. This successfully keeps the guard away from the gem.

Meanwhile, the rest of the party prepares for the rappelling. They discover the skylight doesn't open, so they cut the pane out, cutting as close to the outside as possible, and use suction cups to keep it from falling inwards. They set up the rappelling rig, and lower the thief down. This requires a skill check, but between the thief's high finesse, the high applicability of the thief role, and the preparation bonus, they make it easily. The thief then uses a lockpick to unlock the case, but doesn't quite roll well enough. Nervously, the thief takes extra time to get a bonus, hoping that they don't get caught, and managed to crack it before anyone notices. The thief swaps out the gem for the fake.

Meanwhile, back at Sally, the guard decides to radio in the situation, and ask someone else to swing by on his patrol route. Sally can't think of an argument to stop them, so discretely radios in that they will have company.

Closing the case, they pull the thief back up, and have to rush so they have a narrow time frame on avoiding the lasers again. With a lucky roll, the bonuses they have are just enough to do it in time, and the thief is out of sight by the time the guard's flashlight sweeps across the gem's pedestal. They place the skylight pane back, and use their sealant to cement it in place.

A set of sneak checks sees the party out past the wall without being detected. Sally decides to wait with the guard until morning, at which point she says she feels safe enough to go home. A quick detour picks up the pack she stashed in the bush, and soon after she has rejoined the party where they celebrate their successful heist.

Chapter 5

Combat Mechanics

Overview

Combat is a more rigid mode of gameplay. Instead of freely declaring actions which are adjudicated, you use specific abilities, mainly gained from your tracks and features. Play proceeds in turn order, with the turns roughly alternative between your friends and foes. You will use defensive option to stay alive and offensive options to defeat your opponents until one side flees, surrenders, or is defeated.

Actions

Each round, you have a major action and a minor action you can take, as well as a number of STEPS equal to your speed.

Unless otherwise stated, you're free to take your available actions in whatever order you chose. For example, you can move two STEPS, make your minor action out of provoke range, spend two more STEPS, make your major action as an attack versus a target, then spend your last two STEPS to advance towards your next target, if you wish.

Your major and minor actions aren't substitutes for each other at a different speed. They are levels of power, not an abstraction of time, and are assumed to take the same speed. As such, you cannot substitute one action for the other.

Major

Major actions are your dominant action for the round - they're your biggest effect or most significant thing during a round. Major actions do more damage than minor actions and often have more powerful effects within the same role versus other action types. Your major track will grant you most of your major action options.

Minor

Minor actions are your standard secondary action for the round - they're your extra bang, a heal on the side, or a quick barrier. Minor actions can often do the same things as major actions but at a lesser scale. Your minor track will grant you most of your major action options.

Free

Free actions are instant, non-costed actions that represent a very, very small investment of time or low importance. You can take any number of free actions on your turn

Immediate Actions

Immediate Actions are actions that can happen anytime, not just on your turn. Immediate actions are not their own actions - they are a major, minor, or non-action. If an Immediate action uses a major or minor action, it sacrifices your next action of that type on your next turn unless you're Primed. You can only sacrifice your next turn's action once per type of action. If you use an immediate action during your turn, it cannot consume an action from your following turn.

Primed Actions

Primed Actions are prepared actions 'primed' to spring on an instants notice. Like Immediate actions, Primed actions are not their own - they are a major or minor action. You may only have one Primed action of each type at a time. You may use a primed action to activate an immediate action without consuming the action from your next turn.

Per Attack Effects

While not exclusive to immediate actions, some effects trigger for or against a specific attack. This specific effect has priority over more general effects. For instance, if you gain a BOOST on a specific attack, that BOOST would apply before any normal BOOSTS you happen to have. BARRIER HIT POINTS against a specific attack would be depleted before any normal BARRIER HIT POINTS, etc.

Boosts

BOOSTS represent a variety of things that will make your attacks better. You might be filled with inspiration from your ally's ability, you might be exploiting a weakness in the enemy, you might be taking more time to line up a shot, or many other scenarios. Each ability will specify what effect a BOOST has

on it- some may be more accurate, do more damage, or some other effect. Major actions can use two BOOSTS at a time, whilst minor actions are limited to one. You don't have to use a BOOST on any given action.

PENALTIES are the opposite of a BOOST. They represent things that interfere with or weaken your ability to attack. Major actions can only be subjected to 2 penalties at once, and minor actions can only be subjected to 1 penalty. To apply a PENALTY, just invert the effect of the ability's boost, unless it has an explicit penalty effect. Unlike BOOSTS, if you have a PENALTY you must apply as many as possible to each action you take.

BOOSTS and PENALTIES both stay with you until you use them, but they do negate each other. Someone with a PENALTY who receives a BOOST will instead lose the PENALTY, and visa versa.

You can also accumulate stacks of ON GUARD or OFF GUARD. ON GUARD will give attacks against you a PENALTY, and OFF GUARD will give attacks against you a BOOST. These are consumed when triggered

Counters

COUNTERS, indicated by a [C] on the ability, are things a character can do in response to an attack. They may reduce the damage taken, offer a chance to dodge the attack, damage the attacker, or make the defender stronger, among other things.

COUNTERS apply whenever the attack is capable of doing hit point damage, even if the attack misses. If the defender has more than one COUNTER, they pick which one to use.

Avoid Counter

If you have a BOOST, you may spend it to negate an opponents COUNTER. This does not count against the limit of BOOSTS you can apply to a given action.

Edge

Certain situations can give you an EDGE. If you have an EDGE while attacking, you get a free BOOST on that attack. If you have an EDGE against an attack, you are ON GUARD against the attack. You can only have one EDGE against a given target each round, regardless of how many things are granting you an EDGE. Various abilities can grant an EDGE in specific scenarios, but the basic ways to get an Edge are by taking advantage of Close Support or attacking flanked enemies and sitting ducks.

Flanking & Flanked

When two or more combatants are not OFF BALANCE and have the same opponent directly between them and in their melee range; that opponent is considered flanked. If you are flanking an enemy, you gain an EDGE against that enemy. If you are flanked, you are OFF BALANCE. If you start your turn flanked, you remain OFF BALANCE until you are no

longer flanked. If a character moves such that its ambiguous whether they are flanking or being flanked, such as moving so that the arrangement is ABAB, the flanking arrangement favors the active character.

Cover

Partially blocked LINE OF EFFECT provides an EDGE against attacks to those behind it.

Sitting Ducks

A character becomes a SITTING DUCK if attacked at range without cover when they end their turn less than 3 hexes from where they began. Attacking a SITTING DUCK grants you an EDGE.

Close Support

If a character targets an adjacent ally other than themselves with a beneficial ability, they gain an EDGE on that action.

Momentum Attack

A MOMENTUM ATTACK uses your momentum to deliver a devastating blow, but doing so opens you to a counterattack. A MOMENTUM ATTACK has an EDGE, but gives an EDGE to the next attack against you in the following round. A charge is the most common MOMENTUM ATTACK.

Charge Attack

Melee weapons can use their momentum as part of their attack. Once per turn, as part of making a melee attack, you may move six STEPS above your usual movement before making an attack. If you do so, you cannot move after completing your charge, and you must consider every target you could move to and attack with the charge movement when resolving target priority. Attacks which grant movement before the attack can use that movement to extend the range of a charge. This makes the attack a MOMENTUM ATTACK.

Hit Points, Wounded, and Death

HIT POINTS (HP) represent a combination of your ability to mitigate attacks, endurance, and will to keep fighting, as well as raw ability to absorb damage and keep going.

If you are reduced to 0 HIT POINTS, you are WOUNDED.

A WOUNDED character is too hurt to fight. WOUNDED characters can still be conscious, but are unable to take actions or maintain abilities. Their Target Priority is set to Lowered, and their Target Priority cannot be raised above that while WOUNDED. A WOUNDED character cannot be healed unless the ability specifies otherwise. You can continue to take damage after 0 HIT POINTS to put you into negative HIT POINTS - if you reach your negative maximum HIT POINTS, you are dead.

Mooks and SUMMONS do not have a WOUNDED status; if they would become WOUNDED they are instead dead.

By default, remaining HIT POINTS are known to all participants in the fight- if playing on a virtual board, enemy health bars would be visible, if playing in person, the players or GM can ask at any time 'What is that target's remaining HIT POINTS?'

For the GM: Transparent HP and fudging

Transparent HIT POINTS reduces the fudge ability on your part - but if the fight is a foregone conclusion, read the End of an Encounter section and consider declaring victory early!

Dropped

When you are reduced to 0 HIT POINTS and are unable to fight, you are dropped. This term covers characters being killed, WOUNDED, or desummoned.

Lethal vs Nonlethal

There is not a difference between lethal and non-lethal damage. Against regular foes, there is no accidental death; as it takes some significant effort to move a foe beyond WOUNDED to Dead. Mooks and SUMMONS are foes more frail, and you can choose whether to kill or wound them when defeating them, depending on if you take BLOODLUST from their defeat.

Bloodlust

If you make an attack against a single target, and that attack reduces them to dead, you gain an amount of BLOODLUST equal to the you dealt above what was required to kill them. BLOODLUST functions like ENERGIZED. If you choose to gain BLOODLUST from defeating them, SUMMONS and mooks are killed at 0 HIT POINTS. If you choose to not gain BLOODLUST, they are WOUNDED at 0 HP. Twice per round, if you have at least $2 \times C$ BLOODLUST, you can lower BLOODLUST by $2 \times C$ to make a SURGE.

Last Stand

Once per encounter, a single PC in the party can resist incapacitation. If that PC would be reduced to below 1 HIT POINTS in an encounter, they are instead at 1 HIT POINTS and cannot be damaged further and have lowered target priority until their next turn. Furthermore, their target priority cannot be increased in any form until their next turn, nor can they use any abilities that force themselves to be targeted or take damage. They also cannot block LINE OF EFFECT nor provide LINE OF SIGHT or LINE OF EFFECT to other creatures.

Allies and Enemies

Allies are people on your side of the combat, enemies are people you are fighting against. You are your own ally. Abilities that target allies only work on a willing target, whilst abilities that target enemies allow you to choose which creatures are or are not affecting. Abilities that target all creature will effect creatures regardless of whether they are an ally or enemy.

Target Priorities (TP)

Every foe on a battlefield has a Target Priority. Abilities can be used to raise or lower your Target Priority.

Target Priorities go from Lowered < Basic < Elevated. By default, it is basic. If you are already elevated and your target priority increases, you are still just elevated. If you are already lowered and your target priority lowers, you are still just lowered.

If you have multiple available targets you can select from that are not behind concealment, and they have differing target priorities, you may be restricted from selecting anything but the highest available, or may have to accept a drawback for attacking an enemy with a lower target priority than the highest available to you depending on the abilities used. Abilities that target multiple opponents, such as area of effect abilities; use the highest target priority of those targeted by that ability.

If targeting an enemy would provoke a REACTION, you can ignore its Target Priority as long as the action you do take does not provoke a REACTION.

Using Abilities

Attack and Defense Rolls

Attack Rolls are $1d20$, and succeed on a 9+. These are used for attacks that are dependent on the attacker, such as weapon attacks. An ability that says 'on a hit' or that specifies using a STRIKE requires an attack roll. They always hit inanimate objects.

Defense Rolls are $1d20$, and succeed on a 13+. These are used for attacks that are dependent on the defender to react, such as avoiding the center of a fireball. Inanimate objects always fail a defense roll.

Abilities that do not have an attack roll or an attack value automatically hit.

If an ability would deal a fractional amount, such as after a half on miss effect, round in favor of the players.

Attacks

An attack is any action that targets an enemy. If a character has multiple actions that can attack the same enemy, treat each major, minor, and SURGE action as it's own separate attack action.

Strikes

STRIKE are attacks that require an attack roll, such as weapon attacks or eye lasers. They are listed as "Take # STRIKES". If a single action grants multiple identical STRIKES, treat them as Pool Attack.

Pool Attacks are attacks are made in a pool of attacks - order doesn't matter. Roll all attacks at once, and the number of hits are multiplied by per-hit damage.

Statuses, RIDERS, and other conditions that are contingent 'on a successful attack' made during an attack take effect after the attack pool is resolved. If a Pool Attack is [O]verwhelming, the entire pool must be aimed at a single target to keep it's [O]verwhelming tag. While it is permissible to split your attacks against multiple targets, keep in mind that this will have a disadvantage in that you will hit multiple COUNTERS. Use judiciously.

SURGES

SURGES are bonus abilities that can be used in certain circumstances. They can be used as a REACTION, such as exploiting a provoked opportunity, and some Tracks will grant uses of the SURGE.

Resolving an Attack

This is the sequence of events when someone attacks someone else, whether it involves an attack roll or not. If all elements, such as dodge chance, are not present, this can be streamlined.

First, the attacker declares their target. Any immediate actions against this attack are used, unless that action specifies otherwise. The target may then choose to activate any DODGE CHANCE they have that is not from a COUNTER. If the DODGE CHANCE succeeds, the attack does nothing, the attacker keeps their BOOSTS and PENALTIES, and the defender does not activate any COUNTERS.

Then the attack and COUNTER happen, even if one of the characters is dropped in the exchange.

If the COUNTER is a DODGE CHANCE, it is rolled. If it succeeds, the attacker keeps their BOOSTS and PENALTIES, and the attack is negated.

If all of the DODGE CHANCES have failed, the attack goes through and the counter is applied, and any BOOSTS or PENALTIES used by the attack are consumed.

Summary:

1. Declare attack
2. Dodge chance
3. Immediate actions
4. Pick counter
5. Dodge chance counter
6. Attack
7. Other counters

When neither immediate actions or DODGE CHANCES are being used, this can be simplified to

1. Declare and roll attack
2. Apply counter.

Seek Opening

You prepare yourself to wait for a safe moment to make a clear strike. You may delay your turn when you do not have an enemy in range that you can attack without provoking with any of your available weapons, that is not behind concealment. If you delay your turn, you may only delay your turn until you can make an attack an enemy outside of concealment without provoking. If this would require you to swap weapons, you may spend the necessary STEPS from your next turn. If you delay after that, lose the delayed turn. If you delay until your next turn, lose the delayed turn and take your next turn as normal. You cannot use a [H]eavy ability on a delayed turn. If the ability would move you or an ally from their current hex, that ability cannot be used without suspending that part of that ability. If you are wielding a melee weapon when taking your readied action, you can make an attack with someone attacking you with a melee weapon even if their melee range exceeds yours.

Readied Actions and untargetable enemies

Readied actions can be used to counteract a wide variety of enemy tactics. If they are doing anything to keep themselves from being targeted easily, whether it is stealth, a smoke-screen, or just running behind a handy wall, readying an action to attack them when they are exposed can be a huge benefit.

Universal Actions

Even when you don't have access to your awe-inspiring powers, or perhaps you just wanna go easy on someone, everyone can throw some basic haymakers. The Basic Attack is a default attack that anyone can do, even if it's just with their fists, but its better with a weapon. This is a basic ability that does not grant weapons at character creation.

The Basic Attack is a major action to make two STRIKES that deal 8|10|13|15 damage. **BOOST:** +4 to hit.

It is a [W]eapon ability.

Additionally, any character may spend a minor action to become ON GUARD 1, and can become onguard as a [C]ounter.

If all of your innate tracks are FULLY DEPLETED, you may spend a minor action to gain a REFRESH.

Movements

STEPS are used for general mobility and sub-actions that are too small to be a regular action, but take enough that they're not a free action. They can be used individually - one STEP at a time, or all at once. Each STEP spent sequentially without another

action interrupting it is a set of movement. By default, characters have a speed of 6, so they gain 6 STEPS each round.

STEPS can be used to move 1 hex per one STEP into normal terrain, and 1 hex per 2 STEPS for difficult terrain. You can move through a hex that is occupied by an ally, but not stop on it. You cannot enter a hex that is occupied by an enemy.

If you need further movement, everyone has access to the Run action:

Run - As a Major Action, all your movement this round is a DASH and all STEPS spent to move are worth double.

Other things that use STEPS are:

Jump (see (pg. 35)) (varied)

Change wielded weapon (1)

Draw a weapon without one wielded (1)

Defensively swap wielded weapon from a melee weapon (3)

Remove certain conditions (varied)

Battlespells

Battlespells are specific abilities that require extra time to use in battle, and will be interrupted if you take damage. You can only use one battlespell per round. To cast a battlespell, you must be stopped for one turn. If you did not take damage before your next turn, you get the listed effect. A creature can use an applicable Role to learn what battlespell is being cast. Certain abilities, such as battlespell feats, require a successful battlespell cast but without such abilities they do nothing. You declare what use the battlespell will have before casting it, though it is not known to other creatures without the applicable Role.

Combat Encounters

A Combat Encounter (commonly referred to as just an Encounter) is the big fight, the inevitable altercation, the bit of time where seconds count in the scale of mortal peril, and every split-second decision feels like an eternity, but when it's over, it's only been a minute or two. It's also known as Combat Time where turns and order have extreme importance.

Initiative

When it comes to who goes first in a fight, it goes to those who boldly seize the initiative. Whoever acts first, by initiating a fight with a Combat Action ("Enough of your words, I'm going to stab you now!"), goes first. Combat actions include the usual direct attacks, but also include combat-grade buffs, such as charging a shield, or taking a potion to increase your combat effectiveness.

Teams will have a designated First Turn Character - if a combat encounter is initiated and the PCs don't have time to prepare, that PC will get the first turn on their team.

In case of a lack of a decisive first action, ("Both of the teams juggernauts charge at each other at the same time!"), a coinflip determines who goes first.

Turn orders are alternating between teams, PC → Enemy → PC → Enemy → etc, until there is only one team left.

If the teams are of uneven size, the leftover turns for the larger team are folded into current turns for the larger team, adding to the lastmost turn with the smallest numbers of creatures acting.

5v3 example: BaBBaBBa.

4v14 example: aBBBaBBBaBBBBaBBBB.

4v4 example: aBaBaBaB.

At the end of their turn, the character who's turn just ended declares which of their allies goes next, on their teams next turn. This declaration is how you indicate your turn is over. They cannot select someone who has already acted this round, unless they are the last person on their team, in which case they pick who goes first next round. Once all participants have gone once, that ends the round and starts a new one.

If a character is downed during a round, the overall order of the teams remains in place until the next round, when its adjusted for the new combat composition. If the downed person has yet to act, their team must still select them to act, though all they will do is select the following person. If a character has an ability that can cause them to self-resurrect, such as the Healing Factor capstone, they don't count as dead for initiative purposes as long as that ability is capable of making them not be wounded. A character which stops being wounded while not accounted for in the turn order will add an additional turn for their team at the end of the initiate order, but they themselves are available to be chosen for a turn immediately.

Ambushed!

If there is a Surprise Round, determine who can act in the surprise round. Ambushers and characters who can act in the surprise round do regular initiative declaration, and characters who cannot are placed at the end of the initiative order, who do their own regular initiative declaration.

After the Surprise Round is over, proceed to determine regular initiative, and then proceed as a regular encounter.

If you use a non-combat TELEPORT, such as from a trinket or Perk, any NPCs or PCs already on site can choose to start the encounter while the other party is TELEPORTING in, and Ambush them.

Fatigue

FATIGUE can be invoked during a fight to bring it closer to an end when a winner is not yet clear. Typically, Round 5 is a good time to invoke it for normal fights, however each encounter is different and it may be invoked earlier or later as dramatically appropriate or necessary. A long running boss battle will want this to be invoked much later, or perhaps never, for example. If no side is making meaningful progress on damaging the other, FATIGUE should be invoked.

Once invoked, FATIGUE will start appearing on all combatants at the start of their turn. This will start

at FATIGUE 1, and increase by that 1 per turn, up to a maximum of FATIGUE 12.

FATIGUE X: The first time each round a creature with FATIGUE takes damage, it takes additional damage equal to $X \times 2 \times C$. This does not remove the fatigue.

FATIGUE makes combatants affected by it take extra bonus damage when hit, and cannot be removed except by the end of an encounter recovery.

FATIGUE represents the initial surge of adrenaline and instant reaction times, and those reaction and energy levels being unsustainable over time. All combat abilities and activated abilities from TRACKS are assumed to have some hard edge of focus or drain that prevents them from being used continuously without FATIGUE.

If you have reached FATIGUE 12, you are too drained to further use combat abilities or activated abilities from Tracks.

Implied Ability Durations

Tracks are made with encounter-length abilities in mind. They may grant a bonus that has no explicit duration, or let you do something with no restriction on its frequency outside of its action cost. This does not mean they last indefinitely or that it can be used nonstop without breaking a sweat. It only means that they last long enough that you don't need to worry about it within an encounter, but not much longer than that. Unless otherwise stated, abilities from tracks cannot be used repetitively outside of combat. There may be use limits, it's too exhausting or costly to perform without a good reason, or whatever reason the player or GM feels is appropriate. (Using combat abilities outside of combat too much is a good reason to start accruing FATIGUE !) Anything that says you begin an encounter with it implies that it can be replenished between encounters, such as when taking a quick rest. This does not mean that there is some in world meaning to being in an encounter vs. outside of it, it is a convenience for running the game.

The End of an Encounter

End of encounter recovery is something that every PC does at the conclusion of a fight. Whether they have a medical kit that takes time to apply, they take some time to channel passive magic into a healing spell, a refreshing martial arts technique, or mixing together a healing brew for the party, they have a way of getting back up and brushing themselves off, ready for the next challenge!

This need not be an item they have on them or an ability - this is something any PC can do because they're PCs, how they express it is up to the PC.

This takes one minute of uninterrupted rest for every point of FATIGUE you have, plus an additional minute. If you are interrupted early, each full minute of rest prior to the interruption reduces FATIGUE by 1, but does not restore any HIT POINTS or abilities. Any interruption should be considered a continuation of the previous encounter.

The PC party will remove all Conditions except Death, or conditions that explicitly last beyond an

encounter, and heal back to full HIT POINTS. All their per-encounter abilities will recharge. Any expendable resources granted by a track refills to full.

Generally, this applies to NPCs as well. Whatever sort of medical aid the PCs possess will heal most HP-based maladies, thought maladies that are not HIT POINTS based still need someone with the correct Role, such as Doctor or Healer.

Surrendering and Lane Duck Considerations

If a fight is deemed unwinnable by one side or the other, surrendering or otherwise cutting short to the foregone conclusion is okay! The Stuff of Legends fights are supposed to be interesting and matter, if it gets to a point where you're just going through the motions, consider a victory or defeat declaration as an alternative to dragging it out.

GLORIOUS VICTORY!

You won! Awesome!

The bloody struggle is over, and you are the ones still standing. You have an opportunity to decide what to do with the opponents. Are you going to capture them? Kill them? Leave them lying there? Steal their money? Pin a warning to their shirt? Deliver them to their boss's doorstep? Or something else entirely? Whatever you choose, they won't forget how badly you just trounced them.

HUMILIATING DEFEAT!

Defeat doesn't have to mean death. The PCs can be taken prisoner, traded for other prisoners, or may be bound to a service or act. PCs are powerful tokens - killing them can set back a PC's efforts, but they oftentimes have options that mean death or severe wounding is less a setback to them as to other people in the world, and savvy antagonists will recognize that. Trading a captured PC or party back to their sponsor in exchange for a prisoner trade or a significant boon can be more valuable to the antagonist than forcing a fatality. Likewise, a PC bound to perform a service or act for the victor is a powerful servant that often outperforms the 'usual help' an antagonist can get. This is hardly a complete list - a savvy GM or player will use these to great effect or create new defeat guidelines, as well. And, of course, defeat can still mean death.

Reactions

A REACTION is an ability to attack an opponent to capitalize on an opening. When you take a REACTION, you can use a SURGE against the creature who provoked the REACTION.

Taking REACTIONS

In order to take a REACTION, you must be wielding a weapon with the Reactive property. You must have used the weapon to attack in the last round. You can take one REACTION per round.

While you're flanked or OFF BALANCE, you can't take REACTIONS.

Provoking REACTIONS

When you provoke, you only provoke one REACTION. If multiple opponents can deliver the REACTION, that team chooses which one attempts it.

List of things that Provoke REACTIONS

- Non-DASH movement. Each hex of movement counts as a new, separate provoke, but the same enemy cannot take a REACTION against you for non-DASH movement more than once a round.
- Using a [R]eckless ability.
- Using a [Rm]eckless Melee ability on someone who's not in melee with you.
- Using a ranged weapon.
- Changing your currently wielded weapon unless you defensively swap with a melee weapon.
- Standing from PRONE, unless you spend an extra STEP.

Dash

DASH is movement that works like spending normal STEPS, but does not provoke REACTIONS.

Weapons

Get Equipped: Melee and Ranged weapons

Any PC with a [W]eapon ability other than the Basic Attack starts with three weapons they can change between, 1 melee weapon, 1 ranged weapon, and 1 weapon of either type. Feats and abilities may modify that. This isn't a limit on how many you can potentially own or carry, merely the number that are in a readily-drawable state. Weapons do not have separate damage ratings - they instead define the ranges, defensive trends, and opportunistic capitalization that goes with attacks delivered with that weapon.

Damageless Weapons

Weapons in this system don't define your damage - how often does Superman check his unarmed damage to see how strong his punch is, and how often does a wizard check to see if their fireball gets an item bonus? A paladin's smiting effectiveness is determined by the smite, not the weapon, as well.

Weapon Types

There are two basic types of weapons. Melee weapons can only attack things in your melee range, and can provide flanking bonuses. Ranged weapons can attack up to 12 away, but will provoke a reaction when used.

Additionally, weapons have a number of properties which enhance them. There are 4 categories of weapons:

- **Unarmed:** When you have no weapon, you can use your bare hands as a melee weapon. This counts as having the [Grabbing] property, but all attacks with them will provoke unless you have an ability to make your unarmed attacks function as real weapons.
- **Improvised Weapons:** Improvised weapons aren't designed to be a weapon, and so are worse at it than a normal weapon. You can find an improvised weapon by spending 1 STEP. Improvised weapons have a single weapon property, based on what the item is.
- **Standard Weapons:** Standard Weapons are where most weapons fall. They are designed to be a weapon, and get 2 weapon properties.
- **Exotic Weapons:** Exotic weapons are highly specialized, and require special skills to use fully. Exotic weapons have 3 properties, but if the wielder doesn't have the proper skill they can only use the first 2.

Weapon properties

Properties with the [Ranged] or [Melee] tags can only be applied to the corresponding type of weapon

- **Agile**[Melee]: Can use Charge without it becoming a MOMENTUM ATTACK.
- **Bayoneted:** Grants an EDGE against MOMENTUM ATTACK.
- **Dancing:** Attacking with this weapon grants a STEP to use immediately before or after attacking.
- **Deft:** If you start your turn outside of someone's melee range, you don't provoke any reactions from moving from that person.
- **Distant**[Ranged]: Doubles the range of the weapon
- **Fast:** When used to make an attack, you may take a PENALTY on your attack to take a SURGE with a PENALTY. This cannot be used if the attack would already have a PENALTY.
- **Grabbing**[Melee]: After attacking with this weapon, you can choose to grapple the target, giving them a defense roll or be GRAPPLED.
- **Guarded**[Ranged]: Does not provoke Reactions when attacking a target you are In Melee with.
- **Heavy:** Attacking with this weapon grants a BOOST, but makes you OFF GUARD.

- **Thrown**[Melee]: Can make ranged attacks up to range 6. Can take Ranged weapon properties, which will only effect the weapon while making ranged attacks. Using it at range means it counts as a ranged weapon that round, so no melee properties will apply.
- **Piercing**[Ranged]: Can attack a SITTING DUCK even when they have cover. This does not negate the EDGE they get for being behind cover.
- **Paired**: Can be wielded alongside another Paired weapon. Attacks can be made with either weapon. You can equip 2 paired weapons for the price of one. Select an additional property; if wielded alongside another paired weapon with the same properties and additional property, both weapons gain that additional property.
- **Quick Draw**: Has no cost to draw, and drawing it does not provoke a Reaction.
- **Reach**[Melee]: Increases the melee range by 1, but cannot take reactions in adjacent hexes.
- **Reactive**[Melee]: Can take Reactions.
- **Shield**: Once per round, you may make a defense roll to prevent a Lesser Condition.
- **Threatening**[Ranged]: Allows allies to flank with you. Melee weapons don't need this property.

Changing and Drawing Wielded Weapons

You can swap between your available weapons, to cease wielding one and begin wielding a different one, for 1 STEP. This provokes a REACTION. If you are wielding a Melee weapon, you can Defensively Swap for 3 STEPS, instead. This does not provoke a REACTION. If you draw a weapon without having one wielded, (such as the start of an unexpected fight or being forcibly disarmed), you do not provoke a REACTION. This costs 1 STEP. If you are granted a SURGE or action that uses a weapon when it is not your turn, you may switch weapons as part of that action. This does not provoke a REACTION.

Natural Weapons

Some abilities grant a natural weapon. You can swap to a natural weapon without spending a STEP, and doing so never provokes a reaction. Switching to a non natural weapon from a natural weapon still takes a STEP, or 3 to do so without provoking.

In Melee

You are considered being in melee with an enemy if that enemy is within your melee range or you are within that enemy's melee range, and either one of you have a melee weapon equipped.

Provoke Table By Weapon Type

	Range	Provokes?
Unarmed	1	Y
Improvised Melee	1	N
Improvised Ranged	1-12	Y
Melee	1	N
Ranged	1-12	Y

Learning About Enemies

When you face an opponent, you may be able to learn more about them. If you have an applicable role to knowing about a creature, you may ask one Question about it per rank. No role can be useful for every possible enemy, as the role needs to indicate a specific familiarity with that type of creature. Possible questions include:

- What are its Major actions?
- What are its Minor actions?
- What are its counters?
- What are its monster tactical abilities?
- What are its immunities?
- Other questions of similar specificity.

Conditions

Condition Descriptors

[SENSELESS]: Descriptive tag for sense-targeted effects.

[FEAR]: Descriptive tag for fear-based effects.

[SICKENING]: Descriptive tag for queasy based effects.

[MENTAL]: Descriptive tag for mind-based effects.

[GROUND]: Descriptive tag for ground-based effects. Flying creatures are immune.

Standalone Conditions

TETHERED X [Lesser]: Limits creature to remain within X hexes of what its tethered to. (pg. 342)

GRAPPLED [Lesser]: Cannot move away from grappler and can only attack them. (pg. 342)

ENERGIZED X: Increase healing or damage by X. (pg. 342)

BLOODLUST X: Energized gained from killing weak creatures (pg. 342)

OFF BALANCE [Lesser]: Cannot take REACTIONS or use immediate actions. (pg. 342)

PRONE [Lesser]: Laying on the ground until you stand (pg. 342)

FATIGUE X: Take additional damage when attacked (pg. 342)

PERSISTENT <status>: Gain the status at the start of each turn (pg. 342)

SHIELDED: Disable attacker. (pg. 342)

WOUNDED: Cannot heal or act. (pg. 342)

Lesser Restorable Conditions

Lesser negative conditions that can be removed
DISABLED X [Lesser Restorable]: Prevent using tactical effects. (pg. 342)

SLOWED X [Lesser Restorable]: Can move X fewer hexes. (pg. ??)

STOPPED [Lesser Restorable]: Cannot move. (pg. 342)

STUNNED [Lesser Restorable]: Stopped unless they spend a minor. (pg. 342)

DIZZY X [Lesser Restorable]: Move randomly at the end of your turn. (pg. 342)

BLIND X [Lesser Restorable [SENSELESS]]: Can't see distant hexes. (pg. 342)

BLEEDING X [Lesser Restorable]: Take damage if moving too far. (pg. 342)

ENERGY EFFECTS: Conditions that reflect specific energy types.

➤ **IGNITED X** [Lesser Restorable]: Become BURNING unless fall prone and roll. (pg. 343)

➤ **FROZEN** [Lesser Restorable]: spend STEPS or become SOLIDIFIED. (pg. 343)

➤ **SHOCKED** [Lesser Restorable]: Be DISABLED or CONVULSING (pg. 343)

Greater Restorable Conditions

Greater negative conditions that can be removed

BURNING X [Greater Restorable]: Take X damage at the end of each turn. (pg. 343)

CONVULSING [Greater Restorable]: Have a 30% failure chance for all actions (pg. 343)

CORRUPTED X [Greater Restorable]: Prevent being healed. (pg. 343).

ONGOING X [Greater Restorable]: Take C damage at start of turn, then half ongoing. (pg. 343)

SOLIDIFIED [Greater Restorable]: Prevent minor action. (pg. 343)

VULNERABILITY X [Greater Restorable]: Take extra damage. (pg. 343)

WEAKEN X [Greater Restorable]: Prevent the next X damage or healing. (pg. 343)

Adaptations and Alternative Rules

Changing Dice Sizes

Sometimes you don't have a lot of dice of a given size. If rolling the number of dice requested is too hard, you can roll a smaller die with a bonus. Add

1/2 of the difference between the die sizes to your roll for each die. For instance, you can replace a d8 with a d6+1, a d10 with a d6+2, 3d8 with 3dd6+3, etc. A d4 can be rolled as a d6-1.

Changing Who Rolls

The default rules have the attackers rolling attack rolls and defenders rolling defense rolls. This is meant to signify who is the active party with that type of attack. These can be adjusted for table preference. Instead of a defense roll, an attacker may roll an attack roll with the defense roll's modifier subtracted from it. Instead of an attack roll, the defender may roll a defense roll with the attack roll's modifier subtracted from it.

Some specific variants:

1. **Players Always Rolls:** Players are always the ones to roll, both when attacking and being attacked. This can be more engaging.
2. **GM Always Rolls:** This can give the players more abstraction from the mechanics (and allow the GM to fudge easier).
3. **Attacker Always Rolls:** Keeps the rolls being done by the creature who is acting

The Map

Hex Grids

Terrain is a crucial component of any battle. It affects the tactics of all involved. The Stuff of Legends uses a hex grid to lay out the battlefield. This simplifies many things compared to a square grid. There is no diagonal movement on a hex grid; everything is face to face, so the complexities of calculating distances with diagonals is gone. Areas of effect are also much easier to visualize, with a basic circle becoming a hex where you count your desired distance from the center point. The biggest disadvantage is representing square shapes on the grid. The easiest way to do so is to align it such that one edge of the rectangle goes along the flat edges of the hexes. This will split every other hex in half, and you can count it as being blocked unless adjacent to another half hex. The sides of this rectangle should then be aligned such that they fall between the zigzag of the hex edges. This makes it clear where each hex lies without blocking any.

Areas of Effect

Areas of effect, aka AoEs, are abilities which affect all targets within a given set of hexes. These come in a few common forms.

The first is the burst, which effects all hexes within a certain radius of the targeted hex. Here is an example of a radius 1 burst

and a radius 2 burst

Cones effect a subsection of a circle, and generally originate from the user. You select a direction to fire it in, and it hits the first hex in that direction. Then you extend it out from the 3 hex edges that are on the opposite side, going out the radius of the cone. Here is an example of a radius 4 cone

A line extends between two hexes, where the destination hex is within the line's length of the origin hex. This origin hex may be the user's hex if not otherwise specified, in which case it does not include the hex itself. Draw a line (or use a string or other straight-

edge) between the center of the origin hex and the destination hex. Each hex the line passes through is affected. This does not include hexes that are only hit on the corner or edge. If the line passes directly through the edge of two hexes, you can choose a side of the line and effect the hexes on that side.

Some abilities effect the hex edges in a line. Determine which hexes would be effected by a line, as above, but then select hex edges along one side of this to be effected, up to the number listed

If you need to deal with the 3d effects of an AoE, consider factor the height into the distance from the origin the hex in question is. There must also exist LINE OF EFFECT from the origin of the AoE to any effected hex for that hex to be effected by it. A creature that has cover from the origin on the AoE has cover from the AoE.

Larger Characters

Some characters or monsters will be Large or Huge. These take up more space on the battlemat and have a longer reach. A large character takes up space like this, with the purple indicating their reach. They can slide 1 hex as their normal movement, or choose a hex they are in and rotate their footprint around it to achieve a new orientation as a step.

A huge character takes up the same footprint as the 1 hex radius burst.

Square Grids

If you are using a square grid map, ranges stay the same. Diagonal movement is possible and is equivalent to moving one hex.

Theater of the Mind / Mapless

If no gridded map is available or simply not desired, we suggest using Range Zones. The Stuff of Legends has the concept and utilization of ranges tied heavily into it's system design, it is not recommended to totally ignore them. Ranged Zones come in three categories : Melee, Near, and Far. Any two combatants are in one of those categories to each other.

Melee range should be used for range 1, Near should be used for ranges 1-12, and Far should be used for ranges 12+. In some sparing circumstances multiple instances of Far should be used, such as Far (x3). Weapon and ability attack ranges should be translated into Melee, Near, or Far per above. You can move one category per turn: Melee to Near, Near to Far, etc. If two allies are in Melee of a single enemy, they flank. If any character moves out of someone's Melee zone, they provoke as normal. Melee Attacks with extended range such as Reach (etcetcetc)...

Caution should be used with this approach, as many abilities will be much less useful without the fine grained grid. Character choices should be considered accordingly.

Movement Abilities

Aerial Movement

Three dimensional movement is an easy way to demonstrate tactical superiority; so to allow this, we provide rules for moving in the air, either under your own power or being thrown there with no helpful way of controlling your fall. A creature who is above the ground is in air by some number of hexes.

While in the air, the range of all non melee abilities is halved. This can occur in one of four ways.

A creature may be able to fly. A creature with flying can increase their altitude by one hex by spending 2 STEPS, or can decrease their altitude by spending one STEP. Additionally, a flying creature can choose to fall, returning them to the ground at the end of their turn. Flying creatures can move horizontally while in air at the normal rate.

A creature may be able to hover. A hovering creature cannot gain altitude, and at the end of every turn, if they are in air by two or more hexes, they decrease their altitude by one hex. Hovering creatures can move horizontally while in air at the normal rate.

A creature may be able to jump. When a creature jumps, they become in air by an amount specified by the ability. Multiple jump abilities may be used simultaneously to combine their height. They can move horizontally while in air at the normal rate, and fall at the end of their turn, or after moving as many hexes horizontally as their jump height, unless otherwise specified, returning them to the ground. They may choose to end the jump prematurely, returning to the ground as normal before the end of their turn. All movement made while jumping must be in the same direction. Any creature may spend a STEP to jump 1 while on solid ground. When a creature jumps this way, they fall after moving 2 hexes or at the end of their turn, whichever occurs first.

Finally, a creature may be thrown into the air, or be pushed off an edge, causing them to be above the ground as a result of someone else's actions. A creature who is in air this way is juggled. At the beginning of a juggled creature's turn, they fall, causing them to return to ground level. When a creature falls this way, they make a recovery roll. If they fail the recovery roll, they become PRONE.

Falling Damage

Within combat, falling shouldn't deal damage unless the fall is long enough to effectively remove them from combat. Out of combat, the GM may assign penalties to longer falls, up to and including death. Midrange falls may cause injury that results in persistent penalties.

Any fall within the scale of a combat will reach the ground effectively instantly. Longer falls may have a duration, but if so they are effectively removed from the combat.

Burrowing

Similar to air movement, burrowing is based on how many hexes you are from ground level. In this case, distance is kept track by how many hexes you are below the ground. While burrowing, movement costs are doubled, although tougher materials may have an even higher cost.

Creatures that are underground do not have LINE OF SIGHT or LINE OF EFFECT to any other creature, and LINE OF SIGHT and LINE OF EFFECT can not be drawn to the underground creature.

If you are underground and lack the burrow ability, you can dig to the surface by spending 3 STEPS for each hex.

In-combat Stealth

This section only covers stealth in combat, and presumes the chaos and dynamics of battle. For the rules for sneaking around outside of combat, see (pg. ??).

At the end of your turns, if you did not target an enemy with an action and no enemy has LINE OF SIGHT to you, or you have cover or concealment against the enemies that do have LINE OF SIGHT, you may gain STEALTH with a radius equal to one greater than the number of hexes you have moved this turn. When you move by an effect other than TELEPORTATION or WARP, increase the radius of your STEALTH by one for every hex you move. When you TELEPORT or WARP, increase the radius of your STEALTH by one, regardless of how far you TELEPORTED. When you take a major action, increase the radius of your STEALTH by 12. When you take a minor action, increase the radius of your STEALTH by 6. If you target an enemy with an action, the STEALTH effect ends.

Stealth Modifiers

Action	Stealth effect
Moving	+1 to stealth radius per hex moved
TELEPORTING	+1 to STEALTH radius
Minor action	+6 to STEALTH radius
Major action	+12 to STEALTH radius
Target Enemy	STEALTH ends

If you end your turn in STEALTH, you may reset the radius to one greater than the number of hexes you have moved that turn. You must still qualify for activating STEALTH at this point.

You can't be targeted by a creature who establishes line of sight from outside of radius X of you, where X is the radius of your STEALTH ability. A creature is OFF BALANCE to attacks made from creatures who are concealed from them.

Fluid/Swimming

Some hexes will be filled with a fluid, such as water or lava. Creatures in such a hex are treated as having flying, but all movement through such hexes cost double the usual number of STEPS. Creatures native to the environment ignore this additional cost.

TELEPORTATION

TELEPORTATION is movement that moves you straight from your start to end point without traversing the middle; it requires LINE OF SIGHT to the destination from the start, but not to any points in between.

Once you add WARP to TELEPORTATION, it no longer requires LINE OF EFFECT or LINE OF SIGHT. Generally these abilities have their own conditions on where you can TELEPORT to, however.

TELEPORTING and WARPING away from a hex that is threatened by a melee attack provoke REACTIONS based on its activating abilities tags. If you TELEPORT with an ability with the [R] tag, or with something that modifies your regular movement, then

this TELEPORTATION provokes REACTIONS only from the hex you TELEPORTED from.

DASH

DASH is like regular movement, except that it does not provoke REACTIONS. Otherwise, it has the same benefits and limitations as your usual movement.

PHASING

PHASING is like regular movement, except that it can move through hexes that are otherwise unenterable. Otherwise, it has the same benefits and limitations as your usual movement.

Recovery Rolls

Recovery Rolls are a character's chance to protect themselves or an ally from the effects of hazardous terrain, be it lava, an electric fence, or falling off a steep cliff. If successful, they've prevented the effect by a quick roll, grabbing the edge of a cliff, or they've rescued a falling ally just in the nick of time before that ally would trip face-first into molten lava.

The Recovery Roll is $1d20 + Level$.

The base DC for any environmental hazard is 15, specific effects may declare a different DC.

Terrain Features

Whole Hex Effects

Each hex of terrain on the battlefield may contain a terrain feature. By default, a hex is open. Creatures can move through it without penalty, and it does not block LINE OF SIGHT or LINE OF EFFECT.

The following is a list of common properties of terrain features:

> Difficult Terrain

Difficult terrain costs an additional STEP to enter. Unless otherwise noted, difficult terrain is a [GROUND] effect.

> Fast Terrain

Entering a hex of fast terrain allows you to move an additional hex onto fast terrain without spending an additional STEP. Entering a hex of fast terrain in this way does not grant additional movement. Fast terrain overrides difficult terrain.

> Obstacle

An obstacle does not allow creatures to move into the hex, or through a hex border if its on the border.

> Obscuring

An obscuring terrain feature blocks LINE OF SIGHT through it.

> Blocking

A blocking terrain feature blocks LINE OF EFFECT of effect through it.

➤ **Solid**

A solid terrain feature is an obscuring, blocking obstacle.

➤ **Destructible**

A destructible terrain feature can be destroyed if enough damage is directed at it. Each piece of destructible terrain has a damage threshold. A creature that does more than the threshold to the terrain feature in 1 round will destroy it, turning the hex into difficult terrain.

➤ **Dense**

A dense terrain feature has enough things in it to block **LINE OF SIGHT**, but not enough to do so under short distances. Dense terrain will have a maximum sight distance. A creature cannot draw **LINE OF SIGHT** through more hexes of dense terrain than this sight distance.

➤ **Slope**

The altitude changes in this hex. By moving in the indicated direction, you end up at a higher altitude.

➤ **Cliff**

The altitude abruptly changes between 2 hexes. The edge between them is a wall.

➤ **Dark**

The hex is not illuminated. **LINE OF SIGHT** cannot be drawn into the hex without a source of light, but it can be drawn through the hex.

➤ **Pushing**

The hex has some force in it that pushes creatures. This has a direction. A creature moving in this direction may move an additional hex without spending a **STEP**. A creature moving in the opposite direction must spend an additional **STEP**.

➤ **Toggleable**

This is attached to another property. That property can be toggled by a given trigger. This may be at the hex itself, or at a designated remote location.

➤ **Fluid**

The hex is filled with a fluid, such as water or lava. A creature may move upwards in a fluid as if they had flying, but all movement in the fluid costs double **STEPS**. Specific fluids may have additional effects. Water, Lava, and Acid are merely common fluids and not an exhaustive list.

- **Fluid (Water)**
Creature in a water hex lose **BURNING** and are immune to **BURNING**.
- **Fluid (Lava)**
Creatures in a lava hex begin **BURNING** (see hazards) and cannot remove **BURNING**.
- **Fluid (Acid)**
Creatures in an acid hex gain **ONGOING** (see hazards).

Hex Borders

A hex border may also have terrain features. For instance, a wall may exist between hexes and block movement between 2 hexes but not along it. The top and bottom borders of a hex can have features as well; a floor and ceiling are the most common forms of this.

Example Terrain Features:

- Wall: destructible, solid
- Glass/window: destructible, obstacle, blocking
- Chain Link Fence: destructible, obstacle
- Door: destructible, solid. It is toggleable by spending 1 **STEP** while adjacent
- Remote Door: destructible, solid. It is toggleable by spending 1 **STEP** at a control panel
- Remote Locked Door: destructible, solid. It is toggleable by spending 1 **STEP** while adjacent. This toggleability it itself toggleable by spending 1 **STEP** at a control panel
- Force Field: obstacle, blocking. It is toggleable by spending 1 **STEP** at a control panel)
- Forest: Difficult terrain, dense 6, destructible 26
- Wooden Ramp: destructible, slope
- Heavy Iron Gates: solid: it is toggleable by spending 5 **STEPS** while adjacent
- Tree: Destructible 26, solid
- Overgrowth: difficult terrain, obscuring
- Dark Room: darkness, toggleable for 1 **STEP** by a lightswitch
- Rubble: Difficult terrain
- Icy Pond: destructible, fast terrain. Hexes below are water.
- Giant Boulder: solid
- Water: Fluid
- Fog bank: Dense

Terrain Hazards

Some forms of terrain are an active hazard which can injure a creature. These are not attacks, and hence the combat abilities of a creature do little to protect them from it.

Example Hazards:

- Lava pit: Fluid, creature in it take 12 **IGNITED**.
- Acid: Fluid, creatures in it take **ONGOING** or 3 rounds.
- Quicksand: Difficult terrain, The first time each round a creature starts in the quicksand they must make a recovery roll or be stopped for 1 round.
- Tar pit: Fluid, The first time each round they start in or enter a tar pit, they gain **SLOW** 2 until they leave the tar pit. This stacks with other instances of **SLOW** from the tar pit, and ignores the normal limit on **SLOW** stacking.
- Boiling tar pit: As a tar pit, but also deals 6 damage each round to creatures in it.
- Hot coals: 6 damage as a **[GROUND]** effect.

Destructible Terrain

Not all structures survive being smashed around by meteors, meteoric slams, and earthquaking attacks from powerful beings. Similarly, a wooden door may be an appropriate barrier for livestock, but not a hulking behemoth. This destructibility of the battlefield structures is represented by Destructible Terrain. This section provides guidelines on the relevant strength of various types of obstacles and structures.

Below are a set of examples for the damage thresholds of various objects. Note that the walls listed are relatively thin walls that would exist on a hex edge. A wall that fills an entire hex is often too tough to be destructible. This is not a comprehensive list, but a general overview of common materials that are expected to be encountered.

Destroying Terrain: Any given obstacle that can be destroyed will have a Damage Threshold. If it does not have a damage threshold, it is not destroyable in a way that is meaningful - for example, a wall of solid rock can't be destroyed, as it's rubble would fill the same space. If something takes that damage equal to or above it's Damage Threshold in one turn, it is destroyed. If the damage is below it's Damage Threshold, the obstacle is unharmed. You cannot miss terrain, and terrain cannot succeed on defense rolls.

Smash Through: Any character can Smash Through a destructible obstacle in an attempt to destroy it. If they have more than twice times the **HIT POINTS** (RESISTANCE, TEMPORARY HIT POINTS and BARRIER HIT POINTS included) than the obstacle's damage threshold, they destroy it, but take that much damage in return. If they have less **HIT POINTS** than this, they bounce off and the movement is wasted.

Example: I dive through the glass window. I take 1 damage from the shards and keep on trucking.

Example: In a moment of desperation, I charge through the wooden wall to escape, taking 40 damage and lots of splinters in the attempt.

Common Destructibles

Name	DT
Glass	1
Wooden Crates	24
Wooden Wall	40
Bulletproof Glass	42
Metal Crates and Barrels	44
Common Cars	48
Trees	52
Stone Walls	53
Concrete Walls	60
Armored Vehicles	66
Really Thick Trees	70
Metal Walls	76
Reinforced and Magical Metal Walls	80
Past here, not destructible	
Solid Rock	

Environmental Effects

These are features

Afflicted: This descriptive tag refers to terrain affected by abilities (A hex may only be afflicted with one condition at any given time. If a new condition would afflict a hex, it replaces any existing affliction)

Cloudy: Hexes afflicted with this block **LINE OF SIGHT** through them, but not into or out of them.

Concealment: A hex with concealment blocks **LINE OF SIGHT** through it, and targeting through this hex incurs a 40% **MISS CHANCE**

Cover: Partially blocked **LINE OF EFFECT** provides an **EDGE** against attacks to those behind it.

Obstacle: An obstacle does not allow creatures to move into the hex.

Obscuring: An obscuring terrain feature blocks **LINE OF SIGHT** through it

Blocking: A blocking terrain feature blocks **LINE OF EFFECT** through it.

Destructible: Destructible terrain feature can be destroyed if enough damage is directed at it. Each piece of destructible terrain has a damage threshold. A creature that does more than the threshold to the terrain feature in 1 round will destroy it, turning the hex into difficult terrain

Dense: A dense terrain feature has enough things in it to block **LINE OF SIGHT**, but not enough to do so under short distances. Dense terrain will have a maximum sight distance. A creature cannot draw **LINE OF SIGHT** through more hexes of dense terrain than this sight distance.

Slope: The altitude changes in this hex. By moving in the indicated direction, you end up at a higher altitude.

Cliff: The altitude abruptly changes between 2 hexes. The edge between them is a wall in one direction.

Dark: The hex is not illuminated. **LINE OF SIGHT** cannot be drawn into the hex without a source of light, but it can be drawn through the hex.

Pushing: The hex has some force in it that pushes creatures. This has a direction. A creature moving in

this direction may move an additional hex without spending a STEP. A creature moving in the opposite direction must spend an additional STEP.

Toggleable: This is attached to another property. That property can be toggled by a given trigger. This may be at the hex itself, or at a designated remote location

Fluid: The hex is filled with a fluid, such as water or lava. A creature may move upwards in a fluid as if they had flying, but all movement in the fluid costs double STEPS. Specific fluids may have additional effects.

Part III

Character Generation

Chapter 6

Character Generation

There are six questions that can be answered in nearly any order when creating a character for the Stuff of Legends.

- Who Are You? (Concept first)
- What TRACKS and Features will you take? (Playstyle first)
- What are your Roles and Details? (Areas of expertise first)
- What are your Perks and/or Spells? (Out of combat powers first)

- What are your Cool Items? (Save this for later)

As you come up with your answers, keep in mind the setting and campaign. A fantasy concept in a sci-fi setting may not work well, and vice-versa. Coordinate with your GM to make sure what you're making fits in the campaign.

Answering one will lend easy suggestions to the rest of the answers. If you know Who You Are, then your ability selections will have a theme to go with. If there's a particular TRACK or combination of TRACKS you like, the TRACKS are definitive enough to give you a better idea of Who You Are. Perks, too, define a

large part of Who You Are, or in some cases, who your character will grow to be.

Any of the abilities or powers you can pick from tell you more about the character you are making; we suggest you look at the list of six questions, pick the one that you have the strongest answer for first, then go from there.

Who Are You?

PCs in *The Stuff of Legends* matter. Who or what is your PC? A thief with a heart of gold and nimble fingers? A power hungry pyromaniac? A stalwart soldier, or a healer with a heart too big for this world?

Why are they good at what they do, or how did they

attain their powers? What are their motivations, and what is important to them?

Where in the campaign setting are they? Is your character part of a certain faction, is there a certain part of the setting that interests you that you want your character to have a stronger tie or connection to?

Not all of these questions are pivotal, and not every single one must be answered every time, and you might even answer completely different questions, but have enough answered that you know who your character is.

Some of these answers may be immediately obvious, and others may take time to discover. Ability selections from other parts of the Character Generation Loop and Six Questions can help fill in some of this, as well.

Tracks and Features

Tracks

TRACKS are the major source of your PCs power. They are the most defining as far as their powers and world-crashing abilities. A TRACK is a path of power; each TRACK has facets within it that grant new abilities or improve existing ones as you gain levels.

Select a Major, Minor, and Innate TRACK. Each track is listed as offensive, defensive, mixed, or varied.

If you want to pick your playstyle first, start here. Your TRACKS define the core of your character's playstyle.

For more about Tracks, see (pg. 57).

Features

Features are smaller abilities to round out a character's build. A first level character gets 2 to pick from. They can enhance abilities gained from TRACKS, or be new, standalone abilities.

For more about Features, see (pg. 63).

Capstones

Capstones are singularly powerful abilities. Characters get a single Capstone at Level 14. They are all world-shattering abilities of monumental power and scale!

For more about Capstones, see (pg. 89).

Roles and Details

Details

Your GM is going to want to know a few things about your PC that are relevant to how the world sees that PC. Don't worry about this too much; you're going to answer most of them without thinking, but they might have a few specific questions for you. (If you're the GM and you don't know what we're talking about, see (pg. 54)! Details are something you already use, but we incorporate them into the Adventure Resolution System.)

Roles

A role defines what skills and knowledge your character has. A role is a description of both your role in the party and in the world. For instance, Phantom Thief Fox, "Retired" Toad Clan Ninja, and Royale Assassin would all be roles with a similar function, but suggest different shades of how they fit into the world. A role should describe your character, but you and the GM should both agree on what types of things the role would enable you to do. For instance, if you wanted to pick someone's pocket, the Thief role would definitely be applicable, while it may not be covered by Assassin, but either would be able to pick a lock or sneak around undetected.

Each character starts with 6 role points. They may spend a point to get a new role at rank 1, or to increase the rank of an existing role by 1, to a maximum of 2. Increasing it from 2 to 3 or 3 to 4 requires 2 pts, and going from 4 to 5 requires 3 points. That rank determines what Skills (pg. 7) you can use. You get another role point every odd level.

Details may also grant skill ranks, like roles do, though typically only at rank 1. Such skill ranks should be relatively minor and not overshadow the actual roles of the character. For instance, a detail may indicate you have some basic knowledge about a location, but a person with the historian role will still know more about the place's history.

Choosing Roles

Sometimes it can be hard to come up with good roles for your characters, so here's some advice that might help.

One of the easiest ways to create a good role is build it up from parts. Unlike the skills found in some systems, roles can be made of multiple words, or even phrases. In fact, we encourage this approach; creating an interesting role with a single word is often very difficult and encourages generic bunk like "Spy". Sure, your characters a spy, so they're probably good at disguising themselves or ferreting out secrets, but that can't be everything. What kinds of tactics do they favor? What kinds of contacts and tools do they have? Who wants to put a bullet through the back of their head and who merely wants to disavow them? "Spy" answers none of those questions, but if you add some details, "Spy

for the Resistance” can give you so much more to work with.

To get you started, here's a quick list of components that can be helpful in building roles.

Occupation - What you do daily?

Foundational - What brought you to where you are? Why do you do things your way?

Positional - A status, title, or position

Defining- A significant feature of who you are.

Affiliation- What organization that you belong to that plays a significant role in your life.

Aspirational- What do you hope to accomplish?

Oppositional- Who seeks to stop you?

And here are a few examples of roles built with this method, see if you can pick out which components they use: The Blind Huntsman, Spy for the Resistance, The Exiled Duke of Arkile, Wizard of the Shrouded Tome, Fugitive from the Empire, The King's Favored Knight.

This list isn't exhaustive and some components might work better for you than others, so play around with it until you find something you like.

Another option is to use a statement your character might make or to reference a significant event from their past. This type of Role is great for conveying more complex ideas, but it can also be a lot more nebulous, so it's important to make sure you and your GM are on the same page for what they cover. Here's a few more examples and what they're meant to represent: The Shield of Ortland (A general who's famous for his defensive tactics and who protects the kingdom of Ortland.), Broke the Walls of Dukiel (A military engineer who's plans helped their army break a set of fortifications that were thought to be impenetrable), “There's nothing in this town I don't know about.” (A well connected information broker).

However you design it, once you have an idea for a role, it's important to think about how you might use it in the campaign you're about to play. If it seems too specialized or unlikely to come up, then it might not be appropriate, even if it's an important part of your character. For example, if the campaign's going to see you struggling against the horrors of war and long journeys through untamed wilderness, then Master of Tea Ceremonies may not be an appropriate role. Sure, you might be able to use it to maintain a distracting conversation or to help your traumatized nephew grow into the man you know he's meant to be, but it's probably not going to come up very often and it'll take a lot more work to make use of. In these cases, you might be better off adding it as a detail, rather than a role, or just leaving it as a part of your character's backstory.

The other extreme is also a problem. If you can picture yourself using a role in just about any situation, then it's probably a bit too broad and could stand some refinement. Try adding some details that suggest areas where your character has focused their efforts and other areas where they've fallen behind. Alternatively, it might help to replace generic descriptors with more personal ones. For example, Dawn Step Monk and Seasoned Street Tough can both stand in for Martial Artist, but they tell very different stories about your character and what other skills they might have.

For more about Roles, see (pg. 7)

Perks and Spells

Perks and Spells are singular powers that aren't really all that useful in a fight, but they're great for interacting with the world in a powerful way. They are largely composed of abilities that you can just do, with no roll or chance of failure, such as instantly examining a crime scene for clues, or turning that tough monster you beat into a tough item, or reading someone's thoughts.

Perks and Spells both use Perk Points. A level 1 character gets 3 perk points, plus what they get from their Tracks. Gaining a new facet (including the first facet) in a Track will give a perk point if marked with a ★. You also gain a bonus perk point on each level where you only gain 1 facet or capstone.

While TRACKS tell you what you can do in a fight, Perks and Spells are your biggest source of powers and abilities outside of a fight.

For more about Perks, see (pg. 75). For more about Spells, see (pg. 86).

Weapons and Items

Weapons

Weapons in The Stuff of Legends don't define your damage, they define your weapon ranges and how you take and receive REACTIONS.

If you have any abilities tagged as [W]eapon, you start with 3 mundane weapons. 1 must be ranged, 1 must be melee, and the other can be either.

Weapons are constructed by selecting a couple of properties that determine how they function. See (pg. 29) for the specifics.

Items

Magic gear, goofy artifacts, and life saving potions! It's not crucial to every character, but the right item at the right time can have a large impact, as many clever adventurers in a tough spot have shown through the ages.

There's several different classes of items:

Mundane Items are run of the mill basic stuffs, such as cloths, regular rope, food rations, and other basic, day to day sundries.

Trinkets are generally useful or interesting items that are fairly common. They can be reused repeatedly and never stop working.

Depletable Trinkets are similar to Trinkets, except that they have a limit on their total uses.

Artifacts are rarer than Trinkets, and provide bonuses that are useful in combat. They will last forever, and are permanent unless lost.

Depletable Artifacts are like Artifacts, but have a limit on their use. It may be a total number of uses, a timespan, or some other limit.

Consumables are a single use. They are potent and can give a significant edge in combat. They do not take an action, but only 1 can be used per round.

How many items of each you have will vary. (Ask the GM!). This may be 1 artifact point of item per level plus 100 *MP* per level, but it could be more or less (or none) depending on the GM's decision.

For more about Items, see (pg. 95)

Level and Tier

Tier 1: Champion, levels 1-3.

Tier 2: Hero, levels 4-7.

Tier 3: Immortal, levels 8-11.

Tier 4: Myth, levels 12-14.

You have a Level, which ranges from 1 to 14. As you increase in level, you gain more abilities and more power with your existing abilities. At certain levels, you also increase in Tier, which is a large power jump. All your abilities start using bigger numbers. See the Level Chart below for exact numbers by level.

A Champion level 2 vs a Champion at level 3 has a small power difference. A Champion level 3 vs a Hero level 4 has a Very Large power difference!

Respec

aka Avoiding Buyer's Remorse

We've worked very hard to make the TRACKS, Features, and other measurable mechanical things as balanced and as even as possible, to make it as hard as we can for you to make a 'bad' choice power-wise. That all said, if a choice you've made early on stops working out later or doesn't work in the way you expected it to, talk with your GM about a respec - changing the parts that don't work to something else. You'll be happier with a more functional version of your PC and so will the GM.

Additionally, if you make a character choice which later becomes obsolete, you may repick that choice. For instance, say you use your first two features to get flight. Then one of your tracks grants flight at a later time. You may then repick your initial 2 features. This isn't limited to new abilities directly copying old abilities; rendering something functionally obsolete is sufficient.

Making It Yours

Reflavor and Personalization

Reflavor. Definition, verb: Take the narrative and thematic identity of an ability or power and rewrite it to represent it as a different narrative or thematic identity while keeping the mechanics the same.

This system is designed to cover a large amount of thematic and design bases, but it's impossible to cover everything. If you want to take an existing TRACK, feat, item or ability - or heck, any part of the system or your character and rename it to make it more personalized and a better, more pure expression of your brand of awesome, do it!

Mobile Barriers can be magical blue protective bubbles. It can also be magnetic shielding, unstable projected force field generators, or even massive telekinetic power bent defensively.

This does not change how any of the TRACKS or rules work - it merely changes the expression. A fireball can be green, blue, or yellow, or a chi-blast, or even a stick of dynamite, but they all mechanically do the same thing - EXPLODE!

Most TRACKS will have suggestions for other themes that they can easily cover. These suggestions are not comprehensive, they're starting points to be inspired by. You can re flavor to do anything.

Putting it All Together, Step-By-Step

1. Determine Level.
2. Record Base HP and Caliber from the Level Chart (below).
3. Do the following in any order:
 - (a) Select Tracks
 - i. One Major, One Minor, one Innate
 - ii. If you're Level 14, select a Capstone.
 - (b) Assign Details and Roles
 - (c) Select Perks, Spells and/or Role Powers
 - i. Perk Points have an initial amount, and are gained by advancing TRACKS
 - ii. Some perks have prerequisites. You may need to ensure you meet those prerequisites before beginning this stage.
 - (d) Select Features
 - (e) Select Items
4. If this is your first time using SoL, get familiar with the Combat Rules and Special Terms.

Level Chart Statistical Breakdown

Tier: The power group you are in.

Level: Your numerical measure of power.

Base HP: This is the basic HIT POINTS that everyone at that level gets.

Major, Minor, and Innate Tracks: You gain your facet 1 abilities for each Track at level 1, and every level after, you either pick the first facet of the next set or the remaining 2 facets. For instance, you can pick your Minor facet 2 ability first, then your Innate and Major next level. The level of the facet(s) you pick at each level is indicated in the chart below.

Facets: Facets go from 1 to 7. They are the highest level you've reached in a given TRACK.

Caliber(C): This is a measure of your power, used for calculating effectiveness of abilities.

Features: You gain Features at the selected levels; the number indicated the total amount of features you have.

Capstone: Capstones are singular abilities of immense power. You gain one at level 14.

Level Chart

Tier	Level	Base HP	1st Facet	2nd Facet	3rd Facet	Caliber	Feature	Perk	Role
Champion	1	48	1st	1st	1st	3	2	★★★	6
	2	48	2nd			3	3	★	
	3	48		2nd	2nd	3			+1
Hero	4	64	3rd			4	4	★	
	5	64		3rd	3rd	4			+1
	6	64	4th			4	5	★	
	7	64		4th	4th	4			+1
Immortal	8	80	5th			5	6	★	
	9	80		5th	5th	5			+1
	10	80	6th			5	7	★	
	11	80		6th	6th	5			+1
Myth	12	96	7th			6	8	★	
	13	96		7th	7th	6			+1
	14	96	Capstone			6	9	★	

Chapter 7

Creating Roles

So welcome to Roles. Despite being only five letters, welcome to about 60% of your epic, world-wrangling player character. That's a lot of that epic slamatude right here.

Why so much? Roles are the foundation and the frame and the spirit of what your character can do, when they're not smashing heads. You can put a lot of love here in how well you describe them, but even simple roles will still get you rolling along (heh) on your momentous adventure.

So - let's talk about Roles!

Roles Definitions

Roles are broad competency umbrellas - they can be thought of as 'everyman' abilities that everyone - provided they have the appropriate skill and/or experience - can do. Every lawyer can read a tort, every smith can hammer a blade into shape, every thief understands the basics of how to not be noticed, every fae can spin a tune to a riddle. Their rank determines how well they do those things.

What they don't do is provide new abilities - they don't provide the ability to create something from nothing (unless it's a setting conceit that anyone with the right skill and/or experience could do), they don't break the laws of reality, or provide material tools for tasks. For example, an Empath Role wouldn't actually provide telepathy, but it would cover skill in reading or manipulating emotions. That said, for Roles to go above and beyond, take a look at Role Powers or Spellcasting a little further down.

There are three types of Roles:

- **Detail Roles** - Detail Roles are determined by the campaign and the world you are in and you get them as part of existing in the campaign (pg. 54). They function as rank 1 Roles.

- *Sample Detail Roles: Race, profession, planet of origin, alignment.*

- **Character Roles** - Character Roles are your primary roles that describe most of what your Roleplaying capabilities are.

- *Sample Character Roles: Detective, Diplomat, Safari Guide, Astronaut.*

- **Class Roles** - One Role is a Class Role. It must describe your Player Characters combat capability - why they're strong or good in a fight, their source of power, their rigorous training, etc. This role has its own progression based on tier. Aside from that, all other role considerations apply when describing that role.

- *Sample Class Roles: [Descriptor] Knight of [Affiliation], Furious Avenger, Drone Operator.*

Further down there are two general approaches to help understand Roles - The Five Essential Qualities and the Basic Uses Model. They're not at all exclusive to each other, and they can both be true, or feel free to just stick to one if it makes more sense to you.

Picking out Roles

For some players it is easy to come up with their Roles. For others, it's less easy. If or when stuck on picking or coming up with a Role, there's no single answer but here are some helpful prompts.

Look at your other abilities that you've already selected or want to get - tracks, perks, etc. Do any of these make you think of a broad competency of skill or powers?

Ask where your characters abilities come from - this often leads to a character or class role.

Look through the 5 Essential Qualities and Basic Uses model below, and answer the questions - the answers may lead to a Role that contains that answer.

An inspiring moment - do you see your character doing a specific thing, or being able to do something? If so, how did they get there and what Roles may lead to that?

Don't be afraid to expand your character concept during this process. Developing a more complete character is part of this process, so fill in or add new aspects of your character as needed. It can be hard to think of more Roles if your character concept doesn't

require any more. Expanding your concept to include a new Role can yield a more nuanced, interesting character.

Role Powers and Spellcasting

Role Powers are extensions of Roles that provide new and expanded capabilities. (pg. 84). Roles that go well with Role Powers are ones that describe areas of extraordinary abilities more than a realm of competence.

Sample SuperRoles: Empath, Cyborg, Angel, Deity of [concept]

Spellcasting is a take on magic that must be attached to a Role, special abilities that are informed and defined by the Role that they are cast from.(pg. ??). They need to have some concept of what kind of spells (or nanomachine formulas, or dreaming manifestations, in other settings) and out-of-the-ordinary effects that they could achieve. *Sample Spellcasting Roles: [Concept] Mage, Time Traveler, Nanobot Engineer*

Common Archetypes

There are some common themes - investigative, crafty, sneaky, social, and more - which all lend themselves to typical party member archetypes. That's fine! "Thief" is a simple role, while "Shinobi of the Crane Clan" and "Grew up on the wrong side of the tracks" are more complex roles, but they both have the ability to tap into the archetype of 'the sneaky one'. Embrace archetypes! Or don't. You can aim for a Role that covers new archetypes. Or maybe just peruse archetypes for inspiration and then you do you.

Talking About Roles

Five Essential Qualities

The Five Essential Qualities is one way of approaching Roles.

This means Roles can cover five essential qualities of your Player Character: What you know, What your skills are, How you approach things, Your presence, and How you fit into the world.

1. It can cover the things you know about - regional knowledge, areas of study, and information from being part of a group.
2. It should almost certainly cover your skills - what are the things that you can do, teach, explain?
3. It helps define how you fit in the world - Races, social status, reputation, what groups you're in and/or out of. Are you regarded as someone to look up to or avoid, expected to be good or bad at a certain area?

4. It covers your approaches to things - limitations and bias, attitudes or considerations you always have.
5. Your Role can also cover your presence - your material, and/or immaterial existence, and not just in this realm.

The more of this that your Role helps illuminate, the fuller the Role is.

Sample Roles and the Essential Qualities they Cover

Role	Qualities
Warrior	1
Guardian	2,4
Guardian of Atlantis	1,2,3,4
Eternal Guardian of Atlantis	1,2,3,4,5
Assassin	1,2,3
Assassin of the Crane Clan	1,2,3,4
Shinobi of the Crane Clan	1,2,3,4
Exiled Shinobi of the Crane Clan	1,2,3,5
Lawyer	1,2,3,4
Charismatic Lawyer	1,2,3,5
Spirit Lawyer	1,2,4,5
Greedy Lawyer	1,2,3,4

Basic Uses

A Role is very flexible and can do a lot of things. This approach to understanding Roles is about Basic Uses. Basic Uses are things most Roles can do within the Roles theme. The example listed Basic Uses are NOT limiting or comprehensive - these are a starting point to understanding the many uses a Role can provide. In general, the more Basic Uses a Role can enable, the better the Role will be.

When looking at this, it is helpful to take the Role and the Basic Use and use them together in a sentence; "A Smith can Craft armor", "A Politician can Detect objections and lies", "A Detective can Sense when they're being followed", "A Fire Mage can Control a furnace", "A Knight can Teach heraldry and warfare", "A Thief can Conceal an item and Disassemble a trap", "An Engineer can Analyze or Repair a faulty gadget", "A Lawyer can Analyze evidence", "A Gadabout can Get an Invitation to the great gala", "A Timekeeper can Detect time distortions"

This also is a good approach to a question. "Can a Knight Detect an Evil Aura?", "Can a Social Butterfly Conceal that They're Lying?", "Can a Trickster Manipulate a Bombs Timer?", "Can a Chef Teach a kitchen to Make An Alien Dish?" Sometimes the answer is yes. Sometimes the answer is no. Sometimes the answer is if their Rank is high enough. (pg. 7) And sometimes that answer is with a Spell or Role Power.

Basic Uses:

- Do/Act/Manipulate
- Get/Procure/Haggle
- Take/Steal
- Know/Teach/Skill

- Create/Write/Craft
- Sense/Detect/Analyze
- Repair/Maintain/Modify
- Disassemble/Unmake
- Conceal/Hide/Fake
- Control/Manipulate/Use
- Whatever the Devs Missed *

* Making this be a 100% comprehensive list isn't the goal - it's merely a listing of a lot of the common ones that tend to come up.

What is a Good Role

There are a few indicators that will make a Role go from good to great; the more you have, the more you have a stellar, character-defining role that has an impact on the world you're in.

That said, it's easy to get caught up on making the Perfect Best Ultimate Role, but in practice, a simple role such as 'smith' or 'thief' is often just fine. Adding more descriptors or enhancing one can always come later (and often will as your player character gets screen time), but simple roles will still breathe that first bit of life into your Player Character so they're able to start grabbing the world by the reins on session 1.

In general, a good minimum bar should be at least 5 [+]'. If it is 4 or below it is a good candidate for combining with another Role.

Role Quality Indicators (the more +'s the better!)

- [+] Have relevant uses for at least 2+ basic skill uses
- [++] Have relevant uses for at least 4+ basic skill uses
- [+++] Have relevant uses for at least 6+ basic skill uses
- [++] The Role is relevant to the campaign
- [+] The Role defines a little bit about the character
- [++] The Role defines a lot about the character
- [+] The Role covers 2+ Essential Qualities
- [++] The Role covers 3+ Essential Qualities
- [+++] The Role covers 4+ Essential Qualities

Combining Concepts

Some descriptors, no matter how Right for your character they are, don't really stand on their own as a Role. That's not to say they're bad - they're prime candidates for combining with another Role to make something more descriptive. For example, 'Lucky' and 'Rugged' may be valid and awesome descriptors that may apply to your character, but not as a Role. Combine them with another Role to get 'Lucky Fisherman' and 'Rugged Explorer'!

Evolving Roles, Character Growth, and Play Time

Character Growth is a defining part of a good campaign and a longer experience - it's not just that their numbers go up as they grow in power, but they may change, evolve, grow, renounce, abandon, or claim things that they never knew existed before the campaign started. Your Character Roles are the most representative part of your character and they can grow or change in definition as well, and not just by increasing in rank.

As well, what starts as your Session 0 character concept may be less defined, and you fill in the gaps of who and what they are as you play them. This can lead to a better understanding of what their Roles should be instead of what you started with. It can be that you had simple Roles and you now want to expand or add depth to them.

If you feel the Role has changed because of Character Growth or play time (or any other reason), it's encouraged to actually change the Role. Be sure to include the GM as part of this.

Growth and change examples:

- Thief -> Thief with a Heart of Gold
- Knight of Landlin -> Exiled Knight of Landlin
- Reporter -> Battlescarred reporter
- Hero -> Peace Seeking Hero

Gaining Roles

Character Roles

Character roles are your most significant roles, and are used to express your core character concepts.

Each character starts with 6 role points. They may spend a point to get a new character role at rank 1, or to increase the rank of an existing role by 1, at a cost dependent on the current rank of the role.

Advancement

Every odd level, you gain +1 role point. This can be used to gain a new role at +1, or increase an existing role, as per this table:

Cost to Improve Role

Rank	Cost to level up	Total Cost
0	1	0
1	1	1
2	2	2
3	2	4
4	3	6
5	-	9

Class Role

You get an additional role known as the Class Role. This role has a rank equal to your tier, and is meant to represent your combat skills. This role should encompass what concept unifies your tracks.

Advancing Class Roles

Class roles automatically advance a rank when you gain a tier, but if you desire, you can spend role points to boost them further. The cost to do so is the same as for advancing a character role of the same rank. When you go up a tier and you've already advanced your class role, you are refunded the role point cost to move a role from your old tier to your new tier.

Detail Roles

When you are creating your character, the GM will provide you with a list of details you need to define for your character. This captures miscellaneous details about your character that the GM expects to be relevant to your campaign, and can help you flesh out your character. Some common details include:

- Where are you from?

- What is your gender?
- What is your age?
- What is your species?
- What is your social class?
- Where did you go to school or receive training?
- Do you have any notable physical features, such as tattoos or scars?

Depending on your details, people may react to you differently, and you may have different sets of world knowledge, extra skills, and it can influence how easy various disguises are for you. The GM may ask you additional questions during the game which would give you additional details to record.

Each detail grants a Detail Role, which is always at rank 1. This can allow you to have skills and knowledge as appropriate for your background, orthogonal to your Character Roles.

Chapter 8

Tracks

Unlike many systems, The Stuff of Legends uses tracks, instead of classes or a point-buy to define a character's main combat abilities. Every character gets three tracks, allowing for an incredibly diverse selection of potential play styles, and each track has a type, a style and a complexity rating.

Tracks come in three types: Major, Minor, and Innate. Every character must have exactly one of each type.

Major tracks tend to be the defining feature of a character's presence on the battlefield, and are about twice as powerful as the other types of tracks. Examples include Powerhouse, which allows you to wield powerful weapons and Human Shield, which allows you to take powerful defensive stances to protect your allies and heal them. These tracks also define your SURGES.

SURGES function as quicker and less powerful versions of major actions. They are only used to punish an enemy who provokes a REACTION or when another ability calls on a character to use them.

If you would like to learn more about SURGES see (pg. 26).

Minor tracks add another layer to how you act on the battlefield. Examples include Breath Weapon, allowing you to breath fire or other elements, and Shield Master, which allows the player to block incoming damage. Minor tracks can be used to make up for weaknesses in a character's major track, or to compliment their strengths.

Innate tracks normally modify other abilities or function as non-action abilities themselves. Examples include Death Armor, which allows you to protect yourself with the souls of your fallen enemies, and Ninja, which allows you to hide from your enemies.

Innate tracks will also define your COUNTER, which is an ability used when you are attacked. They tell you how you benefit from REFRESHES, which will extend your resources for the battle, and suffer from DEPLETED, which will drain those resources.

If you would like to learn more about COUNTERS, see (pg. 339). If you would like to learn more about REFRESHES and DEPLETED, see (pg. 339)

Most abilities will also define a BOOST. BOOSTS function as special buffs that are unique to the track they are found in and, often, a specific ability in that track. However, every BOOST also has a PENALTY, which is the inverse of the BOOST. Characters will

most often gain BOOSTS from allies, while enemies attempt to apply PENALTIES. Characters may stack an unlimited number of BOOSTS or PENALTIES, but may only apply a net two per major action or a net one per minor action.

If you would like to learn more about BOOSTS and PENALTIES, see (pg. 340).

Offensive tracks focus on hurting a character's enemies, either by directly damaging than or by helping allies to do the same. Similarly, defensive tracks help a character and their allies avoid or weather damage, sometimes by debilitating enemies. Healing also falls under the purview of defense. These two styles of tracks focus very heavily on their roles. However, defensive major tracks will always have an offensive component.

Mixed tracks have both offensive and defensive abilities that they can alternate between as the battle shifts, while varied tracks have both offensive and defensive options that you can choose from when creating or leveling your character.

Every party should have a few characters with at least one offensive track, but any combination of styles should be balanced for an individual character. We strongly recommend new players have at least one offensive and one defensive track as this provides a good mix of survivability and offensive capabilities. Characters who only have defensive tracks will tend to take support roles, while characters with only offensive tracks will tend to be glass cannons that rely on other characters to keep them alive. More advanced players can experiment with using mixed, in place of more dedicated ones, to cover the characters needs. A varied track can very easily stand in for a defensive or offensive track, provided options of that type are selected, otherwise it fills a role similar to mixed. The mixture of track types you take has a strong impact on how your character will function.

Finally, every track list a complexity of low, medium, or high. The higher the complexity the more difficult the track will be to use effectively and the more mechanics it is likely to involve. However, more complex tracks are not more powerful than simpler ones. In fact, high complexity tracks are more reliant on players skill to function correctly and maybe weaker than expected if used poorly.

Reading Tracks

1 Warrior

2 Major Offensive

Warriors are masters of armed combat. They have studied martial combat intently, and have unmatched skill with their weapon. 3

Jack assessed his foe. The chain, he decided, and pulled out a long spiked chain, holding it ready. The samurai approached, and Jack struck, sending out the chain to catch his opponent's foot, pulling them to the ground. He then swung the chain around him dizzyingly, 4 using its momentum up in a complex dance. The samurai rolled back to his feet, only to find the chain wrapping around his arm, pulling him off balance, and more chains fell upon his neck and other arm, restraining him. "A good choice", Jack reflected silently.

Adaptation

This TRACK can represent a master of the gun or bow as easily as a blademaker. Exotic weapons can be a normal weapon used with an advanced style. Con 5 using an exotic weapon with the ancestral weapon feat can yield a character with an extremely special weapon.

Track Header

The beginning of each track has a listing of information about the track.

1. **Title** The name of the track
2. **Track Type** Whether the track is Major, Minor, or Innate, and whether its focus is on offense, defense, a mixture, or if it varies.
3. **Description** Offers a brief description of what the track is
4. **Story** A short story demonstrating the track in use.
5. **Adaptation** Suggestions on how to adapt the track to other concepts or settings.

Facets

1 First Facet★ 2

- 3 **Skilled Figh** 4 [WO]: Your precision only rises with your skill.

As a major action, you may make 2 STRIKES that deal 13|15|18|20 damage. The STRIKES have a +C - 3 modifier to hit. 5 **Boost**: These STRIKES deal 3|3|3|4 extra damage per hit.

- 6 **Deadly Maneuvers**: You make attacking into an art form. 7

Before you use Skilled Fighter, you can choose a combat maneuver. Push and grapple may only be used with a melee attack. If either STRIKE hits, you may use the chosen combat maneuver, which always succeeds

Combat Maneuvers

- 8 ➤ **Trip** Makes your target PRONE.
 ➤ **Grapple** Makes the target GRAPPLED by you.
 ➤ **Push** FORCE your target one hex in any direction. You can move with them if you choose.
 ➤ **Hamper** Inflicts DISABLED. Your target may spend a STEP to remove this DISABLED.

- 9 **Surge** [W]: As a SURGE, you may make a STRIKE that deal 15|18|21|24 damage. The STRIKE has a +C - 3 bonus to hit **Boost**: Increase the damage by C + 2

Each TRACK is split into several facets. You will gain each facet at a different level as you progress. Each facet will have one or more abilities listed; unless specified otherwise, you will get all of these abilities when you get the facet.

Many abilities will have numbers in them. Some of them are a straight number. Others will have a formula, which will yield a changing number based on your tier. When it specifies C in such a formula, it is referring to your Caliber, which is dependent on your tier. Other times it may list numbers such as 1|2|3|4. In these cases, you get the given values for each tier; in this example, 1 at Champion tier, 2 at Heroic tier, 3 at Immortal tier, and 4 at Myth tier.

1. **Facet Number** The number of the Facet
2. **Perk Indicator** Many facets also come with a perk point. These facets are marked with a ★

and you gain a perk point whenever you gain one. Facets without a perk point are judged to be useful enough for more than bashing heads in their own right that they are worth a perk by themselves.

3. **Ability Name** Tracks often come with several abilities, each of which has its own name.
4. **Ability Tags** Ability tags give some important extra information about an ability, see below for the specific tag meanings.
5. **Boost** Many abilities have an associated boost effect. When you are given boosts, you can spend them to improve the ability in the manner specified.
6. **Additional Abilities** Some abilities require an action to use, others will modify existing abilities or function independently.
7. **Ability Flavor** A short description to give you an idea of what the ability is trying to do. These have no rules weight.
8. **Sub-Abilities** Sometimes multiple abilities are defined beneath a normal ability. Depending on the ability, you may get all of them or have to make a choice.
9. **Surge** Some tracks will define a surge. This is a special quicker attack you can use when other abilities grant you a surge.

First Facet★

Skin of Steel: *Your armor protects you from harm.*
You have $8 \times C$ RESISTANCE.

1 **Ironhide**[C]: As a COUNTER, reduce the damage taken by C . If the attack dealt no damage before this reduction, become ON GUARD.

2 **REFRESH:** You may use a REFRESH to gain $2 \times C$ RESISTANCE. 3 **DEplete:** Lose $2 \times C$ RESISTANCE. You are FULLY DEPLETED if you have less than $2 \times C$ RESISTANCE.

Stand Firm: *You plant yourself in place, not to be moved.*

At the end of a turn, you may declare yourself as standing firm. You cannot move or be moved from your hex by any means until the end of your next turn.

1. **Counter** Counters, indicated with [C], offer ways to respond to an attack against you.
2. **REFRESH** Refreshes are granted to you by other abilities, and your tracks determine what benefits you can get from them.
3. **DEplete** DEPLETED is an effect applied to you that drains your innate track. When your track can no longer be DEPLETED, it is FULLY DEPLETED, and being depleted will instead block you from gaining REFRESHES.

Ability Tags

Ability Tags are used to quickly tell players what special properties and how an ability must be treated:

[W]eapon, [W]. This ability requires a weapon and uses the weapon's targeting. It provokes based on the weapon rules.

[S]pecial, [S]. This ability requires extra focus, and is hard to use with certain abilities.

[R]eckless, [R]. This ability opens you to REACTIONS.

[R]eckless Melee, [Rm] This ability opens you to REACTIONS, except when you use it against a target within their melee range.

[H]eavy, [H]. This ability cannot be used as part of a readied action.

[O]verwhelming, [O]. This ability is extra effective at depleting certain defenses.

[C]ounter, [C] These abilities are only used when you are attacked by an ability that can deal hit point damage.

Examples

Here are a few examples of track combinations and how they would play.

Warrior / Shield Master / Steel Mountain - A weapon master who fights with supreme skill, using his shield and armor to fight on the front lines

Powerhouse / Warcries / Rage - An extremely strong warrior who gets angry at his foes, screaming at them to demoralize them.

Assassin / Blighter Spellblade / Ninja - A very sneaky character who poisons his weapons and strikes from the shadows

Ying / Holy Healer / Guardian Spirit - A dedicated healer who restores their allies health.

Tactician / Illusionist / Buff Spells - A wizard who manipulates the battlefield and enhances their allies.

Elementalist / Destroyer / Death Armor - A mage devoted to making things explode.

Polymorph / Green Sage / Companion - A nature based spellcaster who can take on the forms of various animals, control plants, and has an animal that fights alongside himself.

Sniper / Acrobat / Scout - A nimble character who likes to sneak around at range, taking enemies out from afar.

Kung Fu Master / Manuevers / Martial Disciple - An unarmed combatant that uses kung fu to move around the battlefield and disable opponents.

Track Listings

You can find the specific tracks listed in Track Listings(pg. 171), but here is an overview of the various tracks. There are many tracks and just reading them all is a lot, so feel free to browse the overviews for specific ones that catch your interest.

Major Offense

Chapter 9

Features

Characters gain two Features at level 1, and an additional single feature at 2, 4, 6, 8, 10, 12, and 14 for a total of nine features.

Features are abilities that are useful tactically or

combatively. By default, they can be taken only once. Some features can be taken more than once, and will have rules for a greater effect.

Name	Prerequisites	Effect
Accelerator	-	Gain speed each round
Allyport	TELEPORT Ability	You can target allies with a teleport
Ancestral Weapon	Bound Item(Weapon)	Make a Bound Weapon more powerful
Arcane Blade	Non [W]eapon ability	Use spells with a weapon
Artillery	Have AoE	Save an AoE for later
Attuned Item	Possess an Artifact	Bind and upgrade an Artifact
Aura	-	Turn BARRIER HIT POINTS into AREA BARRIER HIT POINTS
Battlespell - Clear Space	-	Remove afflicted hexes
Battlespell - Dimension Door	-	TELEPORT across the battlefield
Battlespell - Elemental Protection	-	Protect an ally from ENERGY EFFECTS
Battlespell - Enlarge Person	-	Make an ally larger
Battlespell - Natural Power	-	Enhance a creature
Battlespell - Protective Ward	-	Protect an ally from an enemy
Battlespell - Wall of Force	-	Create a barrier to impede movement
Bayonet	-	Take reactions against charge with long weapon
Benefactor	-	Healing you receive you may pass to an ally instead
Bound Item	-	Gain a 2pt Artifact that you always have
Breakneck Pace	-	Add +3 base speed
Bull Rush	-	Push enemies with your charge
Convenient Obstacles	-	Create difficult terrain
Cowboy Style	-	DISABLE enemies at range
Cursed Aura	-	SLOW enemies around you
Dancer	-	DASH 1 hex per round
Distracting Shot	Wield weapons	Let allies flank against your ranged attacks
Dominating Presence	-	Raise your TP when you attack
Echoed Power	Have AoE	Makes AoEs hit again
Elusive Summons	-	Lower your summons TP
Evade Notice	-	1/enc, make yourself less of a target.
Exit Stage Right	-	Spend a minor to move
Exotic Weapon Proficiency	Wield Weapons	Use exotic weapons
Expanded Knowledge	-	Ask two questions about your enemies
Extraction	-	Move an injured ally when you heal them
Eye of the Storm	-	Use AoEs on yourself safely
Familiar	-	Gain a familiar
>Arcane Familiar	Familiar	Cast spells through your familiar
>Distracting Ally	Familiar	Familiar inflicts OFF BALANCE
>Elemental Familiar	Familiar	Inflict an ENERGY EFFECT with your familiar
>Sneaky Familiar	Familiar	Your familiar has a lowered target priority
>Transposition	Familiar	Swap locations with your familiar
Fire Mastery	-	Inflict alternative conditions with IGNITED

Name	Prerequisites	Effect
Flanking Master	-	DISABLE enemies you flank
Flashstep	-	TELEPORT yourself around
Frantic Brawl	-	Protection from ranged attacks while in melee
Freezing Mastery	-	Inflict alternative conditions with FROZEN
Fruit of the patient	-	Gain EDGE when going last.
Fusion	-	Fuse with an ally
Goad	-	Choose which enemy acts next
Guardian	-	Protect an ally
Hammerspace	-	Pull weapons out of thin air
Harrier	-	Enemy must attack you or you move towards them
Head Smash	-	penalize your enemies
Hostile Teleport	TELEPORT ability	TELEPORT an enemy
Improvised Weapon Mastery	Wield Weapons	Improve improvised weapons.
Infuse Weapon	-	Turn ability into RIDER
Insignificant	-	Lower enemy target priority when you WEAKEN them.
Insult to Injury	-	Allies may DASH after you penalize enemy
Interceptor	-	Take a hit for an adjacent ally
Into the Breach	-	TELEPORT your ally
Iocane Powder	-	Gain an immunity
Knife Play	Wield weapons	Surprise opponents with deft weapons
Last Gasp	-	Let wounded allies act
Lawn Gnome Dart	Large	Throw allies
Leaper	-	Jump easily
Marching Orders	-	Spend STEPS to move allies
Momentum Defense	-	Trip enemies who charge you
Outdraw	-	Go before an enemy
Pick Target	-	Ignore TP for damaged enemy
Piggyback	-	Allies can MOUNT you
Point It Out	SCANNER	Share benefits of SCANNER
Point Man	-	Move allies at beginning of encounter
Poisoned Steel	-	Turn damage into ONGOING
Pugilist	-	Your fists are deadly weapons
Quarry	-	Track enemy for entire encounter
Rally	-	Move allies closer to you
Reactive Heal	-	Heal ally when they're attacked
Reaver	-	Terrify foes when you make a kill
>Fight or Flight	Reaver	Alter your target priority with Reaver
>Focused Killer	Reaver	Gain reaver points when focusing on one target
>Killing Intent	Reaver	Stun enemies with reaver
Recall Point	-	Set a point you can always return to
Retaliatory Rage	-	Attack people who hurt you
Sacrificial Heal	-	Damage yourself to increase your healing
Sacrificial Summons	Summoning	Raise a summon target priority
Scanner Array	-	Gain SCANNER range 12
Selective Hunter	-	Ignore target priority
Selective Shockwave	AoE Ability	An ally in your AoE can DASH 2 out of it
Self Preservation	-	Heal yourself 1/enc
Shock Mastery	-	Inflict alternative conditions with SHOCKED
Spellguard	[R] or [RM] ability	Protect a single ability from provoking
Spread The Love	-	Gain EDGE against new creatures
Stable Flier	-	Extend your range while flying
Switcharoo	TELEPORT Ability	You can swap the position of two allies
Take The Grenade	-	Take the brunt of AoE damage to spare your allies
Take Your Burden	-	Transfer your allies conditions to yourself
Teacher	-	Grant a Feature to your ally
Telekinesis	-	1/rd, move a creature 1 hex
Telepathic Extension	-	Link your senses to a telepathic network
The Look	-	Turn your Boosts into Penalties
Trackformer	-	Swap between two specified TRACKS
Urban Camo	-	Lower your target priority at long distance
Vacuum Blade	-	Make ranged attacks with melee weapons

Name	Prerequisites	Effect
Wake	-	Shove people by running by
Wild Growth	-	Grow a trail of difficult terrain
YOU SHALL NOT PASS	-	Prevent enemies from moving past you

Monster Tactical Abilities

At level 1 only, you can spend your two starting features to get a single monster tactical ability (pg. 160) to help represent a more capable character concept, such as a powerful race.

Features

Accelerator

Be the fastest thing alive.

Each round, your speed increases by 1, to a maximum of +6.

Allyport [Teleport]

You go instead.

Prerequisite: A TELEPORT ability

You may use an ability that would allow you to teleport yourself to teleport an adjacent ally instead.

Ancestral Weapon

You have a deep bond with your weapon, allowing you to unlock more power.

Prerequisite: A BOUND weapon

Your BOUND weapon may be remade with 2 more points.

Arcane Blade

Direct Channeling.

Prerequisite: A single target non-weapon ability

You may add the [W]eapon tag to any single target non-weapon abilities you have, or any you acquire later. Any defense rolls the ability requires are now attack rolls. The modifier for the defense rolls is subtracted from the attack rolls.

Artillery

What goes up, must come down. Eventually.

When using a ranged AoE, (Note: most lines are not ranged) you may instead launch it into the air. This doesn't target anything, but at any point after this during the encounter you may place the AoE anywhere within your current range and gain its effect.

Attuned Item

You unlock an items Hidden Power.

Prerequisite: Possess an artifact

Pick an artifact you own. This artifact is now BOUND to you, and you can upgrade it with an additional 2 points, which can be used to add new enchantments, remove modifiers or add modifiers to that artifact. If this item is lost, you may attune a new artifact, but otherwise this attunement is permanent.

Aura

Protective shielding.

When you gain BARRIER HIT POINTS, including any BARRIER HIT POINTS you start the encounter with, you may instead have your hex and all adjacent hexes gain AREA BARRIER HIT POINTS. These effected hexes move with you. This AREA BARRIER HIT POINTS only protects you and your allies. If you grant an ally BARRIER HIT POINTS, you may instead grant AREA BARRIER HIT POINTS in the same manner.

Battlespells

See (pg. 27) for information on using battlespells.

Battlespell - Clear Space[R]

Lets tidy that up.

Cast a battlespell. If successful, you may remove any afflicted from hexes within range 12 of you.

Battlespell - Dimension Door[R]

Through the cracks of reality.

Cast a battlespell. If successful, you can WARP to any hex within 12 hexes.

Battlespell - Elemental Protection[R]

Asbestos in a can.

Cast a battlespell. If successful, you can grant one ally within 6 hexes immunity to a ENERGY EFFECT of your choice for the rest of the encounter.

Battlespell - Enlarge Person[R]

Instant Growth Spurt.

Cast a battlespell. If successful, you can make one ally within 12 hexes large for the encounter. If they are already large, they become huge. You can only have one ally enlarged with this and they cannot be enlarged twice with it. You may end this effect on your turn.

Battlespell - Natural Power[R]*Strength of Bear, Grace of Cat.*

Cast a battlespell. If successful, you may grant an ally within 12 hexes one of the following effects.

- **Speed:** +2 speed
- **Strength:** Once per round, strike adjacent opponent to **FORCE** them one hex
- **Wit:** Once per round, Raise or lower your target priority for one opponent for one round. Attacks that violate this priority get a **PENALTY**.

Battlespell - Protective Ward[R]*You shield an ally from harm.*

Cast a battlespell. If successful, you may ward an ally within 12 hexes against a specific enemy. That ally has a lowered target priority to attack that enemy, and that enemy cannot violate target priority to attack that ally. This effect ends if that ally attacks that enemy.

Battlespell- Wall of Force[R]*You create a barrier of force that is hard to pass through.*

Cast a battlespell. If successful, you may afflict 6 consecutive hex edges in a straight line within 12 hexes. These edges cost an extra 2 **STEPS** to cross.

Benefactor*You are able to pass along healing to others.*

Whenever you would be healed by any effect, you may forgo that healing to heal an ally within 12 hexes the same amount.

Bound Item*You are deeply linked to a magical item.*

Design a 2 point artifact to be **BOUND** to you. You gain and always have the benefit of this item.

Breakneck Pace*Gotta go fast.*

Your speed increases by 3. Special: You may take this feature twice. Its effects stack.

Bull Rush*Unstoppable force.*

When you use charge, after making your attack, if your opponent fails a defense roll you can continue moving in a straight line for the remainder of your movement, and **FORCE** your opponent to move with you.

Convenient Obstacles*The battlefield is in your favor.*

At the beginning of each encounter, you may choose 6 hexes within 12 hexes of you. Those hexes become difficult terrain.

Cowboy Style*Fancy shooting has its uses.*

Two times per encounter, you may force an opponent you attacked with a ranged weapon to make a defense roll or be **DISABLED**.

Cursed Aura*Your presence is soul sucking.*

At the beginning of your turn, each creature within 3 hexes becomes **SLOW** 1 for 1 round.

Dancer*Graceful as a swan.*

Once per round, you may **DASH** one hex.

Distracting Shot*I'm not touching you.*

Prerequisite: Wield weapons

When you attack an enemy with a ranged weapon, you count as providing flanking to that enemy from the hex where your line of effect entered their hex.

Dominating Presence*You're fighting ME!*

Whenever you attack a target, your target priority for them increases. If they attack other people in violation of your target priority you may take a **SURGE** against them.

Echoed Power*ECHO Echo echo echo*

When you use an AoE, you may choose to have it echo. If you do, 2 rounds later it effects the same hexes again. This effect is obvious to everyone. You may only have 1 AoE echoing at a time, starting a new echo will end any current echos. If an AoE consists of multiple shapes, such as firing 2 lines, only one of these shapes can be echoed. These echoes affect your allies as well, even if the original ability does not.

Elusive Summon

Your summons are your fur babies.

Prerequisite: Summon ability

When you summon a creature, you may lower its target priority. Attacking it in violation of this priority will incur a 25% miss chance.

Evade Notice

Don't mind me, I'm not important.

Once per encounter, you may lower your target priority for 1 round. You cannot be targeted if there is a higher priority target available.

Exit Stage Right

Time to skedaddle!

Once per encounter, as a minor action, you may gain 6 STEPS and be ON GUARD 2. **Boost:** Increase the ON GUARD by 1.

Exotic Weapon Proficiency

While you were studying the sword, I was studying the kusari-gama.

Prerequisite: Wield Weapons

Choose a weapon property. You can use exotic weapons with that property, and can carry an additional weapon.

Expanded Knowledge

You are well versed in your opponents weaknesses.

You may ask 2 questions about your enemies during an encounter as if your applicable role was 2 higher. (pg. 31)

You may take this feature an additional time. If you do, you may instead ask 4 additional questions.

Extraction

Need evac, now!

Once per round, when you heal an ally, if they are under half health you may DIRECT them 3 hexes.

Eye of the Storm

Close range explosions!

When you use an AoE, you are immune to its effects, and if you are in the area the ability does not have the [R]eckless tag if it had it.

Familiar

This creature may not be the most impressive ally, but you find it useful.

You gain the companionship of a small creature with 1 tactical ability from the monster tactical ability list. It has a speed of 6, moves on your turn, never provokes from moving, and can share hexes with other creatures. You may draw LINE OF SIGHT from its hex. It has $2 \times C$ HIT POINTS and is BONDED to you, but it is immune to AoEs while it is adjacent to an ally. It may MOUNT you or an ally. If it is killed, you may replace it between encounters.

You may select this feature multiple times. Each time after the first, instead, you may increase the HIT POINTS of your familiar by up to $2 \times C$, and it gains an additional ability from the monster tactical ability.

> Arcane Familiar

Spell channeling ally.

Prerequisite: Familiar

You may draw line of effect and line of sight for non[W]eapon attacks through your familiar. Your familiar gains $2 \times C$ more HIT POINTS.

> Distracting Ally

Bird in your face,

Prerequisite: Familiar

Your familiar can move into enemy hexes. When sharing a hex with an enemy, that enemy is OFF BALANCE. Your familiar has $2 \times C$ more HIT POINTS.

> Elemental Familiar

Pet firebird.

Prerequisites: Familiar

Choose an ENERGY EFFECT. Once per round, you may have an enemy in the same hex as your familiar or adjacent to your familiar gain that ENERGY EFFECT ELEMENTAL CONDITION. Your familiar gains $2 \times C$ HIT POINTS.

> Sneaky Familiar

The itty bitty spider crawled up the water spout.

Prerequisite: Familiar

Your familiar has a lowered target priority. Attacks that violate this target priority have a PENALTY. You may negate any effects that would raise this target priority. Your familiar has $2 \times C$ more HIT POINTS.

> Transposition

You use your familiar as a focus point to teleport.

prerequisite: Familiar

You may WARP to your familiar's hex and WARP your familiar to the hex you left behind at the start of your turn. Your familiar gains $2 \times C$ more HIT POINTS.

Fire Mastery

Deeper fire control.

When you inflict IGNITED on an enemy who is not immune to it, you may instead inflict one of the following effects;

- > **Heat Weapon:** If the target is still wielding their current non-natural weapon at the end of their turn, they take C damage. They may drop the weapon for free.
- > **Flare:** The target must either immediately close their eyes and become BLIND 0 until their turn or become BLIND 9 for the rest of the encounter. If they are already BLIND and they do not close their eyes the radius of their BLIND decreases by 1.

Flanking Master

Kidney Strike.

When you attack an enemy that you are flanking, inflict DISABLED on that enemy.

Flashstep [Teleport]

In an instant, you are across the battlefield.

Once per encounter, you can exchange STEPS to TELEPORT hexes equal to the amount of STEPS you've exchanged.

You can select this feature a second time. If you do, you may use this ability any number of times per encounter.

Frantic Brawl

Chaos of Melee.

When you are in melee with an enemy, you have an EDGE against ranged attacks at you from outside melee range. This lowers your target priority for ranged attacks, but violating this target priority is not needed for the EDGE to apply.

Freezing Mastery

Deeper ice control.

When you inflict FROZEN on an enemy who is not immune to it, you may instead inflict one of the following effects

- > **Freeze Weapon:** By encasing their non-natural weapon in ice, you make it hard to use. They gain DISABLED1 until they switch weapons.

- > **Numbness:** The creature gains slow 1 for the encounter.

Fruit of the Patient

Good things come to those who wait.

You gain an EDGE on your attacks if you are the last creature to act in a round. You may delay your turn until after the enemies have acted to achieve this.

Fusion

In times of desperation, you can combine your essence with another.

Prerequisite: Must not use Mook majors

When you use last stand, you may pick an ally to fuse with. If an ally uses last stand, you may choose to fuse with that ally.

When you fuse, you become one character and share a space. This new character retains the invulnerability of last stand, but you and your ally both skip your next turn. The fusion character has the combined HIT POINTS of both characters, and access to all of the characters' tracks, items, and features. It can take two turns each round if both allies can take normal turns. When attacked, it only uses one counter ability. Upon fusing, it gains $8 \times C$ HIT POINTS, 2 REFRESHES, and can restore all lesser conditions effecting it.

Special: If the character you fuse with also has this feature, your fusion form may either have 2 extra features or a monster tactical ability, specific to the pairing of your two characters. If you have a feature in common which cannot be taken multiple times, you may gain an additional bonus feature in the fusion form. If the fusion form has Trackformer, it may change it's major or minor track when it is formed.

Goad

Hey batta batta.

At the end of your turn, you may pick which enemy acts next, from the available options. This overrides the current selection of which enemy acts next.

Guardian

Angelic or otherwise.

At the beginning of each encounter, choose an ally. If an enemy attacks that ally when they could target you without violating target priority, they receive 2 PENALTIES on the attack. You cannot be a guardian of someone who is your guardian, or a guardian of your guardian, etc.

Hammerspace

You form weapons out of nothing.

You may draw any standard weapon, even if you do not have it on you. If you have an enchanted weapon, you can spend 5 minutes to make it BOUND to you, and you can always draw it, summoning it to your hand if necessary. If you have a weapon that is already BOUND to you without this, the weapon enchantments granted by them can be applied to any weapon you draw in this way.

Harrier

You shall always pursue them.

One per round, select an enemy. If they don't attack you on their turn, you may immediately DASH 3 hexes towards them.

Head Smash

In case of emergency, apply directly to the forehead.

Once per encounter, when you deal at least C damage to an enemy, you may reduce that damage by C to give that enemy a PENALTY and inflict DIZZY 2 for one round.

Hostile Teleport

You have increased your control over your teleportation and can force it on others.

Prerequisites: Having access to a TELEPORT ability.

When you would use an ability that allows you to TELEPORT an ally, you may TELEPORT an enemy as if they were your ally. That enemy may make a defense roll. If the defense roll succeeds, they may choose the destination of the TELEPORT, otherwise you choose. The radius of the TELEPORT is as defined by the base ability, which is still treated as used when you use this ability.

Improvised Weapon Mastery

Everything is a weapon.

Prerequisite: Wield Weapons

Improvised weapons you wield may have two additional weapon property. You may apply weapon enchantments from your unarmed attacks to improvised weapons.

Infuse Weapon

Feel my power.

Once per round, pick a non weapon ability you can use. You may infuse that into a weapon your ally within 12 hexes is wielding, granting that ally a RIDER that inflicts any lesser conditions your ability would directly inflict, with the same defensive targeting(i.e. if the ability requires a failed defense roll to inflict its

effect, so does the rider). If the ability has a limited number of uses this counts against that limit.

Insignificant

You make an enemy seem insignificant.

When you inflict the WEAKENED condition on an enemy, you may reduce their target priority by up to 2 for the rest of the encounter.

Insult to Injury

Too slow

Once per round, when you give a creature a PENALTY, the next time they attack a creature that target can DASH 2 hexes after the attack resolves.

Interceptor

You bodily insert yourself between your ally and danger.

If an ally adjacent to you is targeted by an ability that does not also target you, you may move into the nearest hex in the ability's range and have it target you instead.

Into the Breach

Once more we sally forth.

As a minor action, you may TELEPORT an ally within 12 hexes to another hex within 12 hexes that is more than 6 hexes away from their current hex. They may take a SURGE. **Boost:** The ally gains a BOOST on their SURGE.

Iocane Powder

Inconceivable.

Pick one condition from the following list. You are immune to that condition: SLOW , STOPPED, PRONE, DIZZY , GRAPPLED, BLINDED , BLEEDING , STUNNED, IGNITED , SHOCKED, FROZEN.

Knife Play

This is a knife.

Prerequisite: Wield weapons

Once per turn, when you switch to a deft weapon, or as a STEP while wielding a deft weapon, you may render an opponent in your melee range OFF BALANCE. Drawing a deft weapon never provokes.

Last Gasp

Come on buddy we need ya.

When you are standing next to a WOUNDED ally, you may grant that ally one of your actions. They can use that action as though they are not WOUNDED. Any effects that affect them affect you instead.

Lawn Gnome Dart*Tossing allies for fun and profit.***Prerequisite:** Large or larger

You may throw any ally smaller than yourself within your melee range to a new hex by spending 1 STEP for every 2 hexes away it is. The ally is in air during this movement and remains in air until the end of their turn or they decide to land, as if they had jumped. This is FORCED movement.

Leaper*From up on high.*

You may Jump 3 for no action cost while on the ground.

Marching Orders*Step to the beat.*

You may spend STEPS to DIRECT allies 1 hex per STEP. Any given ally can only move up to their speed from uses of this ability each round, regardless of source.

Momentum Defense*Use their momentum against them.*

Whenever an enemy uses a MOMENTUM ATTACK against you, you may knock them PRONE at the end of their movement.

Outdraw*Itchy trigger finger.***Prerequisite:** Wield weapons

On the first round of combat, you may swap your turn with the enemy that would have gone before you. If you do, you must draw and use a ranged weapon.

Pick Target*Nothing will sway you from your prey.*

When you deal damage to an enemy, you may ignore target priority for that target for the rest of the encounter.

Piggyback*You carry allies around on your shoulders.*

Whenever an ally is in a hex adjacent to you, you may spend a STEP to put that ally on your back or that ally may spend a STEP to hop on your back. That ally becomes MOUNTED, and you are the MOUNT.

Point It Out*He's over there.***Prerequisite:** SCANNER

If you can detect a creature with SCANNER, your allies also gain the benefits of scanner to that enemy as well.

Point Man*Utilize scouting for a better position.*

At the start of the encounter, all allies may DASH 6 hexes. If they already moved due to this ability, you may instead increase the distance they dash by 2.

Poisoned Steel*Poison dripping from my blade.*

When you deal damage, you make it into ONGOING damage. The target may make a defense roll with a +3 modifier to half the ongoing. This still triggers counters.

Pugilist*Float like a butterfly, sting like a bee.***Prerequisite:** Wield weapons

Your unarmed attacks gain 2 weapon properties of your choice, and you do not provoke reactions when making unarmed attacks. If you have a bound weapon, your unarmed attacks may be the weapon that receives the enchantment.

Quarry*No evil shall escape my sight.*

Once per encounter, select a creature. You always treat that creature's target priority as one step higher and have scanner to that creature. There is no range limit on that scanner ability. This lasts till the end of the encounter.

Rally*To me, my allies.*

At the start of your turn, you may DIRECT all allies within 6 hexes of you 3 hexes towards you.

Reactive Heal*You are just waiting for an opening to heal your ally.*

Once per round, you may lower the target priority of an ally until the start of your next turn. Violating that target priority heals the ally $2 \times C$.

Reaver

Your kills terrify your foes.

When an enemy is dropped, if you attacked it during your most recent turn, gain a reaver token. At the start of each enemy's turn, If you have LINE OF SIGHT to an enemy and at least 1 reaver token, they are [FEAR] SLOW 1. A defense roll negates this unless one of the creatures they can see gained a reaver token this round.

At the start of an enemies turn, If there is an enemy with at least 2 reaver tokens which they do not have LINE OF SIGHT to, they become [FEAR] DIZZY 1.

If you have at least 3 reaver tokens, you gain SCANNER X for any enemy that has been affected by this ability, where X is 4 times the number of reaver tokens you currently have, and can ignore the penalty from cover for such creatures.

> Fight or Flight

Fear is power.

Prerequisite: Reaver

When you gain a reaver token, you may modify your target priority by up to 2 for 1 round. If an enemy violates this target priority, you may take a SURGE against them.

> Focused Killer

You are unrelenting.

Prerequisite: Reaver

If you attacked one and only one target last round, you gain a reaver token if you attack that same target and no one else this round.

> Killing Intent

You set your eyes on your next target and their blood runs cold.

Prerequisite: Reaver

By spending 3 reaver tokens, you inflict [FEAR] STUNNED on every enemy with LINE OF SIGHT to you. A defensive roll negates this effect. If an enemy has cover to you, they may ignore this effect for as long as they stay behind cover.

Recall Point

You teleport back to a designated location.

Once per encounter, at any point in an encounter, you may set a hex you're on as a Recall Point.

Unlimited times an encounter, on your turn, you may spend your remaining STEPS to return to that hex as a WARP TELEPORT.

Retaliatory Rage

Single minded focus.

If you have been damaged this encounter, the creature who last attacked you always has maximum target priority for you. You have an EDGE when attacking that creature, but violating this priority gives creatures you attack an EDGE against your attacks.

Sacrificial Heal

Take my power.

Once per encounter, when you heal an ally, you may deal $4 \times C$ damage to yourself to heal that ally by an additional $4 \times C$. You cannot use this if you would be WOUNDED or killed by it.

Sacrificial Summons

Summon cannon fodder.

Prerequisite: Summoning ability

When you summon a creature, you may raise its target priority. If this target priority is violated it may take a SURGE against the violator.

Scanner Array

You can sense where opponents are.

You gain SCANNER 12. Optionally, you may type your ability as [GROUND] or [MENTAL] to add +12 to the base range.

You may take this feature any number of times. Each time you do, you may either increase the range by 12, or remove the [GROUND] or [MENTAL] tag.

Selective Hunter

You may attack creatures in violation of Target Priority without triggering it, but the creature has an EDGE against such attacks.

Selective Shockwave [R]

Your skill with explosives is so great you can knock allies away without harm.

Prerequisite: an AoE ability

When you use an AoE, you may have one ally in the area DASH 2 hexes before it takes effect.

Self Preservation

Staying alive, Staying alive.

Prerequisite: Must not use Mook majors

Once per encounter, as a major action, you may heal yourself $4 \times C$ and lower your target priority for one round. If you are attacked in violation of this target priority, you may make a SURGE against the attacker. **Boost:** Increase the healing by C.

Shock Mastery*Deeper electrical control.*

When you inflict SHOCKED on an enemy who is not immune to it, you may instead inflict one of the following effects:

- **Shock Weapon:** The target has a 20% miss chance on their next weapon attack unless they switch weapons or use a natural weapon.
- **Magnetize:** You may raise or lower the target priority of your target by 1.

Spellguard*You have practiced with a specific technique enough to guard yourself while using it.*

Prerequisites: An ability that provokes Reactive Strike

Pick one ability you possess from any TRACK or facet that is tagged as [R]eckless or [Rm]eckless melee (See the TRACKS chapter). This ability no longer has that tag. If you gain a new facet in the TRACK/ from the ability you select, you can choose to have Spellguard remove the [R]eckless or [Rm]eckless melee tag from that ability instead as a permanent switch you choose every time you gain a new facet in that TRACK.

You may take this feature any number of times. Each time you do, you may select an additional ability.

Spread the love*Everyone needs to be attacked*

You have an EDGE against creatures you have not attacked before in this encounter as long as another creature you have attacked this encounter is not Dropped.

Stable Flier*Your aim while in air is remarkable.*

Prerequisite: Flight

When in air, your range is no longer halved, but you have a maximum range of 12 hexes.

Switcharoo [Teleport]*Bait 'n Switch.*

Prerequisite: A TELEPORT ability

When you would TELEPORT an ally, you can TELEPORT them into a hex occupied by an ally within that TELEPORT ability's targeting. If you do so, those creatures instead swap places.

Take the Grenade*You are willing to sacrifice yourself to protect your allies.*

When you would be affected by an enemy's ability that also affects your allies, you may become subject to that ability an additional time. If you do, your allies are unaffected by that ability.

Take Your Burden*Self sacrifice.*

When you heal an ally, you may remove all restorable conditions affecting them. You are effected by these conditions instead.

Teacher*Your sage mentorship aids your allies in combat.*

Pick a feature you have. At the beginning of each encounter, grant that feature to an ally that meets its prerequisites until the end of the encounter.

Telekinesis [R]*The power of your mind can shove other creatures around.*

Once per round, you can FORCE a creature within 12 hexes other than you one hex by spending one STEP.

Telepathic Extension*You receive more than just words from your ally's telepathy.*

You can communicate telepathically with all allies within range 24. Once per encounter, you can extend your senses across telepathic sources to draw LINE OF SIGHT from an ally in telepathic communication for the rest of the encounter.

The Look*You stare into your enemy's eyes and shake them to their core.*

Pick a target within 12 hexes. You may lose any number of your BOOSTS to inflict that many PENALTIES on that target. If you spend at least 4 BOOSTS in this way, your target is STUNNED.

Trackformer*You are able to change your combat style.*

Select two tracks that are the same action cost. (for example, sniper and human shield. Both are sized Major.) One of these tracks must be a track you already possess. This is a permanent choice. Out of combat and at the start of a combat encounter, you may switch between these tracks. This can be the

same track selected twice by this feature with different choices made within that track in each instance. You only gain a Perk Point from a track per facet if both aspects would give a Perk Point at that facet. You may select this feature multiple times. Each time you do you must select a new pair of two tracks with the same action cost. If overall more than two tracks are selected for a given action cost; then all tracks selected must give a Perk Point to gain one upon gaining that facet.

Urban Camo

You make it hard for enemies to spot you while under fire.

When you attack an enemy that is more than 12 hexes away from you, your target priority is lowered for that target until the end of their next turn. Attacking you in violation of this target priority incurs a 25% miss chance.

Vacuum Blade

You swing your weapon so hard the air from its movement damages enemies.

You may treat your melee weapons as ranged weapons with range 12 when attacking.

Wake

The speed of your passage knocks people away.

Once per round per opponent, if you enter and leave a hex adjacent to them you may FORCE them one hex in any direction.

Wild Growth

You are so in tune with the forest that plants sprout out from your footsteps.

Whenever you leave a hex, you may spend an additional STEP to make it into difficult terrain. You are immune to difficult terrain.

Special: You may take this feature a second time. If you do, you no longer need to spend the extra STEP to create the difficult terrain.

YOU SHALL NOT PASS

Fly you fools!

Enemies that enter your melee range on their turn cannot move further away from you than your melee range on that turn.

Chapter 10

Perks, Spells, And Role Powers

Perks are thematic utility abilities of characters that they can often do with no roll; akin to a caped crusader's utility belt or a detective's ability to instantly survey a crime scene.

Player Characters can use their Perks in a lot of situations that don't involve fisticuffs, but by the time fisticuffs have started and parley has been thrown out the window, it's usually too late for a Perk to be applied. A clever use of a perk during a combat encounter can certainly have amazing results, but it's not their primary purpose.

Perks are presented as lists of 'Perk Trees' in which they're grouped by the archetypal theme they fall under. You don't have to take more than one perk from any given tree unless it specifies a prerequisite for it, these are ways to help you understand and sort through your options. Perks cost a certain amount of Perk Points according to their power. A basic perk costs 2 points, while a simple perk only costs 1, and an advanced perk costs 3.

Player Characters begin with 3 Perk Points, and gain additional Perk Points when you gain a facet marked with a ★(including the 1st facet). Specific perks may allow you to invest more perk points for greater effect, and those points may be invested after the perk is purchased.

Perks are ideal candidates for quest-based rewards, as well.

Spells are more complex than perks, requiring perk points to buy the ability to cast spells, but they also require a suitable role to use when casting them, and have various limits on how often they can be used.

Role powers are ways to upgrade the utility of your roles by investing perk points into them, and often grant superhuman capabilities.

Unless otherwise mentioned, perks cannot be taken more than once.

Perks

Name	Prerequisites	Description	Cost
Food Perks(pg. 78)			
Ribsticker	-	Make food that satisfies for longer.	1
Totally Safe	-	Cook safe food with toxic ingredients	1
Immortal Perks(pg. 78)			
Functional Immortality	GM granted	Instead of dying, you defy death.	*
Infiltration Perks(pg. 78)			
Replacement	-	Disguise yourself as a specific other individual.	1
Secret Identity	-	Have a second identity.	1
Species Blender	-	Disguise yourself as a different species	1
Ventriloquit-it	-	Throw your voice	2
Voice Mimicry	-	Speak with someone elses voice	2
Item Perks(pg. 79)			
Crazy Prepared	-	Buy something on the fly as if you've always had it.	2
Cyborg	-	Integrate items into your body.	2
Disguised Gear	-	Make your special gear look mundane.	2
Dream Design	-	Design things while asleep	1
Extended Warranty	-	Get extra uses of consumable items	2
Master Tinker	-	Craft things ahead of time to have them ready later	3
Pickproof pockets	-	Store items securely	2
Pocket Change	-	Pull out loose change	1
Preassembly	-	Make things ahead of time for later deployment.	2
Tinker	-	Create a trinket at a discount, given time.	3
Wealthy	-	Have more money.	X
Information Perks(pg. 78)			
Ate An Encyclopedia Set, not Crayons	-	Have encyclopedic knowledge	3
Crime Scene Reconstruction	-	Know how a fight happened	2
Field Analysis	-	Test things without a lab	2
Gut Feeling	-	Follow up on leads you missed	2
Role Sleuth	-	Determine Roles by observation	2
Show Off	-	Can share a memory	1
Total Recall	-	Remember anything	3
YASD	-	Tell how something died	1
Language Perks(pg. 79)			
High Bandwidth Communication	-	Communicate at high speeds	3
Polyglot	-	Speak any language.	2
Private Language	-	Create a new language	2
Rosetta Text	-	Read any language.	1
Minion Perks(pg. 79)			
Capable Minions	Minion Creation	Improve your minion's Role	1
Create Doppelganger	Minion Creation	Create minion bases on an existing person	2
Manifest	Summon Spirit, Minion Creation	Create minions	2pt
Minion Creation	-	Create minions	2pt
More Minions	Minion Creation	Create a new type of minion	1
Perky Minions	Minion Creation	Grant your minions perks	*
Remote Control	Any Minion Perk	Control a minion directly.	2
Silversong	-	Summon your MOUNT to you.	1
Tactical Minions	Minion Creation	Grant tactical abilities to your minions	2
Nature Perks(pg. 80)			
Create Tools	-	Can always make simple tools.	1
Improvised Ingredients	-	Make a meal with the most meager of materials.	1
I Walk Not Alone	-	Footprints trace a path.	2
Seasoned Native	-	Be at home in a specific environment.	1
Shark Repellent	-	Craft stronger repellents	1

Name	Prerequisites	Description	cost
Sure Footed	-	Regular overland travel through bad terrain.	2
Survival Rations	-	Create food to protect against adverse conditions.	2
Skill Perks(pg. 81)			
Favored Spell	-	Cast a single spell	X
Jack of All Trades	-	Can use any role at rank 1	3
Overachiever	-	Gain extra greater success	2
Seriously Skilled	-	Gain a role point	1
Social Perks(pg. 81)			
Commissioner of Oaths	-	Create magical binding contracts	3
First Impressions	-	Start out any first meeting as a Trusted Ally.	2
Spirit Perks(pg. 81)			
Channel Dead	Summon Spirit	Channel a Summoned Spirit.	2
Newsfeed	Personal Advisor	You and your Advisor know the local news related to your Advisors Knowl-edges.	1
Personal Advisor	-	Gain an advisor who has expert knowledge.	3
Seance	Summon Spirit	Talk to Summoned Spirits.	1
Shared Awakening	Spirit Walk	Bring your allies on Spirit Walks.	2
Spirit Quest	Summon Spirit, Spirit Walk	Find spirits in the area while spirit walking to gain ties to them.	2
Spirit Walk	-	Control your Spirit Form.	3
Summon Spirit	-	Call forth a deceased persons spirit.	2
The Shortest Journey	Spirit Walk	End a Spirit Walk and bring your body to your current spot.	3
TELEPORT Perks(pg. 82)			
Dungeon Dirge	-	TELEPORT your group the the nearest exit.	2
Homeward	-	TELEPORT your group Home.	3
Time Perks(pg. 82)			
Fairy Tale	-	See the past.	1
Tracking Perks(pg. 82)			
Bone Carver	-	Make simple items from bodies.	1
Follow Teleporter	-	Read a recent TELEPORT to learn it's destination.	2
Trackless	-	Do not leave a physical trail.	1
Trophy Hunter	-	Keep trophies of your kills.	2
Political Perks(pg. 82)			
Call The Council	-	Call a council to shift an areas stance.	2
Special Envoy	-	You're always welcome everywhere.	2
Weather Perks(pg. 83)			
Clear Tone	-	Create an anti-fog pocket.	1
Weather Witch	-	Change the weather and make it stick.	2
Worship Perks(pg. 83)			
Detect Worshiper	Declared Deity	Determine if someone worships your deity.	1
Locate Temple	Declared Deity	Determine where your nearest place of worship is.	1
Prayer	-	Ask a Yes/No question once a day.	3
Spellcasting Perks(pg. 86)			
Spellcaster	-	Learn to cast spells	2
Role Powers(pg. 84)			
Sensory	-	Sense things	2
Manipulation	-	Move things	4
Deceitful	-	Trick things	3
Physiological	-	Have unusual biology	2
Communication and Command Powers	-	Talk to things	2/4
Creation	-	Create things	4
Transformative	-	Change things	4
Cosmetic	-	Change your appearance	1

Food Perks

Food Perks deal with creating food

Ribsticker - 1

Food your prepare can be extra nourishing, and can provide sustenance for 3x as long as normal.

Totally Safe - 1

You can cook food from toxic ingredients without the final dish being toxic

Information Perks

I know that you know that I know about that. Don't you know? Now you do.

Ate An Encyclopedia Set, not Crayons - 3

You know anything that would be in an encyclopedia set for where you grew up.

Crime Scene Reconstruction - 2

By spending an hour studying a scene, you can reconstruct a precise sequence of events. You can put together a narrative account of what everyone at the scene did, all attacks made, where people moved, etc. This does not tell you the identity of the participants, but can give broad descriptions, like height and attack methods.

Field Analysis - 2

You can perform analysis of clues on the spot they would normally require sending the clues off to a lab.

Gut Feeling - 2

Once per day, you can ask the GM to point out something you have overlooked or something or someone you can get more information out of.

Role Sleuth - 2

If you observe an action happen, you know if and/or what the relevant role used for it is.

Show-Off - 1

You can show off a memory or chunk of knowledge you possess in a visible fashion. For example a holographic video, a projected whiteboard you manifest, or a group illusion spell.

Total Recall - 3

Anything you've experienced you can remember with perfect recall.

YASD - 1

By directly interacting with a corpse, you can learn what it looked like right before it died, and how it happened.

Immortal Perks

Those who leave behind the limits of the flesh, in part or in whole, are found here.

Functional Immortality - *

Prerequisites: GM Granted This perk cannot be taken normally, but can only be obtained by GM fiat. It could be the result of a quest, some elaborate project, a significant event, plot, or any other reason they deem suitable. They may demand a number of perk points before granting it, or whatever cost they deem suitable. You are functionally immortal, and extremely hard to kill. The way this manifests can vary, depending on the specifics determined when this is obtained. You might automatically revive after a time, teleport back home, respawn at a set point, return from the afterlife, or some other method. This is imperfect. There is some method of disrupting this. Maybe a silver stake through the heart, destroying a phylactery, a specific magical ritual, drowning, etc. This is also established when the perk is granted.

Infiltration Perks

Infiltration Perks are abilities that help you sneak around or disguise yourself.

Replacement - 1

You may disguise yourself as a specific individual, as long as you can meet the other requirements for such an individual (gender, species, etc). You need to have seen them close up in person or seen detailed reproductions of them to pull off the look, heard them speak to mimic their voice, and observed them act to take on their mannerisms.

Secret Identity - 1

You have another identity that has no links between any of your identities. Actions you perform while using this identity are not connected back to your other identity, unless someone witnesses you switch identities.

Species Blender - 1

You may disguise yourself as a member of another species, if you can meet their stature requirements.

Ventriloquit-it - 2

You can sound as if you're speaking from up to any point 10 feet away.

Voice Mimicry - 2

You can speak with a voice that mimics someone else's perfectly if you have heard them speak.

Item Perks

These perks cover creation and different ways of implementing items.

Crazy prepared - 2

You may invest any amount of money in a preparedness fund while you have access to buying trinkets. At any point, you may pull out an item you never bought by spending twice its cost from the preparedness fund.

Cyborg - 2

You may make any of your trinkets part of your body. They are hidden and cannot be removed.

Disguised Gear - 2

You may make any of your Trinkets or Artifacts, and any weapons you possess, look like a mundane item.

Dream Design - 1

The first half of the time to build something can be spent while asleep.

Extended Warranty - 1

Choose a relevant role for each limited use trinket you have. You can get extra uses up to your role rank for each limited use trinket if your role is higher than the items rank.

Master Tinkerer- 4**Prerequisites:** Tinker

You may spend 2 weeks to create a Trinket Token of a given rank, spending \mathcal{M} appropriate to purchase a trinket of that rank. You can also spend 2 day to create a Depletable Trinket Token, spending \mathcal{M} appropriate to purchase a depletable trinket of that rank. You may spend these Trinket Tokens to get an equivalently ranked Trinket later on.

Pickproof Pocket - 2

You can store 1 cubic foot of items in such a way that they cannot be lost or stolen.

Pocket Change - 1

Each day, you can pull out $1d10 + 10 \mathcal{M}$ worth of local currency if you don't have any on you for immediate use.

Preassembly - 2

If you make or craft something somewhere else with a time preparation bonus, you can do it in such a way that 90% of the time is spent there, and only the last 10% is needed to set it up on the final site.

Tinker - 3

A Tinker has significant experience assembling and disassembling things; and can make a trinket at half-cost with a week of effort, or a depletable trinket with a day of effort. With a day's effort you can disassemble a trinket, gaining half of its cost in IU.

Wealthy - X

You have an extra 500 \mathcal{M} for every perk point spent on this perk.

Language Perks

These perks deal with the constructs of communication in all its forms.

High Bandwidth Communication - 3

You can communicate extremely efficiently. You can communicate with 1 individual at a time who you would normally be able to communicate with, but the conversation occurs in a tenth the normal time. It's as apparent to others that you are communicating as the communication normally would be, but outside observers cannot understand the contents of the conversation unless they also have this ability.

Polyglot - 2

You may speak any language.

Private Language - 2

You have developed a language that only you know; even polyglot doesn't provide access to it. You may teach it to others as a new language (pg. 21), and you may instantly teach it to your party members when you take this perk. This language need not be verbal- it could be written, be a form of sign language, or take whatever other form you desire.

Rosetta Text - 1

You can automatically read any text that you can see, regardless of language.

Minion Perks

Minion Perks give you useful allies, human or non-human, though they do not come with any fighting ability.

Capable Minions - 1**Prerequisites:** Minion Creation

Select one of your minion's roles. it is now rank 2.

Special: You can take this once for each type of minion you have.**Create Doppelganger - 2****Prerequisites:** Minion Creation

If you have access to a person's body, you can create a Doppelganger of that person. The Doppelganger looks exactly like that person, though it does not come with their clothing, and has a rank 2 role to impersonate that person, though it doesn't possess any of their skills. This Doppelganger is a minion, and can last for one week, at which time you can extend it's lifespan for another week if you have access to it.

Minion Creation - 2

You are able to create, recruit, hire, or summon a number of helpful minions. You may have one minion. Minions are extras in combat, and if killed must be replaced. They possess a rank 1 role describing the type of minion they are.

Example minions: An animal companion, a butler, undead minions

More Minions - 1**Prerequisites:** Minion Creation

You can create a new type of minion, and can have an additional minion. Select a new role, which your minion's can now possess.

Special: this can be taken any number of times**Manifest - 1****Prerequisites:** Summon Spirit, Minion Creation

You may manifest the summoned spirit as a minion. This minion has the roles and knowledge of the summoned spirit, but cannot directly perform physical actions.

Perky Minions - ***Prerequisites:** Minion Creation

One of your types of minions gains a perk that costs the same amount as the number of perk points invested in this perk. With GM permission, you may have multiple minions gain that perk, if that perk is redundant when multiple minions would have it. You may select this perk any number of times.

Remote Control - 2**Prerequisites:** Any Minion Perk

Choose a minion you control. You may take control of that minion directly, it can speak while you do this, and you can see what it can see. You may only control one minion this way at a time, but you can switch which one you control at any point.

Silversong - 1

If you spend a minute on this chipper tune, your MOUNT will show up in 1-5 minutes no matter where you are. You must have a designated MOUNT - it's not just any horse, it's your horse or your flying carpet or laser panther. If you do not have a designated MOUNT, you can designate one you're riding to be thereafter your designated MOUNT. If you lose your designated MOUNT, you can set a new one by the same method.

Tactical Minions - 2**Prerequisites:** Minion Creation

Select a monster tactical ability (pg. 160). One of your types of minions possesses that ability. You may select this perk any number of times, granting a new tactical ability to a type of minion that doesn't already possess it.

Nature Perks

Everything you need to be a Man of the Land.

Create Tools - 1

A outdoorsman knows the value of a good tool, but they also know you cannot rely on having one handed to you. You may construct simple tools out of whatever materials you can find at hand, whether it's sticks and rocks or old scraps of metal and brick.

Improvised Ingredients - 1

You can make a meal with the most meager of materials. Wherever you and your allies are, you can take an hour to feed everyone, even if ingredients aren't available. Whatever you cook, it always tastes amazing.

I Walk Not Alone- 2

You have an extra set of footsteps that goes ahead of you that aren't necessarily yours; leading the way of where you want to go. They're only placeable where footsteps could go. Who's (or what) footsteps they are is decided upon taking this perk.

Seasoned Native- 1

Pick a specific environment, this could be a place (Foggy Kingdom), area, or part of the world (The sahara, swampy areas). You're always at home and comfortable there.

Special you can take this perk more than once, and pick a new specific environment each time.**Shark Repellent- 1**

When you craft a repellent it covers a wide area and lasts at least 12 hours.

Sure Footed - 2

You don't need to pick your way carefully through the underbrush anymore. You and your party can ignore difficult terrain for overland movement.

Survival Rations - 2

You can prepare meals that protect those who eat it from the adverse effects of a specific environment for 10 hours.

Skill Perks

These perks are for those more adept at the usual stuff than their counterparts.

Favored Spell - X

Create a spell (pg. 86). You may cast this one spell twice a day with a casting time of 1 minute. This costs 1 perk point for a rank 1 or 2 spell, 2 perk points for a rank 3 or 4 spell, or 3 perk points for a rank 5 spell.

Jack of all Trades - 3

You can treat any possible role as if it was rank 1.

Overachiever - 2

If you get a 20+ when making a skill check, you gain an additional greater success if you succeed at the task

Seriously Skilled - 1

You gain an additional role point, as if you gained it from leveling up.

Special: This may be taken multiple times.

Social Perks

Social Perks cover Convincing, Insight, Charm, and general social interaction.

Commissioner of Oaths - 3

You know the arcane art of writing Magically Binding Contracts. These contracts are always fully legible, regardless of language used, and identifiable as a magically binding contract to the persons involved in it. The basic form of these contracts is "If A Person meets a Condition, they gain a Reward. If they do not meet that Condition, the Failure Clause is invoked." A single contract can have multiple clauses and can bind multiple parties, including the one writing the contract, provided all parties agree. The nature of what is expected, the gains and failure clauses vary depending on who writes the contract and who it is written for. In a social encounter, the Reward is an additional Incentive, while the Condition and the Failure Clause are additional Objections. The ranks of each are determined by the NPC. Failure Clauses:

- Cease gaining the Reward.
- Be permanently branded as a Contract Breaker.
- Become unable to use trinkets.
- Lose a Role.
- Reduce a Roles rank.
- Cannot travel away from a pre-defined destination.
- Can not enter a predefined location or leave a set area.
- Gain a PERSISTENT PENALTY at strength 1 or 2. (See Persistent Rewards)
- Death.
- Other. Come up with something not on this list, pending GM approval.

First Impressions - 2

When you meet someone for the first time you can make a Charm check with a time of Instant, that has no penalty for failure.

Spirit Perks

For matters of spirits and souls, O Enlightened One, seek here, first.

Channel Dead - 2

Prerequisites: Summon Spirit

When using summon spirit, you may elect to channel them. You gain access to one of the spirits roles. This requires you to maintain concentration, and so ends if combat starts or you have to perform an unrelated task. When this ends, you cannot channel the same spirit for a month.

Newsfeed - 1

Prerequisites: Personal Advisor

Your advisor tells you about local events. You and your Personal Advisor automatically know if there's any significant activity and the states of affairs related to their Roles near you.

Personal Advisor - 3

Create a nonpresent NPC only you can interact with. Assign them a Role which they can only use for knowledge checks. For example, this can be a nuclear expert on an encrypted radio, a spirit totem only you can see, a scientist from the future trapped between worlds, or a spirit that was never alive to begin with. They have a +4 in their role, and you and them can talk and trade information. Their sources of information are limited to what you can provide. Optionally - you can upgrade a familiar, companion, or minion with this. They gain the Role, and gain the familiar, companion, or minions senses as well.

Seance - 1**Prerequisites:** Summon Spirit

You may speak to the summoned spirit and hear it's replies.

Shared Awakening - 2**Prerequisites:** Spirit Walk

You can help your allies discover their spirit form, so they can share in your journeys. They gain the ability to use Spirit Walk once a day, while under your instruction.

Spirit Quest - 2**Prerequisites:** Summon Spirit, Spirit Walk

While spirit walking, you may seek out spirits in the area. These spirits are those who have died nearby, whose corpses reside nearby, or who had a strong tie to the location in life. Finding a spirit in this manner gives you a tie to them that allows you to summon them later.

Spirit Walk - 3

You can control your spirit form. You can enter spirit form as a minute-long ritual trance. While in spirit form, your spirit can walk around invisibly and intangibly as a ghost, and cannot affect anything that is not also in spirit form. Your physical body is inert while you're traveling, but when your spirit journey ends by force or by choice, you are returned to your body. Your physical body being disturbed or hurt will also end your trance early. Supernatural protections and defenses are effective against your spirit form. You may converse with spirits while in this form.

Summon Spirit - 2

You may call forth the spirit of a deceased creature. You must possess a tie to this creature, such as one of their possessions or a piece of their body. The presence of one of the deceased loved ones can also work. The summoned spirit can cause minor disruptions to the world around you, like shaking tables, blowing wind, and flickering candles. It can hear what is said and react to it.

The Shortest Journey - 3**Prerequisites:** Spirit Walk

When ending Spirit Walk, you can bring your body to where your spirit form is instead of your spirit form returning to your body, as a WARP. You can freely exit 5 hexes per level from your current position, every 5 hex beyond that renders this ability unusable for an hour each. If that would be longer than a week, this ability is unusable for a week instead.

Teleport Perks

Wherever you're trying to go, you're already there.

Dungeon Dirge - 2

You may WARP yourself and your team to the nearest entrance or exit from your current location.

Homeward - 3

While you are in a location, you may declare it to be your home. At any time, you may TELEPORT yourself and your party to your home with 5 minutes of effort.

Time Perks

These perks deal with the ages.

Fairy Tale - 1

You know a haunting, cheerful ditty that brings back the best of the past. This tune shows the best of what the place used to be, and can be directed to show significant historical events to that location, allowing you to view moments from the past.

Tracking Perks

These perks give abilities that revolve around tracking down your targets.

Bone Carver - 1

You can fashion mundane items from a corpse. You can make a 5IU mundane item from the corpse of a monster with half an hour of work.

Follow Teleporter - 2

You can trace teleport lines, and know where a given TELEPORT leads to if you can examine it within one minute of it's effect.

Trackless - 1

When traveling, you've learned how not to leave a trail to be followed.

Trophy Hunter - 2

You like to wear trophies of your greatest kills. After defeating and killing a monster, you may fashion a wearable trophy from its corpse. This gives you a role -Trophy Hunter - with a level equal to the tier of the monster. A boss counts as one tier higher. Only the highest bonus counts. This role is useful for automatically convincing others of your combat prowess. If you possess an ability to make magical items, you can use these trophies as the base for those effects.

Political Perks

These perks are something only the rich, powerful, or cool can do.

Call The Council - 2

You call a council, gathering the leaders of an area to gather their wisdom in one spot. You can declare an Agenda, to gather information on that agenda, or declare a Call To Action within your area. Anything the Council will know on the agenda, you know afterwards. A Call To Action will shift the entire areas stance on something.

Special Envoy - 2

As long as you obey the local laws, you always have a room or seat at the building of power in an area, and you can seek an audience with the local ruler.

Weather Perks

These perks control the weather.

Clear Tone - 1

This soft hymn creates of clear, safe air while traveling in thick fog, or even magical fog, as a circle with radius 50 centered on you. This does not work on [afflicted] hexes, just large, environmental effects. It lasts for five minutes unsustained, but is easy to sustain.

Weather Witch - 2

You may manipulate the weather to alter your local environment. It takes an hour long ritual to start this, and after that, the weather changes an hour after that - once this change happens, you may sustain it against dispersing naturally. Unsustained, the weather change will be subject to the local weather cycle again - storms will be blown away, blizzards will ebb, etc.

Worship Perks

Many of these perks require a declared deity. This means you have declared yourself as a worshiper of a specific deity, and must follow their tenets.

Detect Worshiper - 1

Prerequisites: Declared Deity

You can spend a minute talking to someone to determine if that person is a worshiper of your deity.

Locate Temple - 1

Prerequisites: Declared Deity

You can spend a minute to become aware of the distance and direction to the nearest temple devoted to your deity.

Prayer - 3

Once per day, you can take a minute to ask a Yes/No question. You get the answer immediately after that minute. This cannot be used to predict the future.

Role Powers

Role powers are abilities you possess that are beyond the capabilities of normal humans, but aren't used for discrete effects like spells. Some examples could include telekinesis, telepathy, or super strength.

Like spellcasting, a role power must belong to an associated role. Once purchased, using it becomes a normal role use. The required rank for what you are doing depends on the complexity of the task. See the Role Rank Meaning Table (pg. 7). Unlike spellcasting, role powers don't have a limited number of uses, though they can still be tiring to use like any other action, depending on what is being done.

The price of a role power depends on its category, but your GM may adjust these prices up or down if they think it will be significantly more or less useful than others of that category.

Example: Nigel has a Psion role at rank 3. He purchased a Sensory power for 2 perk points so he can detect thoughts, and a Manipulation power for 4 points to give himself telekinesis, both tied to Psion. Now he can use his Psion role to perform tasks that require reading minds or moving things with his mind. If he increases his Psion role, he will be able to do more complex tasks.

Rank 1: Move small objects, bend spoons, Read unshielded surface thoughts

Rank 2: Move medium objects, perform simple interactions, focus on one person's mind in a crowd, read subconscious thoughts

Rank 3: Move large objects, perform intricate interactions, extract information that isn't currently being thought of

Rank 4: Move huge objects, disable and reassemble intricate machinery, explore someone's memories

Rank 5: Move massive objects, independently control a swarm of objects, uncover someone's lost memory

Sensory - 2 points

A sensory power allows you to detect something otherwise imperceptible or which isn't currently visible with other senses. Higher level ranks let you detect things more reliably, from further away, or learn more about what you detect.

Examples: *Detect thoughts*
Feel the presence of a specific type of creature
Detect poison
Detect magical auras

Manipulation - 4 points

A manipulation power lets you move or control something that already exists. A higher rank lets you manipulate bigger things or use more precision.

Examples:
Telekinesis
Earth bending
Magnetic control
Super strength

Deceitful - 3 points

A deceitful power tricks others without truly changing things. Such deceit can be spotted by an equal or higher relevant role.

Examples:
Disguise self
Illusions
Enchantments
Charm person

Physiological - 2 points

A physiological power means your biology doesn't function normally. They may not scale with role, but they still need a relevant role.

Examples:
Don't need to breath
Don't need to sleep
Don't need to eat
Not bothered by extreme heat/cold
Can eat an otherwise inedible substance
Unlimited endurance

Communication and Command - 2/4 points

A communication power lets you communicate with something that otherwise can't be communicated with. Upgrading to a command power by increasing the cost to 4 points also lets you give them commands that they will carry out as best they can. The relevant Roles rank will usually apply during the ensuing conversation, or to command more stubborn things.

Examples:
Talk to Animals
Communicate with Sea Life
Talk to Spirits
Talk to Plants

Creation - 4 points

A creation power allows you to create things, either creating something from nothing or reshaping existing matter into something useful. It cannot create things which would require skill to craft, and it does not confer any ability to control it after it's created. Higher ranks of your applicable role will allow you to create larger volumes.

Examples:
Conjure Water
Producing Stone
Create force fields

Transformative - 4 points

A transformative power lets you transform your body in a substantial way.

Examples:
Size Shifting
Take on a wholly different appearance

Turn into an animal

Cosmetic - 1 points

A cosmetic power lets you change superficial aspects of your appearance.

Examples:

Change hair color

Change skin color

Make skin glow faintly

Role Power Greater Successes

Role Powers allow you to succeed role checks in more ways than the standard Skill Check Greater Successes. When you can use a Greater Success with a Role Power, there are additional Greater Successes (pageref to Greater Successes) you can pick from when succeeding a Role check that has a relevant Role Power..

- **Distant:** Increased range: Double the range of the ability, or increase it to 1 hex if it requires contact.
- **Encompassing:** Increase targets: Increase the number of things you can manipulate with your power at once by 1, or effect a larger area.

Spells

Some roles can also be used for magic, or similar setting-appropriate abilities. First, the player declares that one of their roles is a magic role. This role should be fairly specific about the type of magic it covers - Wizard is too broad, as any form of magic could fall under its umbrella, but something like "Plant mage", or "weather witch", "Cleric of Finigan" could work. Then they work with the GM to define some benchmarks for what spells look like for each rank, from 1 to 6, 1 being the most basic and simple spells, and 6 being spells that the most capable spellcasters would struggle with. At this point, the role can be used to cast really basic magic that is mostly for flavor - cleaning oneself with magic, lighting a campfire, creating a small light, basic things that could be done non-magically. These don't have any use restrictions like more powerful spells.

Then, they must buy the following perk:

Spellcaster - 2

Prerequisites: Half your level, rounded up, must be equal to the rank gained

Pick a magic role you have. You may cast spells appropriate to that role of 1 rank higher than before, to a max of that role's rank. A skill check to increase your effective rank can still be used.

Special: You may take this perk multiple times

After that, you must pick a casting style from the following list, which will detail how you cast magic.

Casting Styles

Ritual Caster

A ritual caster performs magic by undertaking a complex, time consuming ritual. This takes 10 minutes for a rank 1 spell, and 1 additional time step for each rank above 1 that the spell is. If the ritual is interrupted, it fails.

Prepared Caster

A prepared caster spends time to set up a spell ahead of time, but can use it quickly in the moment. The total spell ranks prepared is the sum of the spell rank of each spell prepared. The total spell ranks a prepared caster can have are equal to twice their level, and the highest rank spell they can prepare is half their level rounded up. In order to prepare a spell, the caster must first declare what effects the spell may have. When preparing spells, they can discard any currently prepared spells. It takes a day and a night of rest to re-prepare all of your spells. It takes 1 minute to cast a prepared spell.

Spontaneous Caster

A spontaneous caster can make up magic on the spot, but find the entire process draining. They have an amount of mana (though this can represent some other form of endurance), and casting a spell consumes some of this mana. It takes 1 minute to cast a spontaneous spell, as well as 1 mana per rank of the

spell. A spontaneous caster has a maximum mana equal to half their level, rounded up, plus 1, which they regain over the course of 2 days, at a consistent rate (so if you have 4 max mana, you gain 1 every 12 hours)

Beseeking Caster

A beseeking caster doesn't directly cast their own magic, but instead requests it from an outside source, which may or may not grant it. The GM should have an understanding of this entity, and understand if there are any situations where it would always or never grant it's benefits, which can include it's attitude towards the caster, which may be based on their actions, including how, and how much, they have been using this power recently. If no clear reason exists either way, the gm may decide with a die roll.

Additional Costs

The GM may declare that certain uses of magic will require additional costs. The simplest of which is a cost in \mathcal{M} , which can mean actual money was involved, or just that there are components of the spell which can be purchased for that amount. Another requirement could be something like a connection to the target of the spell, such as an item they have, or a piece of their body. The GM may also allow magic users to find or purchase items that grant them more spells. A mana crystal may restore a spontaneous caster's mana, or a scroll may allow access to a specific spell effect. A beseeking caster may be able to make a sacrifice or perform some other ritual that will improve their standing with the source of their magic. The price and availability of these are up to the GM based on the needs of their own campaign.

Greater Successes in Magic

Casting a spell of a lower rank than you are capable of allows you to apply greater successes to the spell. The normal greater successes can apply - a sneaky spell can be harder for people to notice you casting, a speedy spell can be cast faster (though no faster than 10 seconds), an efficiency spell may consume less additional costs, etc.

In addition, there are a few greater successes that are generally magic specific:

- **Encompassing:** the spell effects a larger area, or more targets
- **Persistent:** the spell effect lasts for an additional time step.
- **Distant:** the spell effects something further away than normal.

GM Sidebar:

This style of magic is fairly open, with a lot of burden on you to keep it in check. The ranks associated with each spell are the starting point of this, and the modifiers on top of that are guidelines of how things may be improved. The beseeching casting style makes this more obvious, as it explicitly puts the controls over the magic onto your shoulders.

Chapter 11

Capstones

When a character reaches level 14, instead of gaining a new facet in a TRACK, they gain a capstone. Capstones are abilities of immense power.

Capstones

Name	Description	Type
Alacrity	Take extra actions each round.	Varies
Beast Mode	Gain monster abilities	Varies
Displacer Field	Teleport nearby enemies	Defense
Flying Brick	Fly, punch hard, and resist damage	Mixed
Healing Factor	Regenerate constantly	Defense
Innately Superior	Gain an extra innate track	Varies
Legendary	Blast things with energy	Offense
Omega Barrier	Gain a forcefield	Defense
Omniscient	See everything	Defense
Reaper	Become an avatar of death	Offense
Ryleh's Favor	Summon C'thulu	Offense
Shock Troopers	Receive a stream of backup	Offense
Spatial Mastery	Warp everywhere	Mixed
Timestop	Freeze time	Varies

Alacrity

Act with amazing alacrity.

You may take an additional minor action each round. Twice per encounter, no more than once per round, you may take an additional major action.

Beast Mode

RAWR

Pick a non-unique innate monster ability, two monster tacticals, two non-unique monster major actions, and a non-unique monster minor action. Each round, you may elect to use the mook form of one of one of your monster majors or your monster minor for free or forgo it. If you forwent it last round, you may use the full form of one of your monster majors for free instead. Pick Speed, Strength, or Wit:

- **Speed:** +2 speed
- **Strength:** Once per round, strike adjacent opponent to FORCE them one hex
- **Wit:** Once per round, Raise or lower your target priority for one opponent for one round. Attacks that violate this priority get a PENALTY.

Displacer Field

There and here and everywhere.

At the beginning of each enemy's turn, if that enemy is within 6 hexes of you, it is TELEPORTED to a random hex within 6 hexes of you. To quickly select the new position; roll a d6 for the direction, and another d6 for the distance. 8 times per encounter, when an enemy within 6 hexes of you would go to attack you or an ally, you teleport that creature 1d6 hexes in a random direction. They have a 50% chance to get their attack in before you TELEPORT them, if they fail the attack is negated. If the attack is [O]verwhelming, it requires 2 uses of this ability. Every round, you gain 2 more uses of this ability. If the attack would drop you and you have remaining uses, you may use additional uses to roll again. **Refresh:** You may use a REFRESH to gain another 2 uses of this ability.

Flying Brick

Faster than a falcon, and tougher than a tank.

You gain flight, and may ascend with no penalty. You are ENERGIZED 12 at the beginning of each of your turns. Whenever you damage an enemy while you have ENERGIZED, they begin BLEEDING 8 and are DIZZY 3. You gain 48 RESISTANCE. You take no dam-

age from using smash through, and are immune to [SICKENING], DIZZY, BLEEDING, and IGNITED. **Refresh:** You may use a REFRESH to gain 12 RESISTANCE. **Shrug Off[C]:** As a COUNTER, You may reduce the damage taken by C.

Healing Factor

Can't keep a good bub down.

You have 48 extra HIT POINTS, and regain 12 HIT POINTS each round, even while WOUNDED. If this would heal you above max HIT POINTS, the excess becomes ENERGIZED. You cannot die from HIT POINTS damage, though more negative HIT POINTS still takes longer to heal from. You may restore a lesser restorable condition each round when this triggers. You are immune to [FEAR]. **Counter[C]:** As a COUNTER, you may gain a BOOST as you allow the attack to land and give yourself an opening.

Innately Superior

Better than the rest.

You may pick a second innate TRACK that you do not already have and gain all of its benefits. You do not get perks from this TRACK unless your current Track does not grant a perk at that facet. Every round, you gain a REFRESH. This may be applied to either innate track.

Legendary

Every round you may use a legendary ability. Twice per encounter you can use an extra 2 legendary abilities in one round. You gain access to the following legendary abilities:

- Deal 6d4 damage to all enemies in a radius 2 burst within 12 hexes. These enemies are STUNNED unless they succeed on a defense roll.
- Create a pillar of energy within range 24 that has infinite height and damages everything in it's pillar for 18 damage and makes them DIZZY 2.
- Gain a RIDER that deals 12 damage and FORCES the target 3 hexes in any direction.
- Deal 6d4 aoe damage to every enemy within 2 hexes, and either FORCE them to move adjacent to you or FORCE them 3 hexes away from you.
- Become ENERGIZED 12 and gain 6 speed.
- Gain 12 BARRIER HIT POINTS and become SHIELDED.

Omega Barrier

Engaging Giant Forcefield!

You gain 48 BARRIER HIT POINTS at the start of each encounter, and 12 BARRIER HIT POINTS at the beginning of each round. Enemies must spend an additional STEP to move into hexes within radius 3 of you. Additionally, while you have BARRIER HIT POINTS

from this effect, you always count as SHIELDED. Anytime on your turn you can raise or lower your Target Priority. If your Target Priority is lowered you cannot be targeted. If your Target Priority is Elevated, violating your TP gives your opponents target 12 BARRIER HIT POINTS immediately before their attack takes effect. You can transfer any BARRIER HIT POINTS you possess or any willing ally possesses to yourself or any ally within 12 hexes of you. **Refresh:** You may use a REFRESH to gain 12 BARRIER HIT POINTS.

Omniscient

You see everything. Yes, everything. Yes, including the other side of the world.

You may know the TRACKsand level of every creature in the encounter when knowledge checks are rolled, have an unlimited range SCANNER, and LINE OF SIGHT to everything. Yes, everything. Four times per encounter, you may automatically dodge an attack against you. It requires 2 uses of them to block an [O]verwhelming attack. You gain another use of this each round. **Refresh:** You may use a REFRESH to gain another use of this ability.

Reaper

The bell tolls for thee.

You start each encounter with 48 reaper points, and gain 12 reaper points each turn. Whenever you deal damage, you can spend an equal number of reaper points to double that damage. Any BLOODLUST you gain can become reaper points. You may also spend 6 reaper points to negate your target's COUNTER. You can phase and hover, are immune to [FEAR], and gain all of the reaver features.

Ryleh's Favor

Third time's the charm.

You open a rift to eldritch realms at the beginning of each combat. This allows Cthulhu to be placed on the board. He is large and cannot be harmed or hindered, and will destroy any destructible terrain he moves through. He can do 18 [MENTAL] damage to a target within LINE OF SIGHT, or STRIKE all enemies within 2 hexes of him for 23 damage. He moves with speed 6. If you are WOUNDED, he is desummoned and the hexes he is in are rendered impassable for the encounter. Targets damaged by him are [FEAR] DIZZY 2 for 1 round. Twice per encounter, he can seize control of an enemy, forcing them to use a major action as he decrees. This does not take up the action from their turn. This is a [MENTAL] effect that bypasses [MENTAL] immunity.

Shock Troopers

Chaaarge!

Start an encounter with two SUMMONS with 12 HIT POINTS and a base speed of 6. Each knows two mook major abilities (pg. 146). They also have four abilities from the monster tactical list (pg. 160). The abilities chosen can be changed in between encounters. At the beginning of each of your turns after the first, there is a 50% chance that your SUMMONED creature

disappears. If it does not, the summon can move up to its speed and use one of its mook major abilities. Every other round, you gain an additional SUMMON, as above.

Spatial Mastery

Punch them into next door.

All movement you make is WARP. Every round, you gain a RIDER that deals 15 damage on a hit, half on a miss. If it hits, it inflicts BLIND 1 and IGNITED 8 and can WARP the target 3 hexes in any direction. Four times per encounter, when attacked, you may WARP 3 hexes and have the attack completely miss you. If the attack is [O]verwhelming, it requires 2 uses of this ability. **Refresh:** Gain another use of this ability.

Timestop

Time waits for no man, except for you.

Once per encounter, you can instantiate a timestop. During it, you get 4 moments. You can use a minor action for 1 moment, or a major action for 2 moments. You can prime actions, but cannot use any action that affects someone other than yourself. You can also spend twice your speed in STEPS without provoking. You may use innate abilities as if two turns passed if they do not target others. Once per round you gain 2 time freezes. You can spend a time freeze as an immediate non-action to give an ally a 50% DODGE CHANCE against an attack by freezing the attacker momentarily. If this is [O]verwhelming, it requires 2 time freezes. If an attack would wound you, you may keep spending time freezes to try to DODGE it until you run out or avoid the attack, even if you couldn't otherwise use immediate actions.

Part IV

Game Master Tools

Chapter 12

Wealth and Trinkets

Loot. Loot never changes.

This chapter covers money and the things you can buy with it.

Wealth and Money(\mathcal{M})

The Adventurer Economy is fairly straightforward - you use wealth to get better gear or rare and expensive services. The Wealth and Money system presented here is a distilled version that covers that and is expandable to include whatever rare and expensive services - or perhaps mundane ones - that the setting or campaign may call for.

The basic measure of a PC's Wealth is a Money (\mathcal{M}) - these can be traded in at appropriate vendors for items or services of equal value. What it is actually called in-universe can vary - in a fantasy setting, it can be rupees, gold, or gil, in a modern setting it can be dollars, and in a sci-fi setting they can be called credits instead. When you receive \mathcal{M} , it may not necessarily be in the direct form of cash, you could be finding gems, or valuable items you can sell. Tracking the specific breakdown of items and the process of liquidizing them isn't important to the game, so you can just say you earned so much \mathcal{M} and move on.

Different things may affect the base cost of something, such as rarity, locational scarcity or surplus, legality, or relative usefulness compared to the setting baseline, at the GMs call. Generally, if something would come to a cost above 1000 \mathcal{M} , it is not purchasable via normal means.

Items

Trinkets are magic items that are fun, useful, or funny, but aren't very good in a fight. They're much more common than artifacts and are generally easily obtainable in shops. In addition to fun / useful / funny, Trinkets are generally meant to be more than simple, utilitarian items with specific uses - they are written with a bit of character and vagueness to leave room for extra uses or new things you can do with something - if you're clever.

Item Types

- Mundane Items (pg. 95) are run of the mill basic stuffs, such as cloths, regular rope, food rations, and other basic, day to day sundries.
- Trinkets (pg. 95) are generally useful and relatively common items.

Magic and Technology

Trinkets can represent magical items, or the effects of advanced technology, or sometimes both, depending on the setting.

Consumables are a way of adjusting the difficulty for the players. A steady supply of consumables can make things much easier, while having a few on hand can help get the players out of a tough spot. Grant them according to the needs of your group.

Mundane Items

Sometimes necessary but oft overlooked; these are the basic sundries of day to day life that only come up when a campaign cares about such things.

Consumable mundane items; such as rations, oil flasks, or paper, are 1 \mathcal{M} each.

Permanent mundane items, such as clothes, rucksacks, a good coil of rope, or basic weapons, are 5 \mathcal{M} each.

The campaign, world, or setting may have other services available that cost \mathcal{M} .

Trinkets

Trinkets have a Category, Rank, and a Durability. Category is their general theme of usefulness. Their Rank is how good they are, which also affects their cost and availability. And lastly Trinkets have a Durability. Some have limited uses and are 1/10 the cost per use of the ones that don't run out.

Trinkets by Rank

Rank 1 Trinkets are neat! They are useful and common for day to day things as tools for those who need a bit more than their guts and gloves in their daily dose of pursuing glory.

Rank 2 Trinkets are useful in more situations and have more power or use than Rank 1 Trinkets. They're still common in their useful fields, but not everyday items, typically possessed by those serious about what they do.

Rank 3 Trinkets are rare and expensive, but not too hard to find if you know where to look. They have powerful effects at powerful costs. Typically these are only in the hands of experts in their fields.

Rank 4 Trinkets are potent and possible, typically

providing completely new options for characters to pursue their legendary goals with. They can be reasonably expected to exist but are not commonplace, and not guaranteed to be available in shops. If they do, they're legendarily expensive.

Rank 5 Trinkets are game changing (or game breaking) and can be considered unique in the world, or of so few they can be counted on one (human) hand. They are priced as Quest Only - this means they are exclusively available at the whims and fiat of the GM of the campaign. Rank 5 Trinkets, more so than any other rank, are the best candidates for personalizing to any given setting or campaign. Rank 5 Trinkets are instruments of changing the world.

Categories and Loot Table

	Category	Description
1	Communication	Trinkets which enable communication between creatures
2	Creation	Trinkets which can create new things
3	Curses	Trinkets which have a negative effect on their user
4	Environment	Trinkets which manipulate your surroundings
5	Food	Trinkets which change or modify food and drink
6	Healing	Trinkets which can heal injury and disease
7	Infiltration	Trinkets which help you sneak around
8	Investigation	Trinkets which help you gather information
9	Knowledge	Trinkets which help you know things
10	Magic	Trinkets which directly interact with magic
11	Security	Trinkets that keep things safe
12	Survival	Trinkets which help you survive the environment
13	Tool	Trinkets which you use to do other tasks
14	Trap	Trinkets which inflict negative effects on others
15	Travel	Trinkets which help you get around in the world
16	Other	Trinkets which don't fit another category
17	\mathcal{M}	Give \mathcal{M} equivalent instead of a Trinket
18	Player choice	Players choose the category
19/20	Reroll	or just use a d18

Rolling For Random Loot

First decide on what level of trinket you want to give out, based on how much loot is appropriate. Then see the Categories table (above) and roll a d20, or use a 1-16 or a 1-18 random number generator. This is the future and you can be too! Select or create a trinket of the selected tier within that category.

Buying and Selling

Rank 1|2|3|4 Trinkets cost 100|250|500|1000 \mathcal{M} . If they have limited uses they cost $\frac{1}{10}$ th the cost per use. Rank 5 Trinkets do not have an \mathcal{M} cost normally. The higher the rank the less likely they're easily available in shops, however. Trinkets can be sold back to a trinket vendor for $\frac{1}{2}$ their cost. Rank 5 Trinkets have the cost 'QUEST'. This means Rank 5 Trinkets are en-

tirely up to the GM on if they even exist, and what it takes to attain one. These items are generally powerful enough to be an arc or quest of their own just to obtain them.

With this take, it's easy to limit vendors on what they offer if the GM wishes. A vendor can have a maximum rank it sells, "Joes Bazaar only sells up to rank 2 trinkets", and/or a specialty, "This shop is run by a former spy and has 2 ranks higher available only in the Infiltration category." It's also easy to say that a specific Trinket only is sold by one seller in the world, or not at all.

Wealth and Rewards

How many trinkets a group starts with can vary, but 100 \mathcal{M} /level is a decent baseline. \mathcal{M} can be given out as needed as loot from encounters, trea-

sure hoards, quest rewards, or other places in the campaign. Most items cost 100-500 \mathcal{M} , which is a good price range for a minor reward. A major reward can have that much per person, while an amazing reward would be 500-1000 per person. Don't worry about giving \mathcal{M} per level; PCs in *The Stuff of Legends*TM don't need extra items or \mathcal{M} to perform at

their level.

The items listed here are not comprehensive, and the availability and costs are merely starting suggestions. The GM should feel free to recost, ban, or add new items as appropriate to better suit their campaign.

Rank	Name	Effect	Cost
Communication (pg. 100)			
1	ArrowMail	Send a message to named target	10
1	Animal Totem	Talk to a type of animal	100
2	Messenger Scroll	Send short message and receive reply	25
2	Dream Amulet	Share dreams with your friends	250
2	OrbNet Station	Communicate with other orbs	250
3	Quiver of Mail	Keep using ArrowMail	500
4	Mindmarriage Rings	Link our mind with your partner	1000
5	Mind's Eye	Communicate with anyplace you have been	**
Creation (pg. 100)			
1	Elemental Beads	Create a small bead of a specific element	10
1	Permanent Paint	Paint that can't be cleaned	10
2	Grey Goop	Repair items	25
2	Perfect Paint	Paints exactly what you were imagining	25
3	Stone Solvent	Dissolve stone	50
4	Creation Cube	Make items smaller than itself	1000
4	Universal Solvent	Dissolve Anything	100
5	Universal Changer	Change anything into a specific thing	**
Curse (pg. 101)			
1	Mirror of Disgust	Reflections in mirror appear hideous	**
2	False Title	Get a horrible nickname	**
2	Nametag	Force someone to respond to a given name	**
3	Echo Chamber	Anyone can hear user's thoughts	**
4	Thrice Named Voyager	Be compelled to travel to those who summon you	**
5	Personal Raincloud	Cloud continually rains on you.	**
Environment (pg. 101)			
1	Dehydrated Stone	Turns to stone when you add water	10
1	Green Thumb	Sprout seeds and heal plants	100
2	(Almost) Instant Tree	Grow a full sized tree	25
2	Portable Ceiling	Expand to form a ceiling	250
2	Sliver of Sunlight	Create beam of pure sunlight	250
2	Tunneler	Dig through solid ground	250
3	ACME Anvil	Falls through the ground	50
3	It's a Tarp!	Small tarp unfolds and becomes solid	50
3	Keyed Tunneler	Digs through a specific material quickly	500
4	Portable Winter	Create winter for a day	100
4	Pot of Gold and Silver	Grow walls of vines	1000
5	7th Dimensional Hole	Hole that swallows everything	**
5	Dial of Seasons	Control the season in a region	**
5	Instant Terrain	Reshape the land to your specification	**
Food (pg. 102)			
1	Long Lasting Trail Rations	Food that lasts for months	10
1	Steak Stake	Converts a carcass to steaks	10
1	Timeless Spices	Endless spices that keep food fresh	100
2	Jar of Endless Cookies	Create unlimited cookies	250
3	Mug of Midas	Convert drinkable liquids to other drinkable liquids	500
4	Barrel of Joy	Endless feast for parties	1000
5	Spiritia Satia	Don't need food near it	**
Healing (pg. 103)			
*	Antidote Dose	Cures Poison	*
1	Shentu Bean	Removes exhaustion and fatigue	10
1	Aliv'o'meter	Tells how alive something is	100
1	Wand of Light Healing	Slowly heal hitpoints	100
2	Enchanted Amethyst	Neutralizes alcohol	250

Rank	Name	Effect	Cost
2	Medical Bill	Diagnose patients	25
3	Backta Life Tank	Restores the gravely injured	500
3	Wokebomb	Spin to wake people	50
4	Rearming Wound	Reattach Limbs	100
4	Unicorn Horn	Purify water and heal poisons	1000
4	Universal Vaccine	Cure and immunize diseases	1000
5	Amulet of Vitality	Prevents aging until removed	**
5	Kindler	Revive the dead	**
5	Water of Eternal Youth	Make someone younger by a year	**
Infiltration (pg. 104)			
1	Evershifting Robes	Robes conceal your identity	100
1	Hand Model	Mimic a hand	100
1	Turnout Jacket	Switch outfits quickly	100
2	Glamour Powder	Becomes fashionable	25
2	Hat of Disguise	Change your appearance with an illusion	250
2	Mute Button	Prevent wearer from speaking	250
2	Stealth Suit	Helps you sneak	250
3	Cardboard Box	Box that prevents enemies from noticing you	50
3	Cloak of Delayed Divinations	Befuddle magical detection	500
3	Silence Bomb	Visible explosion that blocks sound	50
4	Faceripper	Copy someone's face	100
4	Psychic Paper	Becomes any type of credentials	1000
5	Note to Self	Reactively accomplish something	**
5	Persona Perfecti	The Perfect disguise	**
Investigation (pg. 105)			
1	Invisible Grease	Make a wall transparent	10
1	Eavesdropper's Glass	Hear through walls	100
2	Frame Game	See through a picture's eyes	250
2	Moniker Monitor	See people's Real Names	250
2	Recapper	Create recaps of conversations	250
3	Death Note	Only write the names of the dead	500
3	Litmus	Detect lies	50
3	Scroll of Historical Identification	Learn the history of an item	50
4	T-Drop	Overhear telepathy	1000
4	The Hole of Truth	Prevent Lies	1000
5	Memory Scanner	Search someone's memories	**
Knowledge (pg. 105)			
1	Frivolous Divination	Learn answers to inconsequential questions	10
1	Trivial Trinket	Know lots of trivia	100
2	Reading Glasses	Research faster	250
3	Headband of the Wise	Gain access to a role for knowledge	50
3	Smartbook	Access textual information easily	500
4	Backtrack Map	Learn about useful things you missed	1000
5	Avatar's Wisdom	Gain wisdom and experience of previous users	**
Magic (pg. 106)			
*	Spell Glyph	Cast a specific spell	*
1	Wyrddust	Counteract magic	10
1	Apprentice's Ring	Glow in presence of magic	100
2	Elemental Goggles	See elemental eddies	250
2	Psi Beacon	Amplify telepathic abilities	250
3	Big Fat Grimoire	Allows ritual spells	500
3	Magifinder	Detect the strength of magic effects	500
4	Leyaway	Create a place of power	100
4	Spelldrinker	Dispell magic to cast spells	1000
5	Archmage's Staff	Cast more powerful spells	**
5	Genie's Lamp	Grants wishes	**
Security (pg. 107)			
*	Rope of Binding	Restrain people with rope	*
1	Warner Stone	Glow when something specific is nearby	100
2	Eternal Lock and Key	Unbreakable lock and matching key	25
2	Hipokrit's Writing Utensil	Write text others can't read	250

Rank	Name	Effect	Cost
2	Shrieker Balls	When jolted makes loud noise that shatters glass	25
3	Master Key	Open a lock	50
3	Pocket Trap	Catch and release a creature	50
3	Stuffdar	Locate your possessions	500
4	Skeleton Key	Open any lock until its too hard	1000
5	7th Seal Set	Seal away anything for 1000 years	**
Survival (pg. 107)			
1	Animal Repellent	Keeps wild animals away	10
1	Fire Sphere of Persistent Light	Create a signal in the sky	10
1	Inflammable Wand	Put out fires	10
1	Parachute	Slow your fall	10
1	Everburning Implement	Emits light forever	100
2	Cloak of Water	Cloak made of water	250
2	Instant Campfire	Create a bonfire	25
2	Magic Matchbox	Never runs out of matches that work anywhere	250
3	Instant Hut	Add water to create shelter	50
3	Stimulator	Reduces need for sleep	500
4	Shelter Orb	Creates a bubble of liveable space	1000
5	Instant Castle	Creates a full sized castle	**
Tool (pg. 108)			
*	Masterwork Components	Make it easier to use a skill	*
*	Grapple Launcher	Move directly to other anchor points	*
1	Appraising Monocle	Learn true value of an item	100
1	Attractive Bandage	Holds metal to themselves	100
1	Swiss Army Knife	Turn into small tools	100
1	Wizard's Disk	Floating disk that can carry objects	100
2	Extra Handy	Have another hand	250
2	Genie's Stopper	Suck in fog and genies	250
2	Many Feeted Pole	Pole that changes length	250
2	Stuffsack	Holds lots of stuff	250
3	Fashionable Spacelord's Closet	Access regionally appropriate clothes	500
3	Immovable Rod	Rod that cannot be moved once activated	50
3	Sonic Multitool	Hack and unlock things at range	500
4	Cubic Rod	Creates indestructible cubes	1000
5	Vault Key	Store items securely from anywhere	**
Trap (pg. 109)			
*	Demolition Charges	Destroy terrain	*
*	Poison Dose	Weaken target roles	*
*	Trapped Tome	Book that triggers a trap on person opening it	*
1	Glitterbomb	Uggggggh, really?	10
1	Invisibility Pad	Renders items on it invisible	100
1	Stinkbomb	Makes an area stink	10
2	Barrel of Snakes	Covers area in snakes	25
3	Daravon's Opera Box	Music puts people to sleep	500
4	Book of Perilous Puzzles	Puzzle traps user if they fail to solve it in time.	100
5	Master's Pocket Trap	Placed trap captures creature	**
Travel (pg. 110)			
1	Calibrated Compass	Compass points at a specific thing	100
1	Diving Helmet	Blocks out liquids and gases	100
1	Instant Oxygen Chips	Provides air for 1 hour	10
1	Telescope	See further	100
2	Bridgeify	Creates a bridge	250
2	Drums of Marching	Everyone can travel together quickly	250
2	Ladder to Infinity	Ladder of arbitrary height	250
2	Monocle of Apparent Reality	Teleport to a nearby location	25
2	Recall Token	Warp to a preset location	25
2	Tophat	See current location from above	250
2	Vacuum Suit	Survive without atmosphere	250
3	Locke's Key	Open a door to any door you've used before	50
3	Map of the Lawful	Creates maps of nearby public buildings.	500
3	Replenishing Vacuum Suit	Vacuum suit with unlimited air	500

Rank	Name	Effect	Cost
3	Speed Trace	Follow trail instantly	500
4	Map of the Lawless	Draws map of nearby hidden locations	1000
4	Peridot Hoops	Earrings that are linked portals	1000
4	Shifter's Inn	Wake up in a different Inn	100
5	Gravity Bounders	Change direction of gravity	**
5	Light of the Navigator	Light guides you unerringly to destination	**
5	Visitor's Screen	Teleport to visited locations	**
Other (pg. 111)			
1	Earworms	Play a specific tune	10
1	Eternally Bouncy Ball	Doesn't stop bouncing until caught	100
1	Folding Screen	Change outfits while behind it instantly	100
1	Hat of Eminent Importance	Everyone knows your Title	100
1	Luminous Pointer	Create a dot of light	100
1	Mood Rings	Change color with emotion	100
1	Robotic Stilts	Become taller	100
2	Cleric's Talisman	Repells undead	250
2	Varie Stable	Your mounts can always return here	250
3	Banner of Bravery	Gives knowledge to those who see it of its bearer	500
3	For Sale Sign	Summon someone who will buy something	500
3	iLauncher	Throw small items several miles	500
3	Redstone Hexagon	Provides unlimited power until moved	50
4	Crown of the Beastlord	Command unintelligent animals	1000
4	Forward Jump	Teleport 2 minutes into the future	1000

** These items are not normally available for purchase, and must be attained by other means.

Communication

ArrowMail

This very accurate messenger arrow does no physical damage, but receiving one is a pain nonetheless. This arrow is enchanted to always hit it's named target from no matter where in the world it's fired from, and can carry a wrapped message or something up to several ounces in weight. They explode into confetti after hitting their target.

10 *M*

Animal Totem

These bestial figurine necklaces allow you to communicate with the type of beast it represents.

100 *M*

Dream Amulet

This amulet, when worn, makes it's wearers dreams communal. Sometimes used to help troubled individuals, sometimes used to spy on someone's dreams, and sometimes used to just give the wearer more control of their dreamworld.

250 *M*

Messenger Scroll

This scroll sends a short message that can be up to 21 words to a person you know. They can reply with the same word limit.

25 *M*

OrbNet Station

These orbs can be linked to another orb and create or expand it's network. They carry sound and vision to every orb on the same net.

250 *M*

Quiver of Mail

Once an hour, this quiver can turn any projectile into an ArrowMail projectile. The recipient can fire it back with a return message

500 *M*

Mindmarriage Rings

These rings always come in a set of two. They allow the wearers of a linked set to share their thoughts and feelings with each other. Some call it telepathy. Others call it love.

1000 *M*

Mind's Eye

This crystal ball is slightly out of phase, allowing solids to pass through it and vice versa. If you put your head in it you can establish two-way telepathic communication with any place you've previously been or person you've seen.

Quest Only

Creation

Elemental Beads

Chuck them to create beads of the element they represent. (See Elemental Matter Creation (pg. ??))

10 *M*

Permanent Paint

This liquid is impossible to clean up without universal solvent, and comes in all colors. Popular for graffiti.

10 *M*

Grey Goop

An artificer standby, this goop repairs any mundane material by matching and turning into it, at an equal mass exchange.

25 *M*

Perfect Paint

This brush and bucket paint exactly what you had in mind, whether or not you're any good at painting.

25 *M*

Stone Solvent

This liquid can dissolve natural stone, as a lesser concentration of Universal Solvent. It is often used for decorating stone by etching it directly. Each container is an ounce.

50 *M*

Creation Cube

These come in varying sizes with different usefulness in being able to be transported. If you look inside it while it's working, if you can look small enough, there are worlds within worlds within it. It can be programmed to create any solid shape up to or smaller than itself, which it will make and dispense. All pieces made by a specific Creation Cube will stick to themselves as if they were one piece given a good whack. Left to its own means, it can create one an hour, but if it is provided fuel (any compostable matter smaller than it), it can run continuously for as long as the fuel lasts. Materials created with this have the same Destructible Strength as Really Thick Trees.

1000 *M*

Universal Solvent

This liquid comes in 1 ounce vials and can dissolve anything physical, only transportable by special immaterial vials made of magical energy. It only comes in small doses, apply carefully.

100 *M*

Universal Changer

Typically set into the form of a glove with the active side outwards, this item comes in two versions. The much rarer one allows you to change anything into something, the other allows you to change something into anything. The "something" is defined when the item is created. Classic examples include anything to gold, or a frog into anything.

Quest Only

Curse

Curse trinkets are not normally sold, but are instead found

Mirror of Disgust

When looking at oneself in this mirror, people appear hideous to themselves.

Loot Only

False Title

You've been cursed with a terrible nickname or title - all who see you know it as soon as you speak, and anytime you say your name, you are compelled to place your malign misnomer before your name. Only when you've fully embraced the moniker does it lose its power.

Loot Only

Nametag

This tag, when put on a person, makes their name as what's on the tag. They will respond to it as if it was their real name.

Loot Only

Echo Chamber

Your thoughts are not your own - literally. Anyone within 15 feet of you can hear your surface thoughts.

Loot Only

Thrice Named Voyager

This curse compels you to travel by all your available means to someone who says your true name three times in quick succession. Loot Only

Personal Raincloud

It follows you around, hovering 2 height above your hex and moving with you, constantly raining and occasionally striking with painful jolts of lightning. Once activated, they're only able to be given to someone if they've had a worse day than you and you've made it even worse.

Loot Only

Environment**Dehydrated Stone**

Turns mud to stone. Just add water.

10 *M*

Green Thumb

This green glove allows you to quickly sprout seeds and heal unhealthy plants.

100 *M*

(Almost) Instant Tree

This miniature tree, when planted as a major action in suitable soil, turns into a full sized tree the same type as the miniature over the space of three rounds.

25 *M*

Portable Ceiling

This umbrella can open and expand to hold up anything above it. Inside an enclosed building it will expand to the walls. Otherwise it will expand to range 12. If left over 24 hours, it cannot be closed again.

250 *M*

Sliver of Sunlight

This tube can shoot a beam or create a sphere of pure sunlight or pure moonlight as a 3 hex wide line with unlimited range, or a cone with a range 300.

250 *M*

Tunneler

These are large drills that bore through material that can clear a solid hex every 10 minute of that material.

250 *M*

ACME Anvil

This anvil has the rune for Embiggener carved on it. With the rune activated, and after at least three consecutive turns of mighty blows, it will begin charging. As soon as the series of blows stops, it will activate, break the floor it is upon, create a pit as deep as many turns of blows it took, and break after.

50 *M*

It's a Tarp!

This tarp is small to carry, but can unfold up to a 20x20 sheet. If laid out and left undisturbed for five minutes, it will become solid and stiff, strong enough for people to walk upon.

50 *M*

Keyed Tunneler

These are large drills that bore through material that are more potent, focused versions that are keyed to certain materials, such as stone or metal. Keyed to a material, these magical drills can clear a solid hex a minute of that material, far faster than the usual rate.

500 *M*

Portable Winter

This never-melting icicle melts when stabbed into the ground; and causes a snowy winter snowstorm centered on it in the area for a day or until the icicle is removed.

100 *M*

Pot of Gold and Silver

This pot can be directed to grow a wall of thick, mean vines that are ether golden and die without sunlight, or silver and die in sunlight, over ten minutes. Once grown the pot can be moved and the vines stay in place.

1000 *M*

7th Dimensional Hole

This higher dimensional instance defies description. It simply annihilates all it intersects. Light, sound, matter, energy. The wake of it's passage leaves nothing behind. Left to it's own peculiarities it will erratically orbit a fixed point, flickering in and out of existence, but as a Difficulty 4 action with a relevant role it can be directed to new orbits.

Quest Only

Dial of Seasons

Those in tune with the pulse of the planet can read it's moods, and through it's moods, its seasons. This thick slab has a dial on it and is not made of any solid material; it exists only for those who have seen every weather and emotion of their world, irregardless of the people in it. There is a section on the slab for every mood of the world, and setting the dial of this slab to that section causes the region desired to take that weather and mood.

Quest Only

Instant Terrain

This model in minature represents a mountain that can be sculpted to taste prior to placing it. Once placed and left undisturbed for a week, it will grow the area around it, raising and lowering and creating mass as needed, into an exact replica of the sculpture.

Quest Only

Food**Long Lasting Trail Rations**

A little goes a long way - these very bland food wafers, consumed at an appropriate pace, can last for months.

10 *M*

Steak Stake

This stake, when used on a recently dead animal, converts its mass into ready-to-cook steaks.

10 *M*

Timeless Spices

Food prepared with these spices always taste fresh and never spoil. The jar always seems as full as the day you bought it.

100 *M*

Jar of Endless Cookies

This jar has one button on the side, and is empty inside. When you click on the button as a minor action, a delicious, edible cookie pops out. There seems to be no end to them.

250 *M*

Mug of Midas

This mug is enchanted to transmute any potable liquid into any other non-magical potable liquid. Water to wine, wine to water. It fails to work if something besides, or in addition to a potable liquid is placed within it, like poison or dirt.

500 *M*

Barrel of Joy

It runneth over. While at a festive party, this barrel never runs out of alcoholic beverages from within, and always has tasty snacks on top of it. It refills both exactly fast enough to satisfy everyone at the party.

1000 *M*

Spiritia Satia

This two foot tall statue of a rose wilts eternally. Looking at it is soothing. Those near it never want for sustenance no matter what form it takes, and those who sleep in it's presence keep that benefit for a week away from it.

Quest Only

Healing**Antidote Dose**

Reverses Poison Dose effects at the antidotes strength (+1 to +5). Also prevents doteing.

20*Rank *M*

Aliv'o'meter

This 8-sided amulet can tell how alive something is by touching it to something, shaking it and reading the resulting rune.

100 *M*

Wand of Light Healing

This wand, when applied to a person, can heal that targets HIT POINTS by their level each minute. While adventurers often have many personal means of picking themselves up after a fight, this one can work on NPCs and wounded civilians you run across, as well.

100 *M*

Enchanted Amethyst

A popular derivative of topical antipoisons. When placed in alcohol, it prevents the drinker from getting further drunk from that drink.

250 *M*

Medical Bill

This blue scroll, left on someone, will list everything medically wrong with that someone.

25 *M*

Backta Life Tank

This tub of bubbling blue goo will bring anything that's not dead all the way back to life given a week of uninterrupted submersion. Beings submerged in this will not drown.

500 *M*

Wokebomb

This dizzying orb does not lose its momentum when spun. The faster it's spinning, the louder it will be when destroyed, and must be spun down to transport safely. If spun enough (a non-continuous combined minute of spinning), it will start to hover. If shattered while hovering, it creates a whirling soundburst that awakens everything within range 48, even without line of sight or line of effect. This works on even magically or force slept beings.

50 *M*

Rearming Wound

When applied to a stump, this goo will allow you to re-attach the lost limb.

100 *M*

Unicorn Horn

This horn is on point when it comes to healing. When dipped in water, it will purify it of all contamination, and if left in that water for a week, it becomes a healing spring until the horn is removed. Waving it over a poisoned person for 5 minutes will cure their poison, during which you will get a imprecise feeling of their innocence as compared to your own.

1000 *M*

Universal Vaccine

This divine liquid renders those who drink from it free of all diseases, and immunizes them against all diseases it has cured thus far. Used sparingly, there's enough for 10 sips.

1000 *M*

Amulet of Vitality

Wearing this amulet prevents aging. If removed, all prevented aging immediately occurs.

Quest Only

Kindler

When placed upon the body of the dead, it can be lit to rekindle the soul that normally resides there, and allows them the opportunity to return to life.

Quest Only

Water of Eternal Youth

When drunk, this makes someone physically younger by one year per potion. Don't overdose.
Quest Only

Infiltration**Evershifting Robes**

Deep, concealing robes that are in a constant state of flux, as if a caught in a breeze they can't escape. The breeze always seems to come from the Rift of Chaos. It completely conceals its wearer and can change its color
100 \mathcal{M}

Hand Model

This glove remembers those it's sleeved forever. It can duplicate any hand that's worn it. Left and right sold separately.
100 \mathcal{M}

Turnout Jacket

This set of clothes is actually several sets in one; its wearer can switch freely between them whenever in Stealth.
100 \mathcal{M} .

Glamour Powder

This makeup, once applied, makes you magically fashionable and glamorous until midnight.
25 \mathcal{M}

Hat of Disguise

This audacious hat allows its wearer to change everything about how they look except for their size, what they're holding, and that they're wearing a hat. This is an ILLUSION effect.
250 \mathcal{M} .

Mute Button

This cute little button is decoratable, but when exposed to warmth will reveal a hidden symbol of a wave with a diagonal line through it. Whoever wears this cannot speak.
250 \mathcal{M}

Stealth Suit

This slippery sleek skinsuit seems sort of see-through. When worn without armor, it gives an +2 Item Bonus to Sneaking Skill Checks. If you stay completely still with this you become transparent.
250 \mathcal{M}

Cardboard Box

A cardboard box imbued with a suggestive label that diverts attention away from it as a [mental] effect that's just big enough for one person, crouching. While in it, they can move at half speed and have a supporting role bonus to any stealth attempts. The effect does not end after the person exits it and becomes impossible to find and re-use.
50 \mathcal{M}

Cloak of Delayed Divinations

This cloak is made of tachyons and reflective duct tape. Probably. When attempting divinations on this cloak or its wearer, the divination instead sees where it was 24 hours previously.
500 \mathcal{M}

Silence Bomb

An extremely visible but utterly silent explosion that seems to progress in slow motion. Once started, the explosion takes five minutes to complete, and all area within line of sight to the explosion is muted. When the five minutes are up, all sounds that were made in its effect come out all at once as well as the explosions boom.
50 \mathcal{M}

Faceripper

On an unresisting target, you can use this kit on them to copy their face, and then place that face on someone else. This copied face lasts until it takes damage.
100 \mathcal{M}

Psychic Paper

This blank piece of paper is a free pass to anywhere you want, so long as they believe it. It can appear to be any type of credentials you desire. The details are filled in within the minds of the reader, however it will appear consistent to multiple readers. This is a [MENTAL] effect.
1000 \mathcal{M}

Note to Self

You read this note you wrote yourself to remind you of something. That something is a thing you retroactively did within the last week that affects Right Now.
Quest Only

Persona Perfecti

A bit of soul goes into your art of disguise - but who's soul? This small, clear marble has a ribbon tape that can be pulled from it. If this marble has enough exposure to an entity, it can learn that entity wholly. If you pull the ribbon tape out and wrap yourself with it wholly, it creates a disguise of any entity it has learned. You don't just look like them - it

helps you act like them. You can imitate their mannerisms and ticks and speech and everything about how that entity acts as well. When you remove the disguise the device refills with ribbon tape.

Quest Only

Investigation

Invisible Grease

It comes in a vaguely fist shaped blob and smelling of chicken. When rubbed against any solid wall, it renders it transparent.

10 *M*

Eavesdropper's Glass

This appears to be a simple drinking glass, but when help to a door, wall, or similar surface, one can hear what is occurring on the other side.

100 *M*

Frame Game

This enchanted picture frame lets you see from it as long as something on it has eyes and you're in the same building. The eyes move with your watching.

250 *M*

Moniker Monitor

This magnifying lenses reads fine print, but also, if you keep the entirety of someone with it within its view for three minutes, it will hover their Real Name above them. Every three minutes thereafter it will another, if any, previous Real Names they've had.

250 *M*

Recapper

This lined notebook listens extremely well to your conversations. Upon command, it will provide a written recap of any conversation it was part of.

250 *M*

Death Note

This book will only allow you to write the names of the dead in it. All other names and types of writing will erase themselves.

500 *M*

Litmus

When asking a question of someone, you may crush this cube the size of your thumb during their answer. If they lie when they answer, the cube is hot when crushed. If they tell the truth when they answer, the cube is cold.

50 *M*

Scroll of Historical Identification

When laid upon an item, this empty scroll fills itself with text about the history of the item it is placed upon, its previous owners, historical significance, where it was created and by whom, and where it has traveled. Sometimes they just spontaneously catch on fire instead, though.

50 *M*

T-Drop

This sets of earmuffs, when worn, lets you eavesdrop into telepathic communication within 12 hexes range of you.

1000 *M*

The Hole of Truth

A circular pad with golden, glowing linings. Anything afoot it cannot lie, and on a failed defense roll, must tell the truth, the whole truth, and nothing but the truth.

1000 *M*

Memory Scanner

A garish looking combination of long, thick needles, and a viewing screen. Through a series of painful direct stabs into the brainy parts of the victim, you can see what they remember. This allows you to search someone's memories - it's not open access, searches must be directed and pointed to get useful results. The act of implanting this tends to be lethal without competent magical healing to assist in the emplacing of this. It still works just fine on dead brains, however, up to a week after they deceased. If the victim is alive, they can resist this by having a higher defensive role, so no information can be read.

Quest Only

Knowledge

Frivolous Divination

You can use Prayer as long as what you ask doesn't matter. As soon as you ask it a question that matters it disappears in a puff of logic, without answer.

10 *M*

Trivial Trinket

While wearing this trinket, you always count as having a rank 1 role to gain knowledge so long as the knowledge is trivia.

100 *M*

Reading Glasses

These nerdy glasses make reading easier. When preparing for a skill check for knowledge using a library or other written resource, the time needed for a given bonus is decreased by 1 time step

250 *M*

Headband of the Wise

Designate a role, this is permanent and decided when the item is created. When put on and tied, the wearer may use this role for knowledge for the space of an hour, after which it is merely a normal headband.

50 \mathcal{M}

Smartbook

This storage dedicated to text can be fed text, and knows what you want to read. It will show exactly the page of anything fed to it you want without having to search it.

500 \mathcal{M}

Backtrack Map

When uncurled under moonlight this map plays a haunting symphony instead of showing its map. Hearing the symphony fills you with awareness of the physical things that benefit you in places you've been that are on the normal map that you did not get yet that you can now or could have. Have fun backtracking.

1000IU

Avatar's Wisdom

This rune only exists once, and whenever it does not exist, it manifests where it's wisdom is needed most. Etched upon a soul, it grants access to the wisdom and experience of previous wearers of this rune.

Quest Only

Magic**Spell Glyph**

Pick a spell when item is made; this Glyph allows you to use that spell once if you pay it's mana cost/complete a spell.

Spell Rank \times 20 \mathcal{M}

Wyrddust

This dust, made from powdered Wyr, will stick to and settle over magic fields. If they complete cover the magic field they will totally suppress it. After sticking, the dust reverts to regular, not-sticky dust after an hour.

10 \mathcal{M}

Apprentice's Ring

The amber gemstone on this ring will gently twinkle with an inner light when in the presence of significant magic, be it a spell or a magically significant area.

100 \mathcal{M}

Elemental Goggles

When this item is designed, choose an element - fire, magic, life, wind, etc. While worn, you can see all the eddies and swirls and buildups of that element, but you are otherwise blind.

250 \mathcal{M}

Psi Beacon

A 4 foot tall self floating crystal that changes a different color per person using it. The psi user can relocate it by reducing their speed to 1 and willing it to levitate with them. The psi user can project non damaging psionic effects to all entities within its range.

250 \mathcal{M}

Big Fat Grimoire

Any person can record any spell they know into this book. This book must be still for long enough to gather dust. Once so and until it is moved, anyone can cast any spell recorded into it as a ritual spell from it.

500 \mathcal{M}

Magifinder

This scanner can tell you the approximate strength of any given magical effect, if focused on it for a minute. With a relevant Role check it will also tell you what kind of effect it is.

500 \mathcal{M}

Leyaway

Once activated, for the passage of one setting of the moon to the next, this glyph creates a temporary place of power that connects with the natural magic of the world. While within this place of power, spellcasters have access to a much larger magic source. Ritual Casters cast in 1/10 the time, Prepared Casters don't consume their prepared spells upon use, and Spontaneous Casters refills Spell Points as fast as they spend them.

100 \mathcal{M}

Spelldrinker

With a minute of effort while empty, this orb can dispel a magical effect, and become full. When full, it can be emptied by using it to cast a spell of a level less than or equal to the spell dispelled. A spell cast in this way can be cast in a minute with no further drain on your spellcasting capabilities, regardless of your spellcasting method.

1000 \mathcal{M}

Archmage's Staff

Not a tool for mediocre mages. When making a skill check to increase your effective role to spellcast, you automatically succeed the check.

Quest Only

Genie's Lamp

This lamp has 1d3 wishes left and a genie that's been trapped for at least 1d1000+9000 years. It will be compelled and empowered to fulfill any wish feasible - though perhaps not in the way you expected. What it does after that depends on the Genie.

Quest Only

Security**Rope of Binding**

This rope, when knotted, resists most attempts to break or escape from loops made from it (however sloppy), forcing a Role check to escape. The difficulty rank is 1 higher than its rank.

200 × Rank \mathcal{M}

Warner Stone

This plain stone is enchanted to glow when something within 20 hexes of it is present. They can be utilitarian, for "clean water", warning, for "fog", or more danger specific such as "kobolds are nearby." The nature of the enchantments require that the condition to be very precise, "monsters" will not work but "carnivore rats" will work.

100 \mathcal{M}

Eternal Lock and Key

This lock comes with a single, matching key. When placed, this lock is unbreakable and cannot be shattered or removed. When unlocked by it's matching key, both lock and key disappear in a puff of vapor.

25 \mathcal{M}

Hipokrit's Writing Utensil

This magical pen can take the form of any tool used for writing and when used to write in any language the writing becomes unreadable after 10 minutes to everybody other than the writer. This writing may not be understood by non-magical means and can easily be mistranslated.

250 \mathcal{M}

Shrieker Balls

A metal sphere with many uneven circles engraved into it's surface. Upon touch, it's humming. If violently jolted, it emits a loud, shattering screech that destroys itself and glass and crystal within earshot.

25 \mathcal{M}

Master Key

This key can open any mundane lock, once. It snaps once used, leaving it's remains jammed in the keyhole until cleaned out.

50 \mathcal{M}

Pocket Trap

This extradimensional space serves as a one-time catch and release prison, commonly used by the local law to capture defeated prisoners. This does not work on someone who can resist it, a target must be WOUNDED or willing. Once engaged, it slowly forms a magical energy cocoon that engulfs it's target, and then dematerializes. If this is interrupted, poked, moved, or interfered with at all, it collapses. If you use this item in combat, it takes two rounds to work. It can be activated again after catching a target to release them.

50 \mathcal{M}

Stuffeddar

This many-armed clock serves as a timepeice, and you can have it point to a specific item you own. Can also be set to sound an alarm 1 minute after something leaves your possession without you noticing.

500 \mathcal{M}

Skeleton Key

This bony, morphic key can open nearly any lock, magical or mundane, of rank 4 or below.

1000 \mathcal{M}

7th Seal Set

This set of seven seals, properly distributed and aligned, will seal virtually anything away for 1000 years. The more powerful it's denizen, the wider they must be spaced.

Quest Only

Survival**Animal Repellent**

Repellent formulated against a kind of wild animal. A dose of this will drive away unintelligent animals of the kind specified for a day.

10 \mathcal{M}

Fire Sphere of Persistent Light

A small orb that roils with the color of red. When crushed, it shoots straight up, and creates an enduring globe of illumination high in the sky that can be seen by anyone while it lasts, which can be designated by the user for up to an hour.

10 \mathcal{M}

Inflammable Wand

This specialized wand holds charges that put out fires. It can put out six hexes worth of fire before it is expended, at range 12.

10 \mathcal{M}

Parachute

When deployed, this spider-like magical webbing significantly slows your fall. You can descend as if you had Hover.

10 *M*

Everburning Implement

It never goes out, 'nuff said. It provides [Light] for its hex and 2 beyond. It can count as an improvised melee weapon. Alternatively, this can be added to an existing weapon, as a magical weapon that always glows.

100 *M*

Cloak of Water

This cloak is made of self-replenishing water that flutters like cloth. When underwater, it is made of self-replenishing air that flutters like cloth in air.

100 *M*

Instant Campfire

When unactivated, it is a pouch the size of a fist. When you sprinkle water on it, it instantly turns into a full-sized roaring campfire, with enough logs and fuel to last through a night. Smores not included.

25 *M*

Magic Matchbox

It never runs out of matches, the matches never run out of flame, they always light on the first flick. They even work where flame can't normally work, like underwater.

250 *M*

Instant Hut

When unactivated, it is a pouch the size of a fist. When you sprinkle water on it, it instantly turns into a full-sized cabin, large enough to hold six. Instant Campfire(tm) not included.

50 *M*

Stimulator

This metal tattoo attaches to the flesh of it's wearer. It's mostly sticky, and peels on and off with some effort. While attached, this delivers a constant influx of vital energies and alertness, reducing the amount of sleep it's wearer needs by 75%. The designs of the tattoos vary, many are utilitarian, but the tribes of the Wilds use them as a clannal identifier sometimes.

500 *M*

Shelter Orb

This orb creates an environment suitable for life within it's radius. Gravity not included.

1000 *M*

Instant Castle

When unactivated, it is a seed the size of a fist. When you sprinkle water on it, it instantly turns into a full-sized castle that can serve as a Headquarters, complete with magical servants to run it.

Quest Only

Tool**Grapple Launcher**

A favorite of the Nocturnal Ninja and the Integrated Steamtech Commando. Effective range is 5 hexes per rank. You can fire it to latch onto a solid point within line of effect. The entire hex must be solid to be an anchor. You can retract the line to pull the launcher to the other hex if it's anchored, or pull something small back to the launcher. If you hang on to the launcher, you are pulled with it, and you're in air during this movement, and move at one hex per STEP spent. These lines can be destroyed by an effective attack. If the other point is destroyed, the line is retracted.

200*Rank *M*

Masterwork Components

These high quality ingredients and components give a +2 Item Bonus per Rank to the skillcheck for one task performed with them, and are set to a specific role.

20*rank *M*

Appraising Monocle

Used to obtain minute details about items examined. An analysis will reveal the true value and state of an item.

100 *M*

Attractive Bandage

They're not magic, but how they work is still a mystery. A three foot long bandage that can be wrapped around many things. The bandages themselves hold all metal touching them as if magnetized.

100 *M*

Swiss Army Knife

This versatile tool contains the perfect tool for what's at hand, as long as the tool is smaller than a finger. If the tool will work despite it's small size, you gain a +2 Item Bonus to skill checks for a role that uses that tool.

100 *M*

Wizard's Disk

This floating plank can change in size from 1 foot x 1 foot to 2 foot x 4 foot. It follows you at your speed and can hold anything placed atop it, irregardless of its weight, with perfect stability, as long as it fits.

100 *M*

Extra Handy

You have an extra hand, literally. You can hold and manipulate one more thing at once.
250 \mathcal{M}

Genie's Stopper

This bottle can suck in fog and smoke and unbound genies in gaseous form within range 4.
250 \mathcal{M}

Many Footed Pole

This pole can resize itself anywhere from one foot to forty feet as a minor action.
250 \mathcal{M}

Stuffsack

This sack can hold all of your stuff, because it's bigger on the inside. Isn't extradimensional storage neat?
250 \mathcal{M}

Fashionable Spacelord's Closet

This door and its frame are always in fashion for the area they're in, shifting as it needs to to remain so. The door opens into a bigger-on-the-inside dimensional closet that has a luxurious closet that's similarly up to date for the area they're in, as well as having plenty of extra storage for non-fashion things.
500 \mathcal{M}

Immovable Rod

If you hold down the button and hold the rod in one spot for one continuous minute, this otherwise ordinary metal stick does not move and is indestructible. It cannot be moved by gravity, FORCED movement, attacks, TELEPORT or WARP effects, or anything else.
50 \mathcal{M}

Sonic Multitool

There were once thousands of these, until the factory that made them went out of business - now they're very scarce to find. This curious wand, instead of a magical charge, has a series of dials that adjust themselves based on your thoughts. It allows you to attempt to unlock or lock physical, magical, or technological locks, or read data from devices, as if by magic, at range 6, instead of range 0. It grants a role specific to its use at +1, if the user doesn't have a more applicable role, and gives a +2 bonus to skill checks while using it.
500 \mathcal{M}

Cubic Rod

This rod, when waved as a major action, creates a weightless and glowing, indestructible force cube 3' by 3' by 3' within range 6 of user that lasts 6 hours.
1000 \mathcal{M}

Vault Key

A Vault Key allows you to withdraw or deposit items of any size into or from your highly secure extradimensional vault from any location with a short, minute long ritual, and is magically coded to only be usable by you. Procuring one is an exclusive process of the owner of the extradimensional banks.
Quest Only

Trap**Demolition Charges**

Artificers make them, therefore they explode! They can be used to destroy destructible terrain within a radius $2 \times$ rank aoe, or destroy one hex of nondestructible terrain. When used as part of a trap, they do damage according to the Evoker table by tier (see the monster ability, secondary majors section) and creatures caught in them are deafened until they make a successful Recovery Roll at $dc10 + \text{charges level}$, or the damage received is fully healed. More potent charges have a higher tier. They are built with several safeguards; they take a minute to set and arm; and another minute to detonate. A rank 5 demolition charge does tier 4 damage with 2 boosts and destroys all destructible and nondestructible terrain in its radius.
 $20 \times \text{Rank } \mathcal{M}$

Poison Dose

A single dose of poison can weaken its drinker, with varying effects. Typically, they reduce the drinkers effective roles by the strength of the poison (-1 to -5), and can only affect a target once per day. Anything stronger than that is typically an Ability, as more potency in speed or strength as to be combat capable is better represented there.
 $20 \times \text{Rank } \mathcal{M}$

Trapped Tome

Choose a trap trinket, and obtain it. Once obtained it can be added to the Trapped Tome to inflict its effect on anyone who opens it who is not you, or does not know the secret safety mechanism, determined when the trap trinket is added.
Other item's cost + 10 \mathcal{M}

Glitterbomb

When activated, releases a lot of sparkling particles which tend to stick around even after being cleaned up.
10 \mathcal{M}

Invisibility Pad

This very visible floorpad renders whatever is set upon it invisible while it remains there. They come in varying sizes. Screen reader support enabled.

100 \mathcal{M}

Stinkbomb

When placed, this makes an area stink very badly.

10 \mathcal{M}

Barrel of Snakes

This barrel, when open, has snakes peeking out from it, but not escaping from it. If the barrel is broken or destroyed, the snakes escape and cover the floors of an entire building.

25 \mathcal{M}

Daravon's Opera Box

This music box isn't inherently magical, and neither is the opera recording on it. It's simply that boring. When left playing in a room, everything with hearing in that room that can hear this cannot help but fall asleep over the course of several minutes.

500 \mathcal{M}

Book of Perilous Puzzles

A Sphinx-cursed puzzle that traps the puzzler (per a successful Pocket Trap) if they cannot solve it in time. Abandoning a puzzle that has been started counts as a failure. The puzzle is programmed into it when it is set.

1000 \mathcal{M}

Master's Pocket Trap

This mastercraft pocket trap is sensitive and powerful, and cannot be handled normally. It can be set to trigger on movement, touch, or proximity. Once placed, it has a warmup of five minutes, whereas it will capture the next entity to match its trigger condition as per a successful pocket trap.

Quest Only

Travel**Calibrated Compass**

This compass points to something and it's not north. Sometimes these are a place, such as a favorite port for a ship, and is labeled, but oftentimes what they point to is totally unknown until you follow it to what it points to.

100 \mathcal{M}

Diving Helmet

This oversized clear helmet blocks out nondamaging liquids and all gases. Often paired with Instant Oxygen Chips.

100 \mathcal{M}

Instant Oxygen Chips

A blue pill the size of a breath mint. Instant air, just add water - it provides one hour of oxygen if bottled. Often paired with underwater apparatuses.

10 \mathcal{M}

Telescope

You can see really, really far.

100 \mathcal{M}

Bridgeify

This rod can be placed into the ground, spiked end first, and it will create a bridge up to 30' in length and a copy of itself on the other end. The rod can be retrieved from either end of the bridge, which dispels the bridge and the rod not picked.

250 \mathcal{M}

Drums of Marching

On a long group travel everyone can go as fast as the drummer and it doesn't wear anyone out.

250 \mathcal{M}

Ladder to Infinity

This ladder grows, up and up and up. It can shrink down to one rung for transport as an instant effect, and it can add a rung to its top, over and over and over with no limit. 10 rungs equal height 1, and every 10 rungs thereafter add another height. It can grow at the rate of one minute per height. Without sufficient support, the ladder is unclimbable above certain heights.

250 \mathcal{M}

Monocle of Apparent Reality

When looking through this, you can see yourself as if you were on another hex. If you blink while looking at that hex through this monocle, you TELEPORT to that hex, and the monocle is destroyed.

25 \mathcal{M}

Recall Token

This septagonal disc, the size of a hand, always shows a picture of where it will transport you to on its faces. If you snap it while holding it, you WARP to the area it designates. If you merely bend it, you get a sense of the weather and conditions of where you're going to WARP to.

25 \mathcal{M}

Tophat

This 5 gallon hat, when filled with five gallons of water, will provide a top-down view of its current location as if seen from the sky.

250 \mathcal{M}

Vacuum Suit

These bulky, completely sealed suits allow its wearer to survive in places with no atmosphere, such as extradimensional space, and ignore the existing atmosphere, such as a poison air cloud or underwater. Often used with Instant Oxygen Chips.

250 *M*

Locke's Key

You can use this key to open a door that opens to a different door that you've doored through before. This linking ends when either door is closed, and the key breaks in two halves, one on each door.

50 *M*

Map of the Lawful

This parchment, when invoked, draws out a map of the solid public structures of the surrounding area, up to range 200 centered on its physical location, over the course of a few minutes.

500 *M*

Replenishing Vacuum Suit

These bulky, completely sealed suits allow its wearer to survive in places with no atmosphere, such as extradimensional space, and ignore the existing atmosphere, such as a poison air cloud or underwater. It generates enough to sustain its wearer indefinitely.

500 *M*

Speed Trace

"You can hide but you cant run!" Boots that adapt themselves perfectly to the tracks they step on. If you follow a set of tracks or a trail, you can traverse it's path as long as it is travellable and followable instantly, this can be two-way.

500 *M*

Map of the Lawless

This parchment, when invoked, draws out a map of the empty spaces and hidden areas of the surrounding area, up to range 20 centered on its physical location, over the course of a few minutes.

1000 *M*

Peridot Hoops

Closed, two peridot earrings. Open, two linked holes that have peridot handles, that can be placed separately. They have adjustable size, being able to be shrunk all the way closed or opened as far as 7 feet horizontally and vertically. When one is adjusted, the other adjusts to match. What goes in one goes out the other. Footsprings not included.

1000 *M*

Shifter's Inn

This doortag reads 'do not disturb' but the more you focus on it the less sane it seems. If you hang this doortag at an inn, you wake up in a random, different inn the next day and noone notices anything odd. A successful Role check will let you set parameters not related to location, one per rank of success; such as reputability, quality of food, occupant capacity, classiness, lack or presence of racial profiling, etc.

100 *M*

Gravity Bounders

When activated, this amulet sets "down" to a different direction than what's actually down for it's wearer. What that direction is is set when the amulet is created. It can be "up", "left", "right", "70 degrees clockwise", etc. Classically they're found aligned for reverse gravity, but other alignments exist.

Quest Only

Light of the Navigator

Provides private light for all w/in your party. If you hold a destination in your mind, it will point and light the way to go, as well as provide instinctual knowledge of the route it uses. While you can see this light you can never be externally dissuaded from pursuing it's destination.

Quest Only

Visitor's Screen

This see through window is indestructible and resonates with sites of importance and danger. It shows the name of the region when looking through it, and if held up to a place of importance or danger for five minutes, it attunes with it. With a ten minute stationary warmup, this glass plane can instantly transport itself and all holding onto it to any site it's been attuned to previously.

Quest Only

Other**Earworms**

They go in your ears, and block out all sound except the tune they provide. Used as implements of torture or therapy, depending on the tune.

10 *M*

Eternally Bouncy Ball

This ball, when thrown, does not stop bouncing until caught.

100 *M*

Folding Screen

A portable folding screen 6 feet high, when setup, you can change outfits while behind it instantly.

100 *M*

Hat of Eminent Importance

You have a Title of Importance, and while you're wearing this, everyone who sees you know it.
100 *ℳ*

Luminous Pointer

Display a dot of any color with unlimited range as long as you have line of sight. Drives felines battens.
100 *ℳ*

Mood Rings

When worn, they turn the color closest to your mood. And since these are magic, they actually work.
100 *ℳ*

Robotic Stilts

These extremely well crafted poles increase your height by 1. Once you fall a few times it's very natural to move around with them like they were your normal legs.
100 *ℳ*

Cleric's Talisman

When held aloft, this symbol compels all undead near it and all who perceive it to come no further. This effect ends if the user takes a minor or major action, a surge, or takes damage from a non-undead source.
250 *ℳ*

Varie Stable

When placed, your mount(s) always know where this is and can return to it. ('very stable stable joke')
250 *ℳ*

Banner of Bravery

This banner fills all who see it with knowledge of it's owner, their reputation, and general position.
500 *ℳ*

For Sale Sign

Hold this sign up and somebody will approach you to buy anything you want to sell them, then leave once the transaction is completed. Warning: there are few guarantees for how much the customer is willing to pay, and no guarantees for who will show up. Also, this trinket might not work in truly desolate and inaccessible places.
500 *ℳ*

iLauncher

This crossbow has no strings and cannot take bolts, it just has an empty groove. Placing something small enough in it will launch it up to 6 miles where it will land, unharmed. The further away you launch it the higher the difficulty of the Role check to launch it accurately.
500 *ℳ*

Redstone Hexagon

Look, we don't know why it doesn't run out of power either. Place it and you have an unending power supply within 3 hexes of it, though. It breaks if it's moved after being placed and turned on.
50 *ℳ*

Crown of the Beastlord

This crown lets you command unintelligent animals that you can see and that can see you. If you use it too long you become an animal yourself.
1000 *ℳ*

Forward Jump

This portal, when jumped into, moves you two minutes into the future. Each use of this adds one level of FATIGUE.
1000 *ℳ*

Chapter 13

Artifacts

Artifacts are relatively rare items that grant their user greater combat capabilities. Artifacts are ranked by Artifact Points, which determine how strong and rare an artifact is.

Acquiring Artifacts

The default assumption is that Artifacts are hard to come by. Even if you are wealthy, you can't just go down to the store and buy a ton. If you wish to make them easier to acquire, you can consider the Artifact Slot system (see below) to limit how many can be utilized. Artifacts can be found as loot in dungeons, or from significant enemies being defeated. They may also be gifted by a benefactor. Players may also come across opportunities to buy artifacts; the traveling merchant may not have every item around, but they may have a particular one they will try to sell. Opportunities to trade items may also present themselves.

Parceling Artifacts Out

The suggested rate to give players new items is one Artifact point per player per levels.

In addition, Depletable Artifacts can be granted at a similar rate.

Both of these rates can be adjusted to suit the needs of a campaign. Giving fewer can make the items more rare and special. Any items granted by the player's abilities should not be considered when determining how many they find. They are bonus items, above and beyond what they will get normally.

Generating Loot Lists

There are three basic ways of picking which items the players receive.

The first is to ask them what they want ahead of time, and make the item they find "just happen" to be what they are interested in.

The second is to pick items randomly. You can roll on a table and see what they get.

The third is to pick items yourself. This may be to introduce an item you think will be interesting, or to give a player something you think they will like.

All have advantages and disadvantages, and you should use the method, or methods, which work best for your GMing style and party.

Starting Artifacts

How many items a party starts with is completely up to the gm, but it often makes sense to align it with the expected artifact rate for the campaign. Following the suggestions here would mean that they start with 1 artifact point per level if starting above level 1.

Player Choices

For the player who needs That Specific Item and is having trouble getting it. You may not want to just arbitrarily let players pick the items they will stumble across. In such a case, there are still avenues for a player to control their item selection.

The first is to pick an ability that grants an item, such as the Bound Item feature. This is useful for things that are specifically important to a character, and are integral to their concept.

The second is to undertake a project to acquire the desired item. This may lead to knowledge about a dungeon containing it, somebody who has it and may be willing to sell it or trade it, or it may result in the item itself, depending on what the GM desires.

The third would be to undertake a project to create the desired item.

The fourth is to be an Artificer, which gives a much greater control over your item selection as part of its benefits. They have specific skills directed towards creating items that can avoid the need for a project.

Optional Rule: Artifact Slots

If you wish to make items even more common and easily acquirable without increasing their impact on combat, then you can use slots as an alternative system.

A character must spend time to attune an Artifact before they can use it, and each attuned Artifact takes up a slot for each point. They gain a slot at every level, starting with 2 slots. Artifacts may be unattuned to make room for a different Artifact. This can represent needing to channel magical power to use them.

Optional Rule: Requisitions

If the PCs work on behalf of a group, association, or powerful patron, Requisitions is a method that assigns a set budget that will be granted to the PCs. Purchasable, permanent, consumable, and depletable items have a certain budget.

An example budget would be 500 \mathcal{M} and one Consumable for each member of a team, for a low level group. For a high level group, the budget could be 2000 \mathcal{M} , two Artifacts, 2 Depletable Artifacts, and 3 Consumables.

At the end of every mission, all permanent and unused items are turned in; the budget is reset, and the PCs are allowed to refill their gear from the budget for the next mission.

Rarity

There are four rarities of items, Common, Uncommon, Rare, and Legendary, which are worth 2, 4, 6, and 8 points each, respectively.

Rarity determines how hard it is to come across it. Common can be found in general loot, uncommon would be in a significant place, like on a boss, rare would be a centerpiece of a high level dungeon, and legendary items can have an entire quest devoted to their acquisition.

Each rarity has a max point allotment. Feats and abilities that grant items grant a specific rarity. There is no such thing as a 0 point item.

Points can be used to select various effects, and modifiers can be applied to change the cost.

Building an artifact item

First, select a goal rarity. This will determine the number of points available to the item. Then select a combination of enchantments and modifiers that meets that goal. A magic weapon can select from the general and weapon enchantment lists, and should also specify its base weapon type. A magic armor can select from the general and armor enchantments. Any other artifact selects from the general enchantments list. Enchantments may be selected multiple times for the same cost. A modifier cannot be applied if it won't have a meaningful effect, such as a 1/encounter limit applied to something which is only usable once. Additionally, higher level artifacts can have the effects of a trinket as well. 4/6/8 point artifacts choose or design a rank 1/2/3 trinket at no extra cost. If it's a permanent trinket it gains that effect. If it is a consumable trinket it comes with ten times the initial usage and may be recharged to full for its normal \mathcal{M} cost.

Continuous vs activated

A continuous effect always applies. An activated effect must be chosen to be activated. If an item has multiple activated effects, they all activate together. An item can only be activated once per round.

Obtaining items

The GM has a lot of latitude in how they handle items. They can offer more items, let players design or pick items, or even not have items, but this is the default way to handle items that we feel has a good balance for their impact on a game.

Players do not normally design and select their own items freely. If they want some specific items they can use the bound item feature or the artificer track.

On average, each player finds 1 points worth of items per level. This need not occur on every level, and every party member doesn't need to get items simultaneously, this is just a rough guide for how frequently items should be found. You can batch up multiple points of items into larger items, which can help make the items more special and impactful. Try to select items that the party can make use of, but it doesn't need to be perfectly tailored to each character.

Common items can be included in typical loot. It can be interesting to have an enemy wield it as an addition to their normal strength. Uncommon items are more appropriate as loot from bosses, which once more the boss may be using, or as a quest reward. Rare items are good quest rewards and loot from very special encounters, or may have a dungeon dedicated to them. Legendary items are, well, legendary and can be the focus point of an entire quest to acquire, but should generally have something very specific to them, as well as tie into the lore of your world.

Occasionally presenting players with choices about which items to get can be helpful too. Especially if the party has an item that they don't seem to appreciate, giving them a chance to barter or trade it for a new item they like better is helpful. If they truly are not using it, you can also just give a new item to make up for it.

Example party loot progression

This is for a party of 4, and is a progression for the entire party. This is only an example.

Lv	Items
1	4 common items (starting wealth)
2	-
3	1 uncommon item
4	1 uncommon item
5	-
6	2 rare items
7	
8	2 uncommon items
9	
10	
11	2 rare items
12	
13	
14	1 legendary

Cursed items

There are two types of cursed items.

The first are temptation items. These provide powerful effects, but come with a high narrative cost.

Such items can have up to 8 additional points, depending on the curse. For instance, a cursed dagger may require your to kill an innocent to gain its power, or an item may give one the appearance of a demon, along with the associated reaction from NPCs.

The second are attaching cursed items. These items are difficult to get rid of once acquired, either resisting being physically removed, magically reappearing on the user, or otherwise making conventional removal difficult. An appropriate role check can reveal the method of removal, which typically requires meeting some criteria or accomplishing a task.

There are also naked curses, which function like attaching cursed items, but there is no physical item. They may be applied by an enemy spellcaster, be triggered by violating a tomb, etc.

The effects and methods of removal should be designed for the specific campaign by the GM. These are very narrative heavy items so there isn't a concrete list of what they can do.

Enchantments

These are the enchantments available to create artifacts with.

General Enchantments

Block Teleport: 1 pt

When activated, the user gains a RIDER that prevents the target from using TELEPORT or WARP abilities for 2 rounds.

Ignore Difficult Terrain: 1 pt

The user of this item can ignore movement penalties from difficult terrain.

Lesser Scanner: 1 pt

The user of this item gains SCANNER 6.

Levitating: 1 pt

The user can hover.

Lightfooted: 1 pt

Increase the user's speed by 1.

Natural weapon: 1 pt

Grants a natural weapon. This weapon can be enchanted for an appropriate cost.

Protection from afflicted: 1 pt

The user of this item can move through afflicted hexes without being affected by them.

Swimming: 1 pt

The user of this item can move at full speed underwater and can breath underwater indefinitely.

Afflicting: 2 pt

When activated, you may afflict 1 hex within 12. Creatures entering this hex are SLOW 1 for 1 round. You may increase the area to a 1 hex spread for 2 points. You may increase the duration of SLOW for 1 round per point, or turn it into an ENERGY EFFECT for 1 point.

Anchoring: 2 pt

When activated, become immune to FORCED movement for 1 round.

Create Cloudy: 2 pt

When activated, you may make a 1 hex radius burst within 12 hexes cloudy.

Evoking: 2 pt

This can be chosen to do either a 1 hex burst within 12 hexes, a 6 hex cone, or a 12 hex line. Choose an ENERGY EFFECT. 1/encounter, as a minor action the user of this item may create the chosen aoe that does $3 \times C$ damage to everyone in the area and inflicts the ENERGY EFFECT. A successful defense roll halves this damage and negates the ENERGY EFFECT. A mook must use a major action to use this.

Grant feature: 2 pt

Select a feature. This item grants that Feature to its user. If the feature is Trackformer, no modifiers may be applied to this.

Heartbonded: 2 pt

Choose an ally. You are immune to that ally's attacks.

Jump: 2 pt

The user of this item can jump 3 while on solid ground.

Monster: 2 pt

Once per encounter, you may use a specific monster major or minor ability for it's associated action cost. This ability may be enhanced for 1 more pt.

Pulling: 2 pt

When activated, you may FORCE an enemy with 6 hexes 3 hexes towards you. A defense roll negates this effect. If this is made [FEAR] or [MENTAL], it becomes DIRECT instead of FORCE.

Quick: 2 pt

Increase the user's speed by 3.

Repelling: 2 pt

Enemies within 3 hexes of you must spend another STEP to approach you. This is a SLOW, FORCED effect.

Scanner: 2 pt

The user of this item gains SCANNER 12.

Soulbonded: 2 pt

Pick an ally. You can always target that ally without needing LINE OF EFFECT.

Spellcaster: 2 pt

Once per encounter, when activated, the next battlespell is cast instantly.

Summon Creature: 2 pt

Design a creature. It has $2 \times C$ HIT POINTS, base 6 speed, knows two mook major abilities, one of which must be primary, has a Monster counter, a monster tactical and either has a natural weapon or wields a weapon and a spare weapon. It attacks on the round it is summoned, and on the round following, after which it is dismissed. Once per encounter as a major action this creature can be SUMMONED on the ground within 12 hexes.

Unbalancing: 2 pt

When activated, the user gains a RIDER that inflict OFF BALANCE on a hit.

Barrier creation: 3 pt

Once per encounter, when activated at the start of your turn, you may make 6 consecutive hex borders within 12 hexes of you in a straight line blocking obstacles for the rest of the encounter.

Bleeding: 3 pt

When activated, the user gains a RIDER that inflicts BLEEDING C on a hit.

Blinding: 3 pt

When activated, the user gains a RIDER that inflicts BLINDED 6 for 1 round on a hit.

Disintegrating: 3 pt

When activated, you may destroy 1 destructible obstacle within 6 hexes.

Dizzying: 3 pt

When activated, the user gains a RIDER that inflicts DIZZY 2 on a hit.

Fear aura: 3 pt

Enemies who start their turn within 3 hexes of the user of this item are [FEAR] SLOW 2.

Invisibility: 3 pt

When activated, the user of this item becomes invisible 6.

Monster tactical: 4 pts

Select a monster tactical (pg. 160). This item grants that ability to it's user.

Stunning: 4 pt

Once per encounter, when activated, the user gains a RIDER that makes the target STUNNED on a hit.

Weapon Enchantments

Corrupted: 1 pt

This weapon does C less damage on each attack, but the target is also CORRUPTED 1. If the attack would deal less than C damage before this exchange, the damage is not reduced and the target does not gain CORRUPTED.

Extradimensional: 1 pt

The owner of this weapon may attune himself to it with a 5 minute ritual, causing it to be BOUND to you. While attuned, this weapon can always be drawn, no matter where it is.

Fickle: 1 pt

If you roll a 19-20 with an attack roll with this weapon, it deals an extra C damage. If you roll a 1-2 with an attack roll with this weapon, you take C damage. Each effect can only happen once per round.

Indomitable: 1 pt

When an attack with this weapon would have a PENALTY, the user instead takes C damage per PENALTY.

Morphing: 2 pt

This weapon can convert itself to any other mundane weapon, exchanging its properties for new ones.

Wingbinder: 1 pt

When you attack a flying creature with this weapon, they lose flight for 2 rounds.

Blowback: 2 pt

Melee only. Activate this item to add a RIDER to an attack with this weapon. If it hits, the target is FORCED back 2 hexes.

Electrified: 2 pt

When you use this weapon in a STRIKE, you may activate it to cause the target creature to become SHOCKED.

Explosive: 2 pt

This weapon has the option of targeting everyone in a 1 hex burst when using a non-[S]pecial ability. When used this way, the attack has 2 PENALTIES.

Flaming: 2 pt

When you use this weapon in a STRIKE, you may activate it to cause the target creature to become IGNITED.

Harpooning: 2 pt

When you make an attack with this weapon, the target becomes TETHERED to you with a distance equal to this weapons range, or 12 if its a melee weapon. A defense roll negates this effect.

Icy: 2 pt

When you use this weapon in a STRIKE, you may activate it to have the target creature become FROZEN.

Lasering: 2 pt

This weapon has the option of targeting everyone in a 12 hex line when using a non-[S]pecial ability. When used this way, the attacks have 2 PENALTIES.

Parrying: 2 pt

While wielding this weapon, you have the following counter: Parry[C]: As a COUNTER, gain a 35% dodge chance. This is 20% against [O]verwhelming attacks. You may take a PENALTY to double the dodge chance before it is rolled.

Poisonous: 2 pt

All damage dealt with this weapon is converted to ONGOING. The target may make a defense roll with a +3 modifier to half the ONGOING. This still triggers COUNTERS.

Shockwave: 2 pts

This weapon has the option of targeting everyone in a 6 hex cone when using a non-[S]pecial ability. Each targeted creature can make a defense roll with a -2 modifier to negate the attack.

Spellstoring: 2 pt

Once per round, any ally can pick a non-[W]eapon ability they can use. They may infuse that into this weapon, granting you a RIDER that inflicts any lesser conditions that this ability would directly inflict, with the same defenses targeting (I.e. If the ability requires a save to inflict it's condition, so does this RIDER). If the ability has a limited number of uses this counts as a use against that limit.

Hampering: 3 pt

When attacking a creature with this weapon in melee, they must make a defense roll or be DISABLED. Your target may spend a STEP to remove this DISABLED..

Neutralizing: 3 pt

When you use this weapon in an STRIKE, you may activate it to have the target creature become DISABLED 1.

Pushing: 3 pt

When attacking a creature with this weapon in melee, they must make a defense roll or be FORCED one hex in any direction. You can move with them if you choose.

Tripping: 3 pt

When attacking a creature with this weapon in melee, they must make a defense roll or become PRONE.

Vampiric: 4 pt

When you deal damage to a creature with this weapon, you may half the damage dealt (after all applicable defenses), and heal yourself for the amount dealt. This can only affect one creature per round, all others just take normal damage.

Armor Enchantments**Heavy: -2 pts**

Your speed is halved while wearing this armor.

Damage Resisting[C]: 1 pt

As a COUNTER, you may reduce the damage by C.

Energy storing: 1 pt

Whenever you are attacked, you gain 1 STEP on your next turn.

Guarding: 1 pt

You may take a PENALTY to be ON GUARD.

Life drinking: 1 pt

If you would gain BLOODLUST, you may instead heal by that amount.

Steadfast: 1 pt

If you have a boost, you may spend it to heal C damage.

Spiked[C]: 1 pt

As a COUNTER against a melee attack, you may deal C damage to your attacker.

Bracing: 2 pt

You may spend up to 6 STEPS to charge this armor. On a later turn you may gain these STEPS back.

Immune: 2 pt

Pick one condition from the following list. You are immune to that condition: SLOW , STOPPED, PRONE, DIZZY , GRAPPLED, BLINDED , BLEEDING , STUNNED, IGNITED , SHOCKED, FROZEN.

Freedom: 3 pt

You can activate this item to avoid provoking a reaction.

Retaliatory: X pt

Select one of the enchantments that lets you gain a RIDER when activated. You may inflict this effect on an enemy that attacks you from within their melee range.

Modifiers

Modifiers can be applied to alter the cost of an item's enchantments. You cannot use modifiers to reduce the total cost of an item below 2.

Rate limited: $\frac{1}{2}$ cost

The ability only works once per encounter or for 1 round. If you are applying this to a group of enchantments, you add them together before halving. If you end with a fractional point total, round up.

Restricted: $\frac{1}{2}$ cost

Granted ability is only usable with other ability(such as giving STEPS that can only be used with a certain ability) - half cost of that ability.

Bane: -4 pt

Only works against a certain type of enemy. GM discretion as to what types of enemies are applicable to campaign. Abilities which don't directly target a given type of enemy will still only be active when fighting against that type of enemy.

Equipped: -2 pt

This item has $4 \times C$ HIT POINTS and is EQUIPPED to the user.

Halting: -2 pt

When activated, you are STUNNED. You cannot be immune to this.

Spell triggered: -2 pt

In order to activate this item, you must successfully cast a battlespell.

Add descriptor: -1 pt

The conditions inflicted by this are either [MENTAL], [FEAR] or [GROUND].

Flanking: -1 pt

The associated enchantment only takes effect if used against a target that you are flanking.

Painful: -1 pt

When activated, you gain one of the following conditions. Can also be used to trigger when a destructible item is destroyed. An ENERGY EFFECT , PRONE, DIZZY 2.

Chaotic: 0pt

As flexible, but which effect is used is chosen randomly each time.

Grant extra use: +1 pt

If it can only be used a limited number of times per encounter, you can add another use per point.

Flexible: +1 pt

If this item has activations, it may have 2 more options for activations with the same point total and total number of uses. Each of these activations is under the same total limit, and only gets one of the possible effects.

Sample Artifacts

These artifacts represent a selection of example artifacts that can be made. This can be used as a quick list to pull items from, as examples of how items can work, or inspiration for creating your own items.

2pt Artifacts

Acidophobic Robes

These bright pink robes are lined with Bismuth.
Grants immunity to grappled from oozes, ignores one reaction from oozes each round, and may reduce damage taken by oozes by C as a counter.

immunity(grapple)(2) + freedom(3+)damage reducing(1) + bane(-4)

Backbiter

This dagger leaps forward to strike flesh.... even your own, if you aren't careful.

This is a deft weapon. If you roll a 19-20 with an attack roll with this dagger while flanking it deals an extra C damage. If you roll a 1-2 with an attack roll with this dagger while flanking you take C damage. Each effect can only happen once per round. When flanking a target, this dagger deals ONGOING damage which still triggers counters. A defense roll with a +3 modifier halves the ONGOING.

fickle(1) + poisonous(2) + flanking(-1)

Bag of Animals

This small bag contains a collection of small figurines.

Once per encounter, as a major action, you may draw an animal out of this bag and throw it on the battlefield. It instantly grows to full size and attacks. What animal you get is random.

Eagle - $2 \times C$ HIT POINTS, can fly and use the mook version of Precise(Lower target priority on self, violating gives 2 penalties) or Advanced Attack(blind 6 for 3 rounds).

Bear - $2 \times C$ HIT POINTS, is large and can use the mook version of Advanced Attack(Bleeding C) or Wild Swing(Force 3 hexes away and make dizzy 1).

Rhino - $2 \times C$ HIT POINTS, has Improved Charge and can use the mook version of Wild Swing(Force 3 hexes away and make prone) or Trample.

Mouse swarm - $2 \times C$ HIT POINTS, doesn't provoke from moving, and can use the mook version of Swarm or Hampering(off balance).

Snake - $2 \times C$ HIT POINTS, has Wall Walker, and can use the mook versions of Poison Spit(slow 2) or Drain(disabled).

summon(2) + chaotic(0)

Bag of Devouring

This bag can expand to contain nearly anything, but it doesn't like giving it back.

Once per encounter, as a major action, you may use Swallow Whole.

monster(swallow whole)(2)

Bag of Tricks

This bag contains a wide variety of small critters.
Once per encounter, create a familiar with a random tactical ability.

grant feature(familiar)(2) + chaotic(0)

Banner of Inspiration

This banner inspires your allies to greatness.
Once per encounter, as a battlespell that is cast instantly, you may grant an ally within 12 hexes one the following effects.

- **Speed:** +2 speed
- **Strength:** Once per round, strike adjacent opponent to FORCE them one hex
- **Wit:** Once per round, Raise or lower your target priority for one opponent for one round. Attacks that violate this priority get a PENALTY.

(spellcaster(2) × limited to use with this item($\frac{1}{2}$)) + (grant feature(natural power)) × limited use($\frac{1}{2}$)

Butterfly knife

This weapon unfolds in a peculiar way that is hard to follow.

This is a deft quick draw weapon. Drawing this weapon never provokes, and once per round, when you switch to this weapon, or as a STEP while wielding it, you may render an opponent in your melee range OFF BALANCE.

grant feature(Knife Play)(2)

Caltrops

This bag can be upturned to spew an area with spikes.

Once per encounter, you may afflict a 1 hex spread within 12 hexes. Creatures entering these hexes are SLOWED 1 for 3 rounds. This is a [GROUND] effect.

(afflicted(2) + larger size(2) + increased duration(2)) × limited use($\frac{1}{2}$) + ground(-1)

Charge Potion

Oh yeah, it also tastes like fruit.
For 1 round, you may charge twice as far, ignore the effects of difficult terrain while charging, and can charge through destructible terrain that has less HIT POINTS than twice your charge damage.

(monster tactical(greater charge)(4)) × limited use($\frac{1}{2}$)

Clockwork wings

These mechanical wings attach to your back and allow you to fly.

Can fly while worn. They are equipped to you with $4 \times C$ HIT POINTS.

monster tactical(flight)(4) + equipped(-2)

Cowboy's pistol

A six-shooter of immaculate craftsmanship. This is a guarded piercing weapon. Two times per encounter, you may force an opponent you attacked with a ranged weapon to make a defense roll or be DISABLED

grant feature(cowboy style)(2)

Dancer's shoes

These ballet slippers were once worn by a ballerina cut down in her prime, and can grant her grace to those who wear them.

To activate, you must use a battlespell. You no longer provoke when moving once active

monster tactical(4) + battlespell(-2)

Demonsbane

This white, crystalline sword is made of solidified heavenly light.

While wielding this agile reactive melee weapon you have SCANNER 12 that detects demons, and whenever you attack a demon with this weapon they are DISABLED 1 and cannot TELEPORT for 2 rounds.

scanner(2) + neutralizing(3) + block teleport(1) + bane(-4)

Dragonfall Crossbow

This bow is made of dragonbone. It may not sound like a proper material for a bow, but regardless...

This is a distant threatening ranged weapon that, when used against a dragon, grants a RIDER that inflicts STUNNED and removes the dragon's ability to fly for 2 rounds on a hit, but knocks the user PRONE. Additionally, your target priority is reduced by 1 to the dragon for 1 round if you attack from farther than 12 hexes away. Attacking you in violation of this target priority incurs a 25% miss chance.

stunning(4) + wingbinder(1) + painful(prone)(-1) + grant feature(urban camo)(2) + bane(-4)

Elemental focus

This headband has 3 crystals, a ruby, a sapphire, and a topaz. Each contains a trapped elemental.

Once per encounter, you can use the effect of Burning Mastery, Shocking Mastery, or Frozen Mastery to modify your ability.

(grant feature(fire mastery)(2)) × limited use($\frac{1}{2}$) + flexible(frozen mastery, shocking mastery)(1)

Frogsuit

This green suit with flippers may be a fashion faux pax, but its unmatched underwater.

While wearing this suit you can move and breath underwater without penalty and can jump 2 once per encounter.

swimming(1) + (jump(2)) × limited use($\frac{1}{2}$)

Golden Spurs

These golden spurs can incite any creature to greater speed.

While wearing these spurs, any creature you MOUNT gains +6 speed.

monster tactical(speedy)(4) times restricted($\frac{1}{2}$)

Gorgon's head

The eyes on this decapitated gorgon head are glazed over in death, but still have their power.

Once per encounter, as a major action you may use Malediction(slow 2).

monster(Malediction)(2)

Gravity Anchor

This heavy anchor holds everything down.

Twice per encounter, you become STUNNED, become immune to FORCED movement, and enemies that enter your melee range on their turn cannot move further away from you than your melee range for 1 round.

(anchoring(2) + grant feature(you shall not pass)(2)) × limited use($\frac{1}{2}$) + extra use(1) + halting(-2)

Iron Shell

This armor is an imposing wall of iron.

This heavy armor halves your speed, and is EQUIPPED to you with $4 \times C$ HIT POINTS. While wearing it, you may reduce incoming damage by C as a COUNTER, and each time you are attacked you get a STEP. You may become immune to FORCED movement each round and are immune to SLOW.

Damage Resisting(1) + energy storing(1) + anchoring(2) + immune(2) + equipped(-2) + heavy(-2)

Lesser Omnimental Blade

Wisps of elemental energy spark wildly from this sword.

Once per round, when you use this fast reactive weapon in a STRIKE, the target creature becomes IGNITED, SHOCKED, or FROZEN, chosen randomly.

(flaming(2)) + chaotic(electrified, icy)(0)

Lifeblood armor

This armor is riddled with veins that fuse with the wearer, allowing their blood to flow through it.

If you would gain BLOODLUST, you may instead heal by that amount. If you have a boost, you may spend it to heal C damage.

Steadfast(1) + lifedrinking(1)

Psionic Gem

This small crystal is mounted on the forehead by a silver chain.

Once per encounter, you may gain a RIDER that inflicts [MENTAL] DIZZY 2 BLIND 6 for 1 round on a hit.

(dizzying(3) + blinding(3)) × limited use($\frac{1}{2}$) + mental(-1)

Staff of Loki

This staff is topped by the symbol of a trickster god, and one is never quite sure what it will do.

Twice per encounter, you can cast a battlespell. If successful, roll a die and get the effect of the indicated battlespell.

1. clear space
2. dimension door
3. elemental protection
4. enlarge person
5. natural power
6. protective ward
7. wall of force
8. Reroll

(grant feature(clear space)(2)) × limited use ($\frac{1}{2}$) + chaotic(dimension door, elemental protection, enlarge person, natural power, protective ward, wall of force) + extra use(1)

Totem Beads

These small beads are tied to your spirit animal.

They allow you to cast a battlespell that summons a small spirit animal as a flying familiar with $4 \times C$ HIT POINTS. You can draw LINE OF SIGHT from it and LINE OF EFFECT for non [W]eapon abilities.

grant feature(familiar)(2) + grant feature(arcane familiar)(2) + battlespell(-2)

Wand of Lesser Destruction

Its potent magics must be focused to bring to bear.

This close ranged weapon deals C less damage and inflicts CORRUPTION 1, and may destroy a nearby destructible obstacle after casting a battlespell.

disintegrating(3) + battlespell(-1) + corrupted(1)

Windup Drill

This drill takes some work to get going, but chews through rock easily.

As a battlespell, you may gain Burrowing for the rest of the encounter.

monster tactical(burrowing)(4) + battlespell(-2)

Wranglers Saddle

This saddle can be adjusted to a variety of sizes.

Whoever or whatever wears this saddle can be mounted by other creatures.

grant feature(piggyback)(2)

4pt Artifacts**Armor of Holding Ground**

This armor consists of interlocking crystal plates.

You may spend up to 6 STEPS to charge this armor. On a later turn you may gain these STEPS back. When activated, become immune to FORCED movement for 1 round. Fighting against this armor is tiring, and opponents lose 1 effective role rank for a day.

bracing(2) + anchoring(2)

Blinking Eye

This ring features a single eye.

Once per encounter, you can have the eye blink, increasing your speed by 6 for one turn and all your movement is TELEPORT for that turn. It can be used to obtain minute details about items examined. An analysis will reveal the true value and state of an item.

(increase speed(4) + monster tactical(blinker)(4)) × limited use ($\frac{1}{2}$)

Bloodthirsty Bow

This bow has teeth along its length.

This is a guarded distant weapon. When activated, this bow gains a RIDER that inflicts BLEEDING on a hit. When you deal damage to an enemy with this bow, you may ignore target priority when targeting them with this bow for the rest of the encounter. Each shot screams the name of its victim to both the firer and target.

bleeding(3) + (grant feature(pick target)(2)) × limited to this item($\frac{1}{2}$)

Boots of Mercury

These winged boots were worn by a god.

The boots give their wearer +4 speed and they can ignore difficult terrain. They can run indefinitely without tiring.

quick(2) + lightfooted(1) + ignore difficult terrain(1)

Chaomorphic Extremititis

This is a severed limb from a chaos elemental, and it transforms into other monster parts when prompted.

As a battlespell, you gain the ability to use a random monster major or minor ability for the associated cost once per encounter, and you gain a random monster tactical for the rest of the encounter. If you transform it into a monster part that helps your task, you gain a +2 item bonus to skill checks for that task.

monster(2) + grant tactical(4) + battlespell(-2) + chaotic(0)

Diggers Dirk

This jagged dagger is always ready to strike, but only against the unwary.

This is a deft dancing weapon. When you attack an enemy that you are flanking, inflict DISABLED1 and add a RIDER that inflicts DIZZY 2. If used as a shovel, it can clear a hex of dirt in 10 minutes.

grant features(flanking master)(2) + dizzying(3) + flanking(-1)

Defender's Blade

This sword leaps to block attacks, practically of it's own accord.

This is a shield reactive weapon. If an adjacent ally is targeted by an attack that does not target you, you may move into the nearest hex in the attack's range and have it target you. As a COUNTER, gain a 35% dodge chance. This is 20% against [O]verwhelming

attacks. You may take a PENALTY to double the dodge chance before it is rolled. In a city or within five miles (whichever is larger) when someone calls for help you always hear it clearly.

grant feature(interceptor)(2) + parrying(2)

Deluxe Flying Carpet

This carpet has an intricate pattern woven into it, and levitates smoothly through the air.

You can roll out this flying carpet and fly on it. While flying, your range is not halved, to a maximum of 12 hexes. However, it is EQUIPPED for $4 \times C$ HIT POINTS effect. It can be commanded to follow you at your speed and can hold anything placed atop it, regardless of its weight, with perfect stability, as long as it fits.

monster tactical(flying)(4) + grant feature(stable flier)(2) + equipped(-2)

Earthbreaker Plate

This armor is heavy enough to shatter the very ground you walk upon.

This armor leaves a trail of difficult terrain, and grants immunity to difficult terrain, STOPPED, and STUNNED, but halves your speed. By spending a minute per hex, you can pulverize the ground, leveling it out.

grant feat(wild growth(2)1+immune(stopped)(2) + immune(stunned)(2) + heavy(-2)

Everice Shard

This shard of ice can form itself into any weapon. This morphic weapon inflicts FROZEN when used. If stored next to food, that food will not go bad.

morphing(2) + icy(2)

Exterminator

This spray is highly lethal to bugs. This is a thrown grabbing weapon. You have SCANNER 12 that detects vermin, and whenever you attack vermin with this weapon they are TETHERED 12 to you, the damage converted to ONGOING, with a defense roll with a +3 modifier to half the damage, and may be fired in a cone with a defense roll at -2 to negate. When vermin are within 20 hexes, it glows.

scanner(2) + harpooning(2) + poisoned(2) + shockwave(2) + bane(-4)

Flamespitter

This weapon has two tanks that attach to your back, and a handheld nozzle to spew fire.

This is a guarded heavy ranged weapon that inflicts IGNITED, and can be fired in a 6 hex cone, with a defense roll at -2 to negate the attack when used this way. It can also be fired into the air, creating a flare visible up to 25 miles away for 1 minute.

flaming(2) + shockwave(2)

Geomancer Staff

The earth moves at your command.

At the beginning of each encounter, you may choose 6 hexes within 12 hexes of you to become difficult terrain. Once per encounter at the start of your turn, you may make 6 consecutive hex borders in a straight line blocking obstacles. It can also be used to create rock restraints on a target which require a rank 2 role to escape. The target must be as restrained as it would take to bind them with ropes.

grant feature(convenient obstacles)(2) + (barrier creation(3)) \times limited use($\frac{1}{2}$)

Hellfire Chain

These chains are infused with raw hellfire.

This grabbing reach weapon inflicts [FEAR] IGNITED when attacking and will disable the target if they fail a defense roll. Defeated foes wrapped in these chains have visions of their past misdeeds.

flaming(2) + fear(-1) + Hampering(3)

Hunter's Cloak

This olive green cloak doesn't look like anything special, but it puts its wearer into a predatory mindset.

The wearer of this cloak may ignore difficult terrain and gains +1 speed. Once per encounter, you may select a creature. You always treat that creature's target priority as one step higher and have scanner to that creature regardless of range. This lasts until the end of the encounter. While wearing this cloak, you can field strip a carcass in under a minute.

ignore difficult terrain(1) + lightfooted(1) + grant feature(quarry)(2)

Juggernaut Armour

This armor is massive, and hard to stop once it gets moving.

While wearing this armor, you can ignore difficult terrain while charging. You charge twice as far when charging, and you can charge through destructible terrain with less HIT POINTS than twice your charge damage, destroying that terrain. When you move adjacent to an enemy, whether or not you are charging, you may move that enemy 1 hex. You do not provoke reactions from those creatures. This is an EQUIPPED effect with $4 \times C$ HIT POINTS. It also blocks out non-damaging liquids and all gases.

monster tactical(pushy)(4) + monster tactical(greater charge)(4) + equipped(-2) + heavy(-2)

Lodestone Shield

While using this shield, you can draw attacks to you.

If an adjacent ally is targeted by an attack that does not target you, you may move into the nearest hex in the attack's range and have it target you. If you are affected by an enemies ability that also affects your allies, you may be affected an additional time to allow your allies to be unaffected by that ability. Metallic objects will adhere to the shield.

grant feature(take the grenade)(2) + grant feature(interceptor)(2)

Mageshield Pact

A mage of the white and a mage of the black struck a deal. It took the form of a wearable rune

One character is immune to your attacks, and they can always target you. Each of you can always sense how alive the other is on a scale of 1-8.

heartbonded(2) + soulbonded(2)

Molten Umbrella

With a twirl of this umbrella, you drop lava all around.

Your hex and all adjacent hexes becomes afflicted, such that creatures entering those hexes are IGNITED . Additionally, you and each creature adjacent to you are IGNITED . It provides [Light] for it's hex and 2 beyond and can be used as an improvised melee weapon.

afflicting(2) + one hex burst(2) + energy condition(1) + painful(-1)

Omnimental Blade

Elemental energy shifts from form to form around this sword.

When you use this fast reactive weapon in a STRIKE, you can activate this weapon to have the target creature becomes IGNITED , SHOCKED, or FROZEN, at your choice. Once per encounter, you can add a rider that FORCES the target back 2 hexes on a hit. While carrying this blade you may speak with Elementals in their tongue.

(flaming(2)) + variable(electrified, icy)(1) + blowback(2) × rate limited($\frac{1}{2}$)

Spellfist Ring

When casting Fist doesn't quite cut it.

You may choose any single target non[W]eapon abilities you have and add the [W]eapon tag to them. Your unarmed attacks count as deft reactive weapons. This ring will glow in the presence of magical effects.

grant feature(pugilist)(2) + grant feature(arcane blade)(2)

Sprinters Armor

This armor is light and brightly colored.

Every round, your speed increases by 1, to a maximum of +6. You may spend up to 6 STEPS to charge this armor. On a later turn you may gain these STEPS back. While in stealth you can change the appearance of this armor to a different outfit.

grant feature(accelerator)(2) + bracing(2)

Staff of the Magus

This staff is encircled with various runes and glyphs.

Once per encounter, you can cast Clear Space, Dimension Door, Elemental Protection, Enlarge Person, Natural Power, Protective Ward, or Wall of Force.

This staff grants a +2 item bonus to Skill checks to raise a spellcasting role.

(grant feature(clear space)) × limited use($\frac{1}{2}$) + flexible(dimension door, elemental protection)(1) + flexible(enlarge person, natural power)(1) + flexible(protective ward, wall of force)(1)

Suspended Comet

This burning rock floats slightly above the surface it rests on, twisting in the air.

Once per encounter, as a major action, you may toss this stone in the air. At any point after this, you may create a 1 hex burst within 12 hexes that does $3 \times C$ damage to everyone in the area and inflicts IGNITED . A successful defense roll halves this damage and negates the IGNITED . An ally within this area may dash 2 out if it. It may also be sent up higher into the air, where it can be seen by anyone until it is retrieved.

(great feature(artillery)(2) + grant feature(selective shockwave)(2)) × restricted to this ability($\frac{1}{2}$) + evoking(2)

Sword of the Firehawk

This flamberge has the emblem of a burning bird on it's hilt.

This dancing reactive melee weapon causes IGNITED when you attack. Once per encounter, as a major action you can summon a firehawk. It has $2 \times C$ HIT POINTS, can fly, and can use the mook versions of Blaster(ignited) and Evoker. While carrying this sword you may talk to birds and fire elementals.

flaming(2) + summon(2)

Veil of Thorns

Twisted brambles cover this armor.

The user of this armor may deal C damage to those who attack them in melee as a COUNTER, and may inflict C BLEEDING on anyone who attacks them in melee. While wearing it you can quickly sprout seeds and heal unhealthy plants.

retaliatory(bleeding)(3) + spiked(1)

Warp Spider

While fierce looking, this extradimensional spider is quite friendly and can be your friend.

You gain a speedy familiar with $4 \times C$ HIT POINTS that you can swap locations with. You can give the spider a message and name a recipient and it will deliver it without fail before returning to you, but you cannot use it as a familiar until it returns.

grant feature(familiar)(2) + grant feature(transposition)(2)

Wisp Lantern

This small lantern doesn't give off much light, but is strangely alluring.

You may DIRECT an enemy within 6 hexes toward you 3 hexes as a [MENTAL] effect, and have scanner out to 6 hexes. Additionally, once per encounter as a major action, you may summon a Wisp. It has $2 \times C$ HIT POINTS, can hover, has speed 9, and can use the

mook versions of Make Vulnerable(guide 6 hexes towards user[Mental]) and Drain(slow 2). When hung up at night, this light appears to be floating around half a mile from its actual location. This light seems alluring and entices people to follow it, but cannot be reached and if followed will lead people in circles.

pulling(2) + mental(-1) + lesser scanner(1) + summon(2)

6pt Artifacts

Cloak of Vines

This cloak is woven from living vines.

Enemies within 3 hexes must spend an additional STEP to move away from you. This is a SLOW effect. Whenever you leave a hex, you may spend a hex to make it difficult terrain. You are immune to difficult terrain. You may have this cloak grow to form a bridge up to 30' in length, and retrieve it from the other side.

monster tactical(entangling)(4) + grant feature(wild growth)(2)

Cross of Sanctification

This cross is imbued with healing runes and holy symbology.

You may pick an ally, you can always target that ally. When you heal an ally, you may remove all restorable conditions effecting them and become effected by them instead. Once per turn, you may lower the target priority of an ally until the start of your next turn. Violating that priority heals the ally $2 \times C$. When held aloft, this cross compels all undead near it and all who perceive it to come no further. This effect ends if the user takes a minor or major action, a surge, or takes damage from a non-undead source.

soul bonded(2) + grant feature(take your burden)(2) + grant feature(reactive heal)(2)

Crown of the Immaterial

This ornate crown is studded with pearls, but doesn't seem to be fully there.

You have phasing, can hover, and have SCANNER 6. You gain an +2 Item Bonus to Sneaking Skill Checks. If you stay completely still with this you become transparent.

monster tactical(4) + levitating(1) + lesser scanner(1)

Duelone

A plain blade with a ghostly chain that rewards those who like close fights.

Hitting with this exotic reactive reach grabbing weapon makes the opponent TETHERED 12 to you and they must make a defense roll or be DISABLED. Opponents attacked by this weapon cannot TELEPORT or WARP for 2 rounds. You can also throw it to latch onto a solid point within 12 hexes. The entire hex must be solid to be an anchor. You can pull yourself to the other hex if it's anchored, or pull something small back to you.

block teleport(1) + hampering(3) + harpooning(2)

Dweomer of the Mindstrong

This Dwarven helm gives it's wielder telepathic powers.

You may communicate telepathically with allies within range 24, and draw LINE OF SIGHT from them. You may spend a STEP to FORCE a creature within 12 hexes other than you one hex. You may grant an ally within your telepathic network the same ability. When you sleep, your nearby friends join in your dreams.

grant feature(telepathic extension)(2) + grant feature(major telekinesis)(2) + grant feature(teacher)(2)

Eldritch Limb

This otherworldly appendage should not be growing out of there.

An otherworldly presence forms around you, which you can use as a natural grabbing reactive weapon. Damage dealt with this weapon is C less but inflicts CORRUPTION 1. Enemies within 3 hexes are [FEAR] SLOW 1. You may activate this item to force an enemy with 6 hexes 3 hexes towards you and gain a RIDER that prevents the target from using TELEPORT or WARP abilities. A defense roll negates this effect. You have scanner 6. This is an EQUIPPED effect with $4 \times C$ HIT POINTS. It can draw in fog and smoke and unbound genies within range 4.

natural weapon(1) + corrupted(1) + grant feature(cursed aura)(2) + pulling(2) + block teleport(1) + lesser scanner(1) + equipped(-2)

Firelords Halo

This unstable crown of fire imbues the user with the power of flame.

When the wearer of this crown leaves a hex, they leave a trail of fire that lasts for 1 round and afflicts the hexes, inflicting IGNITED on creatures who enter them. Additionally, twice per encounter, as a major action the user of this item may create a 1 hex burst within 12 hexes that does $3 \times C$ damage to everyone in the area and inflicts a ENERGY EFFECT, and gain a RIDER that inflicts BLIND 6. However, the crown is EQUIPPED for $4 \times C$ and inflicts IGNITED when destroyed. You can set things on fire at will, even in places where fire won't normally burn.

monster tactical(fire trail)(4) + evoking(2) + (blinding(3)) \times limited use($\frac{1}{2}$) + extra use(1) + equipped(-2) + painful(-1)

Giant's Braid

This braid from a giants head is worn as a necklace. You become Large and may throw an ally smaller than yourself within your melee range to a new hex by spending 1 STEP for every 2 hexes away it is. The ally is in air during this movement and remain in air until the end of their turn or until they decide to land, as if they had jumped. This is FORCED movement. While wearing this you cannot get drunk no matter how much you drink, and can continuously eat food without ever getting full.

monster tactical(large)(4) + grant feature(lawn gnome dart)

Glacial Steps

These heavy boots look like icebergs but breathe like silk.

You can spend a STEP to make 2 hexes within 6 hexes into fast terrain. You can use one STEP to move over three fast terrain hexes. You are immune to afflicted and difficult terrain. If you stay still, snow and ice near you will draw a map of the surrounding area.

monster tactical(frosty)(4) + afflicted immunity(1) + difficult terrain immunity(1)

Godlions Claw

These gloves are tipped with claws from a Neiman lion.

Grants a fast reactive melee natural weapon. 2/encounter, you may activate it to pounce. This let's you jump 2, not provoke by moving for 1 round, and knock back an enemy 2 hexes when hit by this weapon. You may let out a roar audible for 5 miles. Anyone who hears it for the first time who has a lower PL than you is instantly charmed, as per a successful use of charm, either through fear or respect, and can identify you as the source of the roar when they see you so long as you wear the claws.

natural weapon(1) + (jump(2) + grant tactical(nimble)(4) + blowback(2)) × limited use($\frac{1}{2}$) + extra use(1)

Greater Wand of Destruction

Its potent magics flow freely.

The wielder of this wand can channel power through it as though it were a guarded piercing ranged weapon. Damage dealt by this weapon is reduced by C but inflicts CORRUPTED 1. While wielding this wand, you can destroy destructible objects within 12 hexes of you. 1/encounter, as a major action the user of this item may create a 1 hex burst within 12 hexes that does $3 \times C$ damage to everyone in the area and inflicts a chosen ENERGY EFFECT. A successful defense roll halves this damage and negates the ENERGY EFFECT. With a minute of focused use, can destroy a hex of undestroyable terrain. This ability recharges in an hour.

corrupted(1) + disintegrating(3) + evoking(2)

Healsink Armor

This armor doesn't look like anything special, but when everything is quiet, you can hear it's plea; "heals flux".

You may lower your target priority, and violating this targbet priority heals you $2 \times C$. When you gain bloodlust, you may instead heal yourself for that amount. If you have a boost, you may use it to heal yourself C damage. Once per encounter, you may use the Heal Self monster ability as a minor action. The wearer may broadcast a distress call. Any sentient creature within 5 miles becomes aware of your location and need of aid until you deactivate it. This distance can be tuned to a shorter distance if desired.

grant features(Reactive Heal)(2) + life drinking(1) + steadfast(1) + monster(heal self)

Indestructible Juggernaut Armour

This armor is forged of pure adamantium and is so massive nothing will stop it once on motion.

You can charge twice as far, and ignore difficult terrain while charging, and can charge through destructible terrain that has less HIT POINTS than your charge damage. When you move adjacent to an enemy, you may move them 1 hex, and you do not provoke reactions from creatures you use this on. You gain +3 speed, but then half your speed. This armor also seals out nondamaging liquids and gases and protects against a vacuum or other hazardous environment.

monster tactical(pushy)(4) + monster tactical(greater charge)(4) + heavy(-2)

Nymph Essence

This perfume bottle contains nymph pheromones and is guaranteed to make you far more attractive.

You may use the Make Vulnerable (Guide 6 hexes towards user [Mental]) monster ability once per encounter as a major action. Enemies within 9 hexes must spend an additional STEP to move away from you. This is a [MENTAL] SLOW effect. On a long group travel everyone can go as fast as the user and it doesn't wear anyone out.

monster(lure)(2) + monster tactical(seductive)(4)

Ring of Invisibility

This ring reveals evil writing on it's inside when heated.

You start each encounter with STEALTH 0. You may activate this item to become INVISIBLE 6 and DIZZY 2. You can also use the ring to write text that is invisible to anyone other than the bearer of this ring.

monster tactical(disguised)(4) + turn invisible(3) + painful(-1)

Royal Gravitas

This royal robe seems to distort gravity.

Enemies within 3 hexes must spend another step to move closer to you. This is a SLOW FORCE effect. Once per encounter, you may gain a RIDER that inflicts STUNNED on a hit and use the Make Vulnerable(Force 3 hexes away) monster ability as a major action. You may also bestow titles upon people, which they will thereafter respond to.

repelling(2) + (stunning(4)) × limited use($\frac{1}{2}$) + monster(repulse)(2)

Skyraptor Headdress

When wearing this ornate headpiece, you sprout wings allowing you to fly.

You can fly and your range is not halved while flying, up to a maximum of 12. Your feet become Raptor Claws and can be used as additional hands while flying.

monster tactical(flight)(4) + grant feature(stable flier)(2)

Slipstream Sandals

These sandals are made of woven air.
You never provoke from moving while wearing these dainty sandals and have +3 speed. While traveling, you appear as a gust of wind.

monster tactical(nimble)(4) + quick(2)

Tiger's Wood

This strangely shaped club seems ideal for hitting things far away.

This is a reactive thrown melee weapon that, on a hit, forces the target back 3 hexes. If either of these work, you may spend a step to force them back an additional hex. It can also be used to launch small items 6 miles without damaging them.

pushing(3) + blowback(2) + (grant feature(major telekineses)(2)) × tied to ability($\frac{1}{2}$)

Vampiric Blade

This Gothic sword is elegant in it's cruelty.
When you deal damage with this agile dancing blade, you may half the damage dealt to heal yourself the same amount. When activated, you may DIRECT an enemy with 6 hexes 3 hexes towards you. A defense roll negates this effect. This is [MENTAL]. After you kill someone with this blade (yes, kill, not merely wound), you don't need to sleep for a week.

vampiric(4) + pulling(2)

8pt Artifacts**Bleeding Armor**

The wicked spikes on this suit of armor eternally drip with blood.

When you wear this armor, you are rendered immune to BLEEDING, gain a RIDER each round that inflicts BLEEDING C on a hit, and if you would gain bloodlust, you may instead heal by that amount. Additionally, the spikes on the armor function as a natural melee weapon with the Fickle property. This armor reduces your need for sleep by 75%.

immunity(bleeding)(2) + bleeding(3) + life drinking(1) + natural weapon(1) + fickle(1)

Colossi Chest

This armor is engraved with tales of victories its past owners won.

You may take a PENALTY to be ON GUARD. If you have a boost, you may spend it to heal C damage. Your target priority raises at the beginning of each turn, and creatures with a lower target priority cannot be attacked as a [MENTAL] effect. You may block C damage as an COUNTER. Once per encounter, you can gain a rider that inflicts OFF BALANCE on a hit. You may have this armor grow in size to become a small hut, large enough to house 6 people, though the armor is unusable as armor in this state.

*guarding(1) + steadfast (1) + monster tactical(center of attention) (4) + damage resisting (1) + unbalancing(2) + rate limited(*1/2)*

Excalibur

This elegant longsword was wielded by an ancient king.

Once per round, the target attacked with this reactive shield sword is DISABLED1. It may be used to attack everyone in a 12 hex line by applying two penalties to the attack. Its true owner can draw it at any time regardless of distance. Once per encounter, as a major action, you can heal yourself $4 \times C$ and lower your target priority until the start of your next turn. If you are attacked in violation of this priority you may take a SURGE against the attacker. While worn, if not dead you will recover to full health in week, no matter how gravely injured. It will return to its true owner to trigger or continue this effect automatically.

neutralizing(3) + lasering (2) + extradimensional(1) + grant feature(self preservation)(2)

Greater Omnimental Blade

This blade hums with power, and flickers between elemental energies.

Once per round, when you use this reactive fast weapon in a STRIKE, the target creature becomes IGNITED, SHOCKED, or FROZEN, chosen randomly. You also leave a trail that inflicts the condition for 1 round depending on the condition you inflict, you may use Shock, Freezing, and Fire Mastery on the conditions inflicted by this weapon. You are immune to the hexes you afflict with this weapon. You can see the elemental buildup of all elements, understanding their flow and eddies.

flaming(2) + chaotic(shocking, icy)(0) + monster tactical(fire trail)(4) + chaotic(shocking trail, icy trail) + grant feature(fire mastery)(2) + chaotic(shocking mastery, frozen mastery)(0) + immunity(ignited)(2) + chaotic(frozen immunity, shocking immunity)(0)

Heavenly Blade

This flaming sword was forged in heaven and can summon an angel.

This is a shield reactive weapon. Once per encounter, as a major action after a successful battle spell, you can summon an angel. You can fly with angelic wings while using this weapon. At the beginning of each encounter, you may pick an ally to guard. If an enemy attacks that ally when they could attack you without violating target priority, they get two penalties on the attack. The angel has $2 \times C$ hit points, flight, and can use the mook versions of Restoration(remove lesser condition) and Wild Swing(ignited and blind 9). The angel can also be summoned in order to create a work of art, which will turn out exactly as you wanted and be impossible to remove without Universal Solvent.

flaming(2) + summoning(2) + battlespell(-2) + monster tactical(flight)(4) + grant feature(guardian)(2)

Helm of General Groback

This rough orkish helm was once possessed by one of the finest military minds on the world.

You can communicate telepathically with all allies

within range 24, and draw LINE OF SIGHT from any of them. At the start of your turn, you may DIRECT all allies within 6 hexes of you 3 hexes towards you. You may spend STEPS to move allies 1 hex per STEP, and you gain +6 STEPS each round that can only be used in this manner. All who see the wearer are filled with knowledge of it's owner, their reputation, and general position.

grant feature(telepathic extension) + grant feature(rally) + grant feature(recon) + quick×2(4)×restricted use($\frac{1}{2}$)

Herakles Bracers

While wearing these gauntlets, You tap into colossal strength.

You have the powerhouse track in place of your major track, and can cast a battlespell to become Huge. While wearing this, you can survive in any environment without issue, even without air.

grant feature(trackformer(powerhouse))(2) + monster tactical(large)(4) + monster tactical(huge)(4) + battlespell(-2)

Hypercube

This cube seems to exist in extra dimensions.

You gain a pool of 6 teleportation points each round (unspent teleportation points do not carry over), and you may spend steps as though they were teleportation points. You may use any number of teleportation points to teleport yourself or an adjacent creature 1 hex for each teleportation point spent this way. You cannot teleport adjacent enemies more than 12 hexes with this ability. Enemies teleported in this way may make a defense roll, if they succeed they can control the destination, within the distance they would be teleported. It can also be used to provide unending power to things within 3 hexes of it.

monster tactical(blinker)(4) + (quick×2(4) + grant feature(allyport)(2) + grant feature(hostile teleport)(2))×tied to ability($\frac{1}{2}$)

Mjolnir

A hammer suitable for a God of thunder.

The true owner of this thrown reactive hammer can summon this hammer to his hand, no matter where the hammer is. It inflicts SHOCKED once per round on someone attacked with the hammer. Once per round you can add a RIDER to its attack, if it hits the target is FORCED back 2 hexes. Once per encounter, can summon a lightning bolt as a major action that targets everyone in a 24 hex line for $3 \times C$ damage and inflicts SHOCKED. A defense roll halves the damage and prevents SHOCKED. Allows the wielder to hover. Only the wielder and those they consider worthy may move it, otherwise it cannot be moved by anything.

Item Based Tracks

Sometimes, a character wants to represent some or all of their abilities as being due to a specific item. In such cases, they may elect to make a track Item Based. A track being Item Based is always optional,

extradimensional(1) + shocking(2) + blowback(2) + evoker(2) + levitating(1)

Mortal Coil

This coiled bracelet cuts your ties to the mortal realm.

While using this item, you are no longer bound to the mortal realm. You can fly and phase like a ghost. You can tell who is no longer in the mortal realm with a mere thought.

monster tactical(flight)(4) + monster tactical(incorporeal)(4)

Phobos Mask

This mask has a fierce expression that inspires Fear in all who view it.

While wearing this mask, it's wielder gains the Reaver feat, and takes on a demonic appearance. At the beginning of each of your turns, each creature within 3 hexes of you becomes SLOW 2 for 1 round as a [FEAR] effect. Additionally, enemies within 3 hexes of you must spend an additional STEP to move closer to you as a SLOW FORCED effect. Finally, you gain demonic claws as part of this appearance, which can be used as a natural melee weapon. You can change your entire outfit except for the fact that you are wearing this mask, and after an encounter you can sense the direction to a specific foe you fought.

grant feature(reaver)(2) + fear aura(3) + repelling(2) + natural weapon

Pick of Destiny

Only for the most tenacious.

This pickaxe is a reactive deft melee weapon that allows you to burrow. Twice per encounter, you can gain a rider on its attack to make a target STUNNED on a successful attack roll as a [Ground] effect. This pick will help break down metaphorical walls between you and your destiny. It may provide advice on how to achieve your destiny, whatever it may be, when you don't see a path forward.

monster tactical(burrowing)(4) + Stunning(4pt) + Add descriptor([Ground])(-1) + grant extra use(+1)

Reaver Scythe

This scythe was wielded by the grim reaper himself.

The wielder of this reactive reach scythe gains the Reaver, Killing Intent, Focused Killer, and Fight or Flight features. They are also covered in a rippling cloak that conceals their identity, but all who gaze upon you know you are Death. You know the direction to the nearest person about to die of old age or disease.

grant feature(reaver)(2) + grant feature(killing intent)(2) + grant feature(focused killer)(2) + grant feature(fight or flight)(2)

even if the description of the track implies that it should be one.

The disadvantage of an Item Based track is that it is possible to lose access to it. Perhaps you aren't allowed to bring that item into an area, or after being kidnapped your captors have taken all of your items. A player choosing an item based track does

NOT mean you need to find excuses to take away their item, but rather follow the natural narrative consequences of it. However, due to the extra narrative attachment the character has to the item, such losses should always be temporary, with the ability to get it back before too long. If you think of your campaign in terms of a television series, losing access to a track item for more than an episode would be extremely rare, even if you need to resort to something contrived to return it. The exception would be if the player wishes to respec, either gaining a different track based item or having their character learn

a track's worth of skills of their own, in which case such a loss can be used as a catalyst for their growth.

In exchange for this risk, the item itself is an artifact, worth 2pts for every track it is granting. This item counts as being BOUND to the character, and cannot be used with other abilities that would make it BOUND.

Characters missing tracks will often have to use the Universal Actions (pg. 26). Additionally, a character who is missing their innate track has a $4 \times C$ penalty to their max hp.

Depletable Artifacts

The items listed here are not comprehensive, and the availability are merely starting suggestions. The GM should feel free to ban or add new items as appropriate to better suit their campaign.

Depletable Artifacts are tactically powerful, and have limited uses. While they don't increase raw power, the extra tactical options they provide can turn the tide of a battle if used smartly.

Depletable Artifacts are as varied as Artifacts. They are generally more powerful and specific than magic items and more useful in combat situations.

By default, they are not normally available for purchase, and must be attained by other means.

Making Depletable Artifacts

Additional depletable artifacts can be made like normal artifacts, with a few alterations. limited use items can be made to have a limited total number of uses rather than per encounter limits. This should generally be 5 times the base number of uses. They can also have total duration limits for things which are always active, which would be a total 5 rounds in most cases. You can also have ammo by adding a use limit to a weapon enchantment, which can be stacked on top of existing enchantments.

[Ammo] / Temporary Weapons

These may be used with another weapon, but no more than one per round. They typically come in sets of 5.

Depletable Artifacts

Name	Effect	Uses
Arrow of Obstruction [Ammo]	Leave a path of difficult terrain.	5
Blasting Charge	Quickly destroy an obstacle.	6
Booster Pack	DASH 3-12	1-4
Cloaking Device	Become INVISIBLE 3	5
Diviners Water	Draw LINE OF SIGHT from farther away	4
Elemental Arrow[Ammo]	Leave an elemental effect along the shots path.	5
Flaming Arrows[Ammo]	Add IGNITED to a hit	5
Gravity Tether	Become immovable	4
Hoverpack	Gain flight	5
Infusion Kit	Lower your HP, raise an ally's HP	1
Necklace of eyes	TELEPORT 4	5
Smoke Bomb	Create a cloudy smokescreen	3
Smoky Arrows[Ammo]	Leave Cloudy in the arrows wake	5
Soapbox	Remove an affliction from a hex	3
Sprinters	Increase your speed by 3	30
Teleportation Arrow	[Ammo] TELEPORT to any hex in the LINE OF EFFECT	5
X-Ray Specs	Draw LINE OF SIGHT through barriers	5

Arrow of Obstruction [Ammo]

When you make a ranged attack, each hex along its LINE OF EFFECT becomes difficult terrain.

Blasting Charge

Comes in a set of 6. Each charge may be used to destroy an adjacent destructible obstacle

Booster Pack

A booster pack that's got one use left; but it's a whammy. You can DASH 12 hexes before it's depleted. If you activate this you must DASH at least 3 hexes, and each 3 hex increment must be in a straight line. You can use all of its remaining hexes in one use.

Cloaking Device

You may turn yourself INVISIBLE 3 for a total of 5 rounds

Diviner's Water

The water poured from this pitcher shows another place. You may draw **LINE OF SIGHT** from any square within 12 hexes. After 4 uses the pitcher is empty.

Elemental Arrow [Ammo]

When this item is made, it has a an elemental effect associated with it. When you make a ranged attack, each hex along its **LINE OF EFFECT** becomes afflicted. The first time each round that a creature enters a hex afflicted this way, that creature gains the chosen elemental effect.

Flaming Arrows [Ammo]

When used with a ranged weapon, causes **C** **IGNITED** on a hit

Gravity Tether

When activated, you may become immovable, and cannot be **FORCED** out of your hex. This can function for a total of 4 rounds.

Hoverpack

You may gain flight for a total of 5 rounds

Necklace of Eyes

This necklace has 5 eyes. 5 times, no more than once a round, you may have one blink, and **TELEPORT** 4 hexes. This does not cost an action.

Smoke Bomb

Comes in a set of 3. Each one can render a 1 hex radius circle of hexes cloudy for 2 rounds

Smoky Arrows [Ammo]

When you make a ranged attack, each hex along its **LINE OF EFFECT** becomes [Cloudy].

Soapbox

you may remove an affliction from up to 3 hexes within 3 hexes of you 3 times before this box is empty

Infusion kit

Between encounters, choose an ally; You may lower your max hit points by any amount, and your ally will gain the same amount of additional max hit points. Only one ally can be chosen at a time. This lasts until the next rest.

Sprinters

While wearing this boots, your speed increases by 3 hexes, to a max of 30 extra hexes moved

Teleportation Arrow [Ammo]

When you make a ranged attack, you may **TELEPORT** to any hex along the **LINE OF EFFECT**.

X-ray Specs

For a total of 5 rounds, you may draw **LINE OF SIGHT** through barriers that block **LINE OF SIGHT**.

Consumables

The items listed here are not comprehensive, and the availability and costs are merely starting suggestions. The GM should feel free to recost, ban, or add new items as appropriate to better suit their campaign.

Consumables are powerful items with very limited uses. They have enough power to them to make a difficult encounter easier all by themselves. You can use 1 Consumable per round without using an action.

Unless otherwise specified, each Consumable only has a single use.

By default, they are not normally available for purchase, and must be attained by other means.

Handing out Consumables:

The number of consumables you hand out can be used to adjust the difficulty of encounters. No consumables are assumed by the system, so you can ignore them entirely if you wish. Each consumable you give you can make an encounter easier. It can take many consumables to deal with an encounter of a higher power level, but against an otherwise balanced encounter they can make a big difference.

Consumables

Name	Description
Bottled Lightning	Gain a SHOCKED RIDER with medium damage.
Danger Magnet	Take a hit for an ally, and reduce the blow
Ectoblade	Gain ENERGIZED , and create ectoplasmic weapons
Firebird Feather	Revive a WOUNDED ally
Form Blazing Sword	Take a SURGE , and add IGNITED to all your SURGES .
Healing Elixir	Heal yourself
Imminently Shatterable Mirror	Your attacker takes PENALTIES and debuffs.
Instant Defender	Create a Bodyguard next to you
Potion of Restoration	Remove greater and lesser Restorable effects.

Name	Description
R-Tank	Gain a REFRESH
Steel Halo	Gain RESISTANCE, and then a BLEEDING aura.
Stolen Minute	Take an extra Major w/backlash
Stolen Second	Take an extra Minor action.
Strength Boost	Gain a BOOST and ENERGIZED. Your next hit adds DIZZY
Venom	Add a WEAKEN and SLOW RIDER to your next attack.

Bottled Lightning

Using this item will give you a RIDER that deals 8|10|13|15 damage and inflicts SHOCKED. A successful defense roll halves the damage and negate the SHOCKED.

Danger Magnet

The next time an ally would be attacked within 6 hexes of you, you may DASH to the nearest hex within range of that attack. That attack is made against you instead of your ally, and receives two PENALTIES.

Ectoblade

Create a mundane weapon of your choice from ectoplasm; and gain ENERGIZED $2 \times C$. For the duration of the encounter you cannot be disarmed, and if you are ever not wielding a weapon you can create a new one from leftover ectoplasm.

Firebird Feather

You may heal an adjacent ally $2 \times C$ hit points while they are WOUNDED. Their target priority remains lowered until the end of your next turn, and attacks cannot be made against that ally that would violate target priority.

Form Blazing Sword

For the rest of the encounter, when you use a SURGE, the attacked creature becomes IGNITED $2 \times C$, regardless of whether it hits or not. You may immediately take a SURGE after using this item.

Healing Elixir

Consuming this potion will heal $2 \times C$ hit points and restores a lesser restorable condition from yourself.

Imminently Shatterable Mirror

Hold out a mirror as bad luck for your next attacker to break. They become OFF GUARD and a gain a PENALTY.

Instant Defender

Invoking this token creates a creature next to you. They have $2 \times C$ hit points and speed 6. They have a natural melee weapon and can take REACTIONS. Once per round, they can have a creature in their melee range make a defense roll or become GRAP- PLED by them. When they take a SURGE, this creature uses the default monster SURGE.

Potion of Restoration

Choose up to one greater restorable effect currently affecting you and up to one lesser restorable effect currently affecting you. End those effects.

R-Tank

Popping open this blue bottle provides you with a REFRESH

Steel Halo

Gain $2 \times C$ RESISTANCE; if this is depleted; you gain a steel halo from it's shattered remnants that orbit you, causing all targets (friend and foe) you become adjacent to at any point during the encounter to become BLEEDING C . The steel halo lasts as many rounds as the RESISTANCE took to be depleted.

Stolen Minute

You may immediately take a major action. If you do, you become VULNERABLE $2 \times C$.

Stolen Second

You may immediately take a minor action.

Strength Boost

You gain a BOOST, and ENERGIZED C . The next attack you make gains a RIDER. If that RIDER hits, the struck enemy becomes DIZZY 2.

Venom

You gain a RIDER to your next attack. That RIDER has a +1 bonus to hit, and if it hits, the struck creature becomes WEAKENED $3 \times C$ and is SLOWED 2.

Chapter 14

Campaign Design

There are many approaches to designing a satisfying campaign.

One major thing to consider when designing a campaign for *The Stuff of Legends* is that the characters are going to be very influential on your world. They are expected to have a high degree of agency and the skills to enact their desires. As such, you can't plan out a campaign as a predefined plot they will follow. It is nigh inevitable that the players will manage to derail your plot train.

Instead of trying to design things from the perspective of the player's experience, try designing things from the perspective of the villains. What are their goals, what resources do they have, what are their plans to reach their goals? How long will it take them to do so? Figure out what their path to victory would look like without outside interference.

You want to give some consideration to how the players will interact with this after that. How do they learn about this plot? What will motivate them to care about it once they do?

Once your players are on the trail, let them steer the plot. They can decide their next course of action, and work towards their goals. This isn't to say you shouldn't offer them any guidance or direction if they seem to want or need it. Let them find information that will lead them to advance the plot, they may be steering the boat, but you can place an interesting island for them to steer towards. If the players seem directionless, offer external prompts to give them a direction.

Scope

The scope of your campaign determines a lot about how you would run it. The simplest format is the one-shot - a game intended to run for a single session. This is a lot simpler to put together than a longer campaign and doesn't require a major time commitment from everyone involved. It can also offer players a chance to try out new character concepts, to dip their toes into a different setting, or play a game with a new set of people. However these games have a lot less time to tell a satisfactory story, and offer no room for character advancement. There is also a lot of overhead to making a campaign (such as finding players, scheduling, creating new characters, explaining the setting, etc) which only gets one

session of payoff.

A short form campaign is similar to a one shot, but is a slightly larger scope that will run over several sessions. They generally have a single plot, but can take more time to explore it. There may or may not be character advancement in it. It has more of a time commitment than a one shot, but it gets a lot of the benefits with more payoff for the overhead.

A long form campaign is significantly different. It often has no set time frame, and features a very large overarching plot. The players will have a lot of time to get used to their characters, the world, and each other, and can get highly invested in what is going on. Characters can level up many times, even going from level 1 to 14 in the longest ones. This requires a lot of commitment from everyone involved.

An epic campaign is one which lasts for multiple years. These often arise organically from a group that really enjoys playing together and is highly invested in their world. They can start as a long-form campaign, but once a plotline is finished, it just adds in a new one.

Scenes

One way to structure a campaign that is very useful and versatile is to structure it in terms of scenes. A scene has a goal, and obstacles. The goal may be presented to the players, either explicitly such as if their boss tells them to accomplish something, implicitly such as when you present something that it's pretty obvious they want to do, or intrinsically, where they have already decided on their goal and you are building a scene about them reaching out.

Obstacles are anything that stands between the players and their goal. It could be a group of enemies, it could be a physical barrier, it could be an information gap, but something keeps them from accomplishing their goal. There can be many obstacles in a scene. Some scenes may require overcoming all of them, others may require overcoming any single one, or some combination. Some obstacles can be more abstract, like time limits.

These obstacles are presented very organically. You don't introduce them explicitly as the obstacles, you just describe the scene.

Once the scene is set, let the players figure out how they will overcome the obstacles. Will they fight the

enemies, sneak last them, or talk to them? Or perhaps they will come up with another approach you never even considered. Don't feel like they must fight enemies just because you have created them, fighting is just one approach to overcoming such an obstacle.

Once they have reached their goal, or are no longer able to do so, the scene is over. This may lead immediately into a new scene, or it may leave them with time to consider their situation and plan out their next actions. Either way, you eventually end up encountering the next scene, rinse and repeat.

Scenes can be fairly complex. Obstacles may require very complex plans to overcome. A party of Stuff of Legend characters will have a lot of skills between them and can employ them in very creative ways, often with a degree of reliability that can allow for some rather intricate schemes to work. Don't be afraid to challenge the players with things that require more than succeeding on a few role checks.

Insignificant Encounters

Insignificant encounters are encounters that don't do much to drive the plot or are trivial to defeat. One common example of these would be random encounters, or an encounter with a small group of minor enemies. These don't serve much of a purpose in *The Stuff of Legends*, and should be skipped or replaced with something else.

Stuff of Legends doesn't use attrition, so there is no loss of resources from an encounter. This means you don't need to include insignificant encounters just to make sure you are draining enough resources. This doesn't mean you can't have an encounter while traveling, but it does mean that encounter should serve a purpose. Maybe you want it just to illustrate how dangerous an area is, or to make travel seem more significant. It does mean you should make sure to have that encounter be interesting in its own right.

Similarly, you don't need to encounter weak enemies just to weaken the players for later. You might want to have an encounter with the enemy's foot soldiers because they should logically be there, but it should still be an interesting battle.

Setting Design

The setting you run your game in is a core part of any campaign. *Stuff of Legends* is designed to be very adaptable to a wide variety of settings. There are 3 basic options available to you.

1. Run an Official Reify Stuff of Legends Setting
2. Run a game in an existing setting
3. Make up your own setting

Reify Stuff of Legend settings are published separately. They are designed to be very open ended, able to support a wide variety of character concepts and plotlines. As these are designed with SoL in mind, they are very simple to use.

Existing settings are also possible, but can vary in how effective they are. Some will work very well, others will be a poorer fit. *Stuff of Legends* isn't designed to replicate details of other settings. For instance, if it has a very particular magic system, it's unlikely that stuff of legends will mimic it exactly. You can still run a successful campaign if you accept a looser interpretation of the setting. Your players will need to build characters according to how they interpret characters in such settings to work, rather than having the system itself guide you to such capabilities.

We advise not trying to go through the system and decide if each individual track or ability is setting appropriate. For one, that's just a lot of work. For another, someone may come up with a way to fluff it that does work, but you hadn't thought of. Instead, make sure everyone understands what types of characters do and do not fit the setting, and let them build characters with an appropriate concept.

Making your own setting can be a lot of work, but it can be very rewarding, for both the gm and players. You get complete control over how things work, and can perfectly tailor it to the campaign concept you have. you can also keep in mind how the system works to make sure your setting is harmonious with it.

Making sure character concepts fit is very similar to using an existing setting, but you have more freedom to determine what the bounds are, and can expand your setting to allow for a new concept.

Money

\mathcal{M} is there to support the Adventurer Economy. We don't cover economies or wealth more than that because it's simply not part of most adventures.

\mathcal{M} is a combination of loot and currency - instead of finding a cluster of gems to sell and trade for currency, we simply add a value of \mathcal{M} from loot. It could still be in loot form, it could already be traded for currency, but it's all trade-able and of value. Whether it's a bag of gems or a stack of cash, the end result is \mathcal{M} .

\mathcal{M} is mainly used for players to get tools and services they want or need. Trinkets, mundane items, basic tools, as well as straight value services such as bribes, or paying spellcasters for spells or librarians to research things.

In some cases it may not make sense for \mathcal{M} to be universal across campaigns - if players visit a new world with very different values of currency and materials, their \mathcal{M} from home may not apply, or have an exchange rate, and vice versa.

Use this option sparingly.

How much does it really add to your world to add different kinds of \mathcal{M} ? Would having a macrobuilding spacedock \mathcal{M} only relevant to making spaceships as separate from player's personal resources add to your game? Do the elves and dwarves hate each other so much that they'll completely reject the others currency and resources? If it doesn't meaningfully add to your world it's just extra bookkeeping, and we'd advise against it. If it does make sense, go for it! You can have Space \mathcal{M} and Personal \mathcal{M} and it works fine.

Downtime

Downtime occurs when the immediate time pressure and danger they are under is gone. It may be brief, such as being an evening by the campfire before another day of adventuring, or it could be long, with days, weeks, or even years passing where they are free to do whatever they want.

How long downtime will last is almost always uncertain. Even if they have a clear idea of when it must end, they never know if something else will pop up before then.

Downtime is generally not roleplayed in detail. Players declare what general actions they are taking, and the outcomes of that are recorded. This is a time to learn languages, work on projects, or engage in trivial jobs to earn a little bit of money.

How much downtime you offer can have a big impact on the overall pacing of the campaign. Offering no downtime will result in a very frantic, tense campaign of nonstop action. Offering lots of downtime can stretch out the events over a long period of time, giving a more epic feel to the overall course of events.

Travel Time

Travel time is another way to space out events, as well as space out locations. Taking time to get from Point A to Point B can make the world feel larger in scope.

Travel time may also be downtime, depending on how you are traveling. A week's journey by airship may be a week of downtime, while a week's travel on horseback would not be. What set of downtime actions are visible will vary based on the specifics of how you travel. You wouldn't be able to work on the mechanical project you have while in a booked room on a passenger airship, but you could on your personal airship with a built-in workshop, for instance.

When designing a setting, what forms of transport are available and how fast they are can be a very crucial detail. If you can teleport from city to city at will, you can open up a lot of new areas very easily, with little time being required to pass. Whilst journeys between cities taking weeks or months can make travel time a major limiting factor. A long journey can also make room for events to happen during the journey, stops to be made at places before your intended destination, and encounters on the road. This can give room to explore more aspects of the setting or engage in side quests.

Disadvantage

If your players are starving, poisoned, or their fightin' gear is shattered and absent... you might de-

clare them to be Disadvantaged. This isn't a combat injury they can shrug off or heal up, this is something that prevents them from being at full power. These Disadvantages stem from temporary conditions that can be dealt with. But until they are, it's much harder to do anything.

Disadvantage comes in two forms - Combat Disadvantage and Debilitating Disadvantage.

Combat Disadvantage means they're not fighting at full power - they've been stripped of their armor, their weapons are broken, they're fighting with one hand handcuffed behind their back because of a hasty escape that forgot the keys, but they've otherwise got their full faculties.

Debilitating Disadvantage comes from starvation, deep illnesses, severe exhaustion, and other things that tend to slowly kill characters on their own. Or maybe they're knockout drunk and haven't gotten to the knockout part yet.

Either way they can be Disadvantaged. When Disadvantaged, attacks against them gain an EDGE (pg. 24). If this is because of a Debilitating Disadvantage, all of their Roles are also reduced by one.

Encounters should not be adjusted because the players are Disadvantaged, but it does mean that all encounters are much harder. Even normal encounters can be extremely dangerous, and difficult encounters can quickly turn lethal. You, the GM shouldn't force the players into such encounters while they are Disadvantaged, and Players should be very motivated to avoid combat. Extras (pg. 163) can still only use one EDGE from a characters Disadvantage per round, but they do not need effective tactics to do so anymore.

Controlling Your Game Content

Stuff of Legends has very competent characters. Perhaps too competent for some cases. Some abilities may break certain campaigns, or make certain desired modes of play obsolete. Perhaps you don't want the ability to teleport large distances because it would undermine travel, perhaps you don't like characters that can burrow or phase because you don't want to deal with characters that can just bypass walls. Maybe a certain ability would make getting plot relevant information too easy and break your story. Whatever your reason, you might want to declare certain types of abilities for limits. This is well within the purview of a GM.

Individual perks and features are easy enough to avoid, but perhaps there is a track which is overall fine, but possesses a certain ability within it that is a problem. If a player really wants such a track, you can try to amend it, replacing the problematic ability with something else, like a bonus feature.

Chapter 15

Encounter Design

Power Level by Tier

Tier	Power Level
Champion	18
Hero	24
Immortal	30
Myth	36
Capstone	48

Step 1: Determine Party Strength

Add up the party's power level by taking the value from table 1 for each party member, as well as any allies which may be in the combat. Level 14 characters are still Myth tier, but take the Capstone level due to the increased power offered by capstones.

A character that lacks access to a track, such as by not having the item for an item based track, loses C power level per missing track.

Step 2: Determine Goal Challenge

A normal challenge has 75% same power level as the party strength. An easy one has about 50%, and a hard one 100%. These values may be adjusted based on the skill level of your players.

Players who desire a less intense challenge, are newer to the game, or who prefer to role play their combats rather than execute combat with ruthless efficiency may do better with weaker encounters, while veteran players who tackle combat with the effectiveness of generals may need harder encounters to satisfy them. If you don't know your group well, it's recommended to start off with easy encounters and gradually increase the challenge until it feels right.

While you should be aware of how things like missing tracks are impacting the party's power level, you don't need to scale every encounter down to compensate. While they can find weaker encounter that would still be a challenge in their weakened state, other encounters may be too strong in their weakened state. You should be aware of this due to the PL adjustments, but it is a penalty and the world isn't scaling itself back to compensate. Needing to avoid combat or seek alternative advantages can be expected when facing stronger foes.

Step 3: Purchase Monsters

Pick a combination of monsters that will meet your goal challenge. A normal monster has a power level based on its tier equal according to the table above. Myth tier monsters may have a capstone, in which case they have the capstone ranking. Mooks have half of this value, and never have capstones. Additionally, add in the tier difference to the party to their power level. For instance, if the party is Hero tier, a Myth monster would have a base power level of 36, plus 2 for being 2 tiers higher, for a total value of 38. Monsters of a lower tier are discounted in power level in the same manner. Capstone still counts as Myth tier for this purpose.

It's not recommended to put Myth tier monsters against Champion tier players, because they are capable of so much damage in one round that it is often unfun and swingy, even if the net challenge level works out. Staying within 1 tier above the party or lower is generally best overall.

Additionally, you can add in any number of Extras, as the situation demands. These do not count towards the power level of the encounter.

Karma

Karma is a way to inject extra events into a battle to spice it up. It is a resource that will accumulate for the GM to spend. This is an encounter level resource that the entire enemy group shares.

Gaining Karma

Karma is gained from certain monster abilities. One way is the Karmic Counter:

Karmic[C]: As a COUNTER, generate 1 Karma.

This is a good option for building enemies that don't seem notable enough in other areas to justify a different COUNTER; it can serve as a default COUNTER when nothing else fits well.

The second way is from various Monstrous Innates. When a monster with one such innate is killed before using up their innate, the excess becomes Karma. This always uses up the remaining uses of their ability.

Spending Karma

You can spend the accumulated karma for a variety of effects. You don't have to have all of the required karma, if you have at least 3/4 of the needed karma you can gain negative karma to use the effect early. New karma will pay off the negative karma before it resumes accumulating.

- **Extra Luck:** 1 Karma Give an Extra an attack.
- **Environmental Hazard:** 4 Karma Triggers some environmental effects, suitable to the current scenario. Can only be used if such an effect has been previously established as being present. It's recommended to designate certain regions as being at risk, and this can only be triggered in such areas.
Deals $4 \times C$ damage in an area, a defense roll halves the damage. May optionally inflict a basic effect on failed save.
- **Extra Turn:** 6 Karma One non-Mook enemy, or two Mook enemies, get an extra turn, at the end of the turn order.
- **Mook Reinforcement:** 12 Karma A new Mook enemy arrives to provide reinforcements. Add it to the battlefield wherever it would make sense for it to come from.
- **Reinforcement:** 24 Karma A new non-Mook enemy arrives to provide reinforcements. Add it to the battlefield wherever it would make sense for it to come from.

Player Advancement

Advancing player abilities is something that takes consideration - what advancement pace is right for your campaign? There are multiple schools of thought. Some are arbitrary level up moments, dictated by the GM or plot, others are a steady creep of advancement by a regular interval of sessions, others involve parceling out XP or other points to trade in for advancement.

Earned Experience is set to level up players quickly at first tier, even out at tiers 2 and 3, then slows down a bit in tier 4. Its set to 5 encounters per level. If you have 1 regular strength encounter a week, this will bring your players from level 1 to level 14 in 64 weeks, or just over 1 year. You can adjust this to be faster or slower based on your desires.

Here are a few sample advancement methods:

- **Earned Experience** - every time the PCs resolve an encounter, they get appropriate amounts of XP. Gather enough XP and they advance in level.

Experience (xp) is an optional system. If used, characters will level up when they get enough total xp according to the below table.

Upon defeating an enemy, the party gains xp equal to the total power level of the enemies, split evenly among the party members.

- **Steady Advancements** - at the end of every session, the PCs gain XP equal to 1/10 the amount needed to advance for their tier, with more awarded if the session proves to be well played, interesting, or the end of a story arc. If this is the only method of XP gain in a campaign (no extra XP from fights or quests, etc), then double this.
- **Quest XP** - Reward XP for the completion of quests and other landmarks. These can be large rewards, or just the icing on the cake, depending on the gm's needs. This can be enough xp to level by itself, or a smaller amount depending on the pacing.
- **Fiat Advancement** - The GM simply tells the PCs 'level up now.'
- **Mixed advancement:** You can progress according to earned experience or steady advancement most of the time, but augment it with jumps forward in level (from 6 to 9, for example) at specific points in the campaign. This can greatly speed up how fast you progress while still keeping the xp and incremental advancement.

Otherwise, leveling up can be handled by whichever method the GM wants, such as a pre-set schedule of advancement, leveling up at specific plot points, after a given quest, or forgo level based advancement altogether.

Tier	Xp to reach next level
Champion	72
Hero	120
Immortal	150
Myth	216

Traps

Tricky traps are a staple of any well designed evil lair. There are three phases to a trap: Finding it, triggering it, and bypassing it. Finding a trap is identifying that it is there, by spotting it ahead of time, or haplessly triggering it. Triggering a trap causes it to invoke its effect, and bypassing a trap lets you continue on with your day.

Choose Your Search Speed: Paranoid, Aware, or Daring. Generally while traversing a dungeon, it's easier to assume a certain level of cautiousness in your movement and searching. Here are the recommended basic speeds. The modifier changes your effective skill rank

Trap Altness

SS	Movement	Mod
Paranoid	1/4	+1
Aware	1/2	0
Daring	Normal	-1

Detecting traps

There are two ways to detect traps- active and passive. Active detection requires stopping and explicitly checking for a trap, and would be used for traps that require interacting with things. For instance, if taking the golden idol off a pedestal will trigger a trap, you must actually check for a trap to find it. Passive detection can be done on the move, though slowing down can make it much easier. Passive detection uses trap alertness; if no search speed has been declared, its assumed they are traveling at full speed, and hence are daring. An active check uses a normal skill check against the trap's difficulty to find. A passive check uses the appropriate skill rank without a skill check, unless the player declares they are specifically searching a hex for a trap, which would make it into an active check with the paranoid bonus.

In general, traps should have something indicating it's worth searching for them. You don't want the entire game bogged down with them searching every hallway for traps. A chest on a pedestal in the middle of the room is an obvious enough place that they can expect to search it, for instance. Traps should be obstacles to overcome, something for players to keep an eye out for, not random slaps of death with no warning that drive players to paranoia.

Obvious Traps: Obstacles

Obstacles work exactly like traps, except they are plainly visible. No searching is needed to identify an obstacle. All further details apply to obstacles the same as traps.

Avoiding a trap

Once you have detected that a trap is present, you must figure out how to bypass it. The player must declare the action they will use to bypass it. "I disarm the trap" is not an appropriate attempt; a method of dealing with it must be proposed. Depending on the trap and the action, it may automatically succeed, or it may require a skill check against the trap's DC. Other actions may simply fail outright, and either be ineffectual or trigger the trap, based on the trap. (There is a wall of fire. I walk through it. Well, you get burned) (There is a rolling boulder. I put chewing gum on it. That does nothing). Being clever and finding ways to negate traps is to be rewarded; don't be afraid to let them neutralize a trap with some clever thinking, but don't feel the need to have anything they attempt work or be automatic if it doesn't make sense. Reward cleverness, don't give an A for participation.

Triggering a trap

The character has either blundered into the trap unaware, set it off while trying to disarm it, failed to sneak past it, or otherwise messed up. The trap goes off.

Triggering a Trap has two parts : Reaction, and Roll. A reaction is an instant question posed to the player, 'you've triggered a trap, what do you do?'

without giving them any new information, except possibly the trigger mechanism; such as as an obvious pressure plate or an open tripwire.

a) Reaction : If the trap is not revealed, without telling them what the trap is, only that a trap has been triggered; the player should say how they respond. "Jump back", "use my Shielding power," "throw myself left", "Parry a projectile out of the air", etc. Consider the reaction and how it relates to the trap; A good reaction will give a bonus to the hazard roll; or may even completely avoid the effects of the trap, a bad reaction will give a penalty or make the trap automatically succeed. A Revealed Trap follows the same rules, however more information about the trap is known when the Player declares their reaction.

b) Roll : The trap may make an attack roll, or require a defense roll. If the reaction provides a modifier to the roll, insert it as appropriate. In some cases a roll is not necessary, as the reaction has turned it into an automatic success or failure.

It makes its designated attack in the designated area (which will generally be the triggered character or an area covering the trigger, but exceptions may exist), dealing whatever damage and effects specified. A single-trigger trap is rendered useless after being triggered once, while a repeating trap can be triggered multiple times, though not more than once per round for a given creature. Triggering a trap always reveals it.

Combat Traps

Some traps are not actually built into a structure properly, but are jury rigged after the fact. All traps granted by abilities fall into this category. When hidden, these traps are not immediately visible, but can be spotted quickly if care is taken. A creature may spend a STEP to check an adjacent hex for traps. Any combat traps in that hex are immediately revealed. If searched for outside of combat, these traps are found in 1 second automatically.

Designing Traps

A trap consists of 2 parts, the trigger and the effect. The effect will have a given set of hexes that are affected by it, and 2 traps cannot have the same affected hexes.

Traps and Levels

Traps have a tier rating for the purposes of determining how strong they are. By default, traps should be the tier of either the trap's creator, or of the area's tier. The skill rank required for a trap is equal to the skill rank of its builder, including a skill check.

Triggers

- Tripwire: Exists along some number of hex edges in a straight line. Triggers when a creature crosses the hex edge. Single Use.
- Pressure plate: Triggers when a creature enters a hex. [GROUND] effect.

- **Laser Trigger:** Exists along some number of hex edges in a straight line. Triggers when a creature crosses the hex edge. Does not trigger on INVISIBLE creatures.
- **Runes:** Triggers when a creature reads it. Can define minimum distance to be legible.
- **Motion Sensor:** Triggers if a creature moves more than 3 hexes a round in the given area. Senses a cone from the sensor.
- **Teleport Sensor:** Triggers if a creature TELEPORTS into/out of a given region.
- **Smart Trigger:** Can be attached to any other trigger. Creatures possessing a certain talisman (such as a security badge) do not set off the trigger.
- **Weight Trigger:** triggers when a weight is removed from it. Often used to detect if an item is removed.
- **Trapped Lever:** a lever, button, doorknob, or other plain control may trigger a trap.
- **Opening trigger:** Triggers if a given door or window is opened or destroyed.
- **Automatic trigger:** The trap goes off at a preset schedule, such as once a round, no matter what. These are always obstacles, as they cannot be hidden.
- **Attack*(d):** The trap makes a single attack, such as a single swinging blade, at a creature in a given hex. May be either single use or repeating. That creature takes damage according Row D on the bottom table on a hit.
- **Multiattack*(a):** This trap attacks with a lot of attacks, like a volley of arrows. It makes 4 STRIKES against creatures in a given hex, doing 1d6+damage from Row A on the bottom table.
- **Poison(e):** The trap STRIKES with poison at a single target. That target takes E ONGOING damage according to the table below on a hit.
- **Poison Cloud(f):** The trap releases a cloud of poison in a given area, dealing E ONGOING damage according to the table below. A defense roll halves the ONGOING.
- **Autodamage*(c):** The trap simply deals damage per Row C to a creature in the given hex.
- **Flame jets*(b):** Creatures in the given hexes take damage according to Row B on the bottom table, half on a miss. On a hit, they also start IGNITED for twice the traps level.
- **Tripping:** The creature triggering the trap falls PRONE.
- **Grappling:** The trap grabs hold of a creature in the given hex. It makes an attack roll, and on a hit the creature cannot move or take immediate actions or REACTIONS until it breaks free. On each round, the trap may make another attack roll to continue this effect.
- **Shoving:** The trap makes an attack roll against all creature in the affected hex. on a hit, they are moved a preset distance up to 6 hexes in a preset direction. If this triggers any additional traps, they go off after the movement is finished.
- **Teleporting:** The trap TELEPORTS all creatures in the affected hex to a preset destination.
- **Crushing walls:** Once triggered, The walls on either side of this room move 1 hex closer together each round. Alternatively, the ceiling may lower by 1 hex each round. A creature in the hex the wall moves through is moved 1 hex in the direction the wall moved. If the walls meet, all creature in between them take damage according to the break threshold of the walls, as if they used burst through. If this does not wound a creature, the walls break.
- **Water filled room:** Each round, water rises in the room by another hex. If the room is compromised so it can't hold water, the water will not rise above the hole. The trap can only unleash enough water to fill the room. Typically combined with lock door to make the room watertight.
- **Smoke cloud:** When triggered, the trap creates a cloud of smoke in the given hexes, rendering them [Cloudy].

Effects

- **Alarm:** The trap does not attack intruders directly, but instead alerts others in the location. Can be a silent alarm, alerting specific individuals discreetly, or have klaxxons and flashing lights and such.
- **Pit:** A given region of the floor drops away, leaving a pit for intruders to fall into. The bottom is X hexes below the surface. [GROUND] effect to cause creatures in the affected hexes to fall in. A successful recovery roll can allow a creature to move 1 hex to a stable hex, if one exists. Once a pit is activated, they stay open.
- **Spike pit:** Like a pit, but those who fall in take damage according to row E of the table below from the spikes at the bottom
- **Water-filled pit:** Like a pit, but the bottom is full of water. How much water can be varied, but its generally left at least 1 hex below the top to prevent easy escape.
- **Lava-filled pit:** Like a water filled pit, only it's lava.
- **Acid-filled pit:** Like a water filled pit, only it's acid.
- **Explosion*(b):** up to a 3 hex area explodes, doing the damage per Row B below to all creature in the area. A defense roll halves the damage. Single use.

- Giant boulder*(d): The boulder rolls 12 hexes down a preset path each round. What this path is will be apparent, and the boulder doesn't start rolling for 1 round. The boulder may be 1-3 hexes wide. If the boulder passes over a creature, it deals damage equal to Row D from the table below and renders them PRONE as it rolls them over.
- Lock Door: This may be added to any other trap. When the trap is triggered, the given door or doors slams shut and locks itself.
- Delays: A trap's effect can be delayed for a set number of rounds after triggering them.

Trap Effect Damage By Type and Tier

Traps

Tier	Champion	Hero	Immortal	Myth
A	3	5	7	9
B	18	24	31	37
C	15	20	25	30
D	25	33	42	50
E	10	13	17	20
F	7	9	11	13

GM tips: Using traps effectively

Traps, like everything else, are a tool for making an interesting experience. It's really easy to misuse traps and have them not contribute well. Imagine a scenario where the party walk down a corridor. They spring a trap, and a blade swings out of the wall and cuts one of them. They stop, heal the wound, and walk on. Not much is added to the adventure. A trap alone is not a meaningful challenge. If instead

they walk down the hallway, trigger a trap, and it decapitates someone, killing them instantly, it's now a meaningful challenge, but it's not a good one. It just becomes a random arbiter of death. Traps work best in conjunction with other things. Say, they trigger a trap, and it wounds them, then nearby enemies attack while they are still harmed. Now the trap has disadvantaged them for this combat, a meaningful setback, but one they can respond to. Or if the trap opens a trap door, and drops them to a different part of the dungeon. Now it's altered their route through the dungeon, and it's meaningful. A trap can also liven up the battlefield for an encounter. Putting out a ton of hidden traps tends to be more arbitrarily punishing than rewarding; there is not time to check everywhere for traps in the middle of combat. However, obstacles can become a key part of a room's tactics. Also consider traps that reveal obstacles for combat. It's more interesting to run up to the enemies and have the floor in front of you drop away into a lava pit than to run up to the enemies and be randomly dunked in lava. If the traps present are supposed to be a significant contributor to the battle, count a trap in a place likely to be triggered as half a character of its level (like a mook), and a trap in an unlikely place as a quarter character (2 such traps are like a mook). Certain traps, like closing walls or the room filling with water, can be used to put a time pressure on the party. By itself, it's not likely an interesting experience, but it can be used to make a separate challenge even more intense. Alarms and locked doors can present punishments for blundering into traps without directly causing harm, esp. where stealth was desired. Time pressures can make the amount of time spent searching for traps a key decision. Too little time, and they will hit you too often, too much time and you run out of time.

Chapter 16

Monster Abilities and Creation

Every intrepid adventurer needs a dangerous, meaty wall of flesh to stand between them and their heroic deeds. Preferably interesting ones with exotic powers and strange, deadly abilities, so when they re-tell the tale later it's much more interesting than that *other* adventurer's stories about how they felled a horde of weak, puny monsters.

Here's a quick, powerful ruleset to build them, and keep your heroes at the top of the bragging pile.

Monster Generation Step-by-Step

1. Assign a tier, and then use the base stats by tier from the Basic Stats Table.
2. Choose between:
 - (a) **Weaponless:** The monster has no weapons, and cannot take [W]eapon abilities. This must be chosen if they do not have any [W]eapon abilities.
 - (b) **Wield Weapons:** The monster possesses three weapons, and can switch between them, similar to a PC.
 - (c) **Natural Weapon:** The monster possesses a single natural melee weapon, and cannot be disarmed. It also gets a bonus major ability that can be used at range; this becomes [R]eckless.
3. Choose two primary abilities, one major and one minor.
4. Choose one additional major or minor ability. These can be either primary or secondary.
5. Define SURGES.
 - (a) If the creature has no abilities that grant a SURGE, they can use the basic SURGE. If the creature has [W]eapon abilities, the basic surge is a [W]eapon ability, otherwise it is not and has range 12.
 - (b) If the creature has multiple abilities useable as a SURGE, they can choose any of their available SURGES when making a SURGE.
 - (c) Abilities with the [SURGE] tag can be used as a SURGE. If the minor ability attaches a RIDER, the target of the SURGE is targeted by the RIDER.
 - (d) Surges granted by [W]eapon major abilities are themselves [W]eapon abilities. Surges are not [O]verwhelming.
6. Choose a innate ability.
7. Choose a COUNTER ability.
8. Determine tactical abilities.
 - (a) Creatures gain 1 tactical ability per tier.
 - (b) A creature may swap a tactical ability for the native ability if the situation warrants it. Native - This creature is immune to adverse conditions in a specific environment. If its native to water it may swim at full speed in any direction, if its native to a volcano it won't burn in lava, etc.
 - (c) A monster with one TRACK gets half the number of tactical abilities, rounded down. A monster with two or more TRACKS gains no tactical abilities. A monster with TRACKS gets the maximum number of facets that would be available at its tier.
9. Enhance abilities. Each tier after the first, the monster may enhance one of its existing abilities, or pick an additional major or minor ability.

10. Add vulnerabilities

Optionally, a monster may possess a vulnerability:

- **Elemental Vulnerability:** Choose an ENERGY EFFECT. Attacks against this creature which are capable of inflicting that ENERGY EFFECT have an EDGE.
- **Physical Vulnerability:** [W]eapon attacks against this creature have an EDGE
- **Nonphysical Vulnerability:** non [W]eapon attacks against this creature have an EDGE

If it has an Elemental Vulnerability, it may either choose an Elemental Resistance, or Enhance one of its abilities

- **Elemental Resistance:** Choose an ENERGY EFFECT. This creature has an EDGE against attacks which are capable of inflicting that ENERGY EFFECT.

If it has Physical or Nonphysical Vulnerability, it may either take another tactical ability, or the opposite resistance

- **Nonphysical Resistance:** This creature has an EDGE against non-[W]eapon attacks
- **Physical Resistance:** This creature has an EDGE against [W]eapon attacks

Effects

Many monster abilities can cause additional effects while used. These effects can be swapped out to further customize the monster. If an ability has one of the basic effects, you can exchange it for a different basic effect. If an ability has one of the enhanced effects, you can swap it for another one of the enhanced abilities. These effects are chosen when the monster ability is selected, offering a further way to customize how the monster fights. This effect may either affect the user of the ability or one of their targets unless indicated otherwise, also chosen when the ability is selected.

A disabled creature cannot use these extra effects. Using an ability with an extra effect uses up one disabled.

Enhancing Effects

Abilities can also be enhanced. Enhancing an effect can let you choose an enhanced effect instead of a basic effect, choose 2 basic effects, or stack a stacking basic effect. The second basic effect doesn't have to affect the same target as the original. The ability may also allow for an alternative enhanced option, such as adding a basic effect where there otherwise isn't one, or making it more reliable to activate the effect it already has.

There are several ways to get an enhanced ability.

- Adding the [FEAR] or [MENTAL] tag to an enemy affecting condition. Doing so to FORCED movement makes it directed.
- Adding the [GROUND] tag to an enemy affecting condition.
- Adding the [FEAR], [MENTAL] or [GROUND] tag to an entire ability. This works the same as before, but also makes the ability secondary, and let's you add another basic effect in addition to enhancing the original effect
- Add a 1/encounter clause to the effect. The ability itself can still be used but no longer has an extra effect after that use.

- Restrict an ally targeting ability to only target yourself
- Selecting the "Enhanced Abilities" tactical option
- One additional ability can be enhanced for every tier after the first the monster has.

All of these apply to any creature which has a monster ability.

Basic Effects

- Inflict a specific ENERGY EFFECT
- Inflict PRONE
- FORCE 1 hex in any direction
- FORCE3 hexes away (melee only)
- FORCE3 hexes towards user
- Inflict DIZZY 1 for 1 round
- Inflict BLIND 9 for 2 rounds
- Inflict SLOW 2 for 1 round
- GRAPPLE target (melee only)
- Inflict DISABLED
- Inflict TETHERED at the current distance
- Inflict OFF BALANCE
- Remove a lesser removable condition
- DASH 3
- DIRECT ally 3
- Raise target priority for one round; violating incurs a punishment (see below)
- Lower target priority for one round; violating incurs a punishment (see below)
- Make targeted hex afflicted; Creatures ending turn in hex gain an ENERGY EFFECT or become DIZZY 1 for 1 turn

- Make targeted and surrounding hexes difficult terrain
- Destroy adjacent destructible terrain

Punishments

- Designated creature may take a surge against attacker
- Attacker has 2 penalties on attack
- Attacked creature heals $2 \times C$.
- Attacked creature gets a 25% DODGE CHANCE

Enhanced Effects

- Inflict 2 basic effects
- Make basic effect twice as strong
- Inflict *C* bleeding
- Inflict STUNNED
- Inflict STOPPED
- Inflict BLIND 6 for 3 rounds
- Grant immunity to a lesser condition for a round
- Make targeted and surrounding hexes afflicted; Creatures ending turn in hex gain an ENERGY EFFECT or become DIZZY
- Double movement speed next round
- Raise target priority, this cannot be violated. Must be [Mental] or [Fear]
- Lower target priority, this cannot be violated. Must be [Mental] or [Fear]
- TELEPORT ally 6 hexes
- Become SHIELDED
- move a lesser condition between target and user
- any basic effect, chosen on use
- adds [Rm] to target's next action
- TELEPORT 3 hexes in any direction

Mooks

A mook is a weaker version of a monster, or just a weaker type of monster. Generating a mook works the same as generating a normal monster, but they use the lowercase version of any table entries where present, and cannot take tracks. Mook abilities lose the [O]verwhelming tag. A Mook can only apply 1 boost or penalty to their major action, and a penalty can block their entire minor action.

Extras

Extras are even weaker than mooks, and are little more than cannon fodder. See the extras section below for more details.

Basic Stat Array

Tier	Champion	Hero	Immortal	Myth
HP	48	64	80	96
hp	24	32	40	48

Massive Meatwall Stat Array

Tier	Champion	Hero	Immortal	Myth
HP	96	128	160	192
hp	48	64	80	96

Meatwall Stat Array

Tier	Champion	Hero	Immortal	Myth
HP	72	96	120	144
hp	36	48	60	72

Summon Stat Array

Tier	Champion	Hero	Immortal	Myth
HP	6	8	10	12
hp	6	8	10	12

Swarm Stat Array

Tier	Champion	Hero	Immortal	Myth
HP	108	144	180	216
hp	54	72	90	108

Basic Surge [W?]

As a SURGE, this creature may make 1 STRIKE (within range 12 if not W), dealing **D** damage.

BOOST: +**B** extra damage.

Tier	Champion	Hero	Immortal	Myth
D	15	20	25	30
B	5	7	8	10

Monster Abilities

Primary Major Abilities

Offense				
Advanced Attack	Autodamage	Basic Attack	Blaster	Double Hit
Flurry*	Precise*	Swarm	Wild Swing*	
Defense				
Drain*	Leech*	Vampiric*		
Other				
Hindering*	Spawn			
Unique				
Major Track				

Offensive Primary Major

Advanced Attack [OW]

As a major action, this creature may make 2 STRIKES, dealing **D** damage each. If both hits, the target is STOPPED.

ENHANCE: Only one hit is needed to stop.

BOOST: +**B** extra damage.

Tier	Champion	Hero	Immortal	Myth
D	13	17	21	25
d	8	10	13	15
B	3	3	4	5

Autodamage [RmO]

As a major action, this creature may deal **D** damage to a target within 12 hexes. They must make a defense roll or be chilled.

ENHANCE: No defense roll required for the chilled.

BOOST: +**B** damage

Tier	Champion	Hero	Immortal	Myth
D	15	20	25	30
d	9	12	15	18
B	3	4	5	6

Basic Attack [OW]

As a major action, this creature may make 2 STRIKES at -2, dealing **D** damage each. If either hits, FORCE the target 1 hex in any DIRECTION (3 hexes if it was a melee attack).

ENHANCE: Trigger the effect for each hit.

BOOST: +**B** extra damage.

Tier	Champion	Hero	Immortal	Myth
D	15	20	25	30
d	9	12	15	18
B	3	4	5	6

Blaster [O]

As a major action, this creature may deal **D** damage to a single target within range 12 and inflict BURNING . A successful defense roll halves the damage and negates the effect.

ENHANCE: The defense roll does not stop the BURNING .

BOOST: Increase damage by **B**.

Tier	Champion	Hero	Immortal	Myth
D	19	25	31	38
d	11	15	19	23
B	4	5	6	8

Double Hit [OW]

As a major action, this creature may make 2 STRIKES, dealing **D** damage each. If either hits, inflict SLOW 2 for 1 round.

ENHANCE: Trigger SLOW for each hit.

BOOST: +**B** extra damage.

Tier	Champion	Hero	Immortal	Myth
D	13	17	21	25
d	8	10	13	15
B	3	3	4	5

Flurry [OW]

As a major action, this creature may make 5 STRIKES, dealing **D** damage each. If at least 3 hit, inflict PRONE. If 5 hit, instead inflict C BLEEDING . A mook takes 3 STRIKES.

BOOST: Take an additional STRIKE.

SURGE: This creature may take 3 of these attacks as a SURGE.

BOOST: Take an additional STRIKE

Tier	Champion	Hero	Immortal	Myth
D	5	7	8	10

Precise [OW]

As a major action, this creature may make 3 STRIKES at +3 to hit, dealing **D** damage. If at least 2 hit, inflict **BLIND** 9 for 2 rounds.

ENHANCE: If at least 1 hits, trigger the **BLIND**.

BOOST: **B** extra damage per hit.

SURGE: This creature may make one attack at +3 to hit for **S** damage as a **SURGE**.

BOOST: +5 to hit

Tier	Champion	Hero	Immortal	Myth
D	7	9	11	13
d	4	5	7	8
B	1	2	2	3
S	12	16	20	24

Swarm [O]

As a major action, this creature doesn't provoke **REACTIONS** for the remainder of the turn and can move through occupied spaces. If the creature ends its turn in a hex occupied by an enemy, it attaches to that enemy, and the enemy takes **D** damage. If this creature shares a hex with multiple enemies, it does half damage to each enemy. Until the next round, this creature has no melee range. If the enemy this creature is attached to is attacked, the attack also targets this creature. While attached, this creature cannot be moved from the enemy's hex, and if the enemy moves this creature moves with it. The enemy may spend 1 STEP to detach this creature from itself.

ENHANCE: Inflicts **SLOW** 2 at the start of a turn if this creature is still attached.

BOOST: deal an extra **B** damage

Tier	Champion	Hero	Immortal	Myth
D	21	28	35	42
d	12	16	20	24
B	5	6	8	9

Wild Swing [OW]

As a major action, this creature may take 1 STRIKE at -4 to hit, dealing **D** damage. If it hits, stun the target.

ENHANCE: If it misses, destroy adjacent destructible terrain.

BOOST: +2 to hit or **b** additional damage for mooks.

SURGE: This creature may make one STRIKE at -4 to hit dealing **S** damage

BOOST: +3 to hit

Tier	Champion	Hero	Immortal	Myth

Change Form				

Offensive Secondary Major

Arcane Projectile [RS]

As a major action, this creature deal **D** damage to 3 different creatures within 12 hexes.

ENHANCE: Each creature makes a defense roll or be SHOCKED.

BOOST: +**B** damage to one creature

Tier	Champion	Hero	Immortal	Myth
D	9	12	15	18
d	6	8	10	12
B	3	4	5	6

Build up [RS]

As a major action, this creature may becomes ENERGIZED **E**, and DASH 3.

ENHANCE: Instead of DASHING, doubles movement speed next round.

BOOST: +**B** ENERGIZED

Tier	Champion	Hero	Immortal	Myth
E	12	16	20	24
e	6	8	10	12
B	3	4	5	6

Cone [S]

As a major action, this creature may create a 6 hex cone originating from itself which deals **D** damage. A successful defense roll halves this damage.

ENHANCE: Each target is chilled on a failed defense roll.

BOOST: +**B** damage or +**S** damage to a single target

Tier	Champion	Hero	Immortal	Myth
D	14	18	23	28
d	9	12	15	18
B	3	3	4	5
S	4	5	6	8

Cursed Blows [OW]

As a major action, this creature may make 2 STRIKES that deal **D** damage and 1 CORRUPTION. If either hits, they are DISABLED.

ENHANCE: Trigger the DISABLED for each hit.

BOOST: +3 to hit, or +**b** damage for a mook

Tier	Champion	Hero	Immortal	Myth
D	8	10	13	15
d	3	3	4	5
b	3	3	4	5

Empowering

As a major action, this creature may ENERGIZE a creature **E** and guide them 3 hexes.

ENHANCE: TELEPORT the ally 6 hexes instead of guiding them.

BOOST: Increase the ENERGIZED by **B**

Tier	Champion	Hero	Immortal	Myth
E	12	16	20	24
e	6	8	10	12
B	3	4	5	6

Evoker [SR]

As a major action, this creature may create a 2 hex radius burst within 12 hexes which deals **D** damage. A successful defense roll halves this damage.

ENHANCE: Each target starts BURNING on a failed defense roll.

BOOST: +**B** damage, or +**S** damage to a single target

Tier	Champion	Hero	Immortal	Myth
D	14	18	23	28
d	9	12	15	18
B	3	3	4	5
S	4	5	6	8

Line [S]

As a major action, this creature may create a 24 hex line originating from itself which deals **D** damage. A successful defense roll halves this damage.

ENHANCE: Each target is **SHOCKED** on a failed defense roll.

BOOST: +**B** damage or +**S** damage to one target

Tier	Champion	Hero	Immortal	Myth
D	14	18	23	28
d	9	12	15	18
B	3	3	4	5
S	4	5	6	8

Lower Guard [RO]

As a major action, this creature can give a creature within 12 hexes Offguard 4 and **[[FEAR]] STOPPED**. Mooks give Offguard 2.

BOOST: Increase the offguard by 1

Make Vulnerable [RO]

As a major action, this creature may cause a creature within 12 hexes to become **VULNERABLE V** and **[[MENTAL]]** guide the target 6 hexes towards themselves. The target may make a defense roll to negate the **VULNERABILITY** and effect.

ENHANCE: The defense roll does not negate the effect.

BOOST: +**B** **VULNERABLE**.

Tier	Champion	Hero	Immortal	Myth
V	20	27	33	40
v	10	13	17	20
B	5	7	8	10

Poison Spit [RO]

As a major action, this creature can **STRIKE** an enemy within 12 hexes. On a hit, they take **O** **ONGOING** damage, and are **BLINDED** 9 for 2 rounds. **BOOST** : +3 to hit, or +**b** **ONGOING** damage for mooks

Tier	Champion	Hero	Immortal	Myth
O	15	20	25	30
o	8	10	13	15
b	4	5	6	8

Trample [SH]

As a major action, this creature can **DASH** up to 6 hexes in a straight line. They can move through enemy hexes during this movement, and deal **D** damage to each enemy adjacent to them at any point in this movement. A creature can only take damage from this effect once per use of this ability.

ENHANCE: Knock each target **PRONE**, defense roll negates.

BOOST: +**B** damage

Tier	Champion	Hero	Immortal	Myth
D	9	12	15	18
d	6	8	10	12
B	2	2	3	3

Whirlwind [WS]

As a major action, this creature may **STRIKE** all enemies in its melee range for **D** damage.

ENHANCE: Each target **FORCE** target 3 hexes away on a hit.

BOOST: +3 to hit, or +**b** damage for mooks, or +**S** damage to one target

Tier	Champion	Hero	Immortal	Myth
D	18	24	31	37
d	12	16	19	23
b	3	4	6	7
S	5	7	8	10

Defensive Secondary Major**Cross Counter [OWS]**

As an immediate major action when an opponent attacks, this creature may make a **STRIKE** that deal **D** damage to the target and blocks **D** damage. If this hits, inflict **PRONE**. If this blocks more damage that was dealt, deal the excess as additional damage.

ENHANCE: The effect triggers on a miss as well. **BOOST** : +**B** damage and block.

Tier	Champion	Hero	Immortal	Myth
D	13	17	21	25
d	8	10	13	15
B	3	3	4	5

Drain Life [ROS]

As a major action, this creature may inflict **PERSISTENT WEAKEN W** and **PERSISTENT VULNERABLE w** for 3 rounds to a creature within 12 hexes. A successful defense roll halves the **WEAKEN** and **VULNERABLE**. On a failed defence roll inflict **SLOW** 2 for 1 round.

ENHANCE: The effect is persisted for 3 rounds.

BOOST: The **WEAKEN** and **VULNERABLE** increases by **B**

Tier	Champion	Hero	Immortal	Myth
W	4	5	6	8
w	2	3	3	4
B	1	1	2	2

Malediction [ROS]

As a major action, this creature may curse a creature within 12 hexes. While cursed, the creature is **DISABLED**, **WEAKENED W** and **VULNERABLE W** at the beginning of each turn. At the beginning of the cursed creature's turn, before these effects take place, they may make a defense roll to stop being cursed. This does not stack with itself.

ENHANCE: Creature is also **SLOW** 2 while cursed.

BOOST: The **WEAKEN** and **VULNERABLE** increases by **B**

Tier	Champion	Hero	Immortal	Myth
W	5	6	8	10
w	2	3	4	5
B	1	2	2	2

Restoration [S]

As a major action, this creature may heal a creature **H** damage and ENERGIZE them **H**, and remove a lesser restorable condition. from it. Any excess healing becomes thp.

ENHANCE: The target's target priority is lowered, violating heals them **H**.

BOOST: Increase the healing and ENERGIZED by **B**

Tier	Champion	Hero	Immortal	Myth
H	6	8	10	12
h	3	4	5	6
B	2	2	3	3

Shielding [S]

As a major action, this creature may grant a creature **H** bhp and ENERGIZE them **H**, and raise their target priority. Violating lets them take a SURGE.

ENHANCE: Instead of raising target priority, add SHIELDED

BOOST: Increase the bhp and ENERGIZED by **B**

Tier	Champion	Hero	Immortal	Myth
H	6	8	10	12
h	3	4	5	6
B	2	2	3	3

Other Secondary Major**Swallow Whole [OS]**

As a major action, this creature make 2 STRIKES within its melee range. If either hits, the target is GRAPPLED. If both hit, the target is swallowed. A swallowed creature shares its space with this creature and moves with it. A swallowed creature cannot move without WARP, has no LINE OF SIGHT or LINE OF EFFECT to anything but the swallowing creature, and no creature has LINE OF SIGHT or LINE OF EFFECT to the swallowed creature. The swallowing creature is OFF BALANCE to the swallowed creature.

The swallowed creature targets the monster's Stomach HP (**H**), Which has a COUNTER that reduces the damage by **C**. If this is eliminated, they are no longer swallowed and are moved to an adjacent unoccupied hex. Any excess damage is dealt to the swallowing creature. The swallowed creature takes **D** damage each round on the swallows turn, including the round they are swallowed, ignoring COUNTERS. If the swallowing creature is dropped or the swallowed creature can leave its hex, the swallowed creature is no longer swallowed. While the swallowing creature has a creature swallowed, it takes 2 PENALTIES on its major action and cannot use Swallow Whole.

ENHANCE: DISABLE target each round a creature is swallowed.

BOOST: The first of the two STRIKES is made at a +3 bonus.

Special: Mooks cannot have swallow whole.

Tier	Champion	Hero	Immortal	Myth
H	33	44	56	67

Offensive Minor

Boost

This creature may gain **B** BOOSTS and may DASH 3 hexes.

ENHANCE: Increase DASH to 6 hexes.

BOOST: Become ENERGIZED **E**

Tier	Champion	Hero	Immortal	Myth
B	2	2	2	2
b	1	1	1	1
E	3	4	5	6

Rider [Surge]

As a minor action, this creature may gain a RIDER that deals **D** damage and inflicts BURNING. A successful defense roll halves the damage and prevents the BURNING.

ENHANCE: The defence roll doesn't prevent the BURNING.

BOOST: Increase the damage by **d**

Tier	Champion	Hero	Immortal	Myth
D	8	10	13	15
d	4	5	6	8

Slash [W Surge]

As a minor action, this creature may make a STRIKE for **D** damage and knocks the target PRONE on hit.

ENHANCE: If this was a melee attack, the target is also GRAPPLED.

BOOST: +4 to hit

Tier	Champion	Hero	Immortal	Myth
D	15	20	25	30
d	10	13	17	20

Strengthen

As a minor action, this creature become ENERGIZED **E** and destroys adjacent destructable terrain.

ENHANCE: Become immune to FORCED movement for a round.

BOOST: Increase the ENERGIZED by **e**

Tier	Champion	Hero	Immortal	Myth
E	6	8	10	12
e	3	4	5	6

Venom [Surge]

As a minor action, this creature may gain a RIDER that does ONGOING **O** damage and DIZZY 2 on a successful attack roll.

ENHANCE: Also inflicts BLIND 9 on a successful attack.

BOOST: Increase the ONGOING by **o**

Tier	Champion	Hero	Immortal	Myth
O	8	10	13	15
o	4	5	6	8

Defensive Minor

Ablate

As a minor action, this creature may gain **R** RESISTANCE and make any surrounding hexes difficult terrain.

ENHANCE: Instead of the difficult terrain, become immune to FORCED movement for a round.

BOOST: Gain **r** additional RESISTANCE

Tier	Champion	Hero	Immortal	Myth
R	6	8	10	12
r	3	4	5	6

Bubble

As a minor action, this creature may gain **B** barrier HIT POINTS and destroy adjacent destructable terrain.

ENHANCE: Instead of destroying terrain become SHIELDED.

BOOST: Gain another **b** barrier HIT POINTS

Tier	Champion	Hero	Immortal	Myth
B	6	8	10	12
b	3	4	5	6

Drain Energy [Surge]

As a minor action, this creature may gain a RIDER that inflicts a PERSISTENT PENALTY for 2 rounds, **W** WEAKENED, and DIZZY 1 on a hit. Mooks only inflict 1 PENALTY.

ENHANCE: also inflict SLOW 2 on a hit.

BOOST: Increase the WEAKENED by

Tier	Champion	Hero	Immortal	Myth
W	4	5	7	8
w	2	3	3	4
b	5	7	8	10

Heal

As a minor action, this creature may heal a creature within 12 hexes **H** hp and remove a lesser restorable condition. Excess healing becomes temporary hp.

ENHANCE: Remove a second lesser restorable condition.

BOOST: Heal an additional **b**

Tier	Champion	Hero	Immortal	Myth
H	6	8	10	12
h	3	4	5	6
b	3	4	5	6

Heal Self

As a minor action, this creature may heal itself **H** hp and become **SHIELDED**. Excess healing becomes temporary hp.

ENHANCE: Also **TELEPORT** 3 hexes in any **DIRECTION**.

BOOST: Heal an additional **b**

Tier	Champion	Hero	Immortal	Myth
H	6	8	10	12
h	3	4	5	6
b	3	4	5	6

Intimidate

As a minor action, this creature may cause a single enemy within 12 hexes to be **WEAKENED W** and **[[FEAR]] SLOW 4**. A defense roll stops the effect.

ENHANCE: There is no defense roll.

BOOST: **WEAKEN** an additional **w**

Tier	Champion	Hero	Immortal	Myth
W	6	8	10	12
w	3	4	5	6

Other Minor**Hasten**

As a minor action, this creature may gain a haste token. If it has a haste token, it may take a major action by spending a minor action and discarding its haste token.

ENHANCE: **DASH** 3 on use.

BOOST: The major will get a **BOOST**

Refresh

As a minor action, this creature may gain a **REFRESH**. A mook must spend 2 minor actions in a row to gain a **REFRESH**.

ENHANCE: remove a lesser restorable condition on use.

BOOST: Also become **ON GUARD**

Rest

As a minor action, this creature may gain a **BOOST**, heal **H** and raise their target priority for 1 round. Violating this gives the attacker 2 **PENALTIES** on their attack. Mooks don't gain a **BOOST**.

BOOST: Heal an additional **H**

Tier	Champion	Hero	Immortal	Myth
H	3	4	5	6

Unique Minor**Massive**

This creature does not take minor actions. It gains **H** hp instead. If granted a minor action, it takes a **SURGE** instead.

ENHANCE: Give this creature an immunity from the Immunity tactical ability.

Tier	Champion	Hero	Immortal	Myth
H	24	32	40	48
h	12	16	20	24

Minor Track

This creature does not gain any minor abilities. Instead, it may select a minor **TRACK**.

Secondary Minor Abilities

Offense				
Breathe Weapon	Depletion	Destructive Aura	Doom Aura	Line Weapon
Defense				
Block	Protective Tackle	Tumble	Web	

Offensive Minor

Breathe Weapon

This creature may spend 2 minor actions in a row to create a 6 hex cone that deals **D** damage and chilled to each target. A successful defense roll halves the damage and negates the effect. **ENHANCED:** The defense roll does not negate the chilled.

BOOST: Increase the damage by **B** for all targets or **S** for one target

Tier	Champion	Hero	Immortal	Myth
D	14	18	23	28
d	9	12	15	18
B	3	3	4	5
S	4	5	6	8

Depletion

As a minor action, make a creature within 12 hexes **DEPLETED**. They must make a defense roll or be **DISABLED**. Mooks have a 50% **DODGE CHANCE** on this attack.

ENHANCE: inflicts **DISABLED 2**

BOOST: Also inflict a **PENALTY**.

Destructive Aura

As a minor action, this creature may deal **D** damage to all enemies within 2 hexes. A successful defense roll halves the damage.

ENHANCE: Inflicts **OFF BALANCE** on a failed defense roll.

BOOST: Increase the damage by **B** for all targets or **S** for one target

Tier	Champion	Hero	Immortal	Myth
D	9	12	15	18
d	6	8	10	13
B	3	3	4	5
S	4	5	6	8

Doom Aura

As a minor action, this creature may deal **D** damage to all other creatures within 3 hexes. A successful defense roll halves the damage.

ENHANCE: **BURNING** on a failed defense roll.

BOOST: Increase the damage by **B** for all targets or **S** for one target

Tier	Champion	Hero	Immortal	Myth
D	9	12	15	18
d	6	8	10	13
B	3	3	4	5
S	4	5	6	8

Line Weapon

This creature may spend 2 minor actions in a row to create a 24 hex line that deals **D** damage and **SHOCKED** to each target. A successful defense roll halves the damage and negates the **SHOCKED**.

ENHANCE: The defense roll does not negate the **SHOCKED**.

BOOST: Increase the damage by **B** for all targets or **S** for one target

Tier	Champion	Hero	Immortal	Myth
D	14	18	23	28
d	9	12	15	18
B	3	3	4	5
S	4	5	6	8

Defensive Minor

Block

As an immediate minor action, this creature may make a **STRIKE** reduce incoming damage by **D**. If this reduces the damage below 0, the excess is dealt as damage to the attacker without triggering a **COUNTER**. Attacker is knocked **PRONE** on a hit. You may prime any number of minor actions.

ENHANCE: The **PRONE** triggers even on a miss.

BOOST: Reduce the damage by an additional **B**.

Tier	Champion	Hero	Immortal	Myth
D	10	13	17	20
d	5	7	8	10
B	5	7	8	10

Protective Tackle

As an immediate minor action, when an enemy attacks an ally within 3 hexes of you, you may **DASH** into their hex and **STRIKE** the attacker for **D** damage. Your ally is **FORCED** one hex, in a **DIRECTION** of your choosing and the attack now targets you.

ENHANCE: You may also use this ability if the attacker is within 3 hexes of you. You **FORCE** them, instead of your ally, 1 hex, but you still become the new target of their attack and you may not take a **REACTION** as a result of their attack unless you would have been able to before using this ability.

BOOST: +4 to hit.

Tier	Champion	Hero	Immortal	Myth
D	15	20	25	30
d	10	13	17	20

Tumble

As an immediate minor action, this creature has a **M** % DODGE CHANCE against an attack. They DASH 3 hexes and are not hit. If the attack is [O]verwhelming, they have a **O** % chance of negating the attack. This creature can store any number of prepped minor actions.

ENHANCE: DASH 3 hexes on a successful DODGE.

BOOST: The attacker receives a PENALTY.

Tier	Champion	Hero	Immortal	Myth
M	100	100	100	100
m	50	50	50	50
O	50	50	50	50

w	2	2	3	3

Innate Abilities

Offense				
Auto-destroyer	Death Throes	Eldritch Body	Explosive	Hunter
Rage	Retributive	Vengeful		
Defense				
Dodger	Iron Skin	Meatwall	Regenerator	Shielded
Other				
Unique				
Innate Track	Purely Karmic	Splitting	Swarm Form	

Offensive Innate

Auto-destroyer

4 times per encounter, this creature may improve its major action. If this action is not [S]pecial, it targets every creature in a 2 hex radius, except for itself. If this is a melee attack, it only effects enemies. If its [S]pecial, it may use the major action twice, each with a PENALTY, targeting a different target each time. If this creature is dropped, it generates 2 Karma for each unused use.

REFRESH: Gain an additional use per encounter.

DEplete: Lose a use per encounter. This creature is FULLY DEPLETED if it has no uses per encounter. Mooks: Mooks cannot have this ability

Death Throes

Once per encounter, when this creature is WOUNDED, it may take a turn before becoming WOUNDED. It gets 2 BOOSTS when it uses this ability. A mook only gains 1 BOOST. If it has more than 0 hp at the end of its turn, it is not WOUNDED.

REFRESH: This creature may take an additional SURGE when they would next become WOUNDED, even if this ability has triggered.

DEplete: This creature is always FULLY DEPLETED.

Eldritch Body

The first time each round a creature has LINE OF SIGHT to this creature, they take **D** [MENTAL] damage that ignores COUNTERS, are SLOWED 1, and gain an eldritch shard from this creature. A successful defense roll negates the SLOW. A creature with 4 shards from the same source is immune to this ability from that source, unless the source is a mook, in which case only 2 shards are necessary.

When this creature dies, it unleashes a psychic lash, dealing **E** damage that ignores COUNTERS to all creatures within 24 hexes. Each eldritch shard a creature has from this target reduces the damage by **D**.

REFRESH: It takes an additional shard to be immune to this ability, and the the damage taken when it dies is increased by **D**.

DEplete: It takes 1 fewer shard to be immune to this ability, and the damage taken when it dies is decreased by **D**. This creature is FULLY DEPLETED if it takes no shards to be immune to it.

Tier	Champion	Hero	Immortal	Myth
D	2	2	3	3
E	6	8	10	12
e	12	16	20	24

Explosive

When this creature is WOUNDED, it explodes, killing the creature and dealing **D** damage to each creature adjacent to it. Creatures with this ability are immune to this damage. Additionally, that creature's hex and all adjacent hexes become difficult terrain. If no creature is damaged by this explosion, it generates 8 karma. If this creature was a mook, it generates gain 4 karma instead.

BOOST: This creature may spend any remaining BOOSTS to increase this damage by **R** for every 2 BOOSTS they have.

REFRESH: The damage when this creature explodes increases by **R**. If no creatures is damaged by the resultant explosion, increase the karma generated by 2.

DEplete: The damage taken when this creature explodes is reduced by **R**. If no creature is damaged by the resultant explosion, decrease the karma generated by 2. If this creature would deal no damage when it explodes, it is FULLY DEPLETED.

Tier	Champion	Hero	Immortal	Myth
D	24	32	40	48
d	12	16	20	24
R	6	8	10	12

Hunter

This creature has **M** marks. Each round, this creature may place a mark on a target, making them VULNERABLE **V**, and allowing this creature to ignore target priority against that creature. If this creature is dropped while it still has marks, it generates 2 karma per mark.

REFRESH: This creature gains an additional mark.

DEplete: This creature loses a mark. It is FULLY DEPLETED if it has no marks.

Tier	Champion	Hero	Immortal	Myth
M	4	4	4	4
m	2	2	2	2
V	6	8	10	12

Rage

R times per encounter, no more than once each round, this creature may become **ENERGIZED E**. This can only be discharged against creatures who attacked them in the last round. For each time this has not been used it generates 2 karma when dropped.

REFRESH: This creature may use this an additional time this encounter.

DEplete: The creature may use this one fewer time this encounter. It is **FULLY DEPLETED** if it has no more uses.

Tier	Champion	Hero	Immortal	Myth
R	4	4	4	4
r	2	2	2	2
E	6	8	10	12

Retributive

This creature has 4 retributive charges. The first time each round this creature is hit within melee range, it may spend a retributive charge to deal **D** damage to their attacker. If they are dropped while they still have retributive charges, they generate 2 karma per charge (1 for mooks).

REFRESH: This creature gains an additional retributive charge. A mook gains 2.

DEplete: This creature loses a retributive charge. A mook loses 2. It is **FULLY DEPLETED** if it has no retributive charges.

Tier	Champion	Hero	Immortal	Myth
D	6	8	10	12
d	3	4	5	6

Vengeful

This creature has 4 Vengeance charges (2 for mooks). If one of its allies is dropped, it may spend a Vengeance charge to either be **ENERGIZED E** or gain 2 **BOOSTS**. If all of its allies is dropped, it may spend all of its Vengeance charges. If it has remaining Vengeance charges when it drops, it generates 2 karma per charge.

REFRESH: This creature gains an additional Vengeance charge.

DEplete: This creature loses a Vengeance charge. It is **FULLY DEPLETED** if it has no vengeance charges.

Tier	Champion	Hero	Immortal	Myth
E	6	8	10	12

Defensive Innate**Dodger**

This creature has **D** DODGE tokens. They may spend 1 to negate an attack against them. If the attack is [O]verwhelming, it requires 2.

REFRESH: Gain a DODGE token.

DEplete: Lose a DODGE token. This creature is **FULLY DEPLETED** if they have no DODGE tokens

Tier	Champion	Hero	Immortal	Myth
D	4	4	4	4
d	2	2	2	2

Iron Skin

This creature has **D** RESISTANCE.

REFRESH: Gain **R** RESISTANCE.

DEplete: Lose **R** RESISTANCE. This creature is **FULLY DEPLETED** if they have less than **R** RESISTANCE.

Tier	Champion	Hero	Immortal	Myth
D	24	32	40	48
d	12	16	20	24
R	6	8	10	12

Meatwall

This creature has an extra **H** hp.

REFRESH: Gain **R** temporary HIT POINTS.

DEplete: Lose **R** temporary HIT POINTS or HIT POINTS. This creature is **FULLY DEPLETED** if it has no temporary HIT POINTS and less than its base hp before this ability.

Tier	Champion	Hero	Immortal	Myth
H	24	32	40	48
h	12	16	20	24
R	6	8	10	12

Regenerator

While injured more than **H**, this creature heals **H** hp at the beginning of their turn, with any excess becoming temporary hp. Each additional time it triggers, it heals half as much as the previous time. This healing applies even if this creature is **WOUNDED**, and the creature will cease to be **WOUNDED** if this brings it above 0 hp.

REFRESH: Increase the healing by **R**. This increases the healing on subsequent rounds as if this was the normal value healed

DEplete: Reduce the healing by **R**, decreasing the healing on subsequent rounds as if this was the normal value healed. This creature is **FULLY DEPLETED** if it would heal less than **R**.

Tier	Champion	Hero	Immortal	Myth
H	12	16	20	24
h	6	8	10	12
R	3	4	5	6

Shielded

This creatures starts combat with **H** Bhp.

REFRESH: They gain **R** barrier HIT POINTS.

DEplete: Lose **R** barrier HIT POINTS. This creature is **FULLY DEPLETED** if it has less than **R** barrier HIT POINTS.

Tier	Champion	Hero	Immortal	Myth
H	24	32	40	48

R	6	8	10	12

Unique Innate**Innate Track**

This creature does not gain any innate or **COUNTER** abilities. Instead, it may select an innate **TRACK**.

Purely Karmic

This creature generates **K** karma the first time it is dropped. If created with ReinFORCEment, it can be created for **K** less, but will not generate karma when dropped.

REFRESH: Generate an additional 2 karma when dropped.

DEplete: Generate 2 less karma when dropped. This creature is FULLY DEPLETED when it will generate less than 2 karma when dropped.

Tier	Champion	Hero	Immortal	Myth
K	8	8	8	8
k	4	4	4	4

Splitting

When WOUNDED, this creature is replaced by 2 mooks of its level with half hp. They have no innate ability.

REFRESH: The resulting mooks will start with a BOOST each.

DEplete: The resulting mooks will start with a PENALTY each. This creature is FULLY DEPLETED if the mooks will start with 4 PENALTIES each.

Special: Mooks cannot take this ability

Swarm Form

This creature has an extra **H** hp. They take double damage and ONGOING from aoes.

REFRESH: Gain **R** temporary HIT POINTS.

DEplete: Lose **R** temporary HIT POINTS or HIT POINTS. It is FULLY DEPLETED if it has less HIT POINTS than its base hp

Tactical

Adaptable

Once per round, this creature can either raise or lower its target priority by 1. Once per round, this creature can take a SURGE against anyone who attacks an ally with a lower target priority than then, and they have a 50% DODGE CHANCE against the first person who attacks them each round if there is a higher priority target available.

Blinker

This creature can TELEPORT by spending 1 STEP for each hex TELEPORTED.

Burrowing

This creature can burrow.

Center of Attention [Mental]

This creature's target priority raises at the beginning of its turn. Allies with a lower target priority than it may not be targeted.

Disguised

This creature starts combat with STEALTH 0.

Enhanced Abilities

Two of this creature's monster abilities are ENHANCED

Entangling [Slow]

Enemies within 3 hexes must spend an additional STEP to move away from this creature.

Fearsome [Fear Slow]

Enemies within 3 hexes of this creature must spend an additional STEP to move towards it.

Fire Trail

When this creature leaves a hex, that hex becomes afflicted for 1 round. The first time each round a creature enters a hex afflicted this way, it begins BURNING C.

Flier

This creature can fly.

Forgettable [Mental]

This creature may lower its target priority once per round for one round. It cannot be attacked if there is a higher priority target.

Frosty

This creature can spend a STEP to make 2 hexes within 6 hexes into fast terrain. They can use one STEP to move over three fast terrain hexes.

Greater Charge

This creature can charge twice as far, and ignores difficult terrain while charging, and can charge through destructible terrain that has less hp than their charge damage.

Greater Telekinesis

Once per round per target, this creature can FORCE a creature within 12 hexes other than itself one hex by spending one STEP. They may also spend a STEP to move a destructible obstacle within 12 hexes to another hex within 4 hexes of its previous location.

Hoverer

This creature may hover, and has 3 additional speed.

Huge

This creature occupies 7 hexes, is 3 hexes tall, and has 2 additional hexes of reach. It is immune to FORCED movement that doesn't originate from a huge creature. **Special:** This creature must already be large.

Ice Trail

When this creature leaves a hex, that hex becomes afflicted for 1 round. The first time each round a creature enters a hex afflicted this way, it becomes FROZEN.

Immunities

This creature is immune to 1 condition from the following list:

- [SENSELESS]
- [FEAR]
- [SICKENING]
- [MENTAL]

or 2 conditions from the following list:

- SLOW
- STOPPED
- PRONE
- DIZZY
- GRAPPLED
- BLIND
- BLEEDING
- FORCED movement
- STUNNED
- an ENERGY EFFECT

Incorporeal

This creature can PHASE.

Invisible

This creature is INVISIBLE 3. This does not end if they attack so long as all of the target creatures are within the invisibility radius.

Jumper

This creature has +3 speed, and may jump 3 high with no action cost when it is on a solid surface.

Large

This creature occupies 3 hexes, is 2 hexes tall and has an additional hex of reach.

Living Nightmare [Fear]

This creature's target priority raises at the beginning of its turn. Allies with a lower target priority than it may not be targeted.

Nimble

This creature never provokes REACTIONS from moving.

Opportunist

This creature may raise its target priority once per round for 1 round. If an ally with a lower target priority is attacked, it may take a SURGE against the attacker.

Poison Trail [Sickening]

When this creature leaves a hex, that hex becomes afflicted for 1 round. The first time each round a creature enters a hex afflicted this way, it gains O ONGOING damage.

Tier	Champion	Hero	Immortal	Myth
O	5	6	8	9

Pushy

When this creature moves adjacent to an enemy, it may move them 1 hex. A creature cannot be moved more than one hex each turn from this effect. This creature does not provoke REACTIONS for moving from creatures it uses this on. This creature also has +3 speed.

Scanner

This creature has SCANNER 12, can act in surprise rounds, and is immune to BLIND.

Seductive [Slow Mental]

Enemies within 9 hexes must spend an additional STEP to move away from this creature.

Seeker

This creature may ignore target priority when attacking.

Shocking Trail

When this creature leaves a hex, that hex becomes afflicted for 1 round. The first time each round a creature enters a hex afflicted this way, it becomes SHOCKED.

Speedy

This creature has +6 speed.

Stench [Sickening]

Creatures within 3 hexes of this creature without this ability are DIZZY 1 for 1 round.

Vanisher

Once per encounter, after being attacked and while under 50% hp, this creature may gain STEALTH 0 and restore all of its lesser restorable conditions. Their target priority is lowered until their next turn and cannot be broken.

Wall Walker

This creature has +3 speed and may walk on walls and ceilings.

Special Tactical Abilities

These abilities are not part of the normal tactical ability list, but a monster can pick one of these in place of a tactical ability.

Charging turret

This creature cannot move or be moved, and cannot be a SITTING DUCK, but all of its ranged abilities can attack at range 30, and it has +1 melee range. It's hex is immune to afflicted. It may reactivate at the beginning of its turn. It may use a primed major action when it uses its major action to take a second major action, and a primed minor action when it uses its minor action to take a second minor action.

Clamshell turret

This creature cannot move or be moved, and cannot be a SITTING DUCK, but all of its ranged abilities can attack at range 30, and it has +1 melee range. It's hex is immune to afflicted. If it has no targets in range on its turn, it may shut down, becoming untargetable. It may reactivate at the beginning of its turn.

Feature Complete

This creature gains 2 additional features.

Melee Monster

This creature can only attack within its melee range, but gains 2 other tactical abilities and has an EDGE against attacks from outside its melee range.

Mindless

This creature must always target the nearest enemy it can without violating target priority, and gains an EDGE on its attacks when doing so. It is immune to [FEAR] and [MENTAL].

Pack Hunter

This creature gains an EDGE when it attacks if it is adjacent to another creature with this ability.

Shield Wall

This creature gains an EDGE against attacks if it is adjacent to another creature with this ability.

Extras

Sometimes you want more bodies in a battle, but you don't want to overwhelm the party. This is where Extras come in. Extras represent creatures which are trying to fight, but aren't actually a real threat to the pcs on their own. What this means will vary based on setting and context.

Extras take up hexes, and block movement. Extras can either be melee or ranged. Melee extras can flank and grant flanking, ranged extras can target a hex within 6 hexes.

If an extra has an **EDGE**, or is granted a **BOOST**, they may make an attack for $4 \times C$ damage on a hit, with a -2 modifier to hit. They typically will get an **EDGE** from attacking a flanked target or a **SITTING DUCK**. Only one ranged extra can attack each **SITTING DUCK** per round. A dodge counter has a 50% chance to dodge an extra's attack, and any other form of dodge automatically dodges.

They will be killed by damage from attacks and AoEs, and you can spend a **STEP** to kill an extra within your melee range. They are too weak to earn **BLOODLUST** from killing them, except as described below. If they are subjected to a greater condition, or are given a **PENALTY** or **OFF GUARD**, they are neutralized, and are effectively wounded. They don't change the general initiative order and aren't selected as char-

acters to go next by their allies. They are sprinkled in throughout the initiative order, going in between normal characters in an evenly distributed manner.

You can give Extras a movement enhancing monster tactical ability (pg. 160) if appropriate.

Extras will either flee or be easily mopped up if the actual enemies in the encounter are **WOUNDED** or killed.

If you target a number of Extras with an ability, roll the accuracy for this ability as normal, then subtract C from the damage. This is the base **BLOODLUST** for the attack. You gain this much **BLOODLUST** for the action per Extra you target, max is either the number of **STRIKES** or 2 for AoEs, minus the number of non-Extra targets you hit. The Extras are hit by the ability regardless of this accuracy roll.

For instance, Jill throws out a fireball that hits 3 Extras and a normal enemy. It does 9 damage base with a C of 3. The ability is half on a successful save, so a save is rolled for the Extras. They succeed, so it has $5 - 3 = 2$ base **BLOODLUST**. She hits 3 Extras, so she counts the maximum 2 hit, then subtracts 1 for the normal enemy. This gives her 1 Extra worth of **BLOODLUST**, for a total of 2 **BLOODLUST**, and all 3 Extras are killed.

Extras are never considered to have a higher target priority than non-Extras and may be killed with **STEPS** regardless of target priority.

Chapter 17

Bosses

Bosses are climatic encounters with foes of unmatched power. They are typically more than just a monster of a higher level, and function as a singular opponent that is a worthy challenge in and of itself.

We have several ways to create bosses with different feels to them. Like any other monster, you can customize the exact abilities they have to create exactly what you want.

General

Most bosses have some form of boss resistance. This is an ability to shrug off tactical effects and power through hindrances.

If using power level to build the encounter, the boss's encounter should generally be 100% of the party's power level.

Progressive Boss

Progressive bosses start out immensely powerful, acting quickly to present a full body of offensive and defensive powers, but are worn down over the course of the battle.

A progressive boss has a max boss level M . M is an adjustable value that represents the number of normal monsters of a given tier that the boss can stand in for. Higher values will allow a boss to face a party on its own, while lower values or a lower tier will leave space for other monsters to fill out the encounter.

It has a current boss level N , which starts at M . It gets $16 \times C \times M$ HIT POINTS, and has M major abilities and M minor abilities. A progressive boss takes N turns a round, spaced as if they were the actions of N different monsters.

It also has a number of damage thresholds; Each one starts $16 \times C$ from the previous threshold. Taking damage that brings it below one of these thresholds weakens it. Whenever it crosses one of these thresholds, its N drops by 1. It also starts with a single innate ability, and each time it crosses one of these thresholds it gains a new one. It may trigger any effect that would function when WOUNDED when it crosses these thresholds. If the innate ability grants extra HIT POINTS, it instead grants TEMPORARY HIT POINTS.

It has one tactical ability per tier, plus $N/2$. It also has a [C]ounter ability. If the boss is level 14, it has N capstone abilities. A progressive boss has a PL $M \times$ as much as a normal creature of its level.

Boss resistance: When hit by a FORCED movement effect or a lesser condition, the boss may roll a $d20 + N$. If that is 10 or greater, it ignores the effect.

Multipart Boss

Multi-part bosses consist of several components working together. Every component represents a clear part of the creature. These can be limbs and appendages, weak points, items, modules, or some over division of the monster which would give it abilities. Players can work on targeting these components to weaken the monster, stripping it of its abilities before they go in for the kill.

Which parts are targetable should be clear to the players. One of these components should be the body, or other foundational component. The body is highly recommended to have offense of its own, so if all other components are killed it is still a threat. Each part has a major, minor, innate, and [C]ounter ability, and tactical abilities according to its tier, and has stats according to a creature of its level.

Sum up the HIT POINTS of every component, including the body. This becomes the body's HIT POINTS. The other components are BONDED to the body.

Each component has its own turn in the initiative order, but only the first component each round generates STEPS, which persist for the rest of the round if unused. Other parts may add to the STEP pool for the body to use if they have abilities to gain STEPS, or move it with special abilities, including charge. They may also spend unused STEPS from the round. Effects that target multiple components can only target 2 components at once. The first of those components is the body. The second is a body part of the boss's choice. However, the next time it is affected by an ability that targets multiple components, it must use the same body part, unless that body part is WOUNDED.

BARRIER HIT POINTS from different parts of the boss add together and form a single pool. TEMPORARY HIT POINTS from different parts of the boss similarly add together. Abilities that allow the a part to

move will move the entire boss, and abilities that mitigate or reduce attacks can be activated by any part of the boss when another part is attacked.

Each tactical ability from the parts is shared by the whole. When part is destroyed, the whole loses that tactical ability.

Any ability that only affects self can affect any other part of the boss instead.

A Multipart boss has a total PL equal to the sum of the PL of its parts.

Boss resistance: When hit by a forced movement effect, a lesser condition that effects the entire creature, the boss may roll d20+ its current number of parts. If that is 10 or greater, it ignores the effect.

Multibody Multipart Bosses

You can make a multipart boss that has some or all of its parts independent of the main body. This can be used for extra large bosses where the different parts can move around the battlefield into different positions. All of the parts are permanently TETHERED to each other, or the body, as makes sense for the boss, and cannot be moved past that distance, even with TELEPORT effects. The body of the boss is always considered larger than the components for the purpose of this tether. Independent parts do get STEPS on their turn and can move freely withing their tethered range. If a multi-target effect does not target the body, it can target 2 independent components.

Example multipart bosses

Dragon part suggestions:

Body: Double Strike/ Blaster/ Healer/ Meat wall/ Outta my way

Wings: Flurry/ Slow quarry/ Fleet/ Death throes/ Flier

Maw: Vampiric/ Swallow whole/ Breath weapon/ Regenerative/ Scanner

Legs: Tripper/ Terrain fling/ Fleet/ Meat wall/ Speedy

Armored Plating: Trampler/ Restoration/ Ablative/ Shielded/ Fear

Tail: Whirlwind/ Instill fear/ Slash/ Death throes/ Immune to PRONE, DIZZY

Hydra:

Body: Flurry(claws or biting with many double split heads)/ Restoration(self)/ Massive/ Regeneration

Head(add as many as you need): Slug(bite)/ Evoker(cone)/ dodger/ Splitter

Split head(starts with none): Slug(bite)/ Evoker(cone)/ Slash

double split heads(starts with none): Acts as an extra

Heads will regrow from regeneration, and when that fails split into 2 heads. The splits are not actually BONDED to the body. When a slit head is destroyed, create two double split heads, which in turn will spawn two new ones if destroyed. The heads can be made independant of the body to give more of a serpent neck effect.

Terrain Based bosses

Terrain based bosses are in an environment where the terrain is key to defeating them. They may have a force field protecting them that needs to be dropped, or energy crystals are empowering them. In any case, there are structures in the environment that it would be prudent to destroy before the boss itself.

Build the base boss as you would any other type of monster, but leave extra PL for the pylons. Its boss resistance counts each undestroyed pylon as a part of itself or towards its *N*.

Then create the environmental pylons. They have the HIT POINTS of a monster of their level, but don't typically have STEPS. A mook version of a pylon can be made as well.

Each pylon has one of the following major abilities. They target the boss, regardless of LINE OF EFFECT:

- Restoration
- Shielding
- Toughening
- Empowering

And a minor ability, which also effects the boss, regardless of LINE OF EFFECT:

- Heal
- Bubble
- Ablate
- Refresh

And a innate ability:

- Shielded
- Meatwall

For each one, increase the boss's HIT POINTS by the their combined HIT POINTS and BARRIER HIT POINTS, and make them BONDED to the boss.

Multi-encounter Boss

Multi-encounter bosses are so extreme that they take up multiple encounters. Each encounter is its own boss, using one of the other templates, and once that boss is defeated, there is enough time before the next phase kicks in for people to stand back up, recover, reset encounter abilities, etc. The arena may be changed between encounters, through whatever means is thematically appropriate. Maybe the party chases the monster to the next area, maybe its transformation draws them into a psychotic dream realm, maybe the transformation is so destructive that it reshapes the arena, get creative.

Another implementation is to give each phase a time limit, and a failure to defeat the boss within that time limit will trigger the transformation to the next phase. This can be used for things like the villain summoning a horrible monster; defeat them in time and you stop the summon, fail and your task just got harder.

Multi-encounter bosses should not be used lightly, are generally only suitable for the final boss, or other

suitably key and epic points in the narrative.

Part V

Track listings

Aeromancy

Major Offensive

You control the winds, and wield them to toss your enemies around like ragdolls.

Aaron eyed the samurai as they approached. Spotting them draw their blade, Aaron sent a blade of air forward, slashing through the samurai's armor and sending them tumbling back. With a moment of focus, he gathered the winds around him, sweeping himself high into the air. The samurai drew a bow and loosed an arrow that struck true in Aaron's shoulder, who let out a shout of gale force winds that knocked the samurai flat on their butt.

Adaptation

This can be used to represent telekinetic barrages or mastery over currents in a underwater setting.

First Facet★

Gust [RmO]: *Blow them away with your magic.*

As a major action, deal $6 \times C + 1$ damage to a creature within 24 hexes. If this is used on your turn, you can FORCE them 2 hexes in any direction. A successful defense roll halves the damage and distance moved. **Boost:** Deal C extra damage, regardless of whether they succeed on their defense roll.

Surge: As a SURGE, you may deal $4 \times C - 1$ damage to a creature within 24 hexes. If used on your turn, you can FORCE them 1 hex in any direction. A successful defense roll halves the damage and negates the movement. **Boost:** Deal C extra damage, regardless of whether they succeed on their defense roll.

Second Facet★

Windblast [RHS]: *With all the force of a great typhoon!*

As a major action, you can create a length 6 cone or a length 24 line. Creatures within the area take $Cd6$ damage and are knocked PRONE. A successful defense roll prevents the PRONE. **Boost:** Deal $2|1d4|1d6|4$ extra damage to each creature, or C additional damage to one creature.

Third Facet★

Gale [HS]: *Your personal space is strictly enforced.*

As a major action, you may deal $Cd6$ damage to all creatures within 3 hexes and FORCE them 2 hexes away from you. Until the beginning of your next turn, creatures must spend an additional STEP to move towards you while within 3 hexes of you. **Boost:** Deal an extra $2|1d4|1d6|4$ damage to each affected creature, or C damage to one affected creature.

Fourth Facet★

Barrage [O]: *Wind can move more than just people.*

As a major action, make C STRIKES at -1 accuracy that deal 9 damage each. For every STRIKE that misses, you may cause an unoccupied hex within 3 hexes of the target to become difficult terrain. **Boost:** Increase the damage by 2.

Fifth Facet

Wind Walk [O]: *Take to the skies and gather your strength.*

As a major action, gain a PERSISTENT —| —|7|8 energized and flight for 3 rounds. **Boost:** Increase the PERSISTENT ENERGIZED by 2

Sixth Facet★

Asphyxiate[RmO]: *This display of magic will take their breath away - literally.*

As a major action, deal $Cd6$ damage and 2 CORRUPTION to a creature within 24 hexes, and cause them to become SLOW 2 for 2 rounds. A successful defense roll halves the damage, and SLOW . **Boost:** Increase the damage by $4|5|6|8$.

Seventh Facet★

Summon Twister[RH]:*Any alley can be Tornado Alley.*

Once per encounter as a major action, you can create a twister in a hex in range 12 which lasts for 3 rounds. The twister affects a column in radius 2 and height 12. Creatures and objects within the area at any point take $2 \times C + 1$ damage and are FORCED 3 hexes in a random direction. If a creature would end this movement within the area of the twister, it moves an additional 3 hexes. On your turn, you may move the twister 12 hexes. **Boost:** The twister lasts an additional round.

Assassin

Major Offensive

You are the blade in the dark. You are a competent warrior, let nobody mistake that, but you specialize in finishing off defenseless targets.

Shiela clutched her dagger in her hand, looking for the perfect opening. In a moment, she saw it. The orc turned to face Lancelot, and she darted in behind him, slipping the dagger into a chink of his armor. He let out a surprised gasp and collapsed to the ground. The other orcs looked at her in shock, as she planted her next dagger in one of their necks.

Adaptation

This can represent an assassin with a dagger or a master marksman.

First Facet★

Flurry of Stabs [WO]: *Your attacks are fast and furious.*

As a major action, make 4 STRIKES at +1 to hit that deal $2 \times C$ damage. **Boost:** Receive a +2 modifier to hit.

Sneak Attack [WO]: *You faultlessly strike a vulnerable target.*

As a major action, deal $5 \times C$ damage and BLEEDING C to a susceptible target. A target is susceptible if they are effected by a [SENSELESS] or [FEAR] effect, are OFF BALANCE, GRAPPLED by someone other than you, do not have LINE OF SIGHT to you, or if you have an EDGE against them. **Boost:** Deal another C damage.

Feint: *Some fancy bladework can create all of the opening you need.*

At the beginning of your turn, you may have an enemy within 6 hexes of you become off balance or [FEAR] SLOWED 1 for 1 round. A defensive roll negates this effect. The defense roll gets a -1 modifier for every even facet of this TRACK.

SURGE[W]: As a SURGE, you may make 2 STRIKES with a +1 to hit that deal 7|9|12|14 damage **Boost:** +4 to hit.

Second Facet★

Light Feet: *Jack be nimble, jack be quick.*

You are no longer affected by difficult terrain, and you may take REACTIONS and immediate actions while you are OFF BALANCE.

Swift Movement: Increase your speed by 2.

Third Facet★

Assassin's Mark: *Once you strike, you are adept at maintaining your assault.*

When you successfully use Sneak Attack against a creature, you may treat that creature as OFF BALANCE for one turn for the purpose of using Sneak Attack, and can ignore target priority to target them for that turn.

Fourth Facet★

Eye Stabs: *Your precise strikes can target a creature's eyes.*

When you successfully use Sneak Attack or Flurry of Stabs against a creature, you may inflict BLIND 3 on that enemy for 2 rounds. A defense roll negates this effect.

Fifth Facet★

Night Terror [O] [FEAR]: *The aftermath of your wrath is deeply unsettling.*

Whenever an enemy you have damaged this encounter with an ability from this track becomes WOUNDED, each enemy within 3 hexes of them becomes SLOW 2 for 1 round.

Weapon Mastery: *The right tool for the right job.* You do not provoke REACTIONS when you swap weapons.

Sixth Facet★

Weak Point: *You know the worst places to stab people.*

When you hit an enemy with sneak attack, they are DISABLED.

Seventh Facet★

Assassination Stalking: *Proper preparation is the key to a clean kill.*

As a major action, choose an enemy who does not have LINE OF SIGHT to you. At the beginning of your turn, that enemy becomes vulnerable 24 to the next Sneak Attack you make against them. **Boost:** Increase the VULNERABILITY by 6.

Master of Assassination: *You have transcended the need for silly things like "openings".*

You can use Sneak Attack on any enemy, even if they wouldn't be susceptible.

Blighter

Major Offensive

Blighters are wielders of poison magic, inflicting spells that damage their opponents over time.

Francis stared at the old man, hunched over and decrepit, oozing with sores. "He's harmless, bring him in," he commanded, and his men rushed forward. The man hacked out a cough, and a green cloud swept forward, first bringing his men, then Francis himself down coughing. His skin and lungs burned in agony. "Blighter!" he shouted between coughs. "Retreat!"

Adaptation

This TRACK can represent diseases and curses with minimal modification. It could also be used to represent a character that throws grenades or vials of poison.

First Facet ★

Basic Bacteria [RmO]: *A dash of poison.*

As a major action, you may deal 11|15|19|22 ONGOING damage to an enemy within 12 hexes. A successful defense roll halves the ONGOING damage. **Boost:** Increase the ONGOING damage by 2|3|4|5 extra damage, regardless of whether they succeed on their defense roll.

Subtle Sickness: *A modicum of disease.*

Whenever an opponent fails a defensive roll against an ability from this TRACK, choose one of the following:

- **Lethargy:** The enemy becomes SLOWED 1 for 1 round
- **Ignorance:** The enemy becomes OFF BALANCE
- **Blurred:** The enemy becomes BLIND 6 for 1 round
- **Stench:** The enemy's target priority is reduced by 1 for 1 round

Alchemist's Antibody: *Your long exposure to your own compounds has allowed you to build up a resistance.*

You are immune to the damage and statuses you inflict through this track.

Surge: As a SURGE, you may deal 6|8|9|11 ONGOING damage to an enemy within 12 hexes. A successful defense roll halves the ONGOING damage. **Boost:** Increase the ONGOING by 3|4|5|6.

Second Facet ★

Contagion Cloud [R]: *You create a billowing green cloud that corrodes everyone within.*

As a major action, you can create a cloud of poison, centered on a hex within 12 hexes. Each creature within 3 hexes of the center takes 8|10|13|15 ONGOING damage for 3 rounds. A successful defense roll halves the ONGOING damage. This doesn't provoke REACTIONS if you center it on your own hex. **Boost:** Increase the amount of ONGOING damage dealt to one enemy by 3|4|5|6.

Third Facet ★

Incurable Infection: *You have a particularly nasty poison that resists attempts to heal it.*

Once per round, when you affect an enemy with Basic Bacteria or Contagion Cloud, you may choose to reduce the ONGOING they take by C (after their defense roll). If you do, that enemy becomes CORRUPTED 2. You may use this twice if you deal enough ONGOING. Additionally when you affect a target with CORRUPTION this way, the next time the target would be healed, it becomes DIZZY 2 for one round. When you gain the 5th facet of this TRACK, you may do this to any number of creatures when you use Contagion Cloud.

Fourth Facet ★

Corrosive Contaminations: *Your poison is acidic and eats through physical objects easily.*

Whenever a destructible item or terrain would take damage from Basic Bacteria or Contagion Cloud, you may have that obstacle take additional damage equal to twice the amount of ONGOING it would receive.

Sickening Spillage: *You produce an excess of poison that can spill on the ground.*

When you affect a creature with Basic Bacteria, the hex that creature occupies and up to three adjacent hexes becomes afflicted for one round. Whenever a creature enters a hex afflicted this way, they take C ONGOING damage.

Fifth Facet ★

Persistent Pain: *Your poison becomes even stronger.*

When you use Subtle Sickness, you may choose to have that effect become PERSISTENT for 2 rounds.

Sixth Facet ★

Deathly Decay: *A different type of poison can produce a different effect.*

Once per encounter, when you inflict ONGOING damage with your Basic Bacteria, you may instead inflict PERSISTENT WEAKEN for 2 rounds, of the same amount as the damage replaced

Seventh Facet★

Powerful Pandemic: *Your infection is now contagious.*

While a creature has any ongoing or PERSISTENT effects from Basic Bacteria or Contagion Cloud, if it ends its turn adjacent to another creature, you may have the second creature receive the same status.

Blood Knight

Major Offensive

Blood knights are practitioners of blood magic, and use it to become even more fearsome combatants. The sight of a blood knight slicing themselves for their arcane rituals sends fear down their enemies' spines.

Brady unsheathed his ceremonial dagger, then ran it up the length of his arm, cutting a deep channel than welled with blood. The oncoming paladin recoiled in horror at the display. Brady's eyes rolled back in his head as he chanted the blood rites. His eyes went bloodshot, then he rushed forward with inhuman speed, and met the paladin with a flurry of unbridled blows.

Adaptation

This can represent someone who gets angry when hurt, someone who is fueled by adrenaline, or a masochist.

First Facet★

Knightly Blow [WO]: *You have trained with weapons as part of your knightly duties.*

As a major action, make 3 STRIKES. They deal 8|11|14|17 damage each. **Boost:** deal 2|2|3|3 extra damage.

Blood Magic: *The defining trait of a blood knight is their ability to be empowered by blood.*

A blood knight has a number of drams of blood. They may spend these to achieve various effects.

Embrace the Pain[C]: *By forgoing your other defenses, you can utilize the attacks against you to harvest more blood.*

As a COUNTER, gain a dram of blood.

Blood Strike: *The most basic use of blood is to strengthen your attacks.*

You may spend a dram of blood to gain a BOOST.

Self Mutilation: *By undergoing a horrific procedure, you can harvest a large amount of blood from yourself.*

As a major action, you may deal $4 \times C$ damage to yourself and gain 8 drams of blood. **Boost:** deal another C damage and gain 2 more drams.

Knightly Surge [W]: As a SURGE, take 2 STRIKES that deal 8|10|13|15 damage. **Boost:** Deal 3|3|4|5 extra damage.

Second Facet★

Blood Frenzy[WO]: *By using blood, you can enhance your speed, moving and attacking faster.*

As a major action, you may spend a dram of blood to make 6 STRIKES that deal 5|7|8|10 damage and gain 3 STEPS. **Boost:** +2 to hit.

Reclaim the Blood: *Sometimes, when conditions are right, the blood can be re-used.*

If you use a major action that requires drams of blood and miss due to DODGE CHANCE, you regain the required drams of blood.

Third Facet★

Friendly Sacrifice: *Though it requires a great deal of trust, you can extract blood from others.*

As a major action, you may deal $2 \times C$ damage to a willing ally within melee range, ignoring their COUNTER, and gain 6 drams of blood. **Boost:** Increase the damage by C and gain another 2 drams.

Lifeblood[RO]: *By tapping into the deeper blood magics, have learned to absorb health from your enemies.*

As a major action, you may spend 2 drams of blood to deal 13|18|22|26 damage to an opponent within 12 hexes and heal yourself an equal amount. A successful defense roll halves the damage and healing.

Boost: Increase the healing and damage by 2|3|3|4.

Fourth Facet★

Blood Draw: *Your affinity for blood allows you to cause even small wounds go bleed profusely.*

If you hit with Knightly Blow, and you used a dram of blood to enhance it, your opponent begins BLEEDING C .

Fearsome Draw: *You have learned to accentuate the gruesomeness of your blood draws to disturb others.*

When you use Self Mutilation or Friendly Sacrifice, enemies with LINE OF SIGHT to you within 6 hexes are [Fear] SLOWED 3.

Bloodied: *You can work with the blood drenching others.*

Whenever someone starts BLEEDING, they become Bloodied for the rest of the encounter.

Bloodsense: *You sense the blood.*

You have SCANNER 24 to Bloodied creatures.

Fifth Facet★

Blood Hammer[WO]: *You concentrate the blood into one deadly strike.*

As a major action, you may spend 2 drams of blood to make a STRIKE with a +3 to hit for 28|37|47|56 damage. If it hits, the target is forced 1 hex in any direction and is DIZZY 1. **Boost:** Increase the damage by 4|5|7|8.

Bleed Channeling: *If you are going to bleed, you may as well use it.*

If you take damage from BLEEDING, you gain a dram of blood.

Drawn to Blood: *You are drawn to the scent of blood.*

Once per round, you may move 2 hexes towards a Bloodied creature.

Sixth Facet ★

Bloodletting: *You can perform a more precise ritual to bleed yourself without causing as much damage.*

As a major action, you may give yourself BLEEDING *C* and 2 drams of blood a round for the next 3 rounds.

Boost: Gain another dram the first round.

Jagged Blade: *Your intimacy with blood allows you to bleed others easily.*

Any enemy you damage with a melee weapon begins BLEEDING *C*.

Seventh Facet ★

Bloodtie: *You have tapped into the full power of blood magic.*

By spending a STEP, you may WARP to a hex adjacent to a Bloodied creature.

Blood Puppet: *You utilize the most forbidden of the dark blood arts.*

You may DIRECT a creature that is Bloodied 1 hex per step spent.

Brawler

Major Offensive

Cause bodily harm to your enemies with your body, up close and personal.

Ken flexed his bulging muscles and cracked his neck, then rushed forward toward the minotaur, slamming into its solid body and grabbing it in a solid hold. They wrestled back and forth, until the minotaur head-butted Ken, causing him to loosen his grip and stagger back. Thinking quickly, Ken grabbed a ruined piece of statue from the ground and smashed it over the minotaur's head, and the minotaur stumbled back, dazed. Ken grabbed hold of the beast again, and flipped him back over his head in a suplex, smashing its head into the ground.

Adaption

This could be a form of martial arts, brawling, cybernetic enhancements, or raw animal fury.

First Facet★

One-Two [WO]: *Your fists strike like pistons.*

Your unarmed attacks count as being armed with a melee weapon. As a major action, make two STRIKES dealing $(4 \times C) + 1$. If either hit and you are in melee, the target is GRAPPLED by you. **Boost**: Gain a +2 modifier to hit.

Flying Tackle [HO]: *You can easily grab onto your opponent with a flying tackle.*

As a major action, DASH up to your speed in a straight line and STRIKE an adjacent opponent at the end of your movement with a +2 to hit. This deals 21|29|36|43 damage and you they are GRAPPLED by you if you hit. If you moved at least 3 hexes with this action, that enemy becomes PRONE if you hit, and this is a MOMENTUM ATTACK. **Boost**: You deal an additional 5|6|8|9 damage if you hit.

Jab [W]: As a SURGE, make a single STRIKE dealing $5 \times C$ damage. This counts as a single attack with One-Two. **Boost**: +4 to hit.

Second Facet★

Give 'em the Chair! [WO]: *While your hands are deadly, you aren't above using nearby objects.*

As a major action while wielding an improvised weapon, make a single attack with a +1 to hit that deals 23|31|38|46 and inflicts [SENSELESS] STUNNED. If you hit, the improvised weapon receives the same amount of damage, potentially destroying it. **Boost**: Gain an additional +3 bonus to hit.

Suplex [O]: *You flip your enemy backwards and drive their head into the ground.*

As a major action while grappling an opponent, you may cease grappling them. If you do, that enemy is moved into an adjacent unoccupied hex, becomes PRONE and receives $5 \times C$ damage. **Boost**: Deal an additional C damage.

Third Facet★

Disorienting Blows: *It's hard to see straight after you clean their clock.*

One-Two and Give 'em the Chair inflict [SENSELESS] OFF BALANCE.

Fourth Facet★

Steel Grip: *Your long experience with grappling makes it hard to escape your grasp.*

The defense roll to escape your grapples have a -4 modifier

Fifth Facet★

Terrain Rip: *Just because its bolted down doesn't mean you can't wreck some faces with it.*

If you do not target a creature with One-Two and destroy a piece of destructible terrain, you may instead begin wielding it as an improved weapon and immediately make an attack with Give 'em the Chair!

Sixth Facet★

Throw: *You can toss your enemies away from you.*

Suplex may move the opponent to any unoccupied hex within range 3.

Seventh Facet★

Concussion: *Your attacks are brutal and may be causing brain damage.*

One-Two and Give 'em the Chair inflict BLIND 8 for the rest of the encounter. If you would attack a creature already affected by this ability, instead reduce the radius of this BLIND effect by 1.

Commando

Major Offensive

Commandos excel at both ranged and close quarters combat. They can bring many powerful weapons to bear on their enemies from afar, or execute deadly takedowns up close.

Arnold kicked down the door, bursting into the hideout and spraying lead into the first terrorist he saw. The others scattered, going for their own guns, and Arnold was jumped from behind by one with a knife. Catching the strike against his forearm, he then grabbed the knife, twisting it out of his attacker's hand and bringing the attacker to the ground in one smooth motion. Seeing the guns come up, he immediately rolled to the side to avoid a hail of return fire, coming up with his rocket launcher ready. A moment later, there wasn't another side of the room to clear out.

Adaptation

This can be used to represent a futuristic warrior as easily as a modern one, or a fantasy warrior armed with enchanted weapons.

First Facet★

Machine Gun: *Dakadadakada*

You have access to a special weapon, a machine gun. This counts as a distant weapon, but only has range 12.

Machine Gun Fire [WO]: *You pull out a weapon and start filling your opponents with lead.*

As a major action, you may make 10 STRIKES against an opponent within 12 hexes with a -2 modifier to hit. Each hit deals *C* damage. Each of these STRIKES is a machine gun shot. Every 3 hits inflicts SLOW 1. **Boost:** take 2 additional machine gun shots **Special:** You must use the machine gun weapon with this ability

Takedown [WO]: *You are trained to be deadly in close quarters combat.*

As a major action, make 2 STRIKES against a target within melee range with a +1 to hit that deal 12|15|19|23 damage. You can perform this with an unarmed attack even if wielding non-melee weapons without provoking. **Boost:** +2 to hit

Takedown Surge [W]: As a SURGE, make a STRIKE against a target with a +1 to hit. If it hits, they take 14|18|23|28 damage. You can perform this with an unarmed attack, including as a REACTION, even if wielding non-melee weapons without provoking. **Boost:** +4 to hit

Machine Gun SURGE [W]: As a SURGE, you may make 6 machine gun shots. **Boost:** Take an additional 2 shots **Special:** You must use the machine gun weapon with this ability

Second Facet★

Rush: *You never back down and use your machine gun to create an opening to advance.*

When you use Machine Gun Fire, you may move an extra 3 hexes as long as those hexes are not away from the target.

Breach: *You can kick down a door and open fire in one smooth motion.*

If you target a destructible obstacle with Takedown in melee and destroy it, you may attack with Machine Gun Fire.

Heavy Guns: *Gun goes BRRRRRR*
: You have access to a second special weapon, the

Gatling gun. It is a heavy, distant weapon that can be used when a machine gun is required.

Third Facet★

Rocket Launcher [R]: *You brought the heavy weaponry.*

As a major action, you may draw a rocket launcher and attack a creature or hex within range 24. It creates a 1 hex radius spread around that hex that deals *Cd8* damage. A successful defense roll halves the damage. If targeting a creature, a failed defense roll also inflicts DIZZY 2 for 1 round. **Boost:** Does an extra 3|3|4|5 damage to each affected creature, or an additional 4|5|6|8 damage to one affected creature.

Takedown Slam: *Your takedown will bring your opponents to their knees.*

If you hit with both STRIKES when using Takedown in melee, the target is knocked PRONE.

Fourth Facet

Improved Takedown: *You have learned to take your opponent to the ground and disarm them in one smooth motion.*

If you hit with both STRIKES when using Takedown in melee, the target is disarmed

Rocket Jump: *Who says it only works in video games?*

You may fire a rocket launcher at your own hex. You take no damage when doing this, and instead jump 4.

Fifth Facet★

Suppressive Fire: *Locking down your opponents movement is just good tactics.*

After targeting someone with machine gun fire, you may declare them suppressed for 1 round. While suppressed, you may attack them with 4 machine gun shots if they voluntarily leave their hex.

Rolling Takedown: *The momentum of a takedown can let you roll away.*

If you hit with either STRIKE when using takedown in melee, you can DASH 3 hexes.

SAM: *Your rocket launcher can ground foes.*
If you hit a flying creature with Rocket Launcher, it loses flying for 2 rounds.

Sixth Facet★

Stand Ground: *Come at me, I dare ya.*
Once per encounter, on a round you have not moved, you can stand your ground for one round as a major action. You cannot move or be moved while standing your ground. While standing your ground, for each enemy, the first time it voluntarily approaches you or attacks you while within 12

hexes of you, you may attack them with 4 machine gun shots.

Seventh Facet★

Heat Seeking Missiles: *This special warhead will find a way to its target.*

Once per encounter, your rocket launcher can use indirect LINE OF EFFECT.

Wounding Fire: *You shall perforate your opponent.*
Targets hit by machine gun shots gain BLEEDING 1 per hit.

Dancing Blade

Major Offensive

Practitioners of the Dancing Blade are mobile warriors, quickly dashing through the battlefield and slicing their enemies. they are light on their feet and are hard to catch.

Jack leapt and twirled, blade singing as he danced between his opponents, slashing one then another. Soon he came to his true foe, the black knight. He rushed forwards, then slipped to the side, and the black knight struggled to turn and follow his movement, stumbling to the side. The knight swept his broadsword at Jack, ripping through the cloak, but Jack rushed forward, using his momentum to drive his blade home and send the black knight reeling backwards.

Adaptation

This TRACK can represent any number of fast characters, regardless of how they they obtain their speed, whether it be jet-powered, magic-powered, or pure talent.

First Facet★

Mobile Warrior [WO]: *You attack with quick, swift strikes.*

As a major action, you may make 5 STRIKES which deal 5|7|8|10 damage. **Boost**: You may make an additional STRIKE.

Dance[H]: *You allow the momentum of your attack to carry you onwards.*

When you use Mobile Warrior, you may DASH one hex for each successful STRIKE made with a melee weapon after the STRIKES have been made.

Surge[W]: As a SURGE, you may make 3 STRIKES that deal 5|7|8|10 on a hit. **Boost**: Make an additional STRIKE.

Second Facet★

Shove: *Your movement allows you to catch opponents off balance.*

Once per round, during your turn, when you successfully hit an enemy with Mobile Warrior, you may FORCE that enemy one hex in any direction. If the attack was made with a melee weapon, you may FORCE them three hexes in any direction instead.

Third Facet★

Speed Tornado: *Your rapid movements confound foes and make them dizzy.*

At the beginning of each turn, choose up to 3 enemies. For each of those enemies, the first time each round that you enter or leave a hex adjacent to that enemy as part of the movement of Mobile Warrior, that enemy becomes DIZZY 1 for one turn. Those enemies are immune to the Shove ability until their next turn.

Fourth Facet★

Endless Dance: *Can't stop this feeling.*

You are immune to the SLOWED and STOPPED conditions, and you can ignore the effects of difficult terrain.

Fifth Facet★

Stilted Waltz: *You dance between opponents gracefully.*

For each enemy, the first time each encounter that you successfully hit that enemy with Mobile Warrior, that enemy is STUNNED for one round.

Sixth Facet★

Rhythm of the Rapture[HWS]: *You flow across the battlefield, swift and deadly.*

Once per encounter, as a major action, you may DASH up to 12 hexes. For each enemy, the first time you are adjacent to that enemy as part of this movement, you may make a STRIKE against them. If you hit, you deal —| —|25|30 damage and make them DIZZY 2 for one round. **Boost**: Deal an extra —| —|4|5 extra damage to all targets, or deal —| —|8|10 extra damage to one target.

Seventh Facet★

Opening Performance: *With a might surge of effort, you explode into the fight.*

The first time you use Mobile Warrior each encounter, you may DASH 4 additional hexes for every successful STRIKE you made.

Elementalist

Major Offensive

You command a primal form of energy, and use it to destroy your opponents.

Frost formed on Emily's hands, and the air around her took on a chill. The troupe of goblins advanced, spears and shields ready. She thrust her hands forward, and a blast of ice and snow rushed forward and engulfed them. More continued advancing, so she created a wall of icy spikes and ran.

Adaptation

While this lends itself naturally to a spellcaster, it can also be used to represent a character using advanced weaponry.

First Facet★

Elemental Jet[RmO]: *A simple, direct application of magic.*

As a major action, deal *Cd12* damage to a single enemy within range 12. A successful defense roll halves the damage. **Boost:** +4|5|6|8 damage

Elemental Blast[RS]: *A larger explosion of energy.*
As a major action, choose a hex within radius 12. Each creature within a radius 3 circle of that hex takes *Cd8* damage. A defense roll halves the damage. **Boost:** 3|3|4|5 additional damage, or +4|5|6|8 damage to one affected creature.

Elemental Afterthoughts: *You have a tie to a form of energy, and utilize it in all of your attacks.*

When you take this track, pick an ENERGY EFFECT. Whenever a creature fails a defense roll against an ability from this track they gain the chosen ENERGY EFFECT. Enemies cannot gain an EDGE against your attacks because of this ability. This decision is permanent.

Surge: As a SURGE, deal *Cd6* damage to a target within 12 hexes. A defense roll halves the damage.

Boost: +4|5|6|8 damage.

Second Facet★

Elemental Sculpting: Choose one of the following:

➤ **Elemental Breath** [S]: *You breathe out a wave of energy.*

As a major action, deal *Cd8* damage to everyone in a 6 hex long cone. A defense roll halves the damage. **Boost:** 3|3|4|5 additional damage, or +4|5|6|8 damage to one affected creature.

➤ **Elemental Beam** [RS]: *A concentrated, focused beam of energy.*

As a major action, deal *Cd8* damage to everyone in a 24 hex long line. A defense roll halves the damage. **Boost:** 3|3|4|5 additional damage, or +4|5|6|8 damage to one affected creature.

➤ **Elemental Blade** [R]: *You infuse your energy into your allies weapon.*

As a major action, choose an ally within 12 hexes. At the beginning of that ally's next two turns, they gain a RIDER. The rider deals *Cd4* damage, and a defense roll halves this damage. The ally is immune to damage from this track

for two rounds, as well as your chosen ENERGY EFFECT. **Boost:** Your ally gains a boost.

➤ **Elemental Sphere** [R]: *You create an orb of energy which you move around the battlefield.*

As a major action, you may place an elemental sphere token in a hex within range 12 of you. At the beginning of your next 2 turns, you may move the sphere up to 6 hexes, and it may move through occupied hexes. If it ends that movement in an occupied hex, the occupant of that hex takes *Cd6* damage and is off balance. A successful defense roll halves the damage. At the end of two turns destroy the sphere.

Immunity: *You use your chosen element so well you are protected from its effects.*

You are immune to the ENERGY EFFECT you chose with Elemental Afterthoughts, and to damage you deal with this track. When you use Elemental Blast in your own hex it doesn't provoke reactions.

Third Facet

Elemental Form[R]: *You teleport across the battlefield in a bolt of energy.*

You may spend up to 6 STEP to TELEPORT half that many hexes. Each creature between where you begin and where you end up is affected by the ENERGY EFFECT from Elemental Afterthoughts.

Fourth Facet★

Elemental Wall[R]: *You summon forth an intense wall of energy.*

Once per encounter, as a major action, select 12 hex edges in a straight line. Each creature adjacent to one of those edges takes *Cd8* damage. A defense roll halves this damage. Those hex edges become afflicted. Whenever a creature crosses one of those edges they take *Cd8* damage. A defense roll halves the damage. **Boost:** 3|3|4|5 additional damage, or +4|5|6|8 damage to one affected creature.

Fifth Facet★

Elemental Pandemic: *Your influence spreads far and wide.*

Whenever an enemy affected by Elemental Afterthoughts becomes adjacent to another enemy,

ELEMENTALIST

you may have that enemy become affected by the ENERGY EFFECT chosen for Elemental Afterthoughts.

Elemental Aptitude: *Your energy bolt is more efficient.*

When you use elemental form, you may TELEPORT 1 hex for each STEP you spend. Every hex between where you start and end up is afflicted until the end of your next turn. Whenever a creature enters one of these hexes they are affected by the ENERGY EFFECT chosen for Elemental Afterthoughts.

Sixth Facet★

Enhanced Sculpting: You gain one of the following based on your choice for Elemental Sculpting:

- When you use Elemental Breath, each creature in the affected area is FORCED 3 hexed back.
- When you use Elemental Beam, you may instead use it twice. The two uses must be in different directions.

- When you use Elemental Blade, for the next two turns, whenever an enemy attacks that ally with a melee weapon, they take the ENERGY EFFECT from Elemental Afterthoughts.
- Whenever a creature ends their turn adjacent to the Elemental Sphere, that creature takes C*6 damage and becomes OFF BALANCE. A successful defense roll halves this damage.

Seventh Facet

Elemental Mastery: *Your elemental form is the peak of perfection.*

When you TELEPORT with Elemental Form, you instead TELEPORT 2 hexes for every STEP spent. Hexes that become afflicted with Elemental Aptitude remain afflicted for the rest of the encounter.

Enchanter

Major Offensive

You play with people's minds, altering their perception of the world, toying with their emotions, tricking them into doing what you wish. Where others may see a fireball as the right answer, your approach can be a bit more... subtle.

"Your reign is at an end, enchantress!" Jack proclaimed, katana held out threateningly, Kyle at his side in support. Beatrice lazily glanced at him from where she lounged on her throne, and looked him in his eyes.... and suddenly Jack was filled with a deep rage, and remembered a minor sleight Kyle made earlier. He turned on his comrade and slashed him across the face. His mind cleared, and he dropped to his knees in anguish over what he had done.

Adaptation

Instead of using magic, this could be a specialist in mind altering drugs.

First Facet★

Anger [Mental]: *You can provoke a creature into a moment of rage.*

As a major action, pick a creature within 12 hexes. You DIRECT them 3 hexes towards a creature of your choice, and they use a SURGE against that creature with a BOOST that ignores COUNTERS. If this BOOST remains after the attack, you gain it. **Boost:** The target is ENERGIZED C for the attack; if this remains, you gain it. **Penalty:** The granted SURGE takes a PENALTY

Rage Strike [W]: *In moments of desperation, you can turn your ability inwards and rush opponents.*

As a surge made when Anger is used on you, STRIKE your target with a +1 to hit for 14|18|23|28 damage. This does not include the automatic boost. **Boost:** Increase the damage by 5|6|8|9

Mental Blast [Mental]: As a surge, attack a target with 12 hexes for 11|15|19|22 damage and render them OFF BALANCE and SLOWED 1 for 1 round. A successful defense roll halves the damage and negates the OFF BALANCE and SLOWED. **Boost:** increase the damage by 4|5|6|8

Second Facet★

Inflict Fear [Rm]: *You twist your opponents mind to induce panic.*

As a major action, you may cause a single opponent within 12 hexes to become [Fear] SLOWED 3 for 1 round and [Fear] OFF GUARD 4. **Boost:** Increase the OFF GUARD by 1.

Sleep [R, Mental]: *You can alter people's minds, making them drowsy.*

As a major action, inflict $Cd4$ sleep points on every enemy in a 2 hex burst within 12 hexes. This renders them OFF BALANCE and SLOWED 1 as their reactions slow, and when they have fewer HIT POINTS than sleep points, they fall unconscious; they can still be healed while unconscious, but cannot act. Any defenses that stop damage can be used to prevent sleep points. When they fall asleep, any effects that trigger upon becoming WOUNDED can be used. **Boost:** Give one target C more sleep points.

Third Facet

Trick: *Your studies of the mind have taught you how to influence creatures by more mundane means as well as arcane.*

As a major action, you may render a creature within 6 hexes OFF BALANCE and DIRECT them 1 hex. They are OFF GUARD 2 and have VULNERABILITY $2 \times C$.

Boost: Increase the VULNERABILITY by C .

Abyss [R, Mental; Illusion]: *Your magic can shatter a person's perception of reality.*

As a major action, you can create a [Mental; Illusion] for 1 creature within 12 hexes that a number of hexes have fallen away as an abyss; Creatures walking on them is inconsistent with the illusion. The target also takes $4 \times C$ [Mental] damage that ignores counters from the psychic strain when they disbelieve the illusion. **Boost:** Increase the damage by C .

Fourth Facet★

Mystify [R]: *You poke at minds to sow mass confusion.*

As a major action, you make all enemies in 2 hex burst within 12 hexes [Mental] DIZZY 2 for 1 round and they take $Cd4$ sleep points. **Boost:** Increase the number of sleep points for one target by C .

Terrifying Visage [R]: *You can make other creatures perceive a given creature as being utterly horrifying, either demanding the attention of others or making it too horrifying to risk provoking.*

As a major action, you may raise or lower the target priority of a creature within 12 hexes, at your choice, and creatures take [Fear] 2 PENALTIES if they break target priority. You may affect the target creature with Anger.

Fifth Facet★

False Death [R, Mental; Illusion]: *Perhaps the cruelest of your abilities, you convince your opponent that one of their friends is dead.*

As a major action, you may create a [Mental; illusion] for 1 creature within 12 hexes that a given creature is dead; they lose LINE OF SIGHT to that creature, and cannot hear them, and cannot target them with abilities. The allegedly dead creature affecting

the target with an ability or trying to move into their square is inconsistent with this illusion. Each STEP they spend trying to move into your square is a separate inconsistency. The target also takes $4 \times C$ [Mental] damage that ignores counters from the psychic strain when they disbelieve the illusion. **Boost:** Increase the damage by C .

Sixth Facet★

View as Friend [Mental; Illusion]: *You are getting quite good at messing with people's perception of reality, and use it to confuse who is friend or foe.*

As a major action, you may create a [Mental; Illusion] for a specific creature in 12 hexes that a specific other creature is an ally. Harming that creature is inconsistent with the illusion; enemies aiding them, allies hurting them and that creature attacking them or allies is also inconsistent with the illusion. If that creature harms them, it breaks the illusion immediately. The target also takes $4 \times C$ [Mental] damage that ignores counters from the psychic strain when they disbelieve the illusion. **Boost:** Increase the damage by C .

Seventh Facet

Personal Hell: [Rm, Mental; Illusion] *It's only temporary damnation.*

Once per encounter, as a major action, you can create a [Mental; Illusion] for a specific creature in 12 hexes. A SUMMONED demon that only the target can see attacks them. It has 12 HIT POINTS, and makes 2 STRIKES that deal 15 damage each on a hit. It can reduce incoming damage by 6 as a COUNTER. The target lacks LINE OF SIGHT to all others, and cannot target them with abilities. Their surroundings take on a warped, fiery, hellish appearance. Killing the demon breaks the illusion, but it cannot otherwise be disbelieved. **Boost:** The demon gains a boost. The demon's boost increases its damage by 5.

Dominate [Rm, Mental]: *You can fully take over control of another's actions.*

Once per encounter, as a major action, you may force a creature to do your bidding. You may grant that creature an additional turn under your control. A successful defense roll with a -1 modifier negates this effect. You cannot target yourself and the target cannot voluntarily fail the defense roll. **Boost:** You get to use a boost during the granted turn.

Explosive Arcana

Major Offensive

You know one spell really, really well, and that one spell is Fireball.

Alucard stood, watching the army approach. At first it was a half-suppressed giggle, then it spread into a grin. A moment later it was a full-on maniacal cackle, giddy with anticipation. "Boom," he said gleefully, snapping his fingers, and a giant explosion tore through the encroaching ranks.

Adaptation

This TRACK can represent other forms of fire, napalm, black powder, explosives, missiles, or even great balls of fire.

First Facet ★

Fireball [R]: *The classics never get old.*

As a major action, you can target any hex within 24 hexes with an area of effect. You can control the radius, to be between a minimum of 3 and a maximum of C . Targets caught in it take $Cd8$ damage. A successful defense roll halves the damage. **Boost:** Add $3|3|4|5$ damage to every target or $4|5|6|8$ damage to one target.

Homing Swarm [RmO]: *These bolts of explosive energy know where you live.*

As a major action, you may make C STRIKES dealing 6 damage against a target within 12 hexes. They deal half damage on a miss. **Boost:** Add $1d4 - 1$ to damage

Surge: As a SURGE, you may deal $3 \times C$ damage to a target within 12 hexes, forcing you and the target 1 hex back from each other if you were adjacent.

Boost: Deal an additional C damage

Second Facet

Spotters: *Now they see you, now I see you.*

You can designate an ally as a spotter once per turn. You have LINE OF SIGHT within 6 hexes of the spotter's current location. You start out with one spotter at max, and at each tier you may have an additional max spotter.

Third Facet ★

Infernic Crater: *Pyre, pyre, slacks on fire.*

You may afflict the targeted center hex of a Fireball. Creature who enter or end this turn in this hex gain IGNITED C .

Explosive Storm [R]: *Bite-size classics.*

As a major action, you may create 3 areas of effects within 12 hexes, each with a radius of 1 that each deals $-|15|19|23$ damage. A successful defense roll by the target halves the damage. These areas cannot overlap. **Boost:** Add $-|3|3|4$ damage to every target or $4|5|6|8$ damage to one target.

Fourth Facet

Observer: *Scryball visualizer engaged.*

Once per encounter, as a free action on your turn, instead of using spotters, you can create a SUMMON anywhere within your LINE OF SIGHT and LINE OF EFFECT. The SUMMON has $2 \times C$ HIT POINTS, hover, INVISIBLE 2, speed 3, and your defenses. It provides you LINE OF SIGHT within 4 hexes of its current position, and moves during your turn

FlashBANG! Your Homing Swarm and Explosive Storm attacks inflict BLIND 9 on a hit or failed defense roll.

Fifth Facet ★

Warpfire: *Beauty is carried by the eye of the beholder.*

You may use your observer to Orient a teleported Fireball. You can WARP your Fireball into the void, and it reappears centered on your Observer, ignoring LINE OF SIGHT and LINE OF EFFECT, and using that hex as the center of a Fireball. (*This usually breaks the Observer.*)

Sixth Facet ★

Molten Crater: *Hotfoot!*

Once per encounter, your Fireball is hot enough to liquefy solid ground. When you activate this ability as part of using Fireball, you may change the targeted center hex of a Fireball into Lava if it is unoccupied and solid, and every hex in the Fireball's area effect is afflicted with IGNITED C .

Seventh Facet

Charged Bunker Buster: *Power beyond the twilight...*

When you activate this ability as part of using Fireball, any destructible terrain in the area affected by Fireball is simply obliterated, and automatically destroyed.

Extension of Self: *The calm within the storm.*

You are never harmed by your own abilities from this track.

Gun Dance

Major Offensive

You rove around the battlefield, dancing in a glorious spray of bullets.

Summer pirouetted, her paired LX-15 autoblasters blazing with the spin, spraying the entire cluster of Gornax Enforcers with telling hits. Another one charged her from the side, vibroblade raised. She shot them the face, then gracefully darted backwards, twirling to fire at the others in turn.

Adaptation

This can be someone flowing through combat in a dance, taking shots freely, or a highly disciplined warrior making quick, precise shots as they move briskly around the battlefield.

First Facet★

Gun Drill [WO]: *Simple but effective.*

As a major action, you may take 5 STRIKES with +1 to hit that deal 5|6|8|9 damage, ignoring any penalties from cover. **Boost:** Gain an extra STRIKE.

Dance of Death [W]: *Your whirl around and spray bullets exactly where you want.*

As a major action while wielding a ranged weapon, you may STRIKE up to 3 enemies within 12 hexes for $5 \times C$ damage on a hit. **Boost:** C extra damage.

Surge [W]: As a SURGE, you may make 3 STRIKES at +1 to hit that deal 5|6|8|9 damage per hit. **Boost:** Make an additional STRIKE.

Second Facet★

Roving Fire: *Spread the love.*

If you targeted an enemy last round, and you attack a single enemy with Gun Drill that you didn't target last round, you gain an EDGE on the attack.

Third Facet★

Back Roll: *Gotta keep your space.*

If you use Gun Drill on an enemy in melee with you, you may DASH 2 hexes away from them.

Fourth Facet★

Death Mambo: *Find the perfect angle.*

When using Dance of Death, you may move 2 hexes between each STRIKE.

Fifth Facet★

Dive for Cover: *You deeply appreciate the value of cover and are always ready to dive for it.*

If attacked by a ranged attack, if you are not in cover, you may DASH 3 hexes if that movement would put you in cover. You are still targeted by this attack, even if this movement would otherwise make you untar-getable.

Sixth Facet★

Whirling Rhythm: *You smoothly dart across the battlefield.*

When using Death Mambo, the movement may be a DASH.

Seventh Facet★

Bloody Trail: *You leave nothing but blood and tears in your wake.*

When using Dance of Death, you may inflict BLEED-ING C on every target you hit.

Kung Fu Master

Major Offensive

"Kinetic impact as art." aka "Creatively hitting things."

A Kung Fu Master has honed their body into a deadly weapon. They are able to attack swiftly and break through their opponent's guard to deliver devastating maneuvers.

Daniel faced off against the masked ninja. They both attacked at once, a flurry of strikes, jabs, and stabs finding their targets. Daniel leapt into the air and kicked the ninja in his face, sending him flying back and crashing through a wall. The ninja leapt back to his feet and readied his sword. Daniel smirked. Then the ninja fell over, dead.

Adaptation

While Kung Fu Master is capable of functioning without a weapon, they are still perfectly adept with them, and the aspect can be used to represent many highly skilled warriors. It can become Gun-Fu by having them focus on a ranged weapon, though they still will want to get next to enemies for their finishers.

First Facet★

Lethal Fists: *Your entire body is a weapon.*

Your unarmed attacks have 2 weapon properties of your choice and you do not provoke reactions when using them.

Kung Fu [WO]: *You are capable of unleashing a storm of quick attacks.*

As a major action, make *C* STRIKES with a +2 to hit, each dealing 4 damage. Gain 1 Combo Marker per hit. **Boost:** Gain a +3 modifier to hit.

Flow of Battle: *You learned how to utilize every moment in battle to do crazy kung fu moves.*

Immediately after taking a major action or a SURGE that is not a REACTION, you may spend these combo markers to perform finishers on that target. The target must be in your melee range, unless otherwise specified. Combo markers on mooks count for all mooks, and combo markers on a BONDED creature or its master apply to all creatures BONDED to that master and its other BONDED creatures.

Reap the Harvest[W]: *Your enemy has been prepared.*

Once per round, you may spend the combo markers you have on any enemy to perform a finisher. You cannot use Kung Fu on someone you used Reap the Harvest on this round.

Finishers: They require at least as many Combo Markers as the indicated number, and more can be spent to enhance the effect. Finishers never trigger counters.

➤ **Palm Strike**[W]-1CM: Your opponent takes $3 \times CM$ is OFF BALANCE. If you spend at least 3 CM they are DISABLED.

➤ **Leg Sweep**-1CM: Knock your target PRONE and deal $3 \times CM$ damage. At 3 CM you elbow drop them, and increase their cost of standing by 1 STEP.

Surge[W]: As a SURGE, you may make a STRIKE which deals $2 \times C$ damage. You gain *C* Combo Markers on the target if it hits. **Boost:** +4 to hit.

Second Facet★

Hustle: You gain the following finishers:

➤ **Pushing Kick**[H]-2CM: Deal $2 \times CM$ damage to your target and FORCE them 1 hex per facet in any direction. If you FORCE them into another enemy, that enemy also takes $2 \times CM$ damage. If you spent at least 4 CM, this will destroy a destructible obstacle. If you spent at least 7 CM, you can increase the distance by 2 hexes.

➤ **Spinning Kick**-2CM: Deal $2 \times CM$ damage to all enemies within your melee reach. If you spent at least 4 CM, you may FORCE them 1 hex away.

Third Facet

Behind You[H]: Once per encounter, you may WARP behind an opponent you have a Combo Marker on. If you appear in the air, you count as jumping.

Crouching Tiger: You gain the following finishers

➤ **Slam**[H]-2CM: If your target is in air, they are no longer in air, are FORCED to the ground, and take $3 \times CM$ damage. If you spend at least 4 CM, they cannot fly for 2 rounds.

➤ **Take Weapon**[W]-1CM: Disarm your opponent and being wielding their weapon, dealing $3 \times CM$ damage. If you spend at least 3 CM, you then impale them with that weapon causing it to be stuck in them. They begin bleeding *C* if they remove it.

Fourth Facet★

Gi Grab: You grab a hold of your opponent, preparing to do further damage.: Once per round, you may grab an opponent with a successful strike, making them GRAPPLED.

Torso Flail: *You utilize your enemy's body as a weapon to take down their allies.*

If your target is GRAPPLED, you may begin attacking foes with them. You may use the following abilities while grappling an opponent.

➤ **Living Club:** As a major action, you may make a STRIKE against an opponent in melee range you are not grappling, dealing $6 \times C$ damage

to both the target and your GRAPPLED enemy.

Boost: Increase the damage to each target by C damage to each target.

- **Whirl:** *You grab your opponent, and spin him around, hitting all around you*

If you use Spinning Kick while grappling an opponent, you may FORCE them to any hex adjacent to you after the attack, then throw them as if you had spent the points on Pushing Kick.

Fifth Facet★

You Are Already Dead: *You strike your opponent with such skill that they are dead long before they realize it.*

Once per encounter, on an opponent's turn, you may spend any number of Combo Markers to deal $3 \times CM$ damage. This does not require LINE OF SIGHT or LINE OF EFFECT. If this [Wounds] the opponent, you get 1 Combo Marker for every 3 damage that creature is in the negatives. These Combo Markers may be used against any opponent.

Hidden Dragon: You gain the following finisher:

- **Three Pronged Death Blow**[W]-4CM: STRIKE your opponent for $2 \times CM$ damage. If this hits, they take that damage after their next turn as well. Once per encounter, this causes them to be STUNNED if you spend at least 6 CM.

Sixth Facet★

Kamahaduoken[S]: You fire a massive energy blast in a 3-hex wide line 24 hexes long. It deals $Cd6 + 2 \times CM$ to those in it. You can spend CM from any target to enhance this attack. This is [O]verwhelming if you spend at least 4 CM.

Seventh Facet★

Hundred Hand Strike [WO]: As a major action, roll 12 STRIKES against a target with a +1 to hit. Gain a Combo Marker for each one that hits, but deal no damage. You may use 2 finishers after this attack, dividing your CM between them as you wish. **Boost:** Take 2 more strikes.

Powerhouse

Major Offensive

This TRACK is for people who like the Buster Sword, Dragonslayer, or just feel like they are lacking in some other area.

Throck brought his battleaxe crashing down on the demon. The might of the blow sent the large beast flying backwards and crashing to the ground. It crawled out the resultant crater, and staggered to the side before mustering a lash with its flaming whip. Throck took it across the chest, bellowing in pain as it branded him, then charged forward, embedding his axe in the demon's chest.

Adaptation

Instead of having an oversized weapon, you might use divine might or chi mastery to amplify the FORCE of your blows. Alternatively, you might be using raw magic to create phantom appendages to mimic your strikes. Regardless of how you do it, the bottom line is you hit hard, rather than fast or accurately, and leave craters when you do it.

First Facet★

Slow but Deadly [WO]: *You hit like a truck.*

As a major action, you may make a STRIKE with a -1 modifier which deals $7 \times C + 1$ damage. **Boost:** You deal an additional $2 \times C - 1$ damage.

When you use Slow but Deadly, choose one of the following:

- **Crushing Strike** [W]: The creature you attacked takes C . Additionally, a hex your target is standing in becomes difficult terrain.
- **Cleave** [WS]: You may make an additional attack against all enemies adjacent to the creature you attacked who are also within your weapon's range. The attack made with this ability automatically hits and deals $3 \times C$ damage. **Boost:** Separate from Slow but Deadly's boost, you can deal an additional C damage to a target of cleave.

Giant Sword: *You wield large weapons with ease.* You are proficient in exotic weapons with the Heavy property, and can choose whether or not to take the BOOST, and consequently whether or not to take the OFF GUARD while using it.

Surge[W]: As a SURGE, you may take a STRIKE at a -2 modifier to hit that deals $6 \times C$ damage. **Boost:** Increase the damage by $2 \times C$

Second Facet★

Heavy Blows[H]: *Your attacks are so powerful they send foes flying.*

Whenever you hit an enemy with Slow but Deadly, you may cause them to be FORCED back a number of hexes equal to or less than $C - 2$, after you have dealt damage and used Cleave or Crushing Strike.

Burgeoning Might: *As you grow in strength so do your abilities*

. You may pick one of the following abilities.

- **Bigger and Better:** Your melee weapons can always target both adjacent hexes and 1 hex away. If they can take REACTIONS, they may do so for any hex in their range

- **Ground Crush:** Whenever you would use Crushing Strike and would cause a single hex to become difficult terrain, you may also cause all hexes adjacent to the targeted hex to become difficult terrain.

- **Deadly Twirl:** Instead of making the additional attack with cleave against all creatures who are adjacent to your target, you may target all creatures who are in hexes adjacent to you except for your original target.

Third Facet

Blunt Force Trauma: *Its hard to just shake off your blows.*

Whenever you use a major action from this TRACK to attack a single enemy, you may cause the opponent to become OFF BALANCE and DIZZY 1 for 1 round.

Sky Strike: *The same power that you strike with can propel you high into the air.*

Once per round, you may jump 9. If you use Slow but Deadly in the same turn as Sky Strike, the following applies:

- If you use Cleave, you may target enemies that would be adjacent to your target if your target was on the ground
- If you use Heavy Blows, you may instead cause them to fall as many hexes you would have FORCED them back. If an enemy is no longer in air because of this ability, they becomes PRONE.
- If you use Crushing Strike, you may cause your opponent to stop being in air and fall PRONE.

Hang Time: Once per encounter, you may hover for 1 round after using Sky Strike.

Meteor Impact [WH]: *Your return to earth is glorious.*

Once per encounter, as a major action, while you are in air, you may fall to the ground without taking damage. While falling, you may freely spend STEPS to move horizontally. If an enemy comes into your melee range at any point during your fall, you may make a melee STRIKE against them. If this STRIKE hits, they begin falling with you, and like you do not

take damage from their fall. Upon landing, every creature in a 4 hex burst around you takes $-|20|24|29$ damage, and a successful defense roll at +2 halves the damage. You may use Heavy Blows on anyone who fails this defense roll. All hexes in the range are rendered difficult terrain. **Boost:** Increase the damage to one target by $2 \times C$.

Fourth Facet★

Unstoppable Charge: *Nothing gets between you and your target.*

Once per encounter, before using Slow but Deadly, you may spend any number of STEPS. You may then make a charge with that much extra movement. During this charge you may ignore difficult terrain or any other effect that would slow you down and you may automatically destroy any obstacles that get in your way.

Impale [WSHO]: *You drive your weapon into your opponent.*

Once per encounter, as a major action you may make a charge with an additional 3 hexes of movement. You automatically hit your target and deal $5 \times C$ damage. If the opponent would use any STEPS to move before your next major action they gain C ONGOING . **Boost:** Increase the damage by C .

Increasing Might: *As you grow in strength, so do your abilities.*

You may pick one of the following abilities, or an ability from Burgeoning Might

- **Reversed Kinetics:** Instead of moving the targeted creature you hit when using Heavy Blows, you may DASH backwards the same distance.
- **Instant Burial:** Whenever you would use Crushing Strike and successfully hit, you may cause that opponent to become burrowed 1 if they were not already air. In addition, you may use Slow but Deadly and Crushing Strike against creatures who are burrowed.
- **Batter Up:** When you use Cleave you may move any opponent that you hit as if you had used Heavy Blows, including the original target.

Fifth Facet★

Momentum: *You can use the fore of your blows to carry yourself forward.*

Whenever you would use Heavy Blows, you may DASH 2 hexes. This movement is not reduced or increased by conditions that would normally affect your movement.

Devastating Strikes: *Your blows really mess people up.*

Whenever you use a major action from this TRACK to attack a single enemy, you may cause that opponent to become DIZZY 2 instead of DIZZY 1, or become PRONE. If you knock an enemy PRONE they are not affected by Heavy Blows.

Sixth Facet★

Shatter the Earth [WS]: *Your attacks are so powerful they crack the earth beneath you.*

Once per encounter, as a major action, you may create a 12 hex line originating from you and make a STRIKE with a -2 modifier against all creatures in this line. This STRIKE deals $5 \times C - 1$ damage and causes all opponents hit to become PRONE. On a miss the damage dealt is halved and creatures do not become PRONE. **Boost:** The damage to all targets is increased by $C - 1$, or by $-| - |7|8$ to one target.

Climactic Might *As you grow in strength, so do your abilities*

. You may pick one ability from this list, or one from Increasing Might or Burgeoning Might.

- **On the Return:** You may take an additional reaction each round.
- **Blunt Force Cleave:** Devastating Strikes now triggers on major actions that target multiple opponents and may affect targets of Cleave who were not also a target of Slow but Deadly.
- **Uplifting Strikes:** Whenever you would use Crushing Strike and would cause a single hex to become difficult terrain, you may instead cause the targeted creature and all creatures adjacent to it to be moved 2 hexes into the air.

Seventh Facet★

Calamitous Charge [WSH]: *You charge across the battlefield like a force of nature.*

Once per encounter, as a major action, move up to 6 hexes and STRIKE all creatures within your melee range at any point during this movement with a -2 to hit for 26 damage. All enemies you hit are FORCED 1 hex in any direction and are hit by Cleave. **Boost:** Increase the damage to one target by $2 \times C$.

Psyblade

Major Offensive

Hurl sharp blades around the battlefield with the power of your mind.

Carl strode calmly across the battlefield, hands shelved calmly behind his back. A tornado of daggers whirled around his head. A cultist leapt up, a crazed look in his eye and a blade in his hand. Carl barely glanced at them and a dagger flew through the air and impaled their stomach. The cultist let out another yell and struggled forwards. Carl sidestepped the next swipe as another dagger plunged into the cultists chest.

Adaptation

Psyblade can also represent commanding swarms of insects or small drones to attack and hinder foes.

First Facet★

Blades: *You can move weapons with your mind.*

You start each encounter with 4 Blades in your hex which follow you as you move, and which you will be able to move around. If you move adjacent to a Blade or a Blade you are controlling moves adjacent to you, you may cause it to enter your hex and start following you. A Blade stuck in an enemy moves with them in their hex until directed by you again. A Blade is a melee [W]eapon, and you may use existing melee weapons as your Blades, including enchanted ones. Using that Blade to attack someone counts as attacking with that weapon, and having that weapon in your hex counts as wielding it, though you always count as its wielder while controlling it. You require LINE OF SIGHT to a Blade and its destination to move it, and both you and the Blade requires LINE OF EFFECT to its destination, but you do not need LINE OF EFFECT to the Blade. Attacks with Blades can benefit from flanking depending on the direction they strike the target from.

Blade Propulsion [RO]: *Your telekinetic control over your Blades is awe inspiring.*

As a major action, you may move 1 Blade up to 8 hexes in a straight line to a hex within 24 hexes of you, stopping at the first enemy or obstacle it encounters, dealing $5 \times C$ damage and getting stuck in them. This ability is [RmO] if the Blade starts from your hex. **Boost:** The Blade deals an additional C damage.

Momentum: *The advantage of propelling your projectiles midair is that they can just keep powering through obstacles.*

If a Blade drops an enemy or destroys destructible terrain that would have caused it to stop moving, it may continue moving the remaining distance up to the maximum allowed. A Blade that impacts an enemy or obstacle during this movement deals the same damage as the original, less the damage inflicted on all previous enemies and obstacles from this movement. This precludes earning bloodlust.

Bladestorm: *You send your Blades out in a flurry of steel.*

As a major action, you can move all 4 of your Blades up to 8 hexes in a straight line to hexes within 24 of you, stopping at the first enemy or obstacle they encounter and getting stuck in them, doing $3 \times C$ damage to each unique target hit. **Boost:** One of the targets takes C additional damage.

Surge: As a SURGE, you may mark an opponent within 12 hexes. The next time you have a Blade within 8 hexes in a line to the marked opponent (including immediately after marking them), you may move the Blade into their hex and make a STRIKE against them. This deals damage as per Blade Propulsion on a hit, and the is stuck in them. If you miss, you deal no damage and the Blade moves to the nearest unoccupied hex. **Boost:** +4 to hit.

Second Facet★

Finesse: *Your blades twist around obstacles.*

You may have one turn in your line when you move a Blade.

Blade Shield: *Using rending as defending.*

For each Blade that shares your hex, you deal 1|2|3|4 damage to enemies that end their turn within your melee range.

Blade Recall: *You lazily draw your blade back towards you while you focus on other things.*

Once per round, you can move a Blade 12 hexes towards you. This movement cannot do damage.

Third Facet★

Advance Deployment: *Your blades lay in wait.*

You may start combat with your Blades up to 4 hexes away from you.

Hindrance: *Having kinetically controlled blades sticking out of your side is rather inconvenient.*

Enemies damaged with a Blade stuck in them are SLOWED 1 as long as the blade shares their hex. This increases by 1 for each additional Blade stuck in them.

Blade Driver: *You use the blades stuck in your opponent to move them around.*

As a major action, you can FORCE an enemy 2 hexes in any direction per Blade stuck in them if they have at least 2 Blades stuck in them. Doing so causes all of your Blades to stop being stuck in them and deals $5 \times C$ damage. **Boost:** Deal C extra damage.

Fourth Facet★

Rending Blades: *You aim your blades to better brutalize your target.*

When an enemy is damaged by a blade, it starts BLEEDING C .

Fifth Facet★

Bisect: *You drive your blades home through any obstacle.*

You may treat the HIT POINTS of destructible terrain as halved when you damage them with Blades.

Encumbrance: *You are even better at hindering enemies with your blades.*

Enemies damaged with a Blade are now SLOWED 2 as long as the Blade shares their hex. This increases by 1 for each additional Blade stuck in them.

Blade Sentinel: *You poise your blade to strike any you come too near.*

You may use a Blade to take a reaction against an enemy that moves into its hex if it is not stuck.

Sixth Facet★

Convergence[RO]: *You send all of your blades careening in on a single target.*

As a major action, you may move all of your Blades 12 hexes to a single target. Strike with each Blade for $2 \times C$ on a hit. Blades that hit are stuck on the target, Blades they miss are left behind in that hex. **Boost:** +3 to hit

Seventh Facet★

Blade Mastery: *Your blades dance around the battlefield like a deadly ballet.*

You may have any number of turns in your line when you move Blades.

Warlord

Major Offense

Warlords are warriors who focus on the power of teamwork. They use their allies as weapons as much as their physical weapons.

Captain Sario swept into the room with two officers in tow. Their quarry, a member of the Redclock Rogues, looked up in surprise, and took off running. "After him!", she barked, and one of the officers ran after and intercepted the fleeing target. The officer hit them across the face, throwing them off balance. She drew her own shortsword and slashed the rogue down. He fell to his knees, and she slapped handcuffs on him. "Good work, men." She said, hauling their target away.

Adaptation

This TRACK can represent a puppetmaster, a captain or sergeant, or a martial tactician.

First Facet★

Tag Team [HS]: *Behold the power of teamwork.*

As a major action, you can move up to 2 hexes and use a SURGE, then choose another ally within 12 hexes and DIRECT that ally to DASH up to 2 hexes and use a SURGE against the same enemy. **Boost**: The affected ally gains a BOOST, or your SURGE gains a BOOST.

Battle Cry: CHAAAARGE!

As a major action, choose an ally within 12 hexes. That ally becomes ENERGIZED $2 \times C$. During that ally's next turn, they may DASH 2 hexes and use a SURGE. **Boost**: Either gain C ENERGIZED or give a BOOST to the SURGE.

Surge[W]: As a SURGE, you may make a STRIKE that deals $5 \times C$ damage. **Boost**: You deal an additional 5|7|8|10 damage.

Second Facet★

Pass Them Around: *Allow me to create an opening.*

When you use Tag Team, if your SURGE hits you may FORCE the struck enemy up to 2 hexes towards the chosen ally before the chosen ally moves or uses a SURGE.

Third Facet★

Set up [HWS]: *You do your thing.*

Once per encounter, as a major action, you can make 2 STRIKES that deal $-|11|14|17$ damage. If either STRIKE hits, you may FORCE that enemy 1 hex and have an ally other than yourself within 6 hexes of you take a minor action. **Boost**: Gain a +3 bonus to hit

Fourth Facet★

Leg Smash: *You smash your enemies leg's in coordination with your ally.*

Once per encounter, when you use Tag Team, you and your ally each make a RIDER attack along with your SURGES. If either RIDER hits, that enemy is SLOWED 2 for one turn. If both RIDERS hit, that enemy is STOPPED for one turn.

Fifth Facet★

Get to Work [HS]: *Sometimes their ability is the right ability.*

Once per encounter, as a major action, choose an ally other than yourself within 6 hexes of you. During that ally's next turn, they gain 3 additional STEPS and may take an additional major action.

Sixth Facet★

Rallying Cry [HS]: *All for one.*

Once per encounter, as a major action, choose up to 4 allies. If you have less than 4 allies that are not WOUNDED, choose two allies who both receive double the bonus from this ability. Each of those allies becomes ENERGIZED C . Additionally, you may DIRECT those allies to immediately DASH 2 hexes. **Boost**: When you BOOST this ability, choose one of the affected allies. That ally gains a BOOST.

Seventh Facet★

Group Charge [HS]: *Reckless but devastating.*

Once per encounter, as a major action, up to 4 allies are DIRECTED 3 hexes and use a SURGE. Each ally who does this becomes VULNERABLE 6. If there are only 3 allies available, each ally who does this becomes VULNERABLE 4 instead of 6. **Boost**: When you BOOST this ability, choose one of the affected allies. That ally gains a BOOST.

Warrior

Major Offensive

Warriors are masters of armed combat. They have studied martial combat intently, and have unmatched skill with their weapon.

Jack assessed his foe. The chain, he decided, and pulled out a long spiked chain, holding it ready. The samurai approached, and Jack struck, sending out the chain to catch his opponent's foot, pulling them to the ground. He then swung the chain around him dizzyingly, keeping its momentum up in a complex dance. The samurai rolled back to his feet, only to find the chain wrapping around his arm, pulling him off balance, and more chains fell upon his neck and other arm, restraining him. "A good choice", Jack reflected silently.

Adaptation

This TRACK can represent a master of the gun or bow as easily as a blademaster. Exotic weapons can be a normal weapon used with an advanced style. Combining an exotic weapon with the ancestral weapon feat can yield a character with an extremely special weapon.

First Facet★

Skilled Fighter [WO]: *Your precision only rises with your skill.*

As a major action, you may make 2 STRIKES that deal 13|15|18|20 damage. The STRIKES have a +C - 3 modifier to hit. **Boost**: These STRIKES deal 3|3|3|4 extra damage per hit.

Deadly Maneuvers: *You make attacking into an art form.*

Before you use Skilled Fighter, you can choose a combat maneuver. Push and grapple may only be used with a melee attack. If either STRIKE hits, you may use the chosen combat maneuver, which always succeeds

Combat Maneuvers:

- **Trip** Makes your target PRONE.
- **Grapple** Makes the target GRAPPLED by you.
- **Push** FORCE your target one hex in any direction. You can move with them if you choose.
- **Hamper** Inflicts DISABLED. Your target may spend a STEP to remove this DISABLED.

Surge [W]: As a SURGE, you may make a STRIKE that deal 15|18|21|24 damage. The STRIKE has a +C - 3 bonus to hit **Boost**: Increase the damage by C + 2

Second Facet★

Diverse Training: *Your intense training gives you more abilities.*

You may gain an additional Feature.

Exotic Weapon Mastery: *You have learned the art of wielding strange weapons.*

You may wield any exotic weapon and use all of its properties.

Third Facet★

Bravery: *Laugh in the face of danger.*
You are immune to [FEAR].

Favored Weapon: *While you are highly skilled with all weapons, there is still one you like best.*
Pick any weapon you possess. This choice can be

changed between encounters. Whenever you miss with this weapon on your major action, you gain an EDGE on your next attack this weapon.

Fourth Facet★

Pounce: *Sometimes a bit of speed is all you need.*
Once per encounter, you may DASH 6 hexes before making your attack. This can be used in combination with a charge.

Firm Grip: *Your weapon is practically an extension of your body.*
You cannot be disarmed.

Fifth Facet★

Worldly Knowledge: *You know a diverse array of fighting styles.*

Pick 3 features. You possess one of these features, and can switch it to another one of them with a minute of effort. These features cannot be used as prerequisites for other features, but if you gain one of these features you may select another feature to replace it in this pool.

Improved Combat Maneuvers: *Your attacks used to be art, now they are fine art.*

When you would use the combat maneuvers from Deadly Maneuvers, you may use the following abilities instead.

- **Improved Trip**: The target is knocked PRONE and cannot stand without provoking.
- **Improved Push**: The target is FORCED 6 hexes in any direction. You may move with them.
- **Improved Grapple**: The target is GRAPPLED by you and cannot use TELEPORT or WARP effects while GRAPPLED by you.
- **Improved Hamper**: The DISABLED cannot be removed with a STEP.

Sixth Facet★

Dual Blows: *You absolutely dominate your opponent.*

If both STRIKES hit when using Skilled Fighter, you may select 2 effects from Improved Combat Maneuvers to apply.

Seventh Facet

Master of Combat: *You are able to invent new styles on the fly.*

You gain an additional feature. This feature may be changed with 1 minute of focus.

Unstoppable Assault: *It's hero time.*

Once per encounter, without taking an action, you may begin an unstoppable assault. For the next 2 rounds, you are immune to SLOW, STOPPED, DIZZY, difficult terrain, FORCED movement, and any effect that increases the STEP cost to enter a hex, and any ability that would prevent you from entering a hex.

Chivalric Knight

Major Defensive

Others may fight with reckless abandon, but you are a man of honor, and conduct yourself in combat accordingly.

The Knight Erratic stepped forward to face the sellsword. "Your fight is with me." A barking laugh returned, as did a flurry of poisoned knives. They fought, their focus on each other, the Knight Errant ignoring the poison blows with the fervor of the duel. As they dueled, the Knights escort escaped the battlefield. The sellsword noticed and tried to break off, but taking his focus off of the duel cost him greatly. It cost him his life.

Adaptation

This can represent any kind of honor-bound warrior

First Facet★

Guarded Strike [WOS]: *Your blows only strengthen your resolve.*

As a Major action, Make 2 strikes that deal $2 \times C$ damage each, and gain $2 \times C$ TEMPORARY HIT POINTS per hit. **Boost:** +2 to hit

Binding Oaths: *You hold yourself to a number of oaths of conduct, and find yourself wanting if you fail to follow them.*

Pick an Oath from the list below. You become Dishonored until the end of the encounter if you break an oath. Every additional facet you get, you may pick an additional oath.

Duel: *You and me, mano a mano.*

Once per round, on your turn, when not already in a duel, you may select an opponent to duel. Your target priority is always raised to this enemy, and theirs is raised to you, but your target priority is lowered to everyone else, as is theirs. Either of you being attacked in violation of this priority causes the other to be STUNNED, and either of you attacking someone else in violation of this priority causes the one violating priority to be STUNNED and OFF GUARD. This lasts until one of you is dropped or this target priority is violated. You get an EDGE when attacking your opponent in a duel.

Surge [WS]: *Your weakness is my strength.*

As a SURGE, you may make a single STRIKE with +1 to hit that deals 7|9|12|14 damage. You gain TEMPORARY HIT POINTS equal to the damage delivered. **Boost:** +4 to hit.

Second Facet★

Duelist's Gaze: *Your opponent can't focus on anyone but you.*

The opponent you are dueling is OFF BALANCE to anyone other than you.

Knight's Charge [WOS]: *That's gotta sting.*

As a major action that must be used with a charge, you may move twice as far and make a single attack at +2 to hit that deals $5 \times C + 1$ damage, gives your opponent 2 PENALTIES, and knocks them PRONE on a hit.

Third Facet★

Defender's Flank: *You utilize the distraction of your opponent to better defend yourself.*

When you would gain an EDGE from flanking, you may instead choose to gain an EDGE against the next attack from the flanked target.

Winning Blow: *When the chance to seize victory arises, you must grasp it.*

When in a duel, you may use your TEMPORARY HIT POINTS as ENERGIZED against the opponent you are dueling if doing so would let you drop them.

Fourth Facet★

Debilitating Blows: *Your blows leave your opponent unable to attack properly.*

If both strikes from Guarded Strike hit, the opponent becomes DISABLED.

Fifth Facet★

Valorous Stand: *I stand here, and with the strength of my conviction, I tell you "No."*

Once per encounter while not Dishonored, as a major action you may declare yourself to be taking a Valorous Stand. For the next round, you inflict STOPPED on any enemy entering a hex in your melee range. You gain $4 \times C$ TEMPORARY HIT POINTS. **Boost:** Gain another C TEMPORARY HIT POINTS.

Duelists Edge: *I know your tricks and they shall not avail you.*

Each round, you become SHIELDED 1 against the opponent you are dueling. This expires at the beginning of your next turn.

Sixth Facet★

Conviction's Strength: *I shall not be held down.*

Once per encounter while not Dishonored, you may suppress one lesser condition currently effecting you per oath you took, for as long as you are not Dishonored. This does not protect against the same condition being applied again.

Crashing Wake: *I strike at you with all the weight of my convictions.*

When you hit with Knight's Charge, the opponent must make a defense roll or be STUNNED.

Seventh Facet★

Flash Duel: *Let's end this quickly, shall we?*

For one round per encounter per two oaths you have sworn, while not Dishonored and while in a duel, you may have a flash duel. Both you and your opponent simultaneously get a turn to attack each other, and cannot target anyone but each other. You may trigger this on your turn.

Final Valor: *I said "NO."*

You may make a SURGE against any opponent entering your melee range while using Valorous Stand

Oaths

Nonaggression: *I'm not going to start trouble, but I will finish it.*

Taking an offensive action before any enemy has taken an offensive action in combat causes you to be Dishonored. You may delay your turn in combat if necessary.

While not Dishonored, the target of Guarded Strike may be FORCED 1 hex in any direction or knocked PRONE.

Honor The Fallen: *The fight is over when they can't attack back.*

Attacking a downed foe causes you to become Dishonored. Violating this oath causes you to start the next encounter Dishonored. While not Dishonored, you may leave opponents you down at 0 HP and gain BLOODLUST for the remaining damage.

Badge of Courage: *We do not slink in the shadows,*

we stand face to face.

Using Stealth causes you to be Dishonored. While you are not Dishonored, you are Immune to [FEAR].

No Honor in Backstabs: *You shall see my blade coming for you.*

Prerequisite: Defenders Flank

If you gain an EDGE from flanking or attacking a SITTING DUCK, you become Dishonored. While you are not Dishonored, you cannot be flanked while in a duel.

Protector's Oath: *I shall not let another come to harm if I can stop it.*

While not Dishonored, you may elect to become the target of any attack that would attack an ally within your melee range. If you are able to use this and do not, you become Dishonored.

Binding Duel: *I said you and me, and I mean it.*

Violating the target priority of a duel causes you to be Dishonored. While not Dishonored, the person you are dueling must spend an extra STEP for every hex they move away from you

Oath of Mercy: *If you surrender, no harm shall come to you.*

You cannot attack an enemy that has surrendered. Violating this oath causes you to start the next encounter Dishonored. While not Dishonored, you cannot be attacked while WOUNDED, directly or indirectly, unless all of your allies are also WOUNDED.

Judicious Restraint: *Its not sporting to attack someone when they are distracted.*

Taking a reaction causes you to be Dishonored. Whenever you forgo taking a reaction, you may instead become ON GUARD 2.

Chronomancer

Major Defensive

You toy with time, bending it to your will, giving more to some and taking it from others.

Tim jumped as an angry barbarian leapt from the bushes screaming. Tim blinked, then tossed a handful of hourglass sand at them. The barbarian's movements suddenly slowed, and his ax swing coming down was in slow motion, allowing Tim to step out of the way. Tim blinked. An angry barbarian leapt from the bushes screaming. Susanne was ready, and an arrow struck him in the chest. Time spun his hourglass around, and that same arrow struck him once again. Tim blinked. An angry barbarian leapt from the bushes screaming. Tim blinked. An angry barbarian leapt from the bushes screaming. Tim blinked.

Adaptation

This can be a high tech ability or a superpower.

First Facet

Stasis [RmSO]: *You slow down a creature's progression through time.*

As a major action, give an enemy within 12 hexes 2 PENALTIES, OFF GUARD 2, and everything they do requires twice as many steps to complete for their next turn. **Boost**: Increase the PENALTIES or OFF GUARD by 1

Snapshot: *You will remember that.*

Once per round, at any time, even during another creature's turn, including in the middle of their movement, you may mark a creature's current location. This is their snapshot. If they already have a snapshot, their existing snapshot is replaced with the new one.

Retract [RSO]: *You violently thrust a creature through time.*

As a major action, choose a snapshot within 6 hexes of you. The creature associated with that snapshot WARPS to that snapshot, and takes $3 \times C$ damage and becomes WEAKENED $2 \times C$. **Boost**: Increase the damage by C or the WEAKENED by C .

Reset [RS]: *You kindly send a creature through time.*

As a major action, choose a snapshot within 6 hexes of you. The creature associated with that snapshot WARPS to that snapshot, receives 2 BOOSTS becomes ON GUARD 2. **Boost**: Add another BOOST or ON GUARD

Surge [S]: A creature within 12 hexes takes $2 \times C$ damage, a PENALTY, and is SLOWED 1 for 1 round.

Boost: Add another PENALTY.

Second Facet★

Repeat [S]: *Do it again.*

Once per encounter, as an immediate major action after an ally uses a SURGE, you may have that ally become energized $2 \times C$ and use that surge again. **Boost** increase the ENERGIZED by C .

Chrono Shift: *You nudge people out of the normal flow of time.*

Whenever you target an ally with an ability from this track, they gain 1 speed for the rest of the encounter. Whenever you target an enemy with an ability from this track, they become SLOW 1 for the rest of the encounter. This SLOW does not apply while under the effect of Stasis.

Third Facet

Time Out: *Why should time travel be instant?*

Once per encounter, when you use reset or retract, you may have the target temporarily disappear from the timestream. When a creature warps from the Retract or Reset ability, they do not appear at the chosen destination immediately. Instead, they reappear when they take their next turn. In the meantime, they cannot take any immediate actions or take reactive surges, but they also cannot be affected by any ability. It is as though they do not exist until they begin their next turn. This ability is optional, you can have them reappear immediately instead.

Renew: *You can reset more than their position.*

When you create a snapshot, also note the conditions the creature had. When you use Retract on a creature, you may inflict any lesser condition on that creature that it's snapshot has that it no longer has. Additionally, if that snapshot recorded a greater condition that it no longer has, you may inflict that condition instead of the $2 \times C$ WEAKENED.

Remove: *Back to a happier time.*

When you use Reset on a creature, remove a lesser condition that the snapshot didn't have. Additionally, if that creature is affected by a greater condition that the snapshot did not have, you may end that condition instead of applying ON GUARD. Or, if they have less hp then when the snapshot was made, you can heal them $2 \times C$, to a max of the hp they had when the snapshot was made, instead of applying ON GUARD.

Fourth Facet★

Redo [S]: *Did reality just stutter?*

Once per encounter, as an immediate major action after an ally uses a minor action, they may use that minor action again twice. **Boost**: Give the ally a boost on one of the actions.

Granted Moment [R]: *Just a pocket of time.*

As a major action, an ally within 12 hexes gains 6 STEPS, and may either make a SURGE and a minor action, or take a major action, their choice. **Boost**: the targeted ally gains a BOOST

Fifth Facet

Time in: *Lost in the timestreams.*

You may use Time Out any number of times per encounter.

Time Frame: *Just some slight temporal slippage, nothing to worry about.*

When you target a creature with an ability from this track, you may have them either go before the creature that would otherwise precede them in the turn order, or after the creature that would otherwise follow them in the turn order.

Sixth Facet★

Paradoxical Moment: *Who cares what is happening now.*

You may use Granted Moment on WOUNDED crea-

tures. During these granted actions, they are not considered WOUNDED.

Seventh Facet★

Parallel Timelines [S]: *A bit of extra juice to your spell.*

Once per encounter, as an immediate major action at the beginning of an ally's turn, that ally splits in two. Each copy of that ally takes their turn as normal, but with a PENALTY each. (If they had any other BOOSTS or PENALTIES, or any conditions, those only affect one of them). At the end of that ally's turn, one is declared to be the copy and disappears and any effects affecting him transfer to the other, who is the original. If the copy took damage, the original takes that damage.

Hexer

Major Defensive

Bring pain and suffering to your foes by zapping them with a variety of debilitating magics.

The witch cackled as the witch hunters approached her. "Come quietly and it would be easier on you," they demanded. She uttered a dark incantation in response, and one of them started screaming. Boils and sores sprouted from his skin, as he started clawing at his flesh. The other hunters hesitated, and she uttered another phrase. With a magical cloud of smoke, another witch hunter was transformed into a frog. The last one dropped his sword and ran.

Adaptation

This can represent a witch, a dark wizard, a warlock, a necromancer, or someone who uses a variety of weakening poisons.

First Facet★

Cripple[RmO]: *Death energy courses through your victim.*

As a major action, a creature within 12 receives $3 \times C$ damage and PERSISTENT SLOW 1 and PERSISTENT WEAKENED C for 2 rounds each. **Boost:** Inflict an additional 2|2|3|3 damage and an additional 1|2|2|3 WEAKENED .

Surge: As a SURGE, deal $2 \times C$ damage and inflict C WEAKENED to a creature within 12 hexes. **Boost:** Increase the weakened by C

Enfeebling Aura: *Even your mere presence brings pain.*

Enemies that end their turn adjacent to you become SLOW 2 for 1 round and gain 1 DISABLED.

Second Facet★

Ray of Fatigue[RmO]: *You fire out a magical ray that causes its target to feel exhausted.*

As a major action, STRIKE a creature within range 12. On a hit, they receive $3 \times C$ VULNERABILITY , DISABLED 1, and are DEPLETED. On miss, they take one PENALTY, half the VULNERABILITY , and have a -2 modifier on defense rolls against combat maneuvers **Boost:** Inflict C additional vulnerability.

Defilement: *Your dark magics corrupt the land.*
At the beginning of each round, gain a RIDER that afflicts the hex containing the target on a hit. Creatures that end their turn in these hexes are CORRUPTED 1 and are DISABLED 1.

Third Facet★

Bloodblight[RO]: *You inflict a blight upon your victim's blood.*

As a major action, a creature within 12 becomes CORRUPTED 2, 5|6|8|9 ONGOING , and BLEEDING $2 \times C$. **Boost:** Inflict an additional CORRUPTED.

Curse: *You invoke the dark tongue to bring greater pain upon your victims.*

Once per encounter, you may gain a RIDER that inflicts PERSISTENT SLOW 2 and BLIND 6 for 3 rounds each and 2 DISABLED.

Fourth Facet★

Confusion[RO][Mental]: *Your victim's focus and clarity is shattered.*

As a major action, a creature within 12 must make a defense roll or become DIZZY 3, OFF GUARD 2, and WEAKENED $3 \times C$. Success reduces to OFF BALANCE, OFF GUARD 1 and half the WEAKENED . **Boost:** Inflict an additional OFF GUARD , or an additional C WEAKENED . If you have two boosts, inflict both.

Defiled Footsteps: *Your very passage can defile the land.*

When you leave a hex, you may spend an additional STEP to afflict it with Defilement.

Fifth Facet★

Binding Chains[RO]: *You conjure ghostly chains to bind your victim and prevent their escape.*

As a major action, you may cause a creature within 12 to become TETHERED 6 and FORCED 2 hexes closer to another creature or solid surface within 6 of the target. The target becomes OFF GUARD 2 and gains an EQUIPPED item with $2 \times C$ HIT POINTS which is not bonded to anyone. When this item is destroyed, the TETHERED ends. At the beginning of your next turn, if the EQUIPPED item is not destroyed, the target is again forced 2 hexes toward the tether point, takes $2 \times C$ WEAKENED , and the EQUIPPED item harmlessly destroys itself. **Boost:** Inflict an additional OFF GUARD .

Parting Curse: *You have a cruel, vindictive streak.*
When you become WOUNDED, the last creature to damage you suffers the effect of Curse.

Sixth Facet★

Blindness[RO]: *Your curse robs your victim of sight.*

As a major action, a creature within 12 must make a defense roll or become BLIND 2 for 2 rounds and take a PENALTY and 2 OFF GUARD at the beginning of each of their turn for 2 turns. If they succeed the defense roll, they are instead BLINDED 6 for 1 round and are OFF GUARD 1. this is a [SENSELESS] effect. **Boost:** Inflict an additional PENALTY or OFF GUARD on the first round. If you have two boosts, inflict both.

Widespread Defilement: *Your corruption spreads ever further.*
Defilement now afflicts all adjacent hexes as well as the targeted hex.

Seventh Facet ★

Amphibitize[RO]: *You invoke the most classic of all curses.*
Once per encounter as a major action, give 2 PENALTIES, OFF GUARD 2, SLOW 3, and maximum DISABLED

to an opponent within 12. Additionally, you disable the effects of any artifact weapons or armor they are wielding or wearing, and if the target has any monster tactical abilities, replace up to 2 of them with Jumper. At the beginning of your next turn, they may make a defense roll. If they fail, you may spend a major action to have the effects persist for an additional round. If they succeed or you do not spend the action to increase the duration, the effects immediately end and their amount of disabled is halved.
Boost: Inflict an additional PENALTY or OFF GUARD . If you have two boosts, inflict both.

Human Shield

Major Defensive

You can manifest a holy barrier that confers a truly divine level of protection. This barrier is often not physical. It's an extension of the wielder's soul, and can overlay other physical shields.

Sir Virilian saw the incoming hail of arrows. "Get back!" he said, throwing himself in front of the princess. He weathered the onslaught, and drew his hammer. A quick prayer, and holy energy surged through it, a cosmic reward for his selflessness.

Adaptation

This could also be a shapeable energy field that absorbs damage and turns it into lasers, or a supernatural revenge ability.

First Facet★

Hunker Down [S]: *Ready to weather the storm of violence.*

As a major action while not charged, you may gain $4 \times C$ RESISTANCE, and block LINE OF EFFECT and movement for enemies through your hex and up to two hexes adjacent to you that are not occupied by enemies or adjacent to each other until the start of your next turn. These cannot block LINE OF EFFECT to you. You can't take any further movement and cannot be FORCED or DIRECTED, nor can you be a SITTING DUCK until your next turn. Your target priority is raised for 1 round, and enemies cannot target allies with a lower target priority than you. After using this, you are charged. After this round, any remaining RESISTANCE from this ability becomes ENERGIZED instead. **Boost:** You gain an additional C RESISTANCE.

Searing Smite [WO]: *Violently and offensively discharge built up energy.*

As a major action while charged, you can make two STRIKES that deal $4 \times C + 1$ damage. You cease to be charged. **Boost:** +2 to hit.

Crusader's Conviction [WSO]: *The resolve of your foes only fuels your own.*

As a major action, you may make 3 STRIKES at +1 to hit that deal 5|7|8|10 damage. You gain TEMPORARY HIT POINTS equal to the damage delivered. If you have ENERGIZED, you may half the increased damage to gain half of it as TEMPORARY HIT POINTS.

Boost: +3 to hit

Surge [WS]: *Even your side blows empower you.*

As a SURGE, you may make a single STRIKE with +1 to hit that deals 7|9|12|14 damage. You gain TEMPORARY HIT POINTS equal to the damage delivered. **Boost:** +4 to hit.

Second Facet★

Front Line Dash [H]: *You can build up a dash-ing, dramatic shield charge to be where you're needed most.*

At the beginning of your turn, you get an extra STEP for every even facet you possess in this TRACK. These extra STEPS can only be used as part of Hunker Down or Searing Smite, to DASH immediately before activating either ability, and you cannot spend regular STEPS after using this.

Burning Smite: *That's gotta sting.*

If you hit with both STRIKES from Searing Smite, inflict IGNITED $2 \times C$.

Third Facet★

Blockade: *You halt those fleeing from you in their tracks.*

When you successfully hit a target with a REACTION, they are STUNNED for 1 round.

Momentum: *Slow except when you're not.*

When you use Front Line Dash, you are immune to SLOW and STOPPED while using that movement.

Charged Compass: *Tunnel vision of JUSTICE.*

While charged, you are immune to DIZZY.

Fourth Facet★

Reactive Shield: *Just in the nick of time.*

You can now use Hunker Down as an immediate major action. The effects that normally last until the start of your next turn now last until you use another major action.

Staggering Shield *You are the enemy of your enemies momentum.*

Once per target, if you hit a target with both STRIKES from Searing Smite, they are STUNNED for 1 round.

Fifth Facet★

Shared Conviction: *Your battle fervor is a terrifying inspiration to your allies*

You may grant the TEMPORARY HIT POINTS gained from Crusaders Conviction to any ally within your LINE OF SIGHT.

White Hot: *Burn, heathen, burn.*

Burning Smite only needs one hit to work.

Sixth Facet★

Eternal Guard: *When others reach for a sword, you reach for a shield.*

You can use Front Line Dash when using Reactive Shield despite it being a [H]eavy ability as long as you end up in front of an attack.

Seventh Facet★

Dramatic Dash: *Your place is in the front, whether your enemies comply or not.*

When you use STEPS from Front Line Dash, you can move through enemies. Each enemy you move

through is moved to the nearest unoccupied hex.

Holding the Line: *Not even death can stop you from stopping them.*

If you are WOUNDED while using Hunker Down, you delay being WOUNDED until the start of your next turn.

Judo Master

Major Defensive

The judo master learns to turn an enemies efforts against them.

Felicia adjusted her stance as the dwarf charged at her, and caught his arm as he neared. With a certain twist and a shift to her balance, the dwarf was thrown well past her. He stood up, and approached more cautiously. He swung his axe again, and she stepped in, grabbing it by the haft and kicking him in his gut.

A Judo Master is a martial artist who uses their opponent's own attacks against them, using techniques known as Kaeshi-waza, counter techniques.

Adaptation

This can represent any combat style where negating and countering enemy attacks is at the forefront.

First Facet★

Judo [WSO]: *Your attacks are designed to keep you ready to counter incoming blows.*

As a major action, make 3 STRIKES with a +1 to hit that deal 5|6|8|9 damage. You earn a yuko for each hit. **Boost:** +3 to hit.

Kaeshi-waza: *Your training focuses on Kaeshi-waza, the counter techniques.*

When you are attacked, you may spend Yuko to execute Kaeshi-waza, such as Basic Block.

➤ **Basic Block:** You may spend a Yuko to prevent C damage.

Martial Artist: *You are trained to fight with the empty hand.*

Your unarmed attacks have 2 weapon properties of your choice and you do not provoke reactions when using them.

Surge [WS]: As a SURGE, you may make 1 STRIKE with +1 to hit for 11|14|18|22 damage. You gain a Yuko if this hits. **Boost:** +4 to hit.

Second Facet★

Immediate Kaeshi-waza [WSO]: *Your entire training is focused on responding to enemy attacks and coming out ahead.*

As an immediate major action, you may use Judo against an opponent who just attacked you, and spend any Yuko earned on Kaeshi-waza against the attack you are responding to. **Boost:** +3 to hit.

New Kaeshi-waza: Learn a Kaeshi-waza from the Kaeshi-waza list.

Third Facet★

Defender's Kaeshi-waza: *It takes a slightly different form, but you can extend your protection to nearby allies.*

You may use Kaeshi-waza against enemies attacking allies adjacent to you as if they were attacking you.

New Kaeshi-waza: Learn a Kaeshi-waza from the Kaeshi-waza list.

Fourth Facet★

Spellbounce [Rm]: *Tapping into the mystical side of your training, you can deflect a spell intended for*

you.

As an immediate major action against a non [O]verwhelming ability, you may negate the attack against you, then attack the source of the ability with that ability as if they had targeted themselves. This can only be used against a given opponent once per encounter.

New Kaeshi-waza: Learn a Kaeshi-waza from the Kaeshi-waza list.

Fifth Facet★

Countersurge: *You are keenly aware of the openings others create, and so the opponenings you present, and how to close them.*

If you have at least 1 Yuko, you may negate a REACTION taken against you once per round.

New Kaeshi-waza: Learn a Kaeshi-waza from the Kaeshi-waza list.

Sixth Facet★

Stolen Energy: *You can channel the energy used against you.*

If you would gain an ENERGY EFFECT, the next opponent you hit with Judo gains that condition.

New Kaeshi-waza: Learn a Kaeshi-waza from the Kaeshi-waza list.

Seventh Facet★

Ultimate Defense: *You have reached the pinnacle of your art.*

As a Kaeshi-waza, before the attack is resolved, you may spend 2 Yuko to negate the attack. If the attack is [O]verwhelming it requires 4 Yuko.

Kaeshi-waza

➤ **Sidestep:** As part of an immediate Kaeshi-waza, Spend 1 Yuko to gain a 50% dodge chance against the attack. If the attack is [O]verwhelming, this requires 2 Yuko. You may DASH 1 hex after this is resolved.

➤ **Disarm:** When attacked by a melee weapon, you may spend 2 Yuko to disarm it. You may begin wielding that weapon, dropping any

weapon you were wielding at your feet. This prevents $2 \times C$ damage from the attack

- **Step In:** When attacked in melee, you may spend a Yuko to GRAPPLE the opponent. This gives the attacker a PENALTY.
- **Flip:** When attacked with a melee attack, you may spend 1 or 2 Yuko to give that attack one PENALTY per Yuko. You may FORCE the target to the hex on the opposite side of where

they are attacking from. If they moved prior to attacking you this round, you may FORCE them 1 hex away from you per 2 hexes they had moved. They must make a defense roll or become PRONE. You negate the EDGE of MOMENTUM ATTACK when using Flip against them.

- **Weakening Palm:** You may spend a Yuko to inflict C WEAKENED . This can be done immediately after using Judo on an opponent, as well as being a kaeshi-waza.

Necromancer

Major Defensive

As a necromancer you toy with the concept of life and death.

The zombies shuffled forward, and Susan took them out one by one with a series of shotgun blasts. Before she even had time to catch her breath, they were climbing back to their feet. One came from behind, and bit her on her shoulder. She screamed, and fled down an alley. At the end of it was a massive shape, masked in the shadow. She stopped, and it rose up, stepping into the light, revealing itself to be a skeletal dragon.

Adaptation

This can be a horde of other things, such as robots and cyborgs, or people controlled by a technovirus.

First Facet★

Hordelings: *Cheap. Disposable. Replaceable.*

You have a number of basic undead. These are melee extras (pg. 163) that act on your turn. When destroyed, they leave a hordeling body in their hex. You start with *C* hordelings, plus 1 per facet in this track. They may have a natural melee weapon and carry 3 weapons.

Reanimate: *Reusable.*

2 hordeling bodies may become hordelings each turn. They can take no other action that turn.

Empower Undead: *You channel necrotic energy to elevate one of your minions above a shambling flesh-sack.*

You may spend a major action to empower a hordeling or hordeling body within 12 hexes. They gain $2 \times C$ HIT POINTS, and can no longer be killed by a STEP. A body reanimated in this way may immediately act. An empowered undead has the mook version of Basic Attack, Precise, or Flurry, at your choice, but without their associated basic effect. They may use this attack as a SURGE, and only as a SURGE. When you Empower then, they may use a SURGE. Empowered undead reduce all damage taken by *C* as a COUNTER. If they would take no damage before this counter, they instead gain a BOOST. An empowered undead counts as a SUMMON. **Boost:** the empowered undead gains a BOOST.

Unleash Empowered Undead: *Your allow your empowered undead to attack.*

As a major action, you can have 2 empowered undead take a SURGE. **Boost:** Grant one of the undead a BOOST.

The Horde Persists: *Your undead minions continue to act without you.*

Even after you are WOUNDED, your hordelings continue to act as extras, but they do not Reanimate. Your empowered undead can make a total of 3 attacks a round, split among them as you wish.

Delegated Surge: As a SURGE, you may have an empowered undead use a SURGE against the target. **Boost:** your undead gains a boost on their SURGE.

Surge: As a SURGE, you may deal 11|15|19|23 damage to a target within 12 hexes. A defense roll halves the damage. **Boost:** increase the damage by 4|5|6|8

Second Facet

Specialized Undead: *You can raise the bodies of monsters to enhance your horde.*

Between encounters, when you have access to a corpse of a creature built with the monster rules, you may create a specialized undead from that monster. This takes the place of a hordeling, and functions as a hordeling, except it possesses the tactical abilities of the original monster, and when empowered it can use the mook version of any of its monster majors as its SURGE.

You may have 1 specialized undead in your horde.

Third Facet★

Recycling: *You can raise the bodies of those fallen in combat.*

You may treat killed or WOUNDED creatures as hordeling bodies. A wounded creature controlled as a result of this is not killed, but rather cannot resist your control over their body. Anything that would make them stop being WOUNDED will break your control. They function as a specialized undead, if they qualify, otherwise they act as a hordeling. They do not count against your limit of specialized undead for the duration of the encounter.

Littering: *The bodies of your minions litter the battlefield.*

Hordeling bodies are difficult terrain.

Fourth Facet★

Resurgence: *You can reanimate a greater number of minions.*

Reanimate effects up to 4 hordeling bodies each turn.

Expanded Team: You may keep 2 specialized undead.

Full Power: *You harvested this monster for a reason.*

As a major action, you may have an empowered specialized undead use the full version of their monster major ability instead of the mook version. **Boost:** the empowered undead against a BOOST on their action.

Fifth Facet★

Greater Hordelings: *You are able to create a slightly more powerful type of hordeling.*

Your hordelings all have a tactical ability allowed to extras. This is the same ability for every hordeling, except for specialized undead.

Sixth Facet ★

Lich: *Your soul passes on to an undead form.*
When you are WOUNDED, if you have an empowered undead, you may take control of it, and can use your abilities from its body. The Horde Persists does not apply while you are controlling an undead.

Seventh Facet

Endless Horde: Reanimate effects up to 6 hordeling bodies each turn.

Dream Team: You may have 3 specialized undead.

Bodysnatch: *Your possession is complete.*

If you use Lich on a specialized undead, you may use any abilities it had in life for the appropriate action cost, including from any tracks it had.

Sharpshooter

Major Defensive

You are a snap shot, capable of shooting projectiles out of the air and interfering with other attacks.

Wyatt stood in the center of main street, staring down Bad-eye Brady. "Draw!" someone shouted, and both went for their guns. Bad-eye fired, and there was the simultaneous sound of two gunshots, and two bullets hit the ground, fused together. Before he could fire again, there was a third gunshot, and Bad-eye fell to the ground, clutching a bullet wound in his belly.

Adaptation

This can be a cowboy, or a Robin-Hood-esque archer.

First Facet★

Counter-Shot [WS]: *You shoot another's attack out of the air.*

As an immediate major action with a ranged weapon, you may prevent a ranged single target ability from affecting your ally if they or the attacker is within your range. If it's [O]verwhelming, this has a 50% chance of working. If the attack had BOOSTS and was negated, the attacker keeps those boosts. You may then make a Snap Shot at a target of your choice.

Boost: Give Snap Shot a BOOST. This can grant Snap Shot up to 2 BOOSTS.

Crippling Shot [WO]: *You shoot to cripple.*

As a major action, you may make a Snap Shot. If it hits, it also causes 9|12|15|18 WEAKENED. **Boost:** Give Snap Shot a BOOST or increase the WEAKENED by 5|6|8|9.

Snap Shot [W]: *You fire off a quick, accurate shot.* Make an attack at +1 to hit that deals 14|18|23|28 damage. **Boost:** Deal an additional 5|6|8|9 damage.

Surge: Take a Snap Shot.

Second Facet★

Angel of Protection: *You keep an eye out for others.*

Each round, you may declare an ally to be protected by you. Their target priority is lowered for 1 round. If an enemy attacks them with a ranged attack when there is a higher priority target, you may use Counter-Shot in response to the attack without taking an action.

Interference! [WO]: *You shoot an enemy as they attack to mess them up.*

As an immediate major action with a ranged weapon, you may shoot an enemy as they attack. Make a Snap Shot against that enemy. If it hits, the enemy takes 3 PENALTIES, including on their current attack. **Boost:** Grant Snap Shot a BOOST. Snap Shot can use up to 2 BOOSTS this way.

Third Facet★

Redirection Shot: *You shoot a shot out of the air with such precision it hits a new target.*

As an immediate major action with a ranged weapon, you may change the target of a ranged ability used by another person that is targeting you or your ally. If it's [O]verwhelming, this has a 50% chance of working. If the target's COUNTER targets the attacker, it targets you. If the attack had BOOSTS, the redirected attack does not and the attacker keeps their BOOST. **Boost:** Give the redirected attack a BOOST.

Fourth Facet★

Ricochet Counter: *You are already shooting bullets out of the air, what a few ricochets along the way.* You may use indirect LINE OF EFFECT with Counter-shot, and the corresponding Snap Shot.

High Caliber Wound: *Your shots can leave enemies bleeding out.*

Twice per encounter, Snap Shot may inflict BLEEDING C on a hit.

Fifth Facet★

Greater Protection: *You can protect others in more ways.*

Angel of Protection can work when an ally is attacked by any type of attack. If it's not a ranged attack, you use Interference! against the attacker.

Sixth Facet★

Storm Bolt: *Your attack carries extra weight.*

Once per encounter, when you hit with Snap Shot, you may cause your target to be STUNNED.

Seventh Facet★

Roving Protection: *Your protection covers everyone it needs to.*

You may declare any number of allies to be protected when you use Angel of Protection.

Swashbuckler

Major Defensive

Swashbucklers are masters of parrying enemy attacks.

Indigo drew his rapier and stood ready for his opponent. His opponent did likewise, and moved in for a strike. Indigo deftly parried the blow, and struck a blow of his own. He opponent cursed and went in for an overhead strike, and once more Indigo parried. Strike after strike, swords clashed, and Indigo landed his own on every opening.

Adaptation

This can represent a ninja, samurai, or a Tai Chi master.

First Facet★

Swordplay [WSO]: *Your attacks are careful and keep you protected.*

As a major action, make 2 STRIKES with +2 to hit that deal 7|9|11|14 damage. If any attack hits, you become ON GUARD and the enemy receives a PENALTY. **Boost:** Either increase the ON GUARD amount by 1 or give an additional PENALTY.

Preemptive Strike [WSO]: *You strike decisively to counter your opponent's attack.*

As an immediate major action when an enemy makes an attack against you with a melee weapon, you may make 2 STRIKES against that enemy with a +2 to hit that deal 9|11|14|17 damage. Additionally, if both STRIKES hit, the enemy's attack misses you. If the attack was not [O]verwhelming, and both your STRIKES hit, the enemy receives two PENALTIES. **Boost:** If either STRIKE hits, deal *C* additional damage.

Surge [W]: As a SURGE, make 2 STRIKES with +2 to hit that deal 6|9|11|13 damage **Boost:** Increase the damage by 2|3|4|4.

Second Facet★

Deflection [OS]: *You strike an incoming attack out of the air.*

As an immediate major action, when an enemy makes an [O]verwhelming attack against you with a ranged [W]eapon, you may make 2 STRIKES with a +2 to hit. If only one STRIKE hits, the attack is redirected towards another ally in range, chosen randomly. If both STRIKES hit, the attack is instead made against another creature of your choice within range of that attack, which can be the original attacker. **Boost:** If both of your STRIKES hit, the target of the attack takes $2 \times C$ damage.

Third Facet★

Wounds: *Your strikes land true and inflict gashes.* When you use the swordplay ability with a melee weapon and hit with at least 2 STRIKES, the target begins BLEEDING *C*.

Disrupting Parry: *Countering your opponents attacks throws off their groove.*

When you use Preemptive Strike, if you hit with both strikes, the attacking enemy may choose to become

OFF BALANCE. If they do not, they become OFF GUARD.

Fourth Facet★

Flourish: *You deflect attacks with style.*

When you use Deflection to redirect an attack, you may add a BOOST you have to that attack. If you do, that enemy becomes OFF GUARD.

Fancy Sword: *Just the fanciest.*

You may gain a BOUND magic weapon with 2 enchantment points as a bonus item, or make an existing magical weapon BOUND to you and upgrade it 2 pts, as per the Attuned Item feature. This weapon must be a melee weapon.

Fifth Facet★

Deflect Spells: *Your skill is so deft it can affect magic.*

When you would be the sole target of an [O]verwhelming ranged ability that is not a [W]eapon attack, you may use deflection on that attack as though it was an attack with a ranged weapon.

Slice in Twain [OS]: *You hold out your blade and slice the explosion in half.*

When an enemy uses a ranged area of effect ability, if you are in the area of effect, you may make two attack rolls as an immediate major action. If you only hit with one attack roll, you cut the effect in half. Randomly choose two allies within 6 hexes of you. Instead of the intended targets, those two allies are affected. If you hit with both attack rolls, instead choose 2 enemies at random within 6 hexes of you.

Boost: If both attack rolls hit, one of the new targets takes $2 \times C$.

Sixth Facet★

Shockwaves: *Your blade moves so fast it creates devastating shockwaves.*

When you miss with a STRIKE from Swordplay or Preemptive Strike, you may have each hex adjacent to the attacked enemy become difficult terrain.

Seventh Facet★

Defender of All: *You apply your blade to defend your allies as well as yourself.*

SWASHBUCKLER

When an ally within 3 hexes of you would be attacked, as an immediate major action, you may DASH up to 3 hexes to a hex adjacent to that ally, and then use Preemptive Strike, Deflection, or Slice

in Twain as appropriate against that attack. If you negate an attack this way, the defended ally may immediately DASH 3 hexes.

Tactician

Major Defensive

You cast a variety of spells that modify the battlefield.

Georginian surveyed the battlefield, trying to spot where he could have the greatest impact. He put up a magical force field, splitting the battle in two, and cutting off some of the attacking forces. He then saw a dragonrider flying over it to reinforce the west flank, and he bound it, causing it to drop from the sky. He guided some of the soldiers to flank the downed dragon and finish it off.

Adaptation

This could be deploying robots to shape the battlefield and move things around.

First Facet★

Rearrange[SH]: *You adjust the positioning of the pieces slightly, to better suit your goals.*

As a major action, you may FORCE two creatures within 12 hexes to move 3 hexes. When you move a creature this way, you may either give them a SURGE or $2 \times C$ vulnerability, chosen individually. You may spend a tactician's star to also grant $2 \times C$ WEAKEN or $2 \times C$ BARRIER HIT POINTS to each target, chosen individually. **Boost:** Increase one of the conditions by C or give the SURGE a BOOST. May be applied once per condition, bypassing the 2/round limit.

Reposition [SR]: *You make one giant adjustment, setting up for future success.*

As a major action, you may WARP an ally within 12 hexes 6 hexes in any direction and gain a tactician's star.

Surge: As a SURGE, you may deal $3 \times C$ damage to an enemy within 12 hexes. **Boost:** Increase the damage by C .

Second Facet★

Firefield [RS]: *You create a raging field of fire, denying access to the region.*

As a major action, you may make 1 hex within range 12 impassable. Any creature in that hex may move to an adjacent hex of its choice. Then, create a zone affecting your choice of unoccupied hexes within a 2 hex radius burst around the hex. The chosen hexes are difficult terrain and inflict IGNITED when entered. You gain a tactician's star when you use this ability.

Choose Target[RSO]: *You have identified the linchpin of the enemy's formation, and direct your allies to take it down.*

As a major action that consumes a tactician's star, you may choose a target within 12 hexes, ignoring target priority. The target priority of your target is raised for 2 rounds, and they are OFF GUARD 4 and WEAKEN $4 \times C$. **Boost:** Increase OFF GUARD by 1 or WEAKENED by C . These can be applied twice each, and ignore the 2/round limit.

Third Facet★

Smokescreen[RS]: *You appreciate the value of cover and concealment, and create a bank of fog to provide it.*

As a major action, you may make a burst of up to radius 3 area within 12 hexes cloudy (pg. 38) and gain a tactician star. Additionally, you may choose one of the following effects. If you do, any creatures within the area may move to the nearest outside edge when it is created

- **Solid Fog:** Each cloudy hex takes double movement to pass through
- **Acid Fog:** Creatures in the fog take C damage when they enter it, or at the end of their turn

Black Tentacles[RSO]: *You summon otherworldly tentacles to bind opponents.*

As a major action that requires a tactician star, choose $C - 1$ hexes within radius 12 of you. Each chosen hex must be at least 3 hexes away from another hex chosen this way. Put a tentacle in each of those hexes. The tentacles last for 3 rounds. When the tentacles appear, and at the beginning of each of your turns thereafter, you may have the tentacles make a STRIKE against a creature adjacent to that tentacle that deals $-|20|21|23$ damage, $-|9|11|13$ WEAKENED and inflicts SLOW 3 for one round. **Boost:** One of the tentacles deals $5|7|8|10$ additional damage. This ignores the 2/round limit.

Fourth Facet

Forcewall[RS] : *Controlling the flow of the battlefield is key to success.*

As a major action, pick 12 hex edges within 12 hexes of you in a line. They are blocking obstacles. You gain a tactician star.

Glitterdust[RSO]: *Denying opponents their vision tilts things in your favor.*

As a major action that consumes a tactician star, choose a hex within 12 hexes of you. Each creature within 2 hexes of that hex becomes BLIND 5 for 2 rounds and is OFF GUARD 4. Additionally, for each creature affected by this ability, the next time that creature affects another creature, the affected creature has a 50% DODGE CHANCE against that effect. If the attack is [O]verwhelming, halve the DODGE CHANCE. **Boost:** Choose a creature affected by this. The next time that creature affects another creature, the affected creature's DODGE CHANCE is increased by 25%. This increase is halved if the attack is [O]verwhelming. Alternatively, you can use up to 2 BOOSTS beyond the normal 2 BOOST limit to add an additional OFF GUARD to a target for each boost.

Fifth Facet★

Highway to Hell[RS]: *Never underestimate the impact of asymmetrical movement.*

As a major action, you may create a 24 hex line starting from any hex within 12 hexes. Pick a direction. Every hex in this line has push in that direction. You gain a tactician star.

Bind[RSO]: *You choose to deny a single target their abilities.*

As a major action that consumes a tactician star, you may make a target within 12 hexes VULNERABLE $4 \times C$ and inflict 4 PENALTIES. Additionally, you may choose one of the following effects:

- Prevent them from flying for 2 rounds.
- Prevent them from burrowing for 2 rounds.
- Prevent them from PHASING for 2 rounds.
- Prevent them from TELEPORTING for 2 rounds.
- Remove a monster tactical for 2 rounds.
- Inflict SLOW 3 for 2 rounds.
- Inflict DISABLED 1.

Boost: Increase the VULNERABLE by C , or inflict an additional PENALTY. Each can be used up to 2 times, and bypasses the normal limit on boosts per major action.

Sixth Facet★

Magnetic Pull[RS]: *Your enemies may not want to be next to each other. You don't give them that choice.* As a major action, choose every enemy within a 4 hex

radius burst within 12 hexes. They are forced up to 3 hexes towards, but not past, the center of this burst. You gain a tactician star.

Forcecage[RSO]: *You lock away an opponent, making them a problem for later.*

Once per encounter, you may spend a tacticians star as a major action. Choose a hex within 12 hexes. That hex gains $8 \times C$ AREA BARRIER HIT POINTS. Whenever a creature inside that hex makes an attack, that attack is affected by the AREA BARRIER HIT POINTS. Additionally, while the AREA BARRIER HIT POINTS remain, creatures cannot enter or leave the hex except by TELEPORTATION and WARP effects, but if they use them the AREA BARRIER HIT POINTS will move to their new hex. **Boost:** Increase the amount of AREA BARRIER HIT POINTS by C . This can be used up to 4 times.

Seventh Facet

Tactical Mastery[RS]: *No no no, this current arrangement just won't do.*

Once per encounter, as a major action, you may WARP every creature within 12 hexes of you to another hex within 12 hexes of you. You gain a tactician star.

Thunderfield [RSO]: *A huge crack of thunder can neutralize a group of enemies.*

Once per encounter, as a major action that consumes a tactician star, choose a hex within 12 hexes. Each creature within radius 3 of that hex takes $Cd8$ damage and $(2 \times C)d4$ weakened and becomes PRONE, BLIND 6, and STUNNED. A successful defense roll halves the damage and negates the PRONE, BLIND, and STUNNED effects. **Boost:** One affected creature takes an additional C damage. This damage is not reduced on a successful defense roll.

Totemist

Major Defensive

You have formed pacts with numerous little gods and gained the right to call forth a small fraction of their power in the form of totems and spirits to defend yourself and your allies.

Pointiff was awoken by the noises of a yeti tearing through his village. He started calling upon the local nature spirits, beseeching them for their aid, and a totem appeared in front of the yeti. The beast snarled and struck it, and was met by a magical backlash that burned its paw. Pointiff called upon another spirit, which appeared hovering over him, ready to offer protection.

Adaptation

This track can represent any type of ability that lets you call forth both fixed emplacements and last second defenses. It could take the form of drones, hard light holograms, or magical wards.

First Facet★

Summon Totem[R]: *You invoke a totem.*

As a major action you may SUMMON one Totem that you have contracted into an unoccupied hex within 12 hexes of you. At Facet 1, you may only have one totem in existence at any given time. Summoning a new totem, past your limit, destroys one of your existing totems, triggering any effects that would normally occur on destruction. For targeted effects, you may choose a valid target, that you have LINE OF SIGHT to, within 12 hexes of the old totem. Additionally, BONDED totems only damage you for any HIT POINTS they are missing. Choose 2 totems from the totem list; you are considered to have contracted these totems. This choice cannot be changed.

Sentinel Spirit[Rm]: *You summon a spirit to defend yourself.*

As an immediate major action, you can SUMMON a Sentinel Spirit to an unoccupied hex within 24 hexes of you. It has $2 \times C$ HIT POINTS, 6 STEPS and 1 mutation. As a COUNTER it reduces any incoming damage by C . It may not attack and has no weapons. If it is standing adjacent to an ally, when that ally is attacked, it may choose to become the target of the attack in place of said ally. Any damage that would exceed its health continues on to the original target.

Boost: Your Spirit gains C HIT POINTS. If PENALTIES would cause your spirit to spawn with 0 HIT POINTS, its mutation immediately triggers.

Bursting Mutation: *You can cause your Sentinel Spirit to explode in a fountain of acid upon its gory demise.*

When an enemies attack would cause your spirit to become WOUNDED, that enemy takes $3 \times C$ damage and starts IGNITED.

Emergency Call: If there are no unoccupied spaces adjacent to you, you may summon your Sentinel Spirit in to an adjacent occupied space, FORCE its occupant, and anyone immediately behind them, back one hex. This cannot prevent your attacker from completing their attack.

Surge: As a SURGE, you may SUMMON a swarm of small spirits to harass a target within 12 hex. They deal $3 \times C$ damage and SLOW 1. **Boost:** The spirits deal C additional damage.

Second Facet

Extra Totem: You may choose an additional totem to contract.

Totemic Eyes: *You can see through the eyes of your totems.*

Once per round, you may designate 1 totem that you can gain LINE OF SIGHT from.

Third Facet★

Concussive Mutation: *You can cause your Sentinel Spirit to explode in an earth shaking blast upon its abrupt demise.*

When an enemy's attack would cause your spirit to become WOUNDED, all enemies within 1 hex of it take 8|10|13|15 damage and are knocked PRONE, if they succeed a defensive roll, they take no damage and are not knocked PRONE.

Fourth Facet★

Extra Totem: You may choose an additional totem to contract.

Increased Capacity: You may now have a maximum of 2 totems in existence at any given time.

Distorting Mutation: *You cause your Sentinel Spirit to twist the very fabric of space as on its unceremonious ejection from the land of the living.*

When an enemy's attack would cause your spirit to become WOUNDED, they gain 2 CORRUPTION. At the end of the enemy's turn, you, that enemy, and anyone else within 2 hexes of your spirit are teleported 1d4 hexes in a random direction. A successful defense roll will negate this teleport. Any creature may willingly fail their roll, but they must do so before finding out where they're going.

Fifth Facet★

Glitter Mutation: *You can cause your Sentinel Spirits to burst into an obnoxious cloud of glitter when they are righteously put to the sword.*

When an enemy's attack would cause your spirit to become WOUNDED, they become OFF GUARD 2 and have their target priority raised by 1 for 1 round.

Sixth Facet★

Extra Totem: You may choose an additional totem to contract.

Increased Capacity: You may now have a maximum of 3 totems in existence at any given time.

Blinding Mutation: *You can cause your Sentinel Spirit to fire off a noxious gob of slime on the, inevitable, event of its death.*

When an enemy's attack would cause your spirit to become WOUNDED, they take $C - | - |8|9$ ONGOING and become BLIND 5 for 3 rounds.

Seventh Facet

Totemic Web: *Your totems form a magical web that allows you to move freely.*

Once per round, you may WARP from a hex covered by a totem's aura to a hex covered by another totem's aura.

Enhanced Distortions: *Your distortion mutation is stronger.*

Once per encounter you can enhance a Distorting mutation. Instead of gaining 2 CORRUPTION, your enemy must make a save with a +2 bonus or gain 2 PERSISTENT CORRUPTION for 3 rounds. Additionally, you may set either the direction or distance of 1d4 targets' teleports.

Totems

➤ **Burning Haze Totem:** You may summon a BONDED Burning Haze totem. This totem has $2 \times C$ HIT POINTS and can make use of any COUNTER you can. While it exists, it projects an aura that covers a 2 hex radius. All enemies who enter the aura or begin their turn in it take $2 \text{ times } C$ ONGOING and begin IGNITED, this triggers immediately when the totem is SUMMONED. The Burning Haze Totem can only affect a given enemy once per round. **Boost:** Increase the initial damage by $2|3|3|4$.

➤ **Beneficent Totem:** You may summon a Beneficent Totem. The totem has two healing charges that grant C TEMPORARY HIT POINTS and two invigorating charges that grant C ENERGIZED. Allies within 6 hexes of the totem may spend charges to gain their effects. The totem may grant 2 charges per turn and is destroyed after all charges have been used. If it is destroyed, you gain 1 BOOST for any remaining tokens. **Boost:** Your totem gains 1 additional healing or invigorating charge.

➤ **Accelerating Totem:** You may summon an Accelerating Totem. The totem has two vitalizing charges that grant a BOOST and two warding charges that grant ON GUARD. Both types of charge grant 2 bonus STEPS. Allies within 6 hexes of the totem may spend charges to gain their effects. The totem may grant 2 charges per turn and is destroyed after all charges have been used. If it is destroyed, you gain 1 BOOST for any remaining tokens. **Boost:** Your totem gains 1 additional vitalizing or warding charge.

➤ **Barrier Totem:** You may summon a BONDED Barrier Totem. This totem has $4 \times C$ HIT POINTS and can make use of any COUNTER you can. While it exists, it projects an aura that covers a 2 hex radius. All hexes affected by this aura gain $2 \times C$ AREA BARRIER HIT POINTS. Additionally, the totem spawns with 2 siege tokens. Once per round, an ally within the aura may spend a siege token to gain ENERGIZED C and have their next attack ignore 25% miss chance. Allies within its aura may spend a minor action to gain double the benefit of a siege token without spending any tokens. If the totem is destroyed with remaining tokens, it releases a vengeful spirit that inflicts C damage per token and STOPPED for 1 round. **Boost:** You may increase the AREA BARRIER HIT POINTS by C or grant it an additional siege token.

➤ **Mirage Totem:** (Special: if you select this totem, you do not gain a perk point on this level.) You may summon a BONDED Mirage Totem. It has $2 \times C$ HIT POINTS and benefits from any COUNTERS you have access to. While it exists, it projects an aura out to a 3 hex radius. All creatures in these hexes are INVISIBLE to creatures outside of them. If an INVISIBLE creature attacks another creature that is outside of the range of the totem, it becomes visible to all creatures outside of the totem. Additionally, the totem spawns with 2 ambush tokens. Once per round, an ally affected by the aura may spend an ambush token to add a RIDER to their attack that does C damage, inflicts OFF GUARD, and OFF BALANCE. After all of its tokens are spent, one ally per round may still add a RIDER to their attack, but it only inflicts OFF BALANCE. If the totem is destroyed with tokens remaining, its attacker takes $2 \times C$ damage and 2 PENALTIES, this retaliation ignores COUNTERS. The damage is reduced by C for each token that has been spent, and 1 less PENALTY is taken per token that has been spent. **Boost:** You may increase each the rider's damage by $2|2|3|3$. Alternatively, you may spend two BOOSTS to spawn the totem with an additional Token. Every boost also increases the retaliation damage by C .

➤ **Whirlwind Totem:** You may summon a BONDED Whirlwind Totem. It has your defense and $4 \times C$ HIT POINTS and a COUNTER that grants 35% DODGE CHANCE against non-[O]verwhelming attacks or 20% DODGE CHANCE against [O]verwhelming attacks. While it exists, it projects an aura out to a 3 hex radius. All enemies who enter the aura or begin their turn in it take $14|18|23|28$ damage, a successful defense roll halves the damage, this triggers immediately when the totem is SUMMONED. Enemies may only be damaged by this aura once per round. Additionally, hexes affected by this aura are considered to be dense and have a push pointed away from the aura. **Boost:** 1 target of the whirlwind also gains 1 CORRUPTION. **Penalty:** 1 target of the whirlwind takes $4|5|6|8$ less damage.

➤ **Totem of Vengeance:** This totem has $2 \times C$ HIT POINTS. Whenever the totem would take damage, the attacker takes damage equal the the HIT POINTS lost plus an additional C . Whenever an ally within 6 hexes of the totem would be attacked, you may have the totem receive

that attack instead. When this totem would be healed or receives TEMPORARY HIT POINTS, it receives half the amount instead. **Boost:** You may have the Totem of Vengeance spawn with 2|2|3|3 extra HIT POINTS.

Ying

Major Defensive

You channel both the rift of death and the rift of life. While one may seem to be dominant, both always work in harmony in your abilities.

Priestess Petunia watched the doomrider's sword penetrate Jason's stomach. He fell to one knee, clutching the wound. Anger at her friends wound rose within her, and she called upon the power of her goddess, bringing her blessing onto Jason. His wound stitched back together, and he stood with more vigor and energy than before. Turning her ire onto the doomrider, she unleashed the wrath of her goddess, blasting him backwards and leaving him writhing in agony.

Adaptation

This can represent any kind of healer, whether they are casting spells, imparting the favor of their gods, or shooting vials of adrenaline into people.

First Facet★

Cure Wounds [RmS]: *You give with one hand...*

As a major action, you may heal an ally within twelve hexes for $2 \times C$. When you do so, you may add one bonus to them. **Boost:** Heal an additional C .

Energizer: *You invigorate your patient.*

You start with the energizer bonus. When you use this bonus, the target of your Cure Wounds is ENERGIZED $2 \times C$.

Inflict Wounds [RmS]: *...and take with the other.*

As a major action, choose an enemy within 12 hexes. That enemy makes a defense roll. If they fail the defense roll, deal $Cd6$ damage. If they instead succeed, deal half that damage instead. Regardless of success or failure, add a hindrance to the targeted enemy. This ability has any tags that the hindrance has. **Boost:** After the effects of the hindrance, deal an additional C damage. This damage is not halved on a successful defense roll.

Weakening Influence [O]: *You sap your target's strength.*

You start with the weakening influence hindrance. When you use this hindrance, the target of Inflict Wounds is WEAKENED $Cd4$. If the defense roll for Inflict Wounds succeeded, halve this WEAKENING.

Surge [Rm]: As a SURGE, you may use the Inflict Wounds ability. You may not add a hindrance when using it this way. **Boost:** Use the BOOST of Inflict Wounds.

Second Facet★

Relief: *Your healing removes dangerous effects from your friends.*

When you use Cure Wounds on an ally, you may also choose a lesser restorable condition affecting that ally. If you do, end that condition.

Extended Protection: *Better than new.*

If you heal a damaged ally to more than their maximum hit points, the excess becomes TEMPORARY HIT POINTS.

Flaming Sword: *You infuse their weapon with elemental fury.*

You gain the flaming sword bonus. When you use this bonus, choose an ENERGY EFFECT. The target of your cure wounds gains a RIDER each turn for their next three turns. This RIDER deals 4|5|6|8 damage on

a hit and the target receives the chosen ENERGY EFFECT. If the RIDER misses, the target of the attack still takes half damage.

Vampiric [O]: *You absorb the life energy of your target.*

You gain the Vampiric Wounds hindrance. When you use this hindrance, you heal yourself $Cd4$ hit points. If the target made their defense roll against Inflict Wounds, this healing is halved as well.

Third Facet★

Protective Aura: *You surround your patient with a protective field to punish those who attack them.*

You gain the Protective Aura bonus. When you use this bonus, the next time that the affected creature would be damaged, the creature who damaged the affected creature takes damage equal to the amount healed by Cure Wounds. This ignores COUNTERS.

Doom: *You leave your target unable to resist their fate.*

You gain the Doom hindrance. When you use this hindrance, the target of your Inflict Wounds ability gains PERSISTENT WEAKEN $-|7|8|10$ for 2 rounds if they fail the defense roll for Inflict Wounds.

Fourth Facet★

Vengeance: *You tap into your patient's deep seated need for revenge.*

You gain the Vengeance bonus. When you use this bonus, the targeted ally may move up to three hexes and use a SURGE against an opponent that attacked them in the last round.

Parasite: *You summon a horrifying parasite to latch onto your target.*

You gain the Parasite hindrance. When you use this hindrance, the target of your Inflict Wounds ability gain an EQUIPPED effect with $2 \times C$ non-BONDED HIT POINTS. While the EQUIPPED effect remains alive, the affected creature is SLOWED 3.

Fifth Facet★

Desperate Cure: *You can time your heal to occur at a vital moment.*

You may use Cure Wounds as an immediate major action.

Quick Death: *You invoke a well timed attack to mess up your opponent.*

You may use Inflict Wounds as an immediate major action.

Healing Rush: *Your patient is filled with so much vim they can act again.*

You gain the Healing Rush bonus. When you use this bonus, the target of your Cure Wounds ability may take a minor action.

Hammer: *Your attack slams into your foe, throwing them backwards and interrupting their attack.*

You gain the Hammer hindrance. When you use this hindrance on an enemy, if that enemy is making an attack, make a STRIKE with a -2 modifier. If it hits, the enemy is moved 1 hex per odd circle before their attack (potentially wasting their action). If the STRIKE misses, the movement still occurs, but it occurs after their attack.

Sixth Facet★

Glory of the Fallen: *Your healing is so powerful it can revive wounded allies.*

You may use Cure Wounds on a WOUNDED creature. If this brings them above 0 HIT POINTS, they are no longer WOUNDED.

Damage Aura: *You surround your patient with a deadly field.*

You gain the Damage Aura bonus. When you use this

bonus, the target of your Cure Wounds ability deals $-| - |7|8$ damage to each creature within their melee range at the beginning of each of their turns for the rest of the encounter.

Weakening Burst: *You weaken your foes with an explosion of death energy.*

You gain the Weakening Burst hindrance. When you use this hindrance, the target of your Inflict Wounds and each enemy adjacent to them is WEAKENED C.

Seventh Facet

Lifelink: *You won't be prevented from healing your allies by silly things like walls.*

You may use Cure Wounds on your allies even if you do not have LINE OF EFFECT to them. They must still be within range 12 of you.

Ethereal: *You detach your patient from the mortal coil, just a bit.*

You gain the Ethereal bonus. When you use this bonus, the target of your cure wounds has phasing for one turn and a lowered target priority until your next turn, and they gain two BOOSTS. Attacks against this target that violate target priority receive a PENALTY.

Binding: *Your target is prevented from moving freely.*

You gain the Binding hindrance. When you use this hindrance, the target of your Inflict Wounds is SLOWED 3 for one turn and receive two PENALTIES.

Alchemist

Major Mixed

You combine reactants which individually may be weak, but together, combine for a flexible array of powerful effects.

"A pinch of turmeric, a dash of lead salts, and a splash of mercury..." Thomas muttered under his breath, mixing the ingredients together as the hobgoblin approached. He threw it at its face, and it burst into a mass of fumes. The hobgoblin reeled, its actions becoming uncoordinated and sluggish. Nonetheless, one of its swipes caught Thomas across the shoulder. He hissed in pain, then started grabbing ingredients out of his pouches for a healing salve.

Adaptation

This TRACK is, by default, flavored as mixing ingredients, however, it can instead be flavored as making your own spells.

First Facet★

Recipes: *You have prepared special alchemical concoctions.*

At the beginning of each encounter, make *C* recipes. Each recipe consists of either two main components (pg. 218), or a main component and a secondary component. You begin the encounter with those recipes prepared.

Mystery Mixture [RmOS]: *You give your potion a final shake to mix.*

As a major action, use a recipe that you have prepared on a creature within 6 hexes of you. That recipe stops being prepared when you use it. This may deal *C* damage to the target. **Boost:** If you use this ability on an ally, that ally becomes ENERGIZED *C*. If you use this ability on an enemy, that enemy becomes VULNERABLE *C*.

Fetch Components: *Hold on, I just need to make some more.*

You may re-prepare each recipe that you have used this encounter by spending 3 STEPS. Each recipe becomes prepared again.

Surge: As a SURGE, you may use one of the main components of a recipe that you prepared at the beginning of the encounter against a target within 12 hexes. This may deal *C* damage to the target. **Boost:** If you use this ability on an ally, that ally becomes ENERGIZED *C*. If you use this ability on an enemy, that enemy becomes VULNERABLE *C*.

Second Facet

Ingredients: *A little bit extra to spice things up.*

When you gain this ability, choose two ingredients. These ingredients form your ingredient list. When you gain another facet of this TRACK, you may add another two ingredients to this list (resulting in a total of 12 ingredients in your ingredient list when you gain your 7th facet). When you make a recipe, you may add an ingredient from your ingredients list (pg. 219) to that recipe.

Third Facet★

Alchemical Ammunition [RmOS]: *You can enhance your allies attacks with your brews.*

As a major action, you may choose one of your recipes and an adjacent ally. The next time that ally deals damage with a [W]eapon attack, apply the effects of the recipe to the damaged creature. (Note: While the name of this ability refers to ammunition, it works equally well with damage from a melee weapon as it does with ranged damage.)

Fourth Facet

Increased Ingredients: *Twice as much is twice as nice.*

When making a recipe, you may use two ingredients from your ingredients list instead of one. You cannot choose the same ingredient twice.

Fifth Facet★

Reckless Recipe: *Kids, don't try this at home.*

When making a recipe, you may use an additional main or secondary component. When you use that recipe, you become VULNERABLE $2 \times C$.

Sixth Facet

Incredible Infusion: *It requires a deft touch to combine so many ingredients without interference*
When making a recipe, you may use three ingredients from your ingredients list instead of two. You cannot choose the same ingredient more than once

Seventh Facet★

Spontaneous Preparation: *In less experienced hands, this would be great way to lose a limb.*
Once per encounter, you can make a recipe and add it to your recipe book. You may only use that recipe once. (Tip: Prepare it during other players turns)

Positive Main Components

These components are best used with other positive components and ingredients, and used on allies.

➤ **Liquid Luck:** At the beginning of the targeted creature's next three turns, they receive a BOOST.

- **Strengthening Stimulants:** The target of this effect becomes ENERGIZED $2 \times C$.
- **Potion of Perception:** The next time that the target of this effect would make an [O]verwhelming attack that has a 50% MISS CHANCE or less, ignore that MISS CHANCE. Alternatively, the next two times that the target of this effect would make a non-[O]verwhelming attack that has a 50% MISS CHANCE or less, ignore that MISS CHANCE.
- **Rapidness Root:** During the target of this effects next turn, they may use a SURGE.

Positive Secondary Components

These components are best used with other positive components and ingredients, and used on allies.

- **Healing Herbs:** The target of this effect gains $2 \times C$ HIT POINTS. Any hit points healed above their maximum are converted to TEMPORARY HIT POINTS.
- **Refreshing Restorative:** The target of this effect gains a REFRESH.
- **Common Cure-all:** The target of this effect selects one greater restorable effect currently affecting them. That effect ends.
- **Drink of Defense:** The target of this effect receives PERSISTENT ON GUARD for three rounds.

Positive Ingredients

These components are best used with other positive components and ingredients, and used on allies.

- **Invisible Ingredient:** The creature affected by this ability becomes INVISIBLE 4 until the end of their next turn.
- **Dash of Dashing:** At the beginning of the affected creature's next turn, that creature may DASH 2 hexes.
- **Enlarging Elixir:** Until the end of your next turn, the affected creature threatens hexes one hex further away than usual.
- **Restorative Reagents:** The target of this effect selects one lesser restorable effect currently affecting them. That effect ends.
- **Aiming Additive:** The affected creature may treat creatures and hexes up to 12 hexes away as if they were within 6 hexes for the purpose of targeting with abilities.
- **Bit of a Bite:** The affected creature gains a natural weapon for one turn.
- **Slice of Style:** During the affected creature's next turn, it may DISABLE an opponent they attack. A defense roll negates this DISABLED;

- **Pinch of Protection:** Until the beginning of your next turn, the affected creature's Target Priority is increased. When an enemy would violate target priority by not attacking the affected creature, the affected creature can use a SURGE against the attacking enemy.
- **Fading Fragrance:** Until the beginning of your next turn, the affected creature's Target Priority is decreased. When an enemy would violate target priority by attacking the affected creature, that attack receives a PENALTY.

Negative Main Components

These components are best used with other negative components and ingredients, and used on enemies.

- **Poisonous Powder:** The target of this effect receives $2 \times C$ ONGOING damage. A defense roll with a +2 modifier halves.
- **Distilled Disadvantage:** The target of this effect becomes PERSISTENT OFF GUARD for 3 rounds
- **Vial of Vulnerability:** The target of this effect becomes VULNERABLE $2 \times C$.
- **Supplement of Solitude:** The target of this effect becomes CORRUPTED 2.

Negative Secondary Components

These components are best used with other negative components and ingredients, and used on enemies.

- **Depleting Draught:** The target of this effect id DEplete.
- **Flavoring of Frailty:** The target of this effect becomes WEAKENED $2 \times C$.
- **Ounce of Obliviousness:** The target of this effect receives two PENALTIES.
- **Steeped in Slowness:** The next time the target would make a SURGE, they instead don't.
- **Double Vision:** The next two times that the target attacks any creature, that creature gains a 50% MISS CHANCE against that attack. If this attack is overwhelming, reduce the MISS CHANCE to 25%.

Negative Ingredients

These components are best used with other negative components and ingredients, and used on enemies.

- **Drop of Distraction:** The affected creature becomes OFF BALANCE.
- **Elemental Enzyme:** When you make a recipe with this ingredient, choose an elemental status. When you use this ingredient, the affected enemy receives the chosen elemental status.

- **Sprinkling of Sightlessness:** The creature affected by this ability becomes BLIND 5 for one round.
- **Tad of Torment:** The creature affected by this ability becomes VULNERABLE *C* to the next reaction made against them.
- **Grounded Gravity:** At the end of the affected creatures next turn, that creature loses the ability to fly for one turn and cannot gain the ability to fly for one turn.
- **Vapours of Vision Violation:** The creature affected by this ability loses SCANNER until the end of their next turn, and cannot gain SCANNER through any means during this time.
- **A Light Touch of Light:** All creatures have line of sight to the affected creature until the beginning of your next turn. All creatures gain line of sight to you until the end of your next turn when you use this ingredient.
- **Confusing Condiments:** The next time that the affected creature would take a major action, randomly choose an ally within range of that attack. The affected creature treats that allies target priority as elevated for that action, and treats all other allies target priority as lowered for that action. That enemy cannot violate target priority with that attack.
- **Splash of Subtlety:** Your allies may treat the affected creatures target priority as elevated or lowered until the end of your next turn, at their discretion.

Manifestor

Major Mixed

As a Manifestor, you command a spirit who can manifest in a variety of ways.

Josephine reached her hand out, and the dragon spirit uncoiled from her arm and flowed out to stand in front of her. The goblins stopped their charge, afraid of it, and the spirit rushed forward, slashing at them and breathing fire. After the initial shock wore off, the goblins regrouped, and charged again. The dragon spirit retreated back to Josephine, and merged with her. Scales sprouted from her body, and teeth extended from her mouth, and she rushed forward to attack with newfound claws. The goblins were terrified of her as she slashed her way through them. They fell back once more, and the dragon spirit split from Josephine, and coiled around her neck, forming a necklace. Its power flowed through her, and she flew after the fleeing goblins.

Adaptation

This can be commanding a different type of entity, like a demon, angel, or swarm of nanobots.

First Facet

Spirit Attacks: *Your spirit can directly attack your foes.*

Your Spirit has several attacks it can use. It starts with 2 attacks, selected from the Mook versions of Monster Major abilities (pg. 146). At least one must be a primary Major ability.

Spirit Powers: *Your spirit can use its mysterious power to achieve various effects.*

Your spirit can produce a variety of mystical effects. These are chosen from the list at the end of this track. It starts with 2 known spirit powers.

Command Spirit: *You can empower and command your spirit.*

As a major action, your spirit gains $2 \times C$ spirit points, and executes an action based on its form. The spirit may take its movement and shift forms, if applicable, before taking its action, but neither action is restricted to occurring at this point in the turn. **Boost:** Gain another C spirit points.

Spirit Forms: *Your spirit manifests in a variety of ways.*

There are multiple forms your spirit can take. It can shift forms once per round, with the exception that it can shift into and out of Free Form if it does not attack while in Free Form.

Spirit Form: Free: *Your spirit can move freely in the world and directly attack things, but it leaves it vulnerable.*

While your spirit is in free form, it uses spirit points as HIT POINTS. It is a SUMMON with a speed of 6. If it loses all of its spirit points, it is unsummoned, and may be summoned again with Command Spirit, appearing adjacent to your hex. When given healing, it always counts as being at max hp. When commanded, it may use a spirit attack. In addition, if it has at least $4 \times C$ spirit points, or you are WOUNDED, it may spend $2 \times C$ spirit points to make a spirit attack, up to twice each round. It makes a Spirit Attack when taking a SURGE. It has a COUNTER to reduce incoming damage by C . If the attack does nothing before this reduction, the spirit gains a BOOST. It possesses a ranged and a melee natural weapon if it knows a weapon attack.

Spirit Form: Item: *Your spirit can manifest itself as an item, granting powers to its user indirectly.* Your spirit must move into the hex of, and MOUNTS,

you or an ally when taking this form. This ally is considered the items user, and they may have the spirit spend $2 \times C$ spirit points up to twice per round to activate a spirit power. If its user is WOUNDED, it enters Free Form automatically. It must be one of the following types of items, this choice is permanent:

- **Weapon:** Your spirit becomes a weapon, the type of which is chosen when it changes, and the creature it MOUNTS immediately begins wielding this weapon. When commanded, the wielder may take a [W]eapon surge. If they do not have one, they use the following - **Surge**[W]: Strike for $5 \times C$ damage.
- **Armor:** When commanded, the wielder gains $2 \times C$ RESISTANCE.
- **Other:** When commanded, the user gains a BOOST and becomes ON GUARD.

Surge: As a SURGE, you may have your spirit immediately enter Free Form, make a spirit attack, then return to its previous form. This doesn't count against your limit for changing forms and can occur even if it has no spirit points. This has the same tags as your spirit's attack.

Second Facet

Spirit Tacticals: *Your spirit has abilities it can use while moving freely, and it can grant them to others as an item.*

Your spirit possess a number of monster tacticals (pg. 160). It possesses these abilities in Free Form, and grants them to its user in Item Form. It starts with 1 such ability.

Spirit Form: Fused Form: *Your spirit merges with your body, granting you the ability to attack as it would, while keeping it safe and granting it the freedom to use its powers.*

In fused form, your spirit becomes one with you. It must move into your hex to take on this form. When you command your spirit in this form, you can use any spirit attack your spirit could use. It grants you a melee and a ranged natural weapon if it knows a weapon attack. Twice per round, you may have your spirit use $2 \times C$ spirit points to use a spirit power it knows. If you are WOUNDED, your spirit enters free form automatically.

Third Facet

Enhanced Forms: Your spirit gains the following abilities depending on its current form:

- **Free Form:** *Your spirit can move through obstacles.*
Your spirit possesses PHASING while in Free Form.
- **Item Form:** *The item your spirit transforms into acts as an artifact.*
Your spirit grants its user the effect of a 2pt artifact, according to its type. This choice is permanent when you gain this ability, but if the enchantment doesn't apply to the type of weapon it transformed into then it doesn't work.
- **Fused Form:** *Your spirit physically augments your abilities while you are fused with it.*
Pick Speed, Strength, or Wit:
 - **Speed:** +2 speed
 - **Strength:** Once per round, strike adjacent opponent to FORCE them one hex
 - **Wit:** Once per round, Raise or lower your target priority for one opponent for one round. Attacks that violate this priority get a PENALTY.

Fourth Facet

Extra Tactical: *Your spirits has grown in power.*
Your spirit gains another monster tactical.

Extra Power: *It can invoke new and exciting effects.*
Your spirit learns another spirit power.

Extra Attack: *And can attack in new ways.*
Your spirit learns another spirit attack.

Fifth Facet★

Enhanced Forms: Your spirit gains the following abilities depending on its current form:

- **Free Form:** *Unhindered by flesh, your spirit moves with extreme speed.*
Your spirit gains 6 speed
- **Item Form:** *The power of your spirits item increases.*
Your spirit grants its user the effect of a 4 point artifact, according to its type, instead of 2 points.
- **Fused Form:** *The spirit guards your mind.*
You are immune to [MENTAL] effects while in fused form.

Sixth Facet

Extra Tactical: *Your spirit has reached the peak of its power.*
Your spirit gains another monster tactical.

Extra Power: *It can invoke even more strange effects.*

Your spirit learns another spirit power.

Extra Attack: *... and surprise opponents with new attacks.*

Your spirit learns another spirit attack.

Seventh Facet★

Ultimate Form: *The ultimate form is the ultimate fusion of man and spirit, accessing all of its potential at once.*

Once per encounter, by entering your hex, your spirit may enter ultimate form. After 2 rounds, it must take another form.

When you command your spirit in this form, you can use any spirit attack your spirit could use. Once per round, you may have your spirit use $2 \times C$ spirit points and use a spirit power it knows. You possess all of your spirit's tactical abilities, and the artifact bonus it would grant from item form. If you are WOUNDED, your spirit enters free form automatically.

Spirit Powers

Boost: A spirit power costs C less spirit points.

Penalty: A spirit power costs C more spirit points. If this would cause your spirit's spirit points to become negative, you instead suffer a PENALTY. A spirit power can have up to one BOOST or PENALTY applied to it.

- **Psychic Aura:** Cause all enemies within 3 hexes to be OFF BALANCE and take $Cd4$ damage.
- **Confusion:** Cause an enemy within 12 hexes to take 11|15|19|23 damage and become DIZZY 2. A defense roll halves the damage and dizzy.
- **Spirit Rush:** DASH 3 hexes and STRIKE an opponent in your melee range for $5 \times C$ damage.
- **Compel:** [MENTAL] DIRECT an enemy within 6 hexes 3 hexes and make them VULNERABLE $2 \times C$.
- **Nightmarish Presence:** Take a SURGE and raise your target priority as a [FEAR] effect. This priority cannot be violated.
- **Shadow Form:** You become INVISIBLE 3, and may select an enemy within 12 hexes to become VULNERABLE $2 \times C$.
- **Backlash Barrier:** The next person to attack you takes $2 \times C$ damage, ignoring COUNTERS.

Polymorph

Major Mixed

You take on the form of various monsters to fight your foes. Your body can shift and morph, becoming any beast in the world

The bandits emerged from the woods around Joe. "Your money or your life," they demanded. Joe started to bulge, muscles growing, scales rippling down his body. His mouth elongated and filled with teeth, and a tail spouted from his behind. Wings unfurled and his neck elongated. Soon the bandits were facing down a dragon. They had second thoughts, and turned and ran.

Adaptation

This can also be used for someone who has a wide range of abilities they can take, or alternative forms that are unrelated to monsters. It could represent channeling different creatures to access their abilities without a physical transformation.

First Facet

Shift: *Your bones grind as they take on new shapes, and your flesh flows like putty.*

You may take on a new form. To do so, select any two non-unique abilities from the major monster abilities (pg. 146), only one of which may be from the secondary major list. It is strongly recommended that you have at least 1 ability you can use at range and 1 you can use in melee. You may use either selected ability as a major action. You may also gain 1 weapon of your choice as a natural weapon.

Alternative Form: *Changing takes a significant effort, and you must rest before doing so again.*

Once per encounter, you may take on a form.

Surge: You may make a SURGE as a monster, using the default SURGE ability or a SURGE granted by any of your chosen major actions.

Second Facet

Greater Form: *Your skill increases, allowing you to take on more complex forms.*

When you take on a new form, you may also gain an ability from the monster tactical ability list (pg. 160).

Third Facet★

Extra Shift: *Long practice has made transformation easier, and you can adjust your form mid combat.*

You may take on a new form twice per encounter.

Rideable Forms: *Hop on.*

When you take on a new form, you may elect for it to be MOUNTABLE.

Extended Forms: *You can take on some interesting aspects of your new form.*

When you choose a new form, you may also pick a monster minor that is marked as [SURGE]. You may use this ability in place of a SURGE.

Fourth Facet★

Malleable: *You can make some minor tweaks to your body to compensate for hindrances in combat.*

You are immune to [SENSELESS] and cannot be GRAPPLED.

Fifth Facet

Versatile Forms: *Your forms become ever more capable.*

You may select an extra non-unique monster major ability when you take on a new form. This may be used as a major action, just like the other two.

Sixth Facet

Naturalized: *You can adapt on the fly to your environment.*

When you take a new form, you may become native to any environment you are in, and you may pick 2 abilities from the monster tactical ability list.

Seventh Facet

Evershifting: *You have mastered the art of transformation, and can shift nearly effortlessly.*

You may switch forms once per round at the beginning of your turn.

Sniper

Major Mixed

You are a sniper and have perfect knowledge of how people move, defend, and operate within combat. Using this knowledge, you know where to shoot.

Robin watched the exchange from afar, her bow held at the ready. Her partner passed the dealer a bag of money. The dealer reached into his sack, and pulled out a dagger. Recognizing the deal had gone south, she loosed an arrow, penetrating his hand and causing him to drop the dagger. Chaos ensued as everyone starting drawing weapons, and Robin sent another arrow into the head of their leader.

Adaptation

This TRACK can represent a robin hood like archer, a modern sniper, or a futuristic warrior with equal ease.

First Facet★

Stability: *With a short setup, you become able to aim so well people think you abuse magic.*

At the beginning of your turn, you may become stable for 1 round. While stable, you may ignore cover and target priority, and cannot be a SITTING DUCK however, you cannot move while stable.

One Shot [WO]: *One kill.*

: As a major action, you may make a single STRIKE with a +4 to hit that deals 19|25|31|38 damage. **Boost:** This STRIKE does an additional 4|5|6|8 damage.

Called Shots: Legs [WSO] : *That one's gonna need crutches.*

As a major action, you may take one STRIKE with a +2 to hit dealing 11|14|18|21 damage. Additionally, on a hit the target becomes WEAKENED by an amount equal to the damage dealt and SLOW 1 for one round. **Boost:** Increase the damage and WEAKENED by 2|3|4|4.

Surge [W]: As a SURGE, you may make a STRIKE with a +2 to hit that deals 13|17|21|26 damage **Boost:** +5 to hit.

Second Facet★

Called Shot: Arms [WSO]: *Let me lend a hand.*

As a major action, make a single STRIKE with a +2 modifier to hit. This STRIKE deals 19|25|31|37 damage. On a hit, the target receives a PENALTY and becomes disarmed. **Boost:** Increase the damage by 4|6|7|9.

Third Facet★

Tactical Positioning: When you become stable, you may still move half your speed.

Called Shot: Heart [WO]: *Cross your heart, hope you die.*

As a major action, make a STRIKE with a +2 modifier to hit. This deals —|25|30|37 damage. On a hit, the target begins BLEEDING *C* and becomes CORRUPTED **Boost:** Increase the damage by 4|6|7|9.

Fourth Facet★

Ricochet [W]: Once per encounter, you may draw LINE OF EFFECT with a single turn in it when you use

a major action.

Called Shot: Head [WO]: *So I hit him in the head till he was dead.*

As a major action, make a STRIKE for —|34|42|50 damage. On a hit, the target becomes DIZZY 2 for 1 round, and when the struck creature takes its next major action, randomly determine each possible target's Target Priority. The struck creature cannot target creatures if a higher target creature is a valid target.

Boost: Deal an additional —|6|8|10 damage on a hit.

Fifth Facet★

Mobile Aiming: When you become stable, you may still move normally.

Piercing Shot [W]: Once per encounter, when you would make an attack with this track, you may draw LINE OF SIGHT and LINE OF EFFECT through any number of destructible objects with HIT POINTS less than or equal to your attack's damage. Each destructible object that your LINE OF EFFECT goes through in this way is destroyed, and the hex that contained that destructible object becomes difficult terrain.

Sixth Facet★

Called Shot: Eyes [WSO]: *An eye for an eye.*

As a major action, make a STRIKE with a -2 modifier to hit. This STRIKE deals $6 \times C$ damage. Additionally, on a hit, the target becomes BLIND 6 for the rest of the encounter. Furthermore, the next four times the struck creature would target a creature with an ability, the targeted create has a 50% DODGE CHANCE against that ability. If the attack would be overwhelming, that ability has a 25% DODGE CHANCE instead. **Boost:** Increase the damage by *C*, and the DODGE CHANCE applies to an additional attack.

Seventh Facet★

Double Tap [WO]: Once per encounter, as a major action, if you do not currently have any PENALTIES, you may choose a Called Shot ability. You may use that ability twice. Both attacks receive two PENALTIES. This counts as 2 separate attacks.

Summoner

Major Mixed

Some people don't fight themselves, and don't rely on their allies. Instead, they summon forth creatures to fight on their behalf. Summoners comes from all walks of life, from the shaman who summons forth spirits of nature, to the occultist who binds demons to his will. Regardless of the source, summoners call upon a variety of creatures to do their bidding.

The troll smashed their cart with his club and bellowed. Parnian reached through the dimensional barriers, found a small demon, and threw it at the troll. It attacked with infernal haste, burning the troll. He reached through the barrier once more, and pulled out a flame sprite, which darted around the troll, leaving a trail of fire in its wake, before following up with a blast of flame as the troll smashed the demon.

Adaptation

This TRACK is written to represent summoned creatures, but can also represent short-lived automatons or mobile spell effects.

First Facet

Summons: *You know what you are able to call upon.*

You may create a list of possible creatures to SUMMON. It has 1 creature plus 1 creature per facet on it. Each SUMMON has $2 \times C$ HIT POINTS and base speed 6. Each one knows two mook non-unique major abilities (pg. 146), only one of which can be from the secondary major list, and a monster COUNTER (pg. 159). Additionally, it may either have a natural weapon or a wielded weapon and a spare weapon.

Call Forth[R]: *You force a summon to appear and aid you.*

As a major action, SUMMON forth a creature from your list on a solid hex within 12 hexes. When you SUMMON it, and at the beginning of its turns, it may move up to its speed and use one of the mook major abilities it knows. It can use its mook major abilities as a SURGE. **Boost:** The SUMMONED creature gets a boost on its next attack.

Link: *You possess a deep tie to your summons.* When one of your SUMMONS would be healed, you may choose to have that healing affect you instead.

Summoning Style: *Some summon are nice and stable, others are unpredictable.*

Choose either Fixed Duration Summon or Variable Duration Summon. This choice is permanent:

- **Fixed Duration Summon** [R]: After your SUMMON makes two attacks, the SUMMON is dismissed.
- **Variable Duration Summon** [R]: At the beginning of each of your turns, before your summons act, there is a 50% chance that each of your SUMMONED creature is dismissed.

Point-blank Summoning: When you use Call Forth, you may choose an enemy who you are in the melee range of. If the SUMMONED creature is SUMMONED in a hex adjacent to that enemy, the act of SUMMONING that creature does not provoke reactions, but the SUMMONED creature must attack the chosen enemy.

Surge: When you would use a SURGE, make a strike against a creature within 12 hexes that inflicts VULNERABLE 10|14|17|20 to the next attack made by a SUMMONED creature you control. **Boost:** +4 to hit.

Second Facet

Customized Summons: *You can call upon more powerful creatures.*

Each SUMMON on your list gains a tactical ability (pg. 160) or two features (pg. 63).

Extended Summons: *You have learned ways to keep your summons around longer.*

If you possess the Fixed Duration Summon ability, when you would use a SURGE that is not a REACTION, instead, choose a SUMMON you have active. That SUMMON gains $2 \times C$ TEMPORARY HIT POINTS, and the next time that that SUMMON would be dismissed, it is instead dismissed one round later.

If you possess the Variable Duration Summon ability, when you would use a SURGE that is not a reaction, instead, choose a SUMMON you have active. That SUMMON gains $2 \times C$ TEMPORARY HIT POINTS, and at the beginning of your next turn, do not check if that SUMMON disappears that turn.

Third Facet★

Natural Power: *Even more powerful creatures are at your disposal.*

Each SUMMON on your list gains one of the following abilities:

- **Destructive Aura:** At the beginning of your turn, when this summon acts, every enemy adjacent to this SUMMON takes C damage. A creature may DASH 1 hex away from the SUMMON to prevent this damage.
- **Skitter:** Once per round, after being attacked, this summon may DASH 3 hexes.
- **Restorative:** Once per round, you may remove a lesser restorable effect from this SUMMON.
- **Web:** Once per round, this SUMMON may create a 1 hex burst of afflicted hexes within 6 hexes that inflicts SLOW 1 to any creature entering it. These last for 2 rounds.
- **Venomous:** You may attach a RIDER to each of this SUMMON's mook major actions that inflict PERSISTENT DIZZY 1 for 3 rounds on a hit.

- **Energy Attacks:** When a SUMMON gains this ability, choose an ENERGY EFFECT . When you SUMMON this creature, you may attach a RIDER to it's next attack that inflicts the chosen energy effect.

Fourth Facet

Evolution: *Your quest for power leads you to even more capable creatures.*

Each SUMMON on your list gains a tactical ability or two features.

Fifth Facet★

Enhanced Body: *Only the most capable creatures are worth your time.*

Each SUMMON on your list gains one of the following abilities:

- **Elemental Body:** When a SUMMON gains this ability, choose an energy condition. The first time that this SUMMON is damaged by an enemy adjacent to it, that enemy gains the chosen energy condition.
- **Retributive:** When this SUMMON falls below 0 HIT POINTS, each enemy within 2 hexes of it become PRONE.
- **Fear Aura**[FEAR], SLOW : Whenever an enemy would move into a hex adjacent to this summon, that enemy must spend an additional STEP.

- **Eldritch Body:** The first time each encounter that an enemy has LINE OF SIGHT to a SUMMON with this ability, that enemy becomes DIZZY 2 for one turn.

- **Invisible:** This SUMMON is INVISIBLE 3. This effect does not end if the SUMMONED creature attacks, as long as no targets of that attack are outside radius 3 of the SUMMONED creature.

- **Glorious Form:** When you SUMMON this creature, you may have each hex within 6 hexes of it become lit. This effect ends when the summoned creature dies or is dismissed. Whenever an ally within this area would be subject to a lesser [FEAR] effect, there is a 25% chance that that effect is negated.

Sixth Facet

Evolution: *the creatures you summon are practical legends in their own right.*

Each SUMMON on your list gains a tactical ability or two features.

Seventh Facet★

Master Summoner: *Your access to new creatures is nigh limitless.*

Once per encounter, you may SUMMON a new creature that is not on your list. (*Tip: Write up the SUMMON while it is not your turn.*)

Warden

Major Mixed

Wardens are guardians of their allies. They protect their allies against attacks, and punish those who attack them.

Sir Francois stood tall and proud in front of Joel. The assassin eyed Joel, trying to find an opening. Francois struck with his sword, and the assassin had to turn all of his attention to defending against the strikes. "Leave him alone." Francois demanded, pushing his attack. The assassin tried slipping past him and attacking Joel, but Francois turned and cut him down.

Adaptation

This TRACK can represent a fighter who taunts their enemies, or a swordmage who uses magic to compel his enemies to attack him.

First Facet★

Marks [WSO]: *You attack a target, issuing a challenge to stand and face you.*

As a major action, you may make two STRIKES that deal 8|10|13|15 damage. If either hits, that enemy becomes marked 7|10|12|14 by you. While marked by you, the first time that creature deals damage to you during your next turn, you may prevent damage equal to the amount of marked they have and remove that much marked, and remove one lesser restorable condition from yourself at the beginning of your next turn. If you still have marked on an enemy at the start of your turn, the marked becomes VULNERABLE to you with the same amount as the marked, and the next successful attack you make against them will knock them PRONE, and you may ignore target priority to attack them. **Boost**: Gain a +4 to hit.

Surge [W]: As a SURGE, you may make two STRIKES as per Marks, but you do not inflict marked. **Boost**: +4 to hit.

Second Facet★

Presence: *You don't take kindly to people ignoring you.*

If a marked enemy makes an attack that doesn't include you as a target, if they are within your melee reach, you may make a STRIKE against them that inflicts SLOWED 2 for one turn.

Riposte: *You are ready for their retaliation.*

If a marked enemy makes an attack against you, if they are within your melee reach, you may make a STRIKE after their attack is resolved that disarms them.

Third Facet★

Intimidation [OS]: *Your mere presence can be enough to make people focus on you.*

Once per encounter, as a major action, choose an enemy within 6 hexes of you. That enemy becomes marked $4 \times C$ by you. **Boost**: Increase the marked by C .

Fourth Facet★

Stay Still: *You give your opponent a look that warns them not to try to escape.*

Once per encounter, when an enemy marked by you attacks you, you may activate this ability. The next time that enemy moves before the end of their next turn, you may DASH up to 6 hexes and use a SURGE against them.

Tackle: *Enemy's ignore you at their peril.*

Once per encounter, when an enemy marked by you makes an attack that doesn't include you, if that enemy has not dealt damage to you this turn, you may DASH up to 6 hexes. Each time you enter a hex adjacent to that enemy as part of this movement, you may FORCE that enemy one hex in any direction.

Fifth Facet★

Multi-Mark [S]: *Your presence dominates all those nearby.*

As a major action, each enemy adjacent to you becomes marked $2 \times C$. At the beginning of your next turn, if two or more enemies that you marked with this ability did not deal damage to you, choose one of them. That enemy becomes vulnerable C in addition to the usual effects. **Boost**: Increase one of the marked by C .

Sixth Facet★

Tenacious Fighter: *Nothing gonna bring you down.*

You are immune to lesser conditions inflicted by creatures marked by you.

Slip Away: *You distract people from their intended target.*

Whenever an enemy marked by you makes an attack that doesn't include you as a target, choose one of the targets of that attack. That enemy treats that target as INVISIBLE 2 until the end of their next turn.

Seventh Facet★

Ultimate Champion: *You act quickly to dominate your opponents.*

Once per encounter, you may use one of the following abilities:

WARDEN

- **Supreme Vengeance** [O]: As an immediate major action when an enemy makes an attack that doesn't include you as a target, you may DASH 6 hexes towards that enemy and make two STRIKES against them that deal 25 but does not mark them. If both hit, they are STUNNED. **Boost:** Give one of the STRIKES a BOOST.
- **Undying Grit** [S]: As an immediate major action when an enemy would reduce you to 0 HIT POINTS or less, you may gain 12 TEMPORARY HIT POINTS before the damage is dealt. That enemy becomes VULNERABLE 12 to the next attack made against them. **Boost:** Increase the VULNERABLE by *C*.

Adept

Major Varies

You have learned how to take multiple skills others use as minor actions and blend them together.

Joseph held a sword in one hand, and a grenade in the other. Electricity ran down his sword, crackling with power. The samurai charged at Joseph. Joseph met his charge with a slash of his electrified sword, and stuck the grenade to the samurai's chest. He leapt clear of the explosion, landing gracefully as the samurai collapsed from the onslaught.

Adaptation

This track enables taking a second minor track, and so its uses depend on the track chosen.

First Facet

Extra Minor Track: *Your talents have allowed you to learn an additional skillset.*

Pick any minor track other than your current minor track that does not grant a track. This is your extra minor track. You gain perk points from this track based on whether your extra minor track grants a perk point for that facet. You cannot use your normal minor action to use minor actions from this track, only bonus minor actions granted by this track, which can only be used for that action. If you are able to take an additional minor action from some source, this additional minor action may be a bonus minor action. The abilities from this track can have a single BOOST or PENALTY. If your extra minor track allows for immediate actions, they can still be taken out of turn, but they count against the minor actions you would get from major actions in this track, and the bonus minor actions granted by this track can be used to prime minor actions for use by your extra minor track.

Starting Facet: You gain the first facet of your extra minor track.

Adept Attack: Choose one of the following abilities.

- **Deliberate Strike** [WS]: *You attack your enemies with a weapon.*

As a major action, you may gain a bonus minor action, and make a STRIKE for $5 \times C$ damage. These may occur in either order. **Boost:** +4 to hit

- **Primal Blast** [RmS]: *You unleash an arcane blast.*

As a major action, you may gain a bonus minor action, and deal $Cd6$ damage to a target within 12 hexes. A successful defense roll halves this damage. These may occur in either order. **Boost:** +4|5|6|8 damage

- **Raw Enhancement** [S]: *You incite your ally to action.*

As a major action, you may gain a bonus minor action, and allow an ally within 12 hexes to take a SURGE. These may occur in either order. **Boost:** Give the SURGE a BOOST.

Surge: As a SURGE, you may use Adept Attack without gaining a bonus minor action. If you chose Raw Enhancement, choose either Primal Blast or Deliberate Strike to use as your SURGE.

Second Facet

Additional Facet: You gain the second facet of your extra minor track.

Adept Skill: You gain one of the following abilities based on your choice for Adept Attack:

- **Deliberate Strike** [WS]: *You attack everything nearby.*

As a major action, you may either target all hexes in your melee range or a 1 hex radius burst at range, depending on if this is a ranged weapon. You gain a bonus minor action, and deal 12|16|19|23 damage to people in the targeted area on a hit. **Boost:** +5|7|8|10 damage to one target.

- **Primal Blast** [RS]: *You invoke an arcane explosion.*

As a major action, you may gain a bonus minor action, and deal $3 \times C$ damage to all target in a 1 hex radius burst within 12 hexes. A successful defense roll halves the damage. **Boost:** +4|5|6|8 damage to one target.

- **Raw Enhancement** [S]: *You extend your bonuses to multiple allies.*

As a major action, you may have 2 allies within 12 hexes make a SURGE. These SURGES have a PENALTY. You gain a bonus minor action. **Boost:** Remove a PENALTY from one of the SURGES. **Penalty:** You cannot use this ability with a PENALTY.

Third Facet

Additional Facet: You gain the third facet of your extra minor track.

Adept Power: *Your fighting skill can hinder opponents.*

Choose one of the following conditions. When you hit with Adept Attack, or the target fails their defense roll, the target gains the condition. If you have raw enhancement, the SURGE gets a RIDER that inflicts this effect on a hit.

- an ENERGY EFFECT
- PRONE
- SLOW 2
- DIZZY 1

Fourth Facet

Additional Facet: You gain the fourth facet of your extra minor track.

Swift Minor: *You use the edge you have in combat to take an additional action.*

Once per round, you may spend 2 BOOSTS to take a bonus minor action.

Fifth Facet

Additional Facet: You gain the fifth facet of your extra minor track.

Persistent Blow: *You extend the effect you apply.*

Once per encounter, when you would inflict the condition from Adept Power or create a RIDER with it, you can make it PERSISTENT for 3 rounds.

Sixth Facet

Additional Facet: You gain the sixth facet of your extra minor track.

Mobile Slash[H]: *You move swiftly before you attack.*

You may DASH 2 hexes before using Adept Attack. If you have Raw Enhancement, the targeted ally dashes these hexes instead.

Seventh Facet

Final Facet: You gain the seventh facet of your extra minor track.

Double Barrel: *You use your minor track twice.*

Once per encounter, as a major action you may gain 2 bonus minor actions.

Monstrous

Major Varies

You aren't human. You have more in common with the beasts they fight than with them. Be it spider, dragon, undead, construct, or some other monstrous form, you possess the abilities of a beast.

Lala Neversong floated in midair. The assassin dance troupe circled below. Lala let out a banshee's wail, and the dancers covered their ears as utter despair overwhelmed them. Taking advantage of their weakened state, Lala flew through a wall to escape.

Adaptation

While the most obvious use for this TRACK is playing a monster, it can also be used for a half-monster, the results of a mad science experiment, someone channeling the spirit of a monster, or just a more customizable aspect to represent an odder concept.

First Facet

Monster: *You are a monster, and fight like one.*

Select any two non-unique abilities from the major monster abilities table (pg. 146), only one of which can be from the secondary major list. You may use either ability as a major action. If you possess [W]eapon abilities, you may also gain 1 weapon of your choice as a natural weapon. This does not prevent you from wielding normal weapons.

Defining Traits: *You have special abilities due to your species.*

You gain one of the following abilities

- **Fast:** +1 speed.
- **Glider:** When in air, you may gain Hover.
- **Tough hide:** When affected by an afflicted hex, roll a 1d20. On a 5 or less it doesn't affect you.
- **Leaper:** you may spend 2 STEPS to jump 3 hexes high.

Surge: You may take a SURGE as a monster, using the default SURGE ability or a SURGE granted by any of your chosen major actions.

Second Facet

Monstrous Signature: *You have grown into your natural power.*

You may gain an ability from the monster tactical ability list (pg. 160).

Dual Form: *Some monsters can change their form; you may be one of them.*

You may elect to take a second tactical ability. If you do so, you must pair each of your tactical abilities with 1 of your majors, so each major has a tactical ability associated with it. These pairings are a form, and you must pick a form at the start of each turn. You may only use the tactical ability and major of your current form.

Third Facet★

Natural Powers: *You have learned to leverage your natural abilities in a fight.*

You gain 1 of the following abilities:

- **Destructive Aura:** At the beginning of your turn, every adjacent enemy gains BLEEDING C.
- **Skitter:** Once per round, after being attacked, you may DASH 3 STEPS.
- **Restorative:** Once per round, you may remove a lesser restorable effect from yourself.
- **Web:** Once per round, you may create a 1 hex burst within 6 hexes that inflicts SLOW 2 to any creature entering it.
- **Venomous:** You may attach a RIDER to your major action that inflicts DIZZY 1 for 2 rounds on a hit.
- **Hidden Power:** Pick a monster minor ability marked with [SURGE]. You may use it in place of a SURGE. If it is a RIDER, you may directly attack the target of the SURGE with the RIDER.
- **Energy Attacks:** Select an ENERGY EFFECT. You may attach a RIDER to your major action that inflicts the chosen effect on a hit.
- **Enhanced Natural Weapon:** The natural weapon granted by this TRACK may be a bonus artifact with 2 enchantment points.

Fourth Facet

Evolution: *You have unlocked new powers.*

You gain another ability from the monster tactical ability list. If you have dual form, this ability is accessible from both forms.

Fifth Facet★

Carnal Body: *Your natural talents continue to expand.*

You gain 1 of the following abilities:

- **Hard to Kill:** You may be healed while WOUNDED
- **Retributive:** When you gain this ability, choose an ENERGY EFFECT. When you are targeted by a melee attack, the attacker gains that ENERGY EFFECT.

- **Explode on Death:** If you drop below 0 hit points, all enemies within your melee range are FORCED back 1 hex and knocked PRONE.
- **Fear Aura** [FEAR]: At the start of each turn, your target priority decreases. You cannot be attacked if a higher priority target is available.
- **Eldritch Body**[MENTAL]: The first time each encounter an opponent has LINE OF SIGHT to you, they are DIZZY 2 for one turn.
- **Invisible:** Once per encounter, you may become INVISIBLE 3. This does not end if your attack doesn't target anyone outside of range 3.
- **Glorious Form:** You may choose to cause all hexes within 6 hexes of you to be lit. Allies within this area may make a 50% roll when subjected to a [FEAR] effect to negate it.

Sixth Facet

Pinnacle: *You have gained access to your true power.*

You gain another ability from the monster tactical ability list. If you have dual form, this ability is accessible from both forms.

Seventh Facet ★

Heightened Power: *You use every aspect of your abilities to its maximum potential.*

You gain the following ability based on your Natural Power, or you may pick a second Natural Power

- **Destructive Aura:** Destructive Aura effects opponents within 3 hexes.
- **Skitter:** After being attacked, you may DASH 3 hexes.
- **Restorative:** You may restore 2 lesser restorable effects each round.
- **Web:** Your web may be up to radius 3.
- **Venomous:** The RIDER also attaches BLIND 6 for 3 rounds.
- **Hidden Power:** As a major action, you may make the SURGE from Hidden Power and the SURGE from your selected major, in either order.
- **Energy Attacks:** The RIDER always hits.
- **Enhanced Natural Weapon:** The natural weapon granted by this TRACK may have 4 enchantment points.

Blighter Spellblade

Minor Offense

A spellblade takes the arcane arts that others use and learns ways to channel it into other effects. Many use this to empower their weapons with arcane fury, but others use it to infuse their spells with more potency.

Spying his mark, Markus muttered a spell, forming a clinging, caustic fog around his shortsword. A moment to let it stick, and then he plunged the spelled blade into the ministers back. The minister turned once, turned twice, and then, swaying from the poison, fell on his face.

Adaptation

While this defaults to channeling poison magic, it can just as easily represent a mundane poison user, using their minor actions to apply poison to their weapon. Blows that barely scratch a foe could still poison them, while a solid blow may still result in the poison being resisted.

First Facet★

Amateur Affliction: *You infuse your weapon with poison.*

As a minor action, gain a RIDER. The target of the RIDER takes $2 \times C$ ONGOING damage. A successful defense roll with a +2 modifier halves the ONGOING damage. **Boost:** Increase the ONGOING by C .

Subtle Sickness: *Your poison can have a variety of side effects.*

You may use one of the following abilities once per round. You may choose a new ability each round.

- **Slow Venom:** Every target of an ability with a RIDER from this TRACK becomes SLOWED 1 for one turn. A successful defense roll negates this effect.
- **Distracting Venom:** Every target of an ability with a RIDER from this TRACK becomes off balance. A successful defense roll negates this effect.
- **Blinding Venom:** Every target of an ability with a RIDER from this TRACK becomes BLIND 7 for one round. A successful defense roll negates this effect.

Arcane Strike[W]: *Just directly channel it.*

If your major action does not target an enemy, you may deliver any RIDER from this TRACK through a STRIKE as part of the minor action to create it.

Second Facet★

Poison Skin: *You practically ooze poison.*

Once per round, if you are hit by a melee attack, the attacker gains the effects as if hit by Subtle Sickness.

Third Facet★

Incurable: *This nasty poison resists attempts to cure it.*

Once per round, when you affect an enemy with Amateur Affliction, you may instead affect that enemy

with PERSISTENT CORRUPTED for 3 rounds. Additionally, when you affect a target with this ability, the next time that target would be healed, it becomes DIZZY 1 for one turn.

Fourth Facet★

Acidic Venom: *Your poison is capable of dissolving mundane objects.*

Whenever a destructible item or terrain would take damage from Amateur Affliction, you may have that obstacle take additional damage equal to twice the amount of ONGOING it would receive.

Sickening Spillage: *You liberally scatter poison around.*

Each time a creature is affected by the Amateur Affliction RIDER, the hex that the creature occupies and up to three adjacent hexes become afflicted. Whenever a creature enters a hex afflicted this way, it gains C ONGOING.

Fifth Facet★

Persistent Pain: *Boost the halflife.*

When you use Subtle Sickness, you may choose to have the effect become PERSISTENT for 2 rounds.

Sixth Facet★

Deathly Decay: *This blend is paralytic.*

Once per encounter, when you would inflict ONGOING damage with this TRACK, you may instead inflict PERSISTENT WEAKEN for 2 rounds for the amount the ONGOING damage would have been for.

Seventh Facet★

Painful Pandemic: *Your poison can spread like wildfire.*

While a creature has ONGOING or PERSISTENT effects from Amateur Affliction, if it ends its turn adjacent to an enemy, that enemy receives the same status.

Breath Weapon

Minor Offense

You've got the lungs of a dragon, and possess dragonfire. Gouts of flame erupt from your throat, engulfing your foes. You can fire quick bursts of it at your foe, but the true power requires you to inhale deeply and draw upon your inner fire.

Draco ran down the alley, guards on his tail. One wrong turn later, he found himself in a dead end. He turned, but his exit was already cut off by three guards. He breathed in, focusing on the flame within, then exhaled a billowing flame that filled the alley. The guards ran, screaming and beating at the flames on their clothes. Draco darted away.

Adaptation

This works well for a dragon, but it can also represent a half-dragon, or someone channeling the powers of a dragon. This can also represent other magical abilities that can be charged up. For instance, an electrical guy who can shock people, or charge up to fire a lightning bolt from his hand. At higher levels they can fire a lightning bolt out of either hand, or grab someone to electrocute them. It could also represent a air elemental by taking gale and having it be their control over wind rather than their breath.

First Facet★

Breath Effect: *Your breathe has a potent effect on others.*

Choose a status that can be afflicted as a monster basic effect (pg. 144). When an ability in this track inflicts your Breath Effect on a target, the target receives the chosen status.

Huff: *You breathe deep, preparing for a stronger attack.*

As a minor action, you can inhale, causing you to become Huffed. You cannot Huff while already Huffed.

Boost: Your ability that users Huffed gains an additional BOOST, and may have a total of 2 BOOSTS applied.

Puff[Rm]: *A brief exhalation can create a small burst of flame.*

As a minor action, you may deal C d8 damage to a target within 12 hexes. A successful defense roll halves this damage. If the target fails the defense roll, they are inflicted with your Breath Effect. **Boost:** Increase the damage by 4|5|6|7.

Blow You Down [RmO]: *You completely empty your lungs.*

As a minor action while Huffed, deal C d12 damage to a single target in range 24, defense roll for half. The target is inflicted with your Breath Effect. After using this, you are no longer Huffed. **Boost:** Increase the damage by 4|5|6|7.

Last Gasp: If you are WOUNDED while Huffed, you may use Puff for free and cease being Huffed.

Second Facet★

Breath Shape: *You can spew your breath in a large area.*

When you gain this facet, select either 12 hex line or 4 hex cone.

Broad Puff[R]: *You attack everyone nearby with a quick exhalation.*

As a minor action, deal C d4 damage to all creatures in your Breath Shape, originating from you, and each affected creature receives your Breath Effect. A defense roll halves the damage and negates the Breath Effect.

Wreckage[R]: *You release the full power of your lungs.*

As a minor action while Huffed, deal C d8 damage to all creatures in your Breath Shape, originating from you, and each affected creature receives your Breath Effect. A defense roll halves the damage, but does not negate the Breath Effect. After using this, you are no longer Huffed. If your Breath Shape is a line, it increases to 24 hexes for this ability. If your Breath Shape is a cone, it increases to 8 hexes for this ability.

Third Facet★

Draw In: *Like a Hoover.*

When you become Huffed, you may FORCE an enemy within 3 hexes of you to the closest hex adjacent to you. They must make a defense roll or be GRAPPLED by you.

In Your Face: *Up close and nasty.*

When you use Blow You Down, if you use it on an enemy adjacent to you, instead of inflicting your Breath Effect immediately, you inflict your Breath Effect as a PERSISTENT effect for three turns.

Side Burn: *Being sloppy can be advantageous.*

When you use Wreckage, choose an enemy adjacent to you. You may treat that enemy as though they were in any other adjacent hex to you when determining if they are hit by Wreckage.

Fourth Facet★

Lingering Breath: *Your Breath lingers on the ground.*

When you use Puff or Blow You Down, you may have the target's hexes and any number of adjacent hexes to the target become afflicted. When you use Broad Puff or Wreckage, you may have any number of hexes in the affected area become afflicted. When a creature enters a hex afflicted this way, they are inflicted with your Breath Effect.

Fifth Facet★

Fill With Dread: *They know what is coming and it is terrifying.*

When you use Huff, if you have used Huff before in this encounter, each enemy within radius 3 becomes [FEAR] STUNNED. A defense roll negates the STUNNED status.

Sixth Facet

Adaptability: *You can do it both ways.*
You may use either Breath Shape at will.

Restrained Breath: *Sometimes some self restraint is advantageous.*

When you use Broad Puff or Wreckage, you may choose to reduce the length of the line or cone by any amount.

Seventh Facet★

Prepared Breath: *Always Ready.*

At the beginning of each encounter, you may become OFF GUARD 2 and Huffed.

Admixture: *Mix it up.*

Choose a second monster basic effect that inflicts a status. When you inflict your Breath Effect, you also inflict this status.

Destroyer

Minor Offense

Some people view violence as a necessity. You view it as an art, and you just keep getting better.

Jake strolled through the shop, eyeing the wares. He found a necklace he fancied, slipped it over his neck, and turned to leave. "Hey, are you going to pay for that?" the shopkeeper demanded. Jake glanced at them, his eyes flashing red. He lifted a hand, pouring forth hellfire from it, engulfing the shopkeeper. They fell to the ground, writhing in agony. Jake watched the anguish with a small smile on his face for a it, before saying "No.", and strolling out of the store.

Adaptation

An increasing curse, or repeated doses of triggered toxins.

First Facet★

Demonic Crushing[Rm]: *You unleash a blast of infernal power.*

As a minor action, make a STRIKE within range 12 that deals 11|14|17|20 damage and inflicts 0|1|2|3 ON-GOING . If you hit, increase the anguish on that opponent by 1. A miss deals half the damage and ON-GOING . **Boost**: Increase the damage by 4|5|6|8.

Anguish: *The more you focus your attacks, the more terrible their effects.*

Whenever you hit someone, they know it. You may add a single effect per target of Demonic Crushing or Explosive Aura depending on that target's anguish. Anguish is determined after the attack hits and has increased anguish. You can choose an effect up to their current anguish. Anguish from multiple characters are separate and do not stack. An opponent can have 3 anguish maximum.

- **0 Anguish**: No effect
- **1 Anguish**[FEAR]: OFF BALANCE
- **2 Anguish**: BLIND 8 for one turn per anguish
- **3 Anguish**[MENTAL]: You are INVISIBLE 1 to them until you damage them or they damage you.
- **3 Anguish**: BLEEDING C and reduce their anguish by 2.

Second Facet★

Explosive Aura: *You unleash an explosion of infernal power that harms all around you.*

As a minor action deal $3 \times C$ damage to all opponents within radius 3 of you. A successful defense roll halves the damage. All enemies you damage are also FORCED 2 hexes away from you. **Boost**: deal 3|3|4|5 extra damage per target or 4|5|6|8 damage to one target

Third Facet★

Explosive Presence: *Your mere presence can cause agony.*

Once per encounter, increase the anguish of all opponents within radius 3 of you by one.

Fourth Facet★

YOU!: *You have selected your victim, and they are powerless to resist.*

Once per encounter, choose an opponent within LINE OF SIGHT. That opponents anguish is now 3, regardless of what it was before. You can ignore target priority when attacking this opponent.

Fifth Facet★

I Was Here: *Your explosion of energy can reshape the battlefield.*

Once per encounter, when you use Explosive Aura, you may remove any affliction from any hexes within radius 3 of you, and make any hexes within radius 3 of you difficult terrain for the rest of the encounter.

Sixth Facet★

Graphic Violence [FEAR]: *Sometimes you just need to make an example of someone.*

Once per encounter, when an enemy hit by Demonic Crushing becomes WOUNDED in the same round, enemies within radius 3 of the enemy become STOPPED for one turn.

Seventh Facet★

Foreboding[FEAR]: *Enemies can barely stand to be near you,*

When you move to a hex adjacent to an enemy, they become OFF BALANCE.

Excruciating Anguish: *You can exert your dominance in new and creative ways.*

Twice per encounter, you can pick an Anguish Effect from the following list:

- **1 Anguish**: Your opponent becomes TETHERED 6 to you.
- **2 Anguish**: DIZZY 2 for one turn per anguish
- **3 Anguish**: STOPPED for 1 turn

Elemental Spellblade

Minor Offense

Elemental Spellblades attack with their chosen element not just directly; but can also channel them through their weapons and attacks.

Gabriel held his sword out to his side, and flames ran along it. He ran forward, and brought his sword down on the troglodyte's head. The flames surged, exploding the troglodyte into bits as Gabriel hacked it in two. He turned to the ones behind it, and wrapped the flames around himself in a brilliant cloak.

Adaptation

This can represent someone who attacks with innately elemental attacks, a spellcaster who infuses their spells with elemental power, or a cleric who grants their allies blessings from the god of flame.

First Facet★

Spark of Power: *You cultivate sparks of power to enhance your abilities.*

As a minor action, gain an elemental spark.

Boosted Attacks: *You infuse your attacks with elemental power.*

You may use an elemental spark to gain a RIDER. The RIDER deals $Cd4$ damage. A successful defense roll halves the damage. **Boost:** Deal an extra $4|5|6|8$ damage.

Elementary Elements: *You have chosen a type of energy to master.*

When you gain this track, choose an ENERGY EFFECT. This choice is permanent. Whenever an enemy fails a defense roll against an ability from this track, that enemy gains the chosen condition. Enemies cannot gain An Edge against your attacks because of this ability.

Afterthoughts: *You can infuse the power of your element into all of your attacks.*

When you attack an enemy, if you do not use Boosted Attacks against that enemy as part of that attack, you may have that enemy make a defense roll subject to Elementary Elements.

Arcane Strike[W]: *Just directly channel it.*

If your major action does not target an enemy, you may deliver any RIDER from this TRACK through a STRIKE as part of the minor action to create it.

Second Facet★

Energy Shield: *You can wrap yourself in an elemental shield.*

When you gain an elemental spark, you may decrease your target priority by one stage. This lasts until you no longer have any elemental sparks. Whenever an enemy violates this target priority from within their melee range, they take $Cd4$ damage, ignoring COUNTERS. A successful defense roll halves the damage. If they do not violate target priority, you may spend an elemental spark to activate this anyways. **Boost:** This deal an extra $4|5|6|8$ damage.

Devour Magic: *You are the master of your chosen element, and using it against you is unwise.*

When you would be affected by the condition you chose for Elementary Elements, you may spend an elemental spark or an immediate minor action to negate that condition. If you do, you become ENERGIZED $2 \times C$ and gain 6 steps during your next turn.

Boost: Increase the energized by C .

Third Facet

Elemental Form: *You can transform your entire body into your chosen element.*

When you gain this ability, choose a monster tactical ability (pg. 160). Once per encounter, as a minor action, gain the chosen monster tactical ability and an elemental spark. The monster tactical ability remains for the rest of the encounter.

Fourth Facet★

Overdrive: *You can inflict an even more powerful form of your chosen energy effect.*

Twice per encounter, when you would inflict the element you chose for Elementary Elements, do one of the following:

- If you chose IGNITED for Elementary Elements, the creature may choose to become Blazing instead. If they do, they must spend all STEPS for a turn to end that condition, and while the condition lasts, they take $3 \times C$ damage at the end of each turn. If they do not receive the Blazing condition, you gain an elemental spark and they still receive regular IGNITED.
- If you chose FROZEN for Elementary Elements, the creature may choose to become STOPPED for one round instead of FROZEN. If they do not become STOPPED, they still become FROZEN, and you gain an elemental spark.
- If you chose SHOCKED for Elementary Elements, the creature may choose to become STUNNED for one round instead of SHOCKED. If they do not become STUNNED, they still become SHOCKED, and you gain an elemental spark.

Fifth Facet★

Dance of the Elements: *You control the energy even as it courses over their body.*

Whenever a creature within 12 hexes gains the ENERGY EFFECT you selected for Elementary Elements, you may DIRECT that creature 2 hexes.

Sixth Facet★

Elemental Explosion: *You cover everything near you with your element.*

As a minor action, each hex within 3 hexes of you becomes afflicted, and you gain an elemental spark. Whenever an enemy begins their turn in a hex afflicted this way, or enters a hex afflicted this way, they make a defensive roll, subject to Elementary Elements.

Seventh Facet★

Primordial Power: *Your mere presence can impact your enemies.*

At the beginning of each of your turns, you may have any number of creatures within 3 hexes of you gain the ENERGY EFFECT you chose for Elementary Elements.

Gadgets

Minor Offense

You have a toolbelt of nifty gadgets to assault your enemies with.

John reached into his toolbelt, and out came a bomb. He pitched it at the pursuing Atlantean. It burst into a glob of sticky napalm, coating everything nearby. Bellowing in pain, the pursuer kneeled and threw their trident. It caught John in the leg and he went down. Panicked, John fumbled through his gadgets. Concussive blast was no good... his hand fell upon his lightning generator, and he smiled.

Adaptation

Can be used for a suite of quick, smaller spells to compliment your main combat abilities.

First Facet★

Laser: *You have a variable focus laser.*

As a minor action, you may STRIKE all enemies within a length 12 line originating from you with a +2 to hit, dealing 10|13|17|20 damage. If you only target 1 enemy, this deals an extra *C* damage. **Boost:** Deal an extra *C* damage to everyone, or 4|6|7|9 damage to 1 target.

Second Facet★

Sticky Napalm: *You lob a bomb that sprays a sticky, corrosive substance.*

As a minor action, target a hex within 12 hexes. All opponents in a 2 hex burst gain *C* ONGOING damage. Additionally, all hexes within 2 hexes of the target hex become afflicted for two rounds. Creatures who enter one of these hexes become SLOWED 2 for 1 round. This can only affect a creature once per round. **Boost:** One target takes an additional 2|3|4|5 ONGOING damage.

Third Facet★

Concussive Blast: *Explodes with disarming force.*

As a minor action, STRIKE a single opponent within 12 hexes with a +1 to hit for –|18|23|28 damage. You may disarm the target on a hit, knocking the weapon to a hex of your choice within range 2. **Boost:** +4 to hit.

Fourth Facet★

Defocusing Prism: *Megalaser mode!*

You may use a 6 hex cone instead of a 12 hex line when you use laser. Choose an ENERGY EFFECT.

When you use laser, you may inflict that effect on all creatures hit. This choice is permanent.

Fifth Facet★

Chain Lightning Generator: *This bolt of lightning jumps between targets.*

As a minor action, FORCE up to 3 enemies within range 12, where each target is within 3 hexes of another target, to make a defense roll with a -1 modifier or take $3 \times C$ damage and lose their ability to fly for one turn and become SHOCKED. If you only target 1 opponent, this deals –|–|23|28 extra damage. **Boost:** deal 4|5|6|7.

Sixth Facet★

Boomerang Blade: *This tricky blade orbits around you.*

As a minor action, choose between 1 and 3 hexes away from you. Creatures other than you at that exact distance from that hex and sharing your altitude take –|–|12|14 damage. Creatures damaged by this ability start BLEEDING $2 \times C$. LINE OF EFFECT for this ability is drawn starting from your hex to each hex in sequence either clockwise or counterclockwise, rather from your hex to each other hex as normal. **Boost:** One target takes *C* additional damage.

Seventh Facet★

Stopwatch: *This gadget messes with time.*

Once per encounter, as a minor action, you can inflict STUNNED on all enemies within 4 hexes for 1 round. Affected opponents also receive a PENALTY while STUNNED. **Boost:** One target takes an additional penalty.

Grenadier

Minor Offense

A grenadier throws explosives with a casual grace. The types and number of grenades can be improved with skill.

An explosion went off, scattering rotten body parts everywhere. More zombies continued to advance. Zachary pulled out another grenade and tossed it after the first. He then tossed out a smoke grenade, and darted through the opening he created. Reaching the fire escape ladder, he swiftly climbed up, dropping another grenade behind him before continuing along the rooftop.

Adaptation

This can represent any source of explosives, magical, natural, or technological.

First Facet★

Frag[R]: *Frag out!*

As a minor action, you may throw a grenade at a hex within 12 hexes. It explodes in a 1 hex burst, doing $3 \times C$ damage. A successful defense roll halves the damage. **Boost**: Deal 3|3|4|5 extra damage per target or 4|5|6|8 damage to one target.

Precision Charge[Rm]: *Smaller means more focused.*

As a minor action, you may deal 11|15|19|23 damage to a target within 12 hexes. A successful defense roll halves the damage. **Boost**: increase the damage by 4|5|6|8.

Second Facet

Smoke Grenade[R]: *Great clouds of smoke.*

As a minor action, you may throw a smoke grenade at a hex within 12 hexes. It explodes in a 1 hex burst. Those hexes become cloudy (pg. 38) for 2 rounds. You may use Precision Charge when you use this grenade.

Third Facet★

Sticky Grenade [Rm]: *GETITOFFGETITOFF*

When you throw a grenade, you may declare it to be a sticky grenade. Instead of targeting a hex, STRIKE an opponent within 12 hexes. If it hits, you stick a grenade to that creature which moves with it, otherwise it lands in their hex. At any point during your turn, the grenade explodes at your command. This can be any type of grenade you possess, and the explosion is the same as that grenade type. If the grenade is stuck to a creature, that creature automatically fails its defense roll when it explodes.

Fourth Facet★

Flashbang Grenade[R]: *Blinded by the blast.*

As a minor action, you may throw a grenade at a hex within 12 hexes. It explodes in a 1 hex burst. Those in the hexes are BLIND 6 and DIZZY 2 for one turn. You may use Precision Charge when you use this grenade.

Fifth Facet★

Dual Grenades: *Two hands, two grenades.*

When you throw a grenade with a minor action, you may throw 2 grenades. A creature can only be affected by 1 frag grenade or poison gas grenade. You may use a single Precision Charge if neither grenade is a frag grenade, otherwise any Precision Charges uses granted by these grenades are not used.

Sixth Facet★

Poison Gas Grenade: *Not a silent but deadly. Just deadly.*

When you throw a Smoke Grenade, if you forgo the use of Precision Charge, including the one granted by Dual Grenades, the resultant cloud deals $-| - |3|4$ ONGOING damage for 3 rounds to creatures who start their turns in them. **Boost**: Increase the ONGOING damage by 2 for all targets, or by 3 for one target.

Seventh Facet★

Concussive Force: *Your grenades pack a real punch.*

When a creature is damaged by a Frag Grenade, you may FORCE them 2 hexes from the center of the explosion.

Laser Beams

Minor Offense

Friends don't let friends play with lasers, except you do.

Angelica fired a laser at John. It bounced off his armor harmlessly, and seared a path through the oncoming Grilchin. More continued to pour over the hill. In desperation, she held down the charge button, and watched her indicator light up, showing a full charge. Then the indicator turned red, warning that the power cell was about to overheat. She pointed the gun downrange, and unleashed the full power of the laser, which blew a giant path through the encroaching swarm.

Adaptation

This can represent having a laser rifle, or firing magical beams of energy.

First Facet★

Laser Shot [Rm]: *Peeeeew!*

As a minor action, choose a creature within 6 hexes. That creature takes $3 \times C$ damage. **Boost:** Deal an additional C damage.

Piercing Beam [RS]: *Wide Beam.*

As a minor action, deal $2 \times C$ damage to each enemy in a line up to 12 hexes long. **Boost:** Deal an additional C damage to one enemy hit by this effect.

Focus: *Your laser illuminates its target.*

Whenever you damage an enemy with this track, you may have all allies gain LINE OF SIGHT to that enemy until the end of your next turn. If you do, each enemy gains LINE OF SIGHT to you until the end of your next turn.

Second Facet★

Relay: *Friendly Fire Lasers.*

Whenever you use an ability from this track that targets or ends at an ally, you may use the same ability again as if you were standing in their hex. If an ability requires you to spend charge, you only need to pay the cost once per minor action. No matter how many times an ability would hit an enemy, you can only affect a target once per minor action. You can choose to make your line shorter to end on a specific target. This does not target the ally you redirected from.

Third Facet★

Charging: *You can charge up your laser for a more powerful attack.*

As a minor action, you can gain a point of charge.

Charged Laser Shot [RmO]: *Full Power!*

As a minor action, you can spend a point of charge to choose a creature within 6 hexes. That creature takes $5 \times C$ damage and are IGNITED C . **Boost:** This deals C more damage. This ability can be affected by up to two BOOSTS and/or PENALTIES.

Charged Piercing Beam [R]: *Widest Beam!*

As a minor action, you can spend a point of charge to deal $3 \times C$ damage to each creature in a line up to 12 hexes long. Enemies hit by this ability are IGNITED C . **Boost:** This deals C more damage to the first creature hit by this ability. This ability can be affected by up to two BOOSTS and/or PENALTIES.

Fourth Facet

Overcharged [RO]: *You cook your laser well past the manufacturer's recommended guidelines.*

As a minor action, you can spend two points of charge to deal $3 \times C$ damage to each creature in a line, and all adjacent hexes, with length up to 12 hexes. This attack ignores counters. Enemies hit by this ability are IGNITED C , and become BLINDED 6. Additionally each hex in the path of this attack becomes afflicted for one round. When an enemy enters a hex afflicted this way, they take $3 \times C$ damage and are IGNITED C and BLINDED 6. **Boost:** Deal an additional C damage to the first creature you hit. This ability can be affected by up to three BOOSTS and/or PENALTIES.

Fast As Light: *You can travel through your laser.* When you use Piercing Beam, Charged Piercing Beam, or Overcharged, you may WARP to any hex affected by that ability.

Fifth Facet★

Dual Lasers: *You fire lasers in multiple directions.* Once per minor action that you use Piercing Beam, Charged Piercing Beam or Overcharged, you instead use it twice. Each creature can only be targeted by this track once per minor action.

Sixth Facet★

Forced Relay: *You can bounce lasers off enemies as well as allies.*

You may use Relay when a line ends on an enemy. A given line can only be bounced off a single enemy.

Seventh Facet★

Disco Fever: *You fire lasers in all directions.*

Once per encounter, when you use Piercing Beam, Charged Piercing Beam or Overcharged, you may instead fire one in all 6 directions. You fire 6 beams, and each one must pass through a different hex adjacent to you. If you are large, 2 of these beams must originate from each of your hexes, if you are huge one must originate from each perimeter hex. Each creature can only be targeted by this track once per minor action.

Two Weapon Fighting

Minor Offense

Fighting with two weapons has a long tradition. Assassins striking with a pair of daggers, pirates raiding their foes with a cutlass and flintlock, Cowboys with a six shooter in each hand, even battlemages who would swing a sword while raining fire on their foes all found value in a second weapon.

Clint fired twice, one from each pistol, and took out two of the outlaws. More outlaws popped out from behind their cover to fire, and another pair of shots saw another pair of bodies. Clint ducked behind the wagon as a hail of return fire came. Suddenly, everything went quiet as Billy appeared. Clint ran out from behind his cover and started unloading both pistols into Billy.

Adaptation

This is a very general concept which can be used in many ways. Besides the obvious characters with two weapons, you can use it for someone who attacks with their offhand while doing something else with their main attention, such as casting spells, healing, summoning, etc. It can also be used with an unarmed character to represent them attacking extra fast, or an old one-two.

First Facet★

Dual-Wield: *You have decided the best use of your other hand is to use a weapon.*

You may wield 2 weapons at the same time, as if they have the paired property. You may choose either weapon to make your major action with for the round, and all abilities from this TRACK will use the other weapon, referred to as your offhand weapon. If your major action doesn't use a weapon you can designate either weapon as your offhand weapon each round. Whenever you draw or switch weapons, you may draw or switch your offhand weapon as well.

Offhand Blow [W]: As a SURGE, you may STRIKE an opponent at +1 to hit. This deals 14|18|23|28 damage on a hit. **Boost:**+4 to hit.

Offhand Strike: *You attack with your offhand weapon.*

As a minor action, you may use a [W]eapon SURGE with your offhand weapon. **Boost:** Give the SURGE a BOOST.

Second Facet★

Repeated Attack: *You can aim your weapons at two different targets effectively*

As a minor action, when you attack with your major action, you may use it again; this cannot include targets that were targeted by the first action or other uses of this ability this round. You cannot use this with abilities that have the [S]pecial tag. **Boost:** Give the major action a BOOST.

Melded Style: You can use your melee weapon to defend yourself while firing a ranged weapon. If you are wielding a melee weapon, you don't provoke from making attacks with a ranged weapon, [R], or [Rm] ability.

Third Facet★

Dual Strike[W]: *You can split your attacks effectively.*

As a minor action, you may STRIKE one target with your main weapon and another target with your offhand weapon, each at a +1 to hit, dealing Cd6 dam-

age. **Boost:** Increase the damage to one target by 5|6|8|9.

Fourth Facet★

Deftness: You gain one of the following abilities based on your offhand weapon:

➤ **Melee:** *You exhibit martial prowess with your offhand weapon.*

You may strike an opponent with your offhand weapon. On a hit, they may either be knocked PRONE, GRAPPLED by you, or FORCED 1 hex in any direction.

➤ **Ranged:** *You force your target to duck.*

The target of your off-hand blow is OFF BALANCE.

Fifth Facet★

Rend: *The combined fury of your weapons leaves your opponents bleeding.*

Once per round, attacks with your off hand weapon inflict BLEEDING C if it targets a creature targeted by your major action.

Specialized Maneuvers: Once per encounter, you may use one of the following abilities depending on your offhand weapon:

➤ **Corkscrew Dash** [W]: As a minor action while using a melee offhand weapon, you may DASH 6 hexes, and STRIKE every opponent within melee range of any hex you passed through. This deals 12|16|19|23 damage on a hit. You may take your major action at any point during this movement. **Boost:** Increase the damage by 3|4|6|7 for all targets or by 5|7|8|10 for one target.

➤ **Spray** [W]: As a minor action while wielding a ranged offhand weapon, you may STRIKE 3 opponents. The same opponent may be targeted multiple times This deals Cd4 damage per hit, and each target hit gains ONGOING 5|6|8|9 for 3 rounds. If any of the targets end their turn

without being PRONE or in cover to you, you may take a SURGE against them. **Boost:** Increase the damage to one target by $-| - |8|10$.

Sixth Facet★

Weapon Lock[W]: *You snag your opponents weapon with your own.*
As a minor action, you may make an opponent OFF GUARD 2 and DISABLED. **Boost:** Increase OFF GUARD by 1.

Seventh Facet★

Twinned Attack: You focus both your weapons and attention to the task at hand. As a Minor action before you use a Major action, you can add a PENALTY to your major action, then use it again with another PENALTY. **Boost:** Negate one of the PENALTIES.

Full Synergy: You may treat both of your weapons as having the properties of both weapons.

Web-slinger

Minor Offense

You are capable of shooting out webs to hinder foes and traverse the terrain.

Arachneon spit a ball of spiderweb from his mouth, gluing the skeletons feet to the ground. As it struggled to pull itself free, Arachneon kicked its head off. Another skeleton loomed up behind him, but Arachneon webbed its axe and pulled it out of the skeletons hands. Another web covered its face, and he kicked it apart while it struggled to free its eyes.

Adaptation

Besides spider based characters, this can be used to represent a grappling hook and web launcher.

First Facet ★

Web Bursts[Rm]: *Combat webwork.*

As a minor action, make a STRIKE with +1 to hit within 12 hexes that inflicts a web effect and OFF GUARD 3. **Boost:** +7 to hit.

Web Effects: You gain the following web effects:

- **Yank Weapon:** *You yank the weapon out of your foe's hand.*
Disarm your target.
- **Knockdown:** *A bunch of webbing around the ankles will trip a foe.*
Your target falls PRONE.

Second Facet

Swinging Kick[WH]: *You attach your webbing to a high anchor point and swing into your opponent*

. As a minor action, you may DASH up to 4 hexes and STRIKE an adjacent opponent for $5 \times C$ damage and knock them PRONE. You have hover for this movement. This may be a MOMENTUM ATTACK. **Boost:** +4 to hit.

Spin Web: *You can begin weaving a web across the battlefield.*

When you use web bursts, you may place a strand. A strand extends between 2 solid points within 12 hexes that have a LINE OF EFFECT between each other and to you. You may move along a strand at full speed, even vertically, while other creatures may move along it at half speed. Just because a strand exists in a hex does not mean one must stand on it, a strand right above the ground does not prevent you from standing next to it and moving normally, a flier can fly next to a strand, etc. Strands may be attached to other strands.

Third Facet ★

Web Effects: You gain the following web effect:

- **Yank:** FORCE the target up to 6 hexes towards yourself.

Fourth Facet ★

Web Effects: You gain the following web effects:

- **Bound Feet:** The target is SLOWED 3 for 1 round.
- **Bound Wings:** The target loses flight for 2 rounds.

Fifth Facet ★

Web Effects: You gain the following web effect:

- **Blinding Web:** The target is BLIND 4. A minor action to remove the webbing ends it.

Sixth Facet

Parachute: *You may weave a parachute out of your webbing.*

While in air, you may gain hover until you hit the ground.

Double Stream: You may target 2 creatures when you use web bursts. Each gains OFF GUARD 2 on a hit instead of OFF GUARD 3.

Seventh Facet

Slingshot: *Now that you can fire two webs, you can fire two streams of webbing to catapult yourself around.*

When using swinging kick, you may jump 10 and DASH 10 hexes.

Acrobat

Minor Defense

While others may prefer to use armor or magic to protect them from weapons, you prefer not to be where the enemy's weapon is.

Julia somersaulted backwards as the bounty hunters axe crashed through the space she just left. He hefted his axe once more, and swung it at her head. She jumped this time, flipping over his head and landing behind him. Trying to catch her off guard, he drove his elbow backwards towards her face, but another backwards flip brought her out of reach.

Adaptation

This TRACK can be used to represent anything that is highly nimble and capable of dodging attacks.

First Facet★

Get Outta Dodge: *Dodged this!*

As an immediate minor action when an enemy goes to attack you, you can DASH up to 2 hexes +1 hex per facet in this track and become ON GUARD. Your base dodge rate is 10. Roll a d20; if you roll your dodge rate or lower, you move before the ability hits, the ability misses, and the opponent cannot retarget it. Otherwise, you are too slow and move after the ability hits you. If the attack is [O]verwhelming, you do not become ON GUARD. **Boost:** Increase your dodge rate by 5 if the attack is [O]verwhelming, or gain another ON GUARD if it is not.

Distraction: *You use your agility to distract enemies.*

As a minor action, you can distract up to 2 enemies within 12 hexes. They are OFF BALANCE and gain a PENALTY. If you only target one enemy, become ON GUARD. **Boost:** Give one of the targets another PENALTY.

Second Facet★

Instinctive Dodge: *You can dodge even when it seems you shouldn't.*

You may use Get Outta Dodge while OFF BALANCE.

Evasion: *Noone is quite sure how, but you can even dodge explosions.*

If an effect which does partial damage on a miss misses you, or you succeed a defense roll for half damage, you may avoid the damage as an immediate minor. If you do so, you gain 2|2|3|3 VULNERABILITY. If the effect targets an area, you instead gain 1|1|2|2 TEMPORARY HIT POINTS. **Boost:** Gain C TEMPORARY HIT POINTS **PENALTY:** Gain C VULNERABILITY.

Third Facet★

Backflip: *If they give you an inch, you move a mile.* If you have not been targeted by an enemy since the

end of your last turn, you may DASH 3 hexes as the start of your turn.

On Their Toes: *Dodge at the speed of surprise!*

If you dodge an attack with Get Outta Dodge, the attackers is OFF BALANCE.

Fourth Facet★

Vertical Dodge: *Every angle is an escape route - even up.*

You may jump 3 when using Get Outta Dodge.

Fifth Facet★

Sidestep: *They only thought they had you.*

If an opponent would make a REACTION against you, you may spend 1 STEP to DASH 1 hex before they can target you.

Sixth Facet

Slip Through the Shadows: *You seem to slip away in impossible ways.*

Once per encounter, Get Outta Dodge may be a TELEPORT.

Get Into Dodge: *You dart into the enemy and knock them away.*

Once per encounter, when using Get Outta Dodge, if the attacker is adjacent to you and the dodge is successful, you may forgo the movement to have the attack simply miss and knock the attacker back one hex and disarm them.

Seventh Facet★

Cheaters Dodge: *Who says cheaters never prosper?*

Once per encounter, as a minor action, you can roll a d10 instead of a d20 next time you use Get Outta Dodge, and become ON GUARD 2 instead of 1 unless it's against an [O]verwhelming ability. **Boost:** Become ON GUARD.

Bodyguards

Minor Defense You call upon minions to defend you and your allies. These minions are not very capable fighters, but they can stand between you and a sword.

“Why, I’ve been buying vineyards for years, I find them to be a sound investment.” Barok Von Dresn said to the lady seated next to him, making smalltalk. Suddenly the windows exploded inwards and rebels poured in. The dinner guests scattered in panic. Vin Dresn focused on the earth, and a rocky figure sprang from the ground and stood protectively over him. It suddenly moved to the side, catching an arrow meant for the baron. Dresn focused again, and another defender rose to protect him.

Adaptation

The nature of the summons are wide and varied. They could anything from undead minions, rock creatures that burst from the ground, to energy constructs, and more.

First Facet

Summon Bodyguard: *You call forth minions from the dust and stone around you.*

As a minor action, SUMMON a creature within 12 hexes. They have $2 \times C$ hit points, 6 speed, and are bodyguards. They have a natural melee weapon and can take REACTIONS, but they use one of the following abilities as their major action, chosen when SUMMONED.

- **Grapple:** Strike an opponent in melee range to make them GRAPPLED by you.
- **Shove:** Strike an opponent in melee range to FORCE them 1 hex.

When a bodyguard uses a SURGE, they use the default monster SURGE. **Boost:** Increase the bodyguard’s HIT POINTS by C .

Augment Summon: *You can use your talents to enhance other summons you perform.*

While SUMMONING a creature, as a minor action, you can make it a bodyguard. If it would be unsummoned through its own expiration, it is instead left with $2 \times C$ HIT POINTS and functions as a bodyguard from Summon Bodyguard. If it would be unsummoned due to being reduced to 0 HIT POINTS, it may instead gain $2 \times C$ HIT POINTS and functions as a bodyguard from Summon Bodyguard. This extra HIT POINTS may be used to mitigate BLOODLUST. **Boost:** It gains another C Hit Points.

Meatshield: *Your bodyguards are willing to take a bullet for you and your friends.*

If an ally in melee range of your bodyguard is targeted, the bodyguard may choose to be targeted instead. If an effect would target both the ally and the bodyguard, it only targets the bodyguard instead.

Tough Guards[C]: *Your bodyguards are tough and resilient.*

When a bodyguard is attacked, they may prevent C damage. If the attack dealt no damage before this reduction, the attacker takes a PENALTY.

Second Facet

Tactical Bodyguards: *Your bodyguards have more abilities.*

Your bodyguards gain one of the following abilities when created.

- **Speedy:** The creature’s speed increases by 3.
- **Blink:** The creature can TELEPORT by spending 2 STEPS for each hex TELEPORTED.
- **Scanner:** The creature has SCANNER 6.
- **Fear**[FEAR]: Creatures within 2 hexes must spend an additional STEP to move towards you.
- **Draw In**[MENTAL]: Creature within 3 hexes must spend an additional STEP to move away from you.
- **Phasing:** This creature has phasing, but must spend 2 STEPS to move each hex while using it.
- **Jump:** This creature may jump 3 high while on solid ground.
- **Hover:** This creature may hover.
- **Wall Walker:** This creature may walk on walls and ceilings.
- **Immunities:** This creature is immune to 1 condition from the following list: SLOWED, STOPPED, STUNNED, PRONE, DIZZY, GRAPPLED, BLIND, IGNITED.
- **Nimble:** This creature does not provoke reactions from moving.

Third Facet★

Hindering Forces: *They’re saying ‘slow down’. With their fists.*

Your bodyguards may attach a RIDER to their major actions that inflict SLOW 1 for 1 round on a hit, and may attach a RIDER to their reactions that reduce the creatures STEPS by 2.

Fourth Facet★

Lockdown: *They are really quite good at getting in the way.*

At its option, a bodyguard’s hex can block LINE OF EFFECT from any creature and their abilities from passing through it.

Fifth Facet★

Extended Protection: *Pushing out the defensive line.*

The melee range of your bodyguards is increased by 1.

Sixth Facet★

Through the Fire and the Flames: *They will al-*

ways go where they are needed.

Your bodyguards are immune to afflicted hexes.

Seventh Facet★

Bullet-time Summons: *You can instantly summon a bodyguard to defend in a crucial moment.*

You may use Summon Bodyguard as an immediate minor action.

Fortification Mage

Minor Defense

Build defensive structures to protect your allies and hinder your enemies.

Enron's hands moved through the air, tracing out an arcane pattern. Glowing orange barriers of energy popped up in front of him. The out boarders quickly rushed forward and took cover behind them. Across the field Malikath approached, and sent a bolt of destructive energy coursing towards the nearest out rider. It struck the barrier and dissipated. Enron quickly reinforced the barrier as more bolts streaked towards it.

Adaptation

This can be used as an engineer building the walls, or magic.

First Facet★

Fortification: *You erect fortifications to protect your allies.*

As a minor action, choose a number of hexes equal to 3+ the number of facets you posses in this track. Each hex must be within radius 6 of you. Those hexes becomes fortified. Additionally, fortified hexes you control gain $2 \times C$ AREA BARRIER HIT POINTS. If your fortified hexes already have AREA BARRIER HIT POINTS, increase the pool of AREA BARRIER HIT POINTS by $2 \times C$ instead. **Boost:** Increase the pool of AREA BARRIER HIT POINTS by C.

Second Facet★

Drawn Away: *People can take cover in your fortifications.*

Allies in fortified hexes may choose to have their target priority lowered by 1 stage. Attacks that violate this target priority receive a PENALTY.

Third Facet★

Tunnels: *You allow swift passage between your fortifications.*

While an ally is in a fortified hex, they may spend any number of STEPS to WARP to any other fortified hex within radius equal to the number of STEPS spent this way.

Spies: *Your fortifications act as an information network.*

As long as your fortified hexes have AREA BARRIER HIT POINTS in their pool, allies within fortified hexes may draw LINE OF SIGHT from any other fortified hex.

Fourth Facet★

Quick Escape: *You keep escape routes open for your allies.*

When an ally would be attacked within a fortified hex, they can DASH 2 hexes after the attack has been made.

Fifth Facet★

Stabilized: *Your fortifications allow you to resist movement.*

You gain 3 speed. When you would be FORCED to move, you may reduce your speed next round by 1 for each hex you would be moved to prevent the movement.

Sixth Facet★

Slow approach: *Your fortifications are hard to approach.*

Enemies treat hexes within radius 1 of a fortified hex as difficult terrain.

Seventh Facet★

Crumble Down: *You use your fortifications to weaken an enemy.*

Once per encounter, when an enemy enters a hex within radius 2 of a fortified hex, you may take an immediate minor action. If you do, that enemy's next major action is replaced with a SURGE, and they cannot leave that hex for the rest of the round.

Green Sage

Minor Defense

Deeply in tune with nature, a green sage is able to control plants, growing them impossibly fast.

Greenbeard appeared before the loggers. "Stop this at once, this forest is under my protection." The lumberjacks looked at the frail old man and then each other, and let out a hearty laugh. They got right back to work. Greenbeard shook his head sadly, and the grass underfoot suddenly grew a million times faster than normal, wrapping the loggers feet and arms. As they struggled against it, a thick bramble grew up, blocking their path to the forest. "You are not welcome here. LEAVE."

Adaptation

This can represent a druid, or a poison ivy style character. It could also be growing other types of structures instead of plants, such as using nanites to construct various things.

First Facet★

Grasping Roots: *Plants grow thickly underfoot, snagging feet and limbs.*

As a minor action, create a 2 hex burst of difficult terrain within 6 hexes. Enemies in this area are WEAKENED C . Additionally, you may FORCE each creature in the affected area one hex in any direction. **Boost:** One enemy in the area is WEAKENED by another C .

Razor Grass[GROUND]: *Razor sharp grass sprouts from the ground, piercing through boot and hoof alike.*

As a minor action, choose a hex within 12 hexes. Enemies in that hex are WEAKENED $2 \times C$ and SLOWED 1 for 3 rounds. **Boost:** Increase the WEAKENED by C .

Second Facet★

Barkskin: *You cause a barky coating to grow over someone's skin.*

As a minor action, choose a creature within 12 hexes. That creature gains $2 \times C$ TEMPORARY HIT POINTS. Additionally, the next time that creature would be attacked, the attacking creature becomes SLOWED 2 during its next turn. **Boost:** Grant another C TEMPORARY HIT POINTS.

Third Facet

Grasping Vine: *A vine appears and tries to strangle your foe.*

Once per encounter, as a minor action, choose a creature within 6 hexes. A vine appears in that creature's hex. It STRIKES the creature. If it hit, that creature is GRAPPLED by the vine. The vine has $-|13|17|20$ hit points. At the end of each of the creature's turns, if they are still GRAPPLED by the vine, the vine constricts the creature dealing $6 \times C$ damage. **Boost:** The vine has +4 to hit.

Barky Skin[C]: When the vine is attacked, they may prevent C damage as a COUNTER. If the attack dealt no damage before this reduction, the attacker takes a PENALTY.

Dense Foliage: *The undergrowth grows into thick bushes.*

When using Grasping Roots, any hex in the area may be made cloudy (pg. 38).

Fourth Facet★

Thorny Exterior: *Your barkskin also creates nasty thorns.*

Once per encounter, when you use Barkskin on a creature, the next time that creature is attacked, the attacker begins BLEEDING C .

Natural High: *Vine surfing. Groovy.*

You and your allies ignore difficult terrain created by the grasping roots ability. When moving through areas affected by grasping roots, you and your allies may treat it as fast terrain.

Fifth Facet★

Poison Flower: *A beautiful but deadly flower blooms, and spits poisoned spines at enemies.*

As a minor action, you can summon an oversized flower within 6 hexes for 2 rounds. It cannot move and has C hit points. Each round, including the one in which it was SUMMONED, it may STRIKE a creature within 12 hexes for $-|8|10$ weakened. **Boost:** The flower may attack an additional time on its first round.

Barky Skin[C]: When the poison flower is attacked, they may prevent C damage as a COUNTER. If the attack dealt no damage before this reduction, the attacker takes a PENALTY.

Sixth Facet★

Wall of Thorns: *You cause a thick bramble to grow across the battlefield.*

Once per encounter, as a minor action, choose a number of hex edges that form a straight line. You cannot choose more than Lvl hexes, and at least one hex edge must be within 4 hexes of you. Each affected hex edges becomes afflicted and gains $2 \times C$ AREA BARRIER HIT POINTS. Whenever a creature crosses a hex edges afflicted this way, it takes $-|7|8$ damage and begins BLEEDING C . Whenever a creature attacks another creature, if the LINE OF EFFECT contains one of the affected hex edges, the attacked creature is protected by the AREA BARRIER HIT POINTS. **Boost:** Increase the AREA BARRIER HIT POINTS by C .

Seventh Facet★

Instant Forest: *Just add good vibes.*

Once per encounter, as a minor action, you may turn 7 hexes within 12 hexes into opaque, blocking obstacles. These hexes cannot be adjacent to each other. You may designate any number of hexes within 12

hexes as a forest. They are difficult terrain, dense 6, and destructible 13. In addition, you may use Barkskin on 2 creatures; each receives *C* TEMPORARY HIT POINTS rather than the normal amount. **Boost:** One of the targets of barkskin gains another *C* TEMPORARY HIT POINTS.

Holy Healer

Minor Defense Holy Healers are reliable allies ready to heal their companions without disrupting their main focus.

Wilhelm screamed as an arrow struck his shoulder. Sean was at his side in a moment, and he yanked the arrow out. "You'll be fine," he said reassuringly. He muttered a prayer, and a moment later the wound closed.

Adaptation

This TRACK is intended to represent magical healing, however, it can represent inspiring words that push your allies to ignore their pain, or a field surgeon.

First Facet★

Hope: *You fill your ally with hope that they will survive.*

As a minor action, an ally within 12 hexes of you heals $2 \times C$ HIT POINTS and their target priority is reduced by one stage for one round. If an attack is made that violates that target priority, they heal an additional $2 \times C$ HIT POINTS. Excess healing becomes TEMPORARY HIT POINTS. **Boost:** Increase the healing by C .

Light: *You fill your ally with holy light.*

As a minor action, an ally within 12 hexes of you heals $2 \times C$ HIT POINTS and their target priority is increased by one stage for one round. If an attack is made that violates that target priority, the target of this ability becomes energized $2 \times C$. Excess healing becomes ENERGIZED. **Boost:** Increase the healing by C .

Second Facet★

Understanding: *You grant your allies knowledge and understanding.*

When you gain this ability, choose a feature. Once per encounter, when you heal an ally, that ally gains that feature for the rest of the encounter.

Friendship: *Its magical.*

As a minor action, choose 3 allies within 6 hexes of you. They are each healed C HIT POINTS. Choose an enemy. Each of those allies may ignore target priority when attacking that enemy during their next turn. Excess healing becomes TEMPORARY HIT POINTS. **Boost:** Increase the healing for one ally by C .

Third Facet★

Rest: *You bless your ally with a moment of rest.*

When you use Hope, the affected ally may DASH up to 3 hexes away from the nearest enemy to them.

Encourage: *You encourage your ally to greater feats of valor.*

When you use Light, the affected ally may DASH up to 3 hexes towards the nearest enemy to them.

Tactics: *Rally around your friends.*

When you use Friendship, you may guide each affected ally one hex towards the chosen enemy.

Fourth Facet★

Cleanse: *Your holy light is purifying.*

Once per round, when you heal an ally, you may remove a lesser restorable effect currently affecting that ally.

Vigor: *Your holy inspiration drives people to keep going.*

When you would heal an ally by $2 \times C$ HIT POINTS or more, you may reduce the amount that you heal them by $2 \times C$. If you do, that ally gains a REFRESH.

Fifth Facet★

Teamwork: *You unite your teammates in a singular purpose.*

When an ally moves due to Rest, each other ally may DASH up to two hexes towards the same enemy.

Morale: *You inspire your allies.*

When an ally moves due to Encourage, each other ally may dash up to two hexes away from the same enemy.

Camaraderie: *You are inspired to regroup around the enemy.*

When you use Friendship, during their next turn, each affected ally may move 2 hexes for each step spent, as long as this movement brings them closer to the chosen enemy.

Stimulation: Once per round, when you heal an ally that has not acted this round, you may have that ally take their turn immediately after yours.

Sixth Facet★

Rejuvenate: *Those effected by your holy inspiration feel better than ever.*

When you would heal an ally by $2 \times C$ HIT POINTS or more, you may reduce the amount that you heal them by $2 \times C$. If you do, that ally may restore a greater restorable condition currently affecting them.

Nature: *You restore the balance of nature.*

When you heal an ally, you may remove the afflicted status from any number of hexes within radius 3 of that ally.

Seventh Facet★

Life: *You have power over death.*

You may heal WOUNDED allies with abilities from this

HOLY HEALER

track. When you heal an ally this way, if they end up above 0 HIT POINTS, they stop being WOUNDED.

Renewal: *You renew the life of all those near you.* Once per encounter, you may heal 3 allies *C* HIT POINTS each as a minor action. Additionally, each lesser restorable effect currently affecting those al-

lies is restored. Additionally, each of those allies is immune to [FEAR] and FORCED movements for the next round. Excess healing becomes TEMPORARY HIT POINTS. **Boost:** Increase the healing for one ally by *C*.

Illusionist

Minor Defense

Some mages reshape reality around them. That's waaaay too much work, you just make it look like it's changed. It's the same effect. Sometimes.

Phileon charged at the magician, but a wall appeared in front of him. He stopped short, and looked around for another path. To his right, the ground fell away, revealing a yawning abyss. He turned to the left and ran, then found an iron shackle around his ankle. He took a moment to breath, fighting down panic, and focusing. The illusions fell away, and he saw the magician standing there. He pulled out a dagger and threw it - it passed through the magician as he swirled to mist, yet another illusion.

Adaptation

This could also be a character who creates holograms to confuse the battlefield.

First Facet

Darkness: *You can use your abilities to snuff out light.*

As a minor action, you may render hexes in a 3 hex radius within 12 hexes dark. LINE OF SIGHT cannot be drawn into or out of those hexes, but can be drawn through it.

Illusory Pit[ILLUSION]: *The ground falls away, revealing a yawning chasm.*

As a minor action, you may create the ILLUSION of a bottomless pit. Select up to $8 + \text{Lvl}$ hexes within 12 hexes. Walking on these hexes contradicts the ILLUSION.

Blur: *The illusion of dodging is so much easier than actually dodging.*

Whenever you spend a minor to activate an ability from this track, you gain 2 blur tokens. When attacked, you may spend a blur token to become ON GUARD against the attack. If the attack is [O]verwhelming, it requires 2 blur tokens. **Boost:** Gain an additional blur token.

Second Facet

Illusory Wall[ILLUSION]: *A solid wall springs into existence.*

As a minor action, you may erect a barrier across the battlefield. Select up to $8 + \text{Lvl}$ hex edges within 12 hexes. They block LINE OF SIGHT for anyone who believes in the ILLUSION. Moving through the wall or using lines of effect that pass through the wall contradict the ILLUSION.

False Self: *Here I am... psych*

As an immediate minor action, you may spend a blur token to DODGE the attack. This is an illusion effect, and a triggers a disbelief check with a -3 modifier. A success negates this effect.

Third Facet

Mirror Image[ILLUSION]: *You create several illusory duplicates of yourself to create confusion.*

Once per encounter, as a minor action that does not grant a blur token before you move, you may spend 2 blur tokens to create 4 duplicates of yourself in your hex. They share your defenses and each have $2 \times C$ hit points. Killing them triggers BLOODLUST. Remove yourself from the battlemat. The duplicates

may move as you would, and you can see whatever they would see. On your turn, you may select any remaining duplicates to be the real you, and return to its hex. Move all of your illusions to that hex with you. After you use your actions for the turn, any remaining movement can be used to move the ILLUSIONS and remove yourself from the battlemat.

If a duplicate is targeted, you may either declare it to be an ILLUSION, dealing damage to the ILLUSION, or your real self, in which case you are returned to its hex, you are targeted by the effect, and your duplicates return to your hex. If only one ILLUSION remains, you must declare it to be your real self. If you are attacked while 3 of your ILLUSIONS share your hex, you may use Blur as if you have 2 blur tokens and destroy a duplicate.

If the attacker has succeeded in their save against the illusion, they may choose whether to continue attacking an ILLUSION after declaring their attack and finding out if its real or to choose a new target.

Boost: You need to spend 1 fewer blur tokens.

Fourth Facet

Mass Invisibility: *Together, we're invincib- err, invisible.*

Once per encounter, as a minor action, you can bend light around your allies. Up to 3 allies within 12 hexes become INVISIBLE 6.

Jumpscare[FEAR]: *Don't blink. Don't flinch.*

As a minor action, you can render an opponent within 12 hexes DIZZY 2 for 1 round.

Fifth Facet★

Shackles[ILLUSION]: *You create a shackle that chains your target to the ground.*

Once per encounter, as a minor action, you can create the ILLUSION that shackles are binding up to 2 enemies within 12 hexes. Moving from their hex is inconsistent with the ILLUSION.

Phalanx[ILLUSION]: *You create a small army of soldiers.*

As a minor action, place 4 phalanx ILLUSIONS within 12 hexes. Each has 3 hit points and your defense. Moving through their hexes is inconsistent with the ILLUSION. They can take REACTIONS against provoking creatures in adjacent hexes. When they do, their

flaming swords creates the ILLUSION of the target being on fire. Not dropping PRONE is inconsistent with the ILLUSION unless the target is immune to IGNITED.

Sixth Facet

Illusory Landscape[ILLUSION]: *You alter the entire landscape, changing the battlefield dramatically.* Once per encounter, as a minor action, you can create the ILLUSION of a different terrain across the battlefield. Choose one of the following effects:

- **Forest:** You may create an illusory forest in any number of hexes within 12 hexes. Creatures who believe the ILLUSION treat these hexes as if they were forest hexes. Creatures moving at full speed without using difficult terrain ignoring abilities is inconsistent with the ILLUSION.
- **Ocean:** You create the ILLUSION that the entire area is underwater. Moving at greater than half speed without an ability to move underwater is against the ILLUSION. Things that are burning is inconsistent with the ILLUSION. Creatures subconsciously realize they are not underwater, and so they cannot try to swim upwards unless they have flight.
- **Expanded Space:** Everything around you suddenly seems much bigger. Mark a 12 hex zone around you. Hexes within that zone take twice

as many STEPS to cross, and count as 2 hexes for measuring distances. Adjacent hexes are still adjacent. People moving at full speed in this area is inconsistent with this illusion, as are people making attacks at greater than half range. **Special:** You may opt to appear to be a giant within this space, and do not violate the ILLUSION with your actions.

- **Storm:** You create the ILLUSION of a storm in a zone 12 hexes around you. Each round, declare a direction the wind blows. Creatures moving against that direction must spend an extra STEP for each hex they move. Creatures moving against the wind without spending the cost is inconsistent with the ILLUSION. There is also a lot of rain, snow, and/or dust that blocks LINE OF SIGHT beyond 6 hexes.

Seventh Facet★

False Self[ILLUSION]: *It may be an illusion, that doesn't mean it wholly unreal.*

Once per encounter, as a minor action that does not grant a blur token, you may create an ILLUSION of yourself. It moves with your speed and has your defense. It is destroyed if it takes $2 \times C$ damage. While it exists, you can use any abilities as if you share its hex, including activating defenses to lessen its damage. **Boost:** The ILLUSION can take an additional C damage before being destroyed.

Medic

Minor Defense Prepare medkits for your allies to use.

Adaptation

Can be used for all sorts of consumable healing items, from herbal poultices to crystallized healing magic to nano-med capsules.

The explosion ripped through the team. The others stood through, but Jason took the brunt, ragdolled into a nearby wall. He fell from it, limp and bleeding. Jackie rushed over, pulling out a fresh medkit. She kneeled down, spraying the wounds with field medicine and rapidly bandaging the worst of the bleeding. A quick stimulant shot to finish the patch up, and Jason was back on his feet, and back in the fight.

First Facet★

Medkit: *You prepare a medkit that will help you heal an ally.*

As a minor action, you may prepare and hold a medkit. A medkit heals $2 \times C$ HIT POINTS, restores BLEEDING, an additional lesser condition, and is consumed upon use. On your turn, you may use a held medkit on an adjacent ally or yourself. All prepared medkits expire at the end of the encounter. **Boost:** Increase the healing by C .

Front Line Support: *You are adept at operating safely in the heat of battle.*

When you use a medkit, you may lower your target priority. If this priority is violated, you may pick an ally to take a SURGE against the attacker. You do not provoke while you are adjacent to an ally.

Second Facet★

Pound of Cure: *Worth an ounce of protection.*

Medkits may instead restore a greater restorable condition instead of restoring HIT POINTS. **Boost:** Also heal C HIT POINTS. **Penalty:** Pound of Cure cannot be used if you have a PENALTY.

Helping Hand: *You pull your allies to their feet.*
You may remove PRONE from any adjacent ally by spending a STEP.

Time Out: *It's just rude to attack a patient.*
If you lower your target priority when using a medkit, you may also lower your target's target priority.

Third Facet★

Escort: *Sadly, part of your job is pulling people out of danger.*

When you move, you may have an adjacent ally move with you, even if they are WOUNDED or otherwise immobilized.

Meds: *You've got a med for that.*
Medkits also removes all [SICKENING] effects from the target and makes them immune to [SICKENING] for 1 round.

Transfusion: *You can give a blood transfusion to help those in critical condition.*

When you use a medkit, you may take $2 \times C$ HIT POINTS from an adjacent ally, including yourself, to increase the healing by $2 \times C$.

Prescription Strength: *When all else fails, use more meds.*

Medkits restore 2 lesser restorable conditions.

Fourth Facet★

Vaccinate: *You have figured out how to protect from this effect, and can share that benefit.*

When you use a medkit on an ally, you may also grant them an immunity to a condition you are curing with that medpack for the rest of the encounter.

Got Your Back: *Knowing that, no matter what, you've got their back, really improves your ally's confidence.*

If an adjacent ally moves, you may move with them. While you are adjacent to an ally, that ally is immune to [FEAR].

Fifth Facet★

Trauma Kit: *You can heal wounds that would otherwise debilitate allies.*

You may use medkits on WOUNDED allies. If this heals them above 0 HIT POINTS, they are no longer WOUNDED at the start of their next turn.

Into The Fray: *You are driven by a sense of urgency when allies are wounded.*

Once per round while you have a held medkit, you may DASH 3 hexes toward an ally if you would use a medkit on them.

Sixth Facet★

Extra Strength Dose: *This is the non-non-drowsy version.*

When you heal an ally with a medkit, you may increase the healing by $2 \times C$ and inflict 2 PENALTIES.

Stimpacks: *This shot has the good stuff.*
Instead of using a medkit to heal, you may use it to grant an ally $2 \times C$ energized and an extra 6 speed for 2 turns. You may increase the ENERGIZED by $2 \times C$ if you deal $2 \times C$ damage to them (ignoring COUNTERS).

Boost: Increase the ENERGIZED by C .

Seventh Facet★

Better Than New: *Your medkits grant an extra invigorating effect.*

Medkits also grant the target 6 extra STEPS, restore all lesser restorable conditions, make them immune to lesser conditions for a round, and if any healing

MEDIC

would put them above their maximum hit points, the excess becomes ENERGIZED .

Heroic Rush: *When its time to save people, noth-*

ing will slow you down.

You may DASH 6 hexes with Into The Fray.

Mobile Barriers

Minor Defense

Force fields, screens, barriers, damage they surely stop, and every single one will end with a 'pop!'

Celeen cast a spell, and a blue bubble popped into existence around her. Kyle came at her with a sword, and started beating at the barrier. His first blow ricocheted off, sending him flying backwards. Caleen cast another spell, making her bubble even stronger.

Adaptation

This can represent magical barriers, magnetic screens, and futuristic shield generators.

First Facet★

Bubbles: *You create a barrier around an ally to protect them.*

As a minor action, grant an ally within 12 hexes $2 \times C$ BARRIER HIT POINTS. This also makes the target bubbled for $C - 2$ rounds, even if they have no BARRIER HIT POINTS remaining **Boost:** Increase the BARRIER HIT POINTS by C

Lesser Protections: *Your bubble can cure your ally of various effects.*

The target of Bubbled becomes SHIELDED.

POINTS. This does not grant the effects of Lesser Protections. **Boost:** Grant one ally an additional C BARRIER HIT POINTS.

Fifth Facet★

Armored Bubble: *Bubbled buddies bowl through barriers.*

If a piece of destructible terrain has less than $8 \times C$ hit points, bubbled allies may destroy that terrain as part of their movement. Bubbled allies are immune to afflicted hexes.

Hardened Bubble: *You can harden the bubble in an attempt to completely block the attack.*

When a bubbled ally is attacked, you may spend an immediate minor action to give them a 50% DODGE CHANCE against that attack. If the attack is not [O]verwhelming, you may also grant them C BARRIER HIT POINTS.

Second Facet★

Pop: *Rebound!*

When a bubbled ally is successfully attacked the first time each round, they may FORCE adjacent enemies 1|2|3|3 hexes away from them.

Third Facet★

Move Bubbled Allies: *You can move your bubbles, and with them the ally inside.*

You may spend STEPS to FORCE a bubbled ally 1 hex in any direction per STEP spent.

Sixth Facet★

Prebubble: *But first, Shields Up!*

Once per encounter, you may use Bubbles or Party Bubbles as an immediate minor action.

Fourth Facet★

Party Bubble: *Enough for the whole team.*

As a minor action, you may grant 3 allies within 12 hexes bubbled for $C - 2$ rounds and C BARRIER HIT

Seventh Facet★

Rolling Through: *Your bubbles allow you to force your way through enemies.*

If you move into an occupied hex while bubbled, you can FORCE its occupant 1 hex in any direction to an unoccupied hex. If this is successful, you can move into their previously occupied hex.

Shadow Hand

Minor Defense

A shadow hand manipulates shadow to get the edge in combat.

Umbric twisted light, and created a bubble of darkness. The halfling commander drew a longsword and looked around warily, unsure where Umbric would re-emerge. He saw movement and swung, but a trick of the light confused him and his sword passed through thin air. Umbric reached through the shadows, and plunged a dagger of shadow into the halfling's back.

Adaptation

This can also represent a technoninja using smoke grenades instead of darkness, and cloaking and teleportation devices.

First Facet

Cloak of Darkness: *You are able to leech darkness from your abilities to form a protective cloak.*

When you use a darkness ability, you gain 2 darkness token. You may spend darkness tokens to become ON GUARD against an attack. **Boost:** Gain an additional darkness token.

Shadowblade [Darkness]: *You wrap your blade in shadow.*

As a minor action, gain a RIDER that inflicts SLOW 1.

Lightsink [Darkness]: *You invoke the power of shadows to cast an area into darkness.*

As a minor action, you may plunge a 1 hex radius area within 12 hexes into magical darkness for 2 rounds. LINE OF SIGHT cannot be drawn through, into, or out of these hexes.

Second Facet★

Fear of the Dark[FEAR]: *Darkness is one of humanities primal fears.*

As a minor action, you may eclipse an opponent with shadow. They take a PENALTY, and you get a BOOST on your next attack against them. **Boost:** Give them an additional PENALTY.

Third Facet★

Dancing Shadows: *You have shadows flicker over your ally, making it hard to see them.*

You may spend a darkness token to grant ON GUARD to an ally within 6 hexes when they are attacked.

Shadowsense: *You can sense the shadows around you.*

You gain SCANNER 12.

Fourth Facet

Invisibility [Darkness]: *Shadow masks your presence.*

As a minor action, you become INVISIBLE 6.

Shadow's Theft: Once per round, you may spend a darkness token to gain a rider that causes the target to have a 50% DODGE CHANCE against their next action. If this action is [O]verwhelming, it is instead a 25% DODGE CHANCE.

Fifth Facet

Shadow Jaunt [Darkness]: *You slip through the cracks between shadows.*

As a minor action, you may TELEPORT 6 hexes.

Sixth Facet★

Shadow Strike: *You reach through the shadows and strike your target.*

As a minor action, you may attack through shadow. You may attack a target within 12 hexes with your major action this round as if they were adjacent to you, and gain 2 BOOSTS on that action. **Boost:** Become ENERGIZED C **PENALTY:** Become WEAKENED C.

Seventh Facet

Shadow Form [Darkness]: *You become shadow.*

As a minor action, you may gain phasing for 1 round, and lower your target priority for 1 round. Attacks against you have a PENALTY if they are not against the highest priority target.

Shield Master

Minor Defense

You elevate the use of a shield to an art form, moving beyond its basic use of defense.

Steve strode through the battlefield, enemy soldiers fighting around him. One thrust a spear at him, and he easily caught it on his shield. He struck that enemy down, then blocked another spear thrust aimed at his ally.

Adaptation

This works fine for a classic knights shield, but it could also be a magic ward, or a portable forcefield, a fighting style focused on blocking, or a unbreakable shield with your country's crest.

First Facet★

Shield Block: *You block the attack with your shield.*

As an immediate minor action when attacked, you can raise your shield to block the attack. This gives you $2 \times C$ BARRIER HIT POINTS against the attack, and you may prevent one lesser condition the attack would inflict. If all BARRIER HIT POINTS granted remain after the attack (for instance, because the opponent missed, or you dodged), you lose those BARRIER HIT POINTS and gain a primed minor action.

Boost: Gain an extra C BARRIER HIT POINTS. If only these extra BARRIER HIT POINTS remain, you lose the BARRIER HIT POINTS and regain the boosts but do not gain a primed action.

Vigilance: *You can enter a general state of readiness when there isn't an immediate threat.*

As a minor action, you can become ON GUARD 2

Boost: Gain an extra ON GUARD.

Second Facet★

Shield Wall: *You can protect nearby allies from attack.*

You may use Shield Block to protect an adjacent ally when they are attacked.

Shield Bash: *You shove your shield into your opponent's face, making it hard for them to attack.*

As a minor action, you can bash an enemy in your melee range with your shield, giving them two PENALTIES and rendering them OFF BALANCE. **Boost:** Inflict an additional PENALTY.

Third Facet★

Duck and Cover: *You can use your shield to make someone an inopportune target.*

When you prime a minor action, you may choose to protect yourself or an adjacent ally as long as they are adjacent to you or until the start of your next turn, whichever is shorter. The protected person has their target priority lowered. If they are attacked in violation of this priority, they get C BARRIER HIT POINTS against that attack.

Flanking Bash: *You can protect your allies even while they are flanking with you.*

If you have a primed minor action, you can choose to lower the target priority of anyone who is flanking an enemy with you while they are flanking with you. If the flanked enemy attacks that ally in violation of

target priority, you may use Shield Bash on them before their attack.

Shield Impact: *You make hitting your shield extra unpleasant.*

When you use Shield Bash on an enemy, or you use Shield Block against a melee attack, you can affect the enemy with one of the following effects:

- The target must make a defense roll or fall PRONE.
- The target must make a defense roll or be DIZZY 1.

Prime complex: *You can prepare to block more attacks.*

You can have 2 primed minor actions at once.

Fourth Facet★

Stand Firm: *When you are blocking with your shield, you cannot be moved.*

When you use Shield Block, you, or the ally you are shielding, are immune to FORCED movement from the target you blocked until that creature's next turn.

Shield Toss[R]: *The classic technique returns.*

You may use Shield Bash up to range 12.

Fifth Facet★

Shield Ward: *You obtain greater protection from your shield.*

If you have a primed minor action, you are immune to reactions. In addition, Shield Block can negate all lesser conditions the attack would inflict.

Deflection: *You deflect an incoming attack to hit a different target.*

As an immediate minor action when attacked by a non [O]verwhelming attack, you may attempt to deflect the attack. Make a defense roll with a +2 modifier. If successful, the attack is instead made against a target of your choice within the attack's range of you. **Boost:** Gain a +5 to the defense roll.

Elemental Shield: *Your shield can catch energy effects.*

When you use Shield Block to negate an ENERGY EFFECT, your shield becomes charged with that energy. When you use Shield Impact, you can inflict the target with that ENERGY EFFECT.

Sixth Facet ★

Defenders Leap : *You leap to the defense of others.*
When an ally within 3 hexes is attacked, you may DASH 3 hexes to be adjacent to them before using Shield Wall.

Mighty Bash: *You can send enemies flying with your shield.*

When you use Shield Bash on an enemy, you may FORCE them 2 hexes in a direction of your choice.

Seventh Facet ★

Bulwark: *Your defenses are impenetrable.*
Once per round, you may prevent a lesser condition from being inflicted on yourself or an adjacent ally.

Shield Anchor: *You stand firm against all onslaughts.*

You are immune to FORCED movement.

Epic Clash: *Your shield impact leaves attackers dazed.*

Once per encounter, when using Shield Impact, when they fail their defense roll they are STUNNED.

Spook

Minor Defense

For whatever reason, your spirit remains while your body has moved on, which is... disturbing.

Caspian rose from the sea, his ghostly body covered in seaweed and chains. He let out an unearthly moan, and the pirates started quivering in fear. One of them came at Caspian with his cutlass, but he was shaking so much he couldn't land a good blow. Caspian stared the pirate the eye, and the pirate felt his gaze peer into his very soul.

Adaptation

Can also be used for slightly out of phase interdimensional creatures or other things that aren't quite all there physically.

First Facet ★

Otherworldly Presence: *Your otherworldly nature unsettles your foes.*

As a minor action, you may make your presence known to those around you. This takes one of several forms.

- **Gaze:** Inflict 2 PENALTIES on 1 opponent within LINE OF SIGHT.
- **Moan:** Inflict a PENALTY on 2 opponents within 3 hexes using indirect LINE OF EFFECT.

Boost: Grant one target an additional PENALTY.

Second Facet ★

Unnerve[FEAR]: *You make enemies unable to focus on other things.*

Opponents affected by Otherworldly Presence are OFF BALANCE.

Third Facet

Weightless: *You are no longer bound by gravity.*
You can hover.

Fourth Facet ★

Choose one of the following abilities

- **Play With Me**[FEAR]: *You creepily entice enemies to stay near you.*

Once per round per opponent, opponents must spend 1 extra STEP to move away from you while within 3 hexes of you.

- **Leave This Place**[FEAR]: *You compel others to flee.*

Once per round per opponent, opponents must spend 1 extra STEP to move towards you while within 3 hexes of you.

Fifth Facet

Ethereal Form: *You can pass through walls.*
You can phase.

Sixth Facet ★

Petrify[FEAR]: *Enemies become frozen with fear.*
Once per encounter, opponents affected by Otherworldly Presence are STUNNED for one round.

Seventh Facet

Fade: *You pass from sight.*
You may become INVISIBLE 3 at the beginning of your turn. If you only attack the target of your Otherworldly Presence this round, your invisibility only breaks for those targets; you remain INVISIBLE to other targets.

Warcries

Minor Defense

Screaming bloody murder has never resulted in so much bloody murder.

Gronark let out a blood curdling scream, and the opposing warriors shrunk back, intimidated by this crazy eyed, spittle spewing madman. They shrank back, unwilling to approach. Gronark's screams had the opposite effect on his tribe; They were invigorated and enthralled, and rushed forward to eagerly clash with the opposing warriors.

Adaptation

Instead of a screaming barbarian, you could be a sergeant shouting orders or just a particularly intense bard.

First Facet★

Warcry: *You let out a powerful shout to inspire your allies or terrify your foes.*

As a minor action, you may use a warcry, and apply its effects to all applicable targets within 3 hexes with indirect LINE OF EFFECT. You have access to the following warcries:

- **Invigorating Shout:** Up to 3 allies become ON GUARD . **Boost:** One ally gains another ON GUARD .
- **Demoralizing Shout**[FEAR]: Enemies become WEAKENED *C*. **Boost:** Increase the WEAKENED on one enemy by *C*.

Personalized Verbalization: *Instead of shouting in general, you shout at a specific person.*

As a minor action, you may use a warcry, but have it only affect one target within 12 hexes with indirect LINE OF EFFECT, and magnify its effect.

- **Invigorating Shout:** The ally gains $2 \times C$ TEMPORARY HIT POINTS. **Boost:** The ally gains another *C* TEMPORARY HIT POINTS.
- **Demoralizing Shout**[FEAR]: Enemies become WEAKENED $2 \times C$. **Boost:** Increase the WEAKENED by *C*.

Second Facet★

Charge! *You inspire your allies to charge forward.* Allies affected by Invigorating Shout or Combined Shout are DIRECTED 2 hexes towards an enemy.

Third Facet★

Intimidating Shout[FEAR]: *Your crazed shouting makes enemies hesitant to approach.*

Enemies effected by Demoralizing Shout or Combined Shout must succeed in a defense roll or spend 1 extra STEP to approach you for 1 round.

Fourth Facet★

You gain access to the following warcry:

- **Combined Shout:** *You can inspire and terrify with the same utterance.* Up to 3 allies gain $-|2|3|3$ TEMPORARY HIT POINTS, and enemies gain [FEAR] $3|3|4|4$ WEAKENED . This may not be used with Personalized Verbalization. **Boost:** Enemies gain $3|3|4|4$ additional WEAKENED .

Fifth Facet★

Focused Shouting: *You concentrate your shout into a cone in front of you.*

You may choose to have your warcries instead affect a 6 hex long cone with indirect LINE OF EFFECT.

Sixth Facet★

Noise Violation: *Your shout deafens nearby foes.* When you use a warcry, adjacent enemies become [SENSELESS]OFF BALANCE.

Seventh Facet★

Powerful Lungs: *You can be heard from further away.*

The range of your warcries is increased by 2.

Analytical Observer

Minor Mixed

Analyze your enemies and inform your allies of their strengths and weaknesses.

Thelian eyed the beast carefully. He had never seen anything like it, an armored, segmented worm that writhed around and struck at the soldiers trying to contain it. "Watch out, when it coils back like that it's about to strike!" he warned, and one of the soldiers leapt aside. "Attack between the segments, there seem to weak points there," he advised, and another soldier got a sword wedged between the armor plates and drove it home, killing the strange worm.

Adaptation

Instead of relying on analysis and intellect, similar effects can be achieved with divination magic or luck manipulation.

First Facet

Analytical Mind: *You examine your enemies to find every weakness they have.*

As a minor action, you may apply Observed 2 to a creature within your LINE OF SIGHT. You have SCANNER 24, but only for creature which have Observed.

Boost: Apply an additional Observed.

Exploit Vulnerability: *Everything has a weak spot.* When an ally would target a creature with observed, they may reduce the Observed by 1 and get a BOOST on that action.

Exploit Weakness: *You spot a flaw in their attack method.*

When an ally would be targeted by a creature with Observed, they may reduce the Observed by 1 and give that action a PENALTY.

Second Facet★

Analyze Abilities: *You learn vital information by analyzing your enemies.*

When you use Analytical Mind on a creature, you may learn its level, and any TRACKS or monster abilities it possesses.

Negate Strength: *A careful analysis of your opponents movements shows how to negate its attack.*

When an ally is targeted by a creature with Observed, they may reduce the Observed by up to 4, and the creature is WEAKENED C for each point of Observed lost.

Third Facet★

Probe: *Poke the bear.*

As a minor action, you may gain a RIDER with a -2 to hit. If the RIDER hits, the creature gains Observed 3, otherwise the creature gains Observed 1. **Boost:** Increase the Observed by 1, regardless of whether you hit or miss.

Reveal Weakpoint: *You can spot the perfect spot to strike.*

When an ally targets a creature with Observed, they may reduce the Observed by up to 4, and the creature becomes VULNERABLE C to that ally for each point of Observed lost.

Fourth Facet★

Prediction: *Unsurprising.*

When a creature with Observed takes an offensive action, you may know the exact abilities used before the action is resolved.

Negation: *Make it tough to debuff.*

When a creature with at least 2 Observed inflicts a greater restorable condition from the use of an ability, you may reduce the amount of Observed by 2 to negate the condition.

Fifth Facet★

Empirical Evidence: *The science of hard knocks.*

Once per round, you may choose a creature and gain VULNERABLE C to it. The next time that creature deals damage to you, it gains Observed 1.

Create Opening: *You can spot the ideal moment to attack.*

On your turn, choose a creature with at least Observed 2. One ally may immediately take a SURGE against that creature and reduce the amount of Observed by 2.

Sixth Facet★

Lab Rats: *You can learn about a creature through its interactions with your friends.*

When you use Probe, you may have an ally gain a RIDER. When you activate Empirical Evidence, you may have a willing ally gain its effects instead of yourself.

Restorative Counter: *Deal with the heal.*

When a creature with at least Observed 2 loses a greater restorable condition from the use of an ability, you may reduce the amount of Observed by 2 to negate the loss of the condition.

Seventh Facet★

Mind Games[MENTAL]: *You can toy with a creature when you understand it.*

When a creature gains Observed, it becomes OFF BALANCE and SLOW 2 for as long as they have Observed.

Saw It Coming: *You perfectly predict an incoming attack, allowing an ally to dodge it.*

ANALYTICAL OBSERVER

When an ally is targeted by a creature with Observed, they may reduce the Observed by up to 4, gaining a 50% DODGE CHANCE against that action

for each point of Observed lost. If the ability is [O]verwhelming, they instead gain a 25% DODGE CHANCE per point lost.

Charged Barriers

Minor Mixed

Defend yourself with the elements as you prepare to unleash them upon your foes.

Gilly called up a fire barrier, wrapping flame around her arrow and firing it at the ninja. He threw a shuriken back at her, and she called up an electricity barrier, teleporting next to him in a moment. Then she discharged the fire barrier, sending fire washing over the ninja.

Adaptation

This could be your own magic, calling upon friendly elementals, or a slew of high-tech gadgets.

First Facet★

Charge and Discharge: *You set up magical barriers of various elements, and unleash them for various effects.*

When you use an ability from this TRACK while you do not possess the corresponding barrier, you use the charge ability and gain a barrier corresponding to the chosen element. If you do possess the corresponding barrier, you use the discharge ability, but lose the barrier afterwards. You may begin each encounter with a barrier for any element you have access to.

Force Charge: *You bring up a barrier of force that pushes away nearby enemies.*

As a minor action, gain $2 \times C$ barrier hit points, and FORCE all adjacent opponents 1 hex away from you.

Boost: Increase the BARRIER HIT POINTS by C .

Force Discharge[RmH]: *You unleash your barrier, hitting the target with raw energy.*

As a minor action, deal $3 \times C$ damage to an opponent within 12 hexes, and make them OFF BALANCE.

Boost: Increase the damage by C .

Second Facet★

Fire Charge: *You surround yourself with a soothing flame.*

As a minor action, heal $2 \times C$ hit points, with any excess becoming ENERGIZED. For 1 round, any opponent you damages you is IGNITED C . **Boost:** Increase the healing by C .

Fire Discharge: *You unleash your fire barrier in a wave of flame.*

As a minor action, all opponents within 3 hexes take $3 \times C$ damage. A successful defense roll halves the damage. This also afflicts all hexes within 3 hexes of you. Opponents who end their turn in one of these afflicted hexes receive C damage. **Boost:** Increase the damage to one target by $3|3|4|5$.

Third Facet★

Earth Charge: *You engulf yourself in stone to anchor yourself in place.*

As a minor action, you gain $2 \times C$ RESISTANCE and can half FORCED movement for 1 round. **Boost:** Increase the RESISTANCE by C .

Earth Discharge [Rm]: *You throw a boulder at your enemies.*

As a minor action, you may STRIKE an opponent

within 12 hexes for $5 \times C$, and FORCE them 2 hexes away from you on a hit. **Boost:** +4 to hit.

Fourth Facet★

Cold Charge: *You are protected by the bitter cold.*

As a minor action, opponents within 3 hexes receive a PENALTY and must spend an additional STEP to approach you for 1 round. **Boost:** One enemy receives an additional PENALTY.

Cold Discharge: *You unleash a wave of freezing cold.*

As a minor action, deal $-|9|12|14$ damage and inflict FROZEN on opponents within a 6 hex cone originating from you. **Boost:** Deal C extra damage to one target.

Fifth Facet★

Electricity Charge: *You prepare to teleport in a bolt of lightning.*

As an immediate minor action when targeted by an ability, you gain a 50% DODGE CHANCE, become ON GUARD, and TELEPORT up to 3 hexes. If the attack was [O]verwhelming, you do not become on guard.

Boost: Gain an additional ON GUARD, even against an [O]verwhelming attack.

Electricity Discharge [R]: *You send a bolt of electricity that bounces between nearby targets.*

As a minor action, you may deal $2 \times C$ damage up to 5 creatures within 3 hexes of you or another targeted creature. Targeted creatures are OFF BALANCE and BLIND 6 for one round. **Boost:** One target takes C additional damage. **Penalty:** One target takes C less damage. If this would deal less than 0 damage, another enemy has their damage reduced by the excess.

Sixth Facet★

Light Charge: *You have a glowing halo of light.*

As an immediate minor action, when an opponent within 12 hexes targets you with an attack, you may cause it to become BLIND 3 for 1 round before the attack is made. **Boost:** Become ON GUARD.

Light Discharge [R]: *You unleash your light in a giant laser blast.*

As a minor action, STRIKE all opponents within a 3 hex wide, 12 hex long line for $4 \times C$ damage and inflict IGNITED C . **Boost:** +4 to hit.

Seventh Facet

Shadow Charge^[H]: *You are hidden by shadow.*

As a minor action, become ON GUARD 2, SHIELDED, and turn INVISIBLE 3 for 1 round. **Boost**: Increase the ON GUARD by 1.

Shadow Discharge [Rm]: *You cover an opponent in darkness.*

As a minor action, you may inflict OFF GUARD, VULNERABLE C, and PERSISTENT BLIND 6 for 2 rounds to an opponent within 12 hexes. **Boost**: Add another VULNERABLE C.

Duplicator

Minor Mixed

A duplicator is capable of splitting themselves into multiple parts, each of which can operate independently. They can spread themselves around the battlefield to take out many foes, or concentrate their efforts to bring down a specific target.

The giant lumbered forward, swinging its club at all who approached. Tiffany ran towards it, and it smashed its club down at her. She dodged to the left. And the right. There were suddenly two of her, and she attacked the giant from both sides at once.

Adaptation

This can also represent the use of magical clones, holographic projections, a Von Neumann machine, a giant amoeba, or other concepts capable of supporting multiple bodies.

First Facet

Split: *You split yourself into two copies.*

As a minor action, if you do not have any remaining duplicates, you may become Set and create 2 duplicates as a minor action, 1 in your hex and 1 adjacent. These replace your normal character. If one is destroyed, the remainder becomes your character. Excess damage is transferred to the remaining duplicate. Each has 1/2 of your current HIT POINTS. Using a major action while Set makes you not Set. Each duplicate can use your other abilities, drawing from the same limits. Each duplicate starts with STEPS equal to your current STEPS and gains STEPS equal to your speed each round. A duplicate being destroyed does not count as being WOUNDED. **Boost:** One of the duplicates gains *C* HIT POINTS.

Joint Attack: *You attack with both bodies.*

As a major action, you may allow 2 of your duplicates to take a major action other than this one. This action is always the same. This can be an immediate major if the action being taken can be an immediate major.

If they are not Set:

- They take 2 PENALTIES on each major action they take, and if this action cannot take a PENALTY, they cannot perform it.

If they are Set:

- If their action has the same target, it acts as if one of them takes the action with 2 BOOSTS. If you have an extra BOOST from Sustain, this also ignores COUNTERS.
- If they do not share a target and it's not [S]pecial, then they each take the major action
- If they do not share a target and it is [S]pecial, then they each take the major action with a PENALTY.

For this purpose, a summoned creature is the target of a summon ability, and affected hexes are each a target.

Sustain: *It takes some effort to coordinate multiple bodies.*

As a minor action, you may sustain your split, becoming Set. **Boost:** When you next use Joint Attack, one of the actions gains a BOOST.

Second Facet★

Merge: *You recall your duplicate, pooling your strength.*

As a minor action, you can combine your duplicates. Choose one to destroy; add its HIT POINTS to a remaining duplicate. Any conditions affecting it are transferred. The duplicate that is merged into gains $2 \times C$ HIT POINTS and 3 extra STEPS for that turn.

Third Facet★

Fakeout: *You merge your duplicate into you to avoid it being hit.*

As an immediate minor action, you may remove a duplicate when it is attacked. This negates the attack, unless it is [O]verwhelming, in which case it gets a 50% dodge chance. The health of this duplicate is added to a remaining duplicate, and any conditions affecting it are transferred as well. **Boost:** The remaining duplicate gains an additional *C* HIT POINTS.

One Mind: *Your duplicates are all linked and can see what the others see.*

All your duplicates get LINE OF SIGHT from every other duplicate.

Fourth Facet

Triplicate: *Why stop at 2?*

You can use Split while you already have 2 duplicates.

Fifth Facet★

Enhanced Merge: *You can merge more duplicates at once.*

When you use Merge, you may choose to dash 3 instead of gain 3 STEPS. You can merge multiple duplicates with a single use; add all of their HIT POINTS to a remaining duplicate, and it gets the dash or STEPS per duplicate merged.

Purge Merge: *You can merge in duplicates without polluting yourself.*

When merging a duplicate with Fakeout or Merge, you may remove its lesser restorable conditions before merging.

Sixth Facet★

Vital Link: *You can strengthen the duplicates that need it most.*

You may transfer any amount of HIT POINTS from one duplicate to another once per round.

Seventh Facet★

Triple Team: *Your ability to coordinate your dupli-*

cates has reached its peak.

As a major action, you may allow 3 duplicates to take a major action that does not target the same creature.

- If it is not a [S]pecial action, each of these majors takes a PENALTY.
- If it is a [S]pecial action, each of these majors takes 2 PENALTIES.

Gizmos

Minor Mixed

You have a collection of gizmos that you can prepare and deploy to the battlefield.

Clark slid a springboard in from of himself, and ran into it. It launched him into the air and propelled him forward. He held his spear out, letting the momentum drive it deep into the dragon's side. It bellowed and bit at him, but he tossed a bomb into its face, which exploded in a bright flash, blinding the dragon.

Adaptation

This can also represent the use of magical effects and runes.

First Facet★

Gizmos: *You employ a variety of clever devices to aid you in battle.*

You can have up to *C* prepared gizmos at any one time, and begin each encounter with *C* prepared gizmos. You may spend your speed in STEPS to prepare any number of gizmos, as long as this doesn't you above *C* prepared gizmos. You can prepare any gizmo that is of a tier less than or equal to your tier.

Deploy: As a minor action, use one of your prepared gizmos. It is no longer prepared.

Second Facet★

Multi-purpose: *You have a gizmo with multiple potential uses.*

You may prepare a multi-purpose gizmo. When you do, select two gizmos. As a minor action, you may use one of those two gizmos, and the multi-purpose gizmo is no longer prepared. Preparing a multi-purpose gizmo is done as part of the Gizmos action, it counts as one of the *C* prepared gizmos, and you can only have 1 multi-purpose gizmo at a time.

Third Facet

Doodads: *Accessories are the finishing touch.*

When you prepare a gizmo, you may increase its tier by attaching doodads. Each attached doodad increases its tier by one stage. You cannot attach the same doodad to a gizmo more than once.

Fourth Facet★

Perpetual Motion Gizmo: *You have a gizmo that is always usable.*

At the beginning of each encounter, you may choose one prepared gizmo to be a perpetual motion gizmo. You may not choose a multi-purpose gizmo for this ability. When you use the deploy action with this prepared gizmo, it remains prepared.

Fifth Facet★

Overcharge: *Tim Allen would be proud.*

You may prepare an overcharged gizmo. When you do, select two gizmos. As a minor action, roll a *d20*. On a 1 – 8, the overcharged gizmo backfires and you take *C* damage. On an 9 – 20, you may use both of the

selected gizmos. Either way, the overcharged gizmo is unprepared. If you boost this, one of the selected gizmos receives the boost, and you do not take damage if the gizmo backfires.

Sixth Facet★

Bonus Doodad: *You are very good at attaching doodads.*

When you prepare a gizmo, you may attach a single doodad without raising the gizmo's tier.

Seventh Facet★

Multiselect: *You have figured out how to make very versatile gizmos.*

When you prepare a multi-purpose gizmo, you may select four gizmos. You can have 3 multi-purpose gizmos at a time.

Champion Tier

- **Medic Kit:** When you use this gizmo, place two medic kit tokens adjacent to you or in your hex. Whenever an ally is in a hex with a medic kit token in it, they may use the token to gain *C* HIT POINTS. **Boost:** Place an extra medic kit token.
- **Mini-bomb:** When you use this gizmo, choose a creature within 6 hexes. That creature takes $3 \times C$ damage. **Boost:** Increase the damage by *C*.
- **Adrenaline Shot:** When you use this gizmo, choose yourself or an adjacent ally. That creature gains 2 BOOSTS. **Boost:** That creature receives an extra BOOST.
- **Penalty Shot:** When you use this gizmo, choose a creature within 6 hexes. That creature receives 2 PENALTIES. **Boost:** That creature receives an additional PENALTY.
- **Refresher:** When you use this gizmo, choose yourself or an adjacent ally. That ally gains a REFRESH. **Boost:** That creature also receives a BOOST.

Heroic Tier

- **Springboard:** When you use this gizmo, select a hex adjacent to you. The next time an ally voluntarily enters that hex, they jump 3. At any point during their current turn, they can use a SURGE. **Boost:** That SURGE gains a BOOST.
- **Bomb:** When you use this gizmo, choose a hex within 12 hexes. Each creature within radius 2 of that hex takes $2 \times C$ damage. **Boost:** One affected creature takes an extra C damage.
- **Corruptor:** When you use this gizmo, choose an enemy within 6 hexes. That creature becomes CORRUPTED 2. **Boost:** Increase the CORRUPTED by 1.

Immortal Tier

- **Interceptor:** When you use this gizmo, you may create an interceptor robot. The creature counts as a SUMMON, has $2 \times C$ HIT POINTS, and whenever it is adjacent to a creature that is taking damage, it may take some of the damage in its place. It cannot take more damage than it has remaining HIT POINTS. Once per round, you may move the interceptor robot up to 6 hexes, and it may strike an adjacent creature to FORCE it 1 hex in any direction. If you use a doodad on this, it may affect the interceptor robot, or the first creature that the robot uses a combat maneuver against. **Boost:** Increase the interceptor robot's HIT POINTS by C .

Mythic Tier

- **Phoenix Mode:** When you use this gizmo, choose an adjacent WOUNDED ally. That ally gains $2 \times C$ HIT POINTS, which can prevent him from being WOUNDED. Additionally, for the rest of the encounter, that ally can fly, and adds a RIDER to his attacks inflicts IGNITED. **Boost:** The affected ally gains an extra C HIT POINTS.

Doodads

- **Speed Boost:** When an ally is affected by a gizmo with this doodad, they are DIRECTED 3

hexes. Alternatively, you may move 3 hexes when you use a gizmo affected by this doodad.

- **Elemental Effect:** When an enemy is affected by a gizmo with this doodad, they receive an ENERGY EFFECT, chosen when you prepare the gizmo.
- **Flash:** When you use a gizmo with this doodad, each enemy within 6 hexes is BLINDED 6. A successful defense roll negates this effect.
- **Neon Sign:** When you use a gizmo with this doodad on an enemy, their target priority is increased by 1 for one round.
- **Target:** When you use a gizmo with this doodad on an ally, their target priority is increased by 1 for one round. The affected ally may use a SURGE against any enemy violating this target priority.
- **Faded:** When you use a gizmo with this doodad on an enemy, their target priority is decreased by 1 for one round.
- **Inconspicuous:** When you use a gizmo with this doodad on an ally, their target priority is decreased by 1 for one round. Attacks that violate this target priority receive a PENALTY.
- **Monster Parts:** When you use a gizmo with this doodad on an ally, you may give them an equipped effect with $2 \times C$ BONDED HIT POINTS. As long as the EQUIPPED effect remains, they gain a monster tactical ability, chosen when you prepare this gizmo. Using this doodad increases the gizmo's tier by an additional stage, beyond the normal increase.
- **Blood Transfer:** When you use a gizmo with this doodad on an ally, you may take up to C damage. The affected ally gains HIT POINTS equal to the damage you took this way.
- **Range:** When you use a gizmo with this doodad, you may treat allies within radius 6 of you as though they were adjacent, and you may treat enemies that are up to 12 hexes away as though they were 6 hexes away.

Lawbearer

Minor Mixed

You set the law and you enforce it.

Sheriff Allen faced down Blackheart Andy. "Don't come any closer" he warned. Andy snorted and walked closer anyways. Allen glowered, and shackles magically appeared around the fugitives wrists. "What the..." he exclaimed. "You broke the law, son. There are strict consequences for that 'round these parts."

Adaptation

This TRACK can be used to represent a practitioner of oath magic.

First Facet★

Set Law: *You decree what is law.*

As a minor action, choose an enemy within 12 hexes of you and a law. During their next turn, that enemy may choose to follow the limitations of the chosen law. If they do not, they become a lawbreaker. The following is a list of available laws. You may treat lawbreakers a having a target priority one stage higher.

Boost: The target becomes OFF GUARD to you.

- **Minor Denial:** The chosen enemy cannot take minor actions.
- **Off Limits:** Choose 3 hexes, plus one additional hex for every level you possess. The chosen hexes cannot be adjacent to the chosen creature. The chosen creature cannot enter the chosen hexes, and cannot draw LINE OF SIGHT through those hexes.
- **Mirror:** Choose a greater restorable and a lesser restorable effect currently effecting you. The chosen creature gains those effects.

Punish Lawbreakers: *You enforce your laws.*

As a minor action, you can use two SURGES against a lawbreaker. That creature is no longer a lawbreaker.

Boost: Use a BOOST on one of the SURGES.

Shackle Lawbreaker: *Prison is too kind.*

As a minor action, choose a lawbreaker within 12 hexes of you. That creature stops being a lawbreaker and gains shackles. The shackles are an EQUIPPED effect, and have $2 \times C$ HIT POINTS, but are not BONDED. The shackles disappear after two turns. At the end of each of your turns, while the shackles last, the shackled creature becomes weakened $2 \times C$. **Boost:** Increase the first WEAKENING from the shackles by C .

Debt Repaid: *By falling in battle, the lawbreaker has repaid his debt to society.*

When a lawbreaker becomes WOUNDED, you gain a REFRESH.

Second Facet★

The Watchful Eye of the Law: *You are ever vigilant and can always find a lawbreaker.*

You gain SCANNER 12 to all creatures who are currently lawbreakers, or have been one this encounter.

Third Facet★

Escape Fee: *A price must be paid.*

For each enemy, once per encounter, when that en-

emy would stop being a lawbreaker, you may choose a lesser restorable effect currently affecting you. You lose that condition, and that enemy gains that condition with the remaining duration.

Strict Guidelines: *You demand perfect behavior.*

Once per encounter, as a minor action, choose an enemy. That enemy may immediately make a SURGE or take a minor action with all decisions made by you. If they do not, they become a lawbreaker.

Boost: The SURGE or minor action has a BOOST. If they become a lawbreaker, they are OFF GUARD to you.

Fourth Facet★

Criminal Record: *You don't take kindly to repeat offenders.*

Whenever a creature becomes a lawbreaker, if it is not the first time in the encounter that it has become a lawbreaker, it becomes STOPPED for one turn.

Fifth Facet★

Police Brutality: *If you resist arrest, you are breaking the law.*

Once per encounter, choose an enemy within 12 hexes. You may spend a minor action to have that enemy become OFF GUARD 2 and their target priority increases by two stages. That enemy may choose to negate this by becoming a lawbreaker. **Boost:** Grant an extra OFF GUARD, regardless of whether they become a lawbreaker.

Sixth Facet★

Leniency: *You can go easy on crime when it suits you.*

As an immediate minor action, when an enemy would become a lawbreaker, you may choose for that enemy to not become a lawbreaker. If you do, you may take an additional major action during your next turn. **Boost:** That major action will have a free BOOST.

Seventh Facet★

Profiling: *You are guilty because I say so.*

Once per encounter, as a minor action, choose an enemy within 12 hexes. That enemy becomes a lawbreaker. **Boost:** That enemy also becomes OFF GUARD to you.

Leech

Minor Mixed

Drain the life forces of your enemies and give it to your allies.

Rudy held his hand out towards the yeti. The yeti stumbled, his muscles seeming to melt away. Rudy, in turn, seemed to swell, growing more muscled by the second. He walked up and kicked the yeti, sending him sprawling backwards. The yeti climbed back to its feet and charged, but Rudy held out his hand again, and the yeti's motion slowed, and Rudy started moving faster.

Adaptation

Alternatively, you could be a thief who is Just That Good, or a manipulator of essences.

First Facet★

Transfusion: *You absorb the essence of one creature and use it to bolster another.*

As a minor action, choose 2 creatures within 12 hexes. One is the donor, the other is the recipient. The donor and recipient must be within 6 hexes of each other unless you are the recipient. Apply 1 siphon and 1 transfer to the pair. You have access to the following Siphon and Transfer:

- **Siphon Vitality:** *You vampirically leech the life essence of your victim.*
Deal 5|6|8|9 damage to the donor and heal the recipient for the same amount. Excess healing instead increases the damage to the donor.
Boost: Increase the damage and healing by 2|2|3|3.
- **Transfer Speed:** *You absorb your victim's ability to move swiftly.*
Inflict SLOWED 2 to the donor for 1 round and grant the recipient 2 STEPS.

Second Facet★

Theft of Power: You have access to the following Siphon and Transfer:

- **Siphon Strength:** *You absorb your victim's strength, leaving them weak and powerless.*
Inflict C WEAKENED to the donor and grant the recipient an equal amount of energized.
Boost: Increase the weakened and energized by 2|2|3|3.
- **Transfer Reflexes:** *You take the victim's quick reflexes.*
Inflict OFF BALANCE to the donor and grant the recipient the ability to take an extra REACTION until the beginning of their next turn.

Third Facet★

Theft of Energy: You have access to the following Siphon and Transfer:

- **Siphon Essence:** *You sap your opponent's vital essence to bolster your own.*
Inflict DEPLETED on the donor and grant the recipient a REFRESH. A defense roll with a +2 modifiers negates this. **Boost:** The defense roll has an additional -5 modifier.

- **Transfer Injury:** *You reverse your normal flow a bit to remove injuries from your friend.*

Remove BLEEDING and IGNITED from the recipient and inflict IGNITED and BLEEDING to the donor equal to the amount removed from the recipient.

Fourth Facet★

Drain: *You can manipulate the energies to greater effect.*

You may choose 2 Transfers when you use Transfusion.

Theft of power: You have access to the following Siphon:

- **Siphon Power:** *You absorb a combination of your opponents speed and strength.*
Inflict a PENALTY on the donor and grant the recipient a BOOST. **Boost:** Give the donor an additional PENALTY.

Fifth Facet★

Theft of Senses: You have access to the following Siphon and Transfer:

- **Siphon Guard:** *You absorb your victim's ability to focus.*
Inflict OFF GUARD on the donor and grant the recipient ON GUARD. **Boost:** Inflict an additional OFF GUARD to the donor.
- **Transfer Senses:** *You remove your victim's ability to see.*
Inflict BLIND 6 on the donor for 1 round and grant the recipient SCANNER 6 or 1 round.

Sixth Facet

Theft of Memories: You have access to the following Siphon and Transfer:

- **Siphon Trauma:** *You absorb the corruption from your friend and place it on your victim.*
Remove a CORRUPTION from the recipient and inflict a CORRUPTION on the donor. **Boost:** Give the donor another CORRUPTION.
- **Transfer Presence:** *You make it so everyone is acutely aware of your victim's presence.*

Grant the recipient INVISIBLE 3 and all creatures have LINE OF SIGHT to the donor. This effect ends if the recipient takes an offensive action.

Seventh Facet★

Not to Fifty! *You turn up your drain to its full power.*

Once per encounter, you may choose 3 Transfers when you use Tranfusion.

Materialist

Minor Mixed

You are capable of changing the substance of your body as the situation demands.

Kevin saw the tremor worm charge at him, and turned his body to stone. The worm slammed into him, but he was able to resist its push. He then transformed into air, and flew up above it, before turning into electricity, shooting down into the worm as a lightning bolt.

Adaptation

This can be used to represent other types of transformations or the ability to channel different types of elements without literally transforming.

First Facet★

Change Material: *You are capable of transmuting your entire body into a different substance.*

As a minor action, you take on a new material. This gives you an effect for as long as you use the material (or until your next turn, whichever is longer) as well as a bonus for taking on the material. You may take on the same material to gain the bonus again. You gain the following materials:

- **Flesh:** *Many think flesh is simply weak, but it possesses a remarkable ability to repair itself.* You heal yourself $2 \times C$ when you take this form. **Boost:** Heal an additional C .

- **Stone:** *Stone is heavy, but stable.* While in this form, your speed decreases by 2, you are immune to SLOW, STOPPED, and PRONE, ignore difficult terrain, and cannot be moved against your will. When you take on this form, you gain $2 \times C$ TEMPORARY HIT POINTS. **Boost:** Gain an additional C TEMPORARY HIT POINTS.

- **Clay:** *Clay is malleable, allowing you to reshape your body slightly.* While in this form, you gain +3 speed and +1 melee range. When you take take this form, you heal $2 \times C$ damage at the start of your next turn, even if WOUNDED. If this would heal you above your maximum HIT POINTS, you are ENERGIZED for the extra amount. **Boost:** increase the healing by C .

- **Wood:** *Wood floats.* While in this form, you can float on liquids. You automatically rise 1 hex for each hex you move if submerged, and can move on the surface of the fluid as if it were solid ground. When you take this form, you gain thorns that deal $2 \times C$ damage to the next creature to damage you while adjacent to you or with a melee attack. **Boost:** Increase the damage by C .

Second Facet★

Advanced Materials: You gain the following materials:

- **Metal:** *A substance of strength and honor.* While in this form, Allies with LINE OF SIGHT

to you may draw LINE OF SIGHT from your hex, and you are immune to DIZZY and IGNITED. When you take this form, you gain $2 \times C$ RESISTANCE. **Boost:** Increase the RESISTANCE by C .

- **Ice:** *Frigid and slippery.* While in this form, you may move over 3 hexes of fast terrain for 1 STEP. When you gain this form, you get $2 \times C$ BARRIER HIT POINTS and may make every hex within 1 hex of you Fast terrain. **Boost:** Increase the BARRIER HIT POINTS by C .

Third Facet★

Fire and Water: You gain the following materials:

- **Water:** *Water is cleansing, able to wash away grime and put out fires, but is also fluid and powerful.* While in this form, you are immune to IGNITED, GRAPPLED, and to afflicted hexes, and when you enter an afflicted hex you may choose to remove the affliction. When you take on this form you may use a SURGE. **Boost:** Give the surge a boost.
- **Fire:** *Fire is hot and dangerous to touch.* When in this form, you light up the surrounding area, and 3 hexes you leave this round become afflicted for 2 rounds and give IGNITED to those entering them. When you take this form, gain a fire charge. While you have a fire charge in this form, you may deal $2 \times C$ damage to the next enemy that attacks you, ignoring counters, give them IGNITED, and lose a fire charge. If you have fire charges when you stop using this form, you gain $2 \times C$ TEMPORARY HIT POINTS per fire charge. **Boost:** Increase the damage or TEMPORARY HIT POINTS by C .

Fourth Facet★

Crystalline Form: You gain the following material:

- **Crystal:** *A properly tuned Crystal can resonate with attacks, redirecting their energy outwards.* When you take this form, you gain 2 redirection charges. While in this form, when attacked you may spend 2 redirection charges to use the ability yourself. If the attack was a major

action, you must spend another 2 redirection charges or give the attack 2 penalties. You may use additional redirection charges to give the attack boosts. If you have a redirection charge when you stop using this form, you become ENERGIZED C for each charge. **Boost:** Gain another redirection charge.

Fifth Facet

Passing Breeze: You gain the following material:

- **Gas:** *Gas is elusive, hard to keep contained or pin down.*

When you take on this form, you gain a primed minor action that can only be used to dodge an attack, as outlined below. While in this form, you do not provoke reactions, are immune to GRAPPLED, and you may move through enemy hexes. In addition, you have flight. You may spend an immediate minor action to gain a 50% DODGE CHANCE against an attack and heal C hp. If the attack is [O]verwhelming, you do not heal. If you have primed minor actions when you stop using this form, you gain $2 \times C$ TEMPORARY HIT POINTS per primed minor. **Boost:** Become ON GUARD.

Sixth Facet

Energetic: You gain the following material:

- **Energy:** *Energy is fast, able to travel large distances nearly instantly.*

While in this form, you gain +6 speed and all of your movement may be TELEPORT. When you take on this form, you become ENERGIZED equal to $2 \times C$. **Boost:** Gain another C ENERGIZED.

Seventh Facet

Void Heart: You gain the following material:

- **Void:** *You have learned to take on the form of the void, a complete lack of any substance.*

When you take on this form, you gain 2 void charges. While in this form, you gain PHASING, can hover, and are immune to GRAPPLED. When attacked in this form, you may spend a void charge to halve the damage of the attack. If the attack is [O]verwhelming, it requires 2 charges. If you have a void charge when you stop using this form, you become ENERGIZED C for each void charge. **Boost:** Gain an additional void charge.

Maneuvers

Minor Mixed

You are able to eek extra advantage out of your tactical movements.

As soon as the shaggy beast snarled Sam darted forward, striking the dire wolf across the face with his nunchucks. As soon as it snapped at him, he jumped back, then cut to the left. Sam ran around the wolf until it got dizzy, then leaped over it, landing behind it and knocking its hind legs out from under it while it was confused.

Adaptation

This TRACK can be used for a mobile fighting style.

First Facet★

Advance[H]: *You advance towards the enemy, allowing you to attack them.*

As a minor action, you may pick a target, move up to 3 hexes towards them, and take a SURGE against them. This can be used to extend the distance of a charge or other MOMENTUM ATTACK. **Boost:** The SURGE gains a BOOST.

Retreat[H]: *You pull out, going into a defensive stance.*

As a minor action, you may pick a target, move up to 3 hexes away from them, and become ON GUARD 2. This movement does not provoke from the chosen target. **Boost:** Gain another ON GUARD .

Second Facet★

Regroup[H]: *You gather together with your ally for mutual support.*

As a minor action, pick an ally, you can each move up to 3 hexes towards each other. You each gain 4|5|7|8 TEMPORARY HIT POINTS. **Boost:** You each gain an additional 2|3|3|4 TEMPORARY HIT POINTS.

Third Facet★

Back Flip[H]: *You jump over an enemy to confuse them.*

As a minor action, you may jump 3, move up to 6 hexes, then land. If you pass over an enemy, they are OFF BALANCE and one enemy may be OFF GUARD 2.

Boost: Increase the OFF GUARD by 1.

Fourth Facet★

Greater Retreat: *You can get out of any sticky situation.*

All movement from retreat is a DASH.

Whirl[H]: *You spin around an opponent, making them dizzy.*

As a minor action, pick an opponent within 6 hexes. Then move 6 hexes at the same distance from them. They take 2 PENALTIES and are DIZZY 2. **Boost:** Inflict another PENALTY.

Fifth Facet★

Dodge: *You move out of the way of an attack.*

Once per encounter, as an immediate minor action, when attacked you may DASH 1-3 hexes. This will avoid the attack. If the attack was [O]verwhelming , you instead get a 50% chance to avoid it. **Boost:** If the attack was overwhelming, increase the DODGE CHANCE by 25%. If the attack was not, give the attacker a PENALTY.

Barrel[H]: *You charge forward, knocking enemies out of your way.*

As a minor action, you may DASH up to 6 hexes in a straight line. Any enemies you move 1 hex next to, or through their hex, are FORCED 1 hex back or to the side and take –|–|12|14 damage, once per action per enemy. **Boost:** Increase the damage by –|–|3|4 to all targets or by C to one target.

Sixth Facet★

Extra Maneuverable: *You move freely in all directions.*

All movement granted by this TRACK is DASH.

Tag Along[H]: *You move an ally into location.*

As a minor action while adjacent to an ally, both you and that ally may move up to 3 hexes in the same direction. You each gain a BOOST. **Boost:** Your ally gains another BOOST.

Seventh Facet★

Speed Up: *Faster!*

All movement granted by this TRACK is doubled.

Mentor

Minor Mixed

A mentor guides others, giving them personalized advice on how to fight better.

Henry lit his pipe, and took a slow draw. "You need to mix up your attack pattern more, it's too predictable." Alex pushed the harpy away from himself, giving him just enough time to bring his sword up as she lunged back at him. "I'm trying, old man!" Henry took another drag. "And watch out for her kick, those talons are nasty." Alex twisted away just in time to avoid a claws through the gut. "Are you going to help or just complain about how I fight?". Henry chuckled. "Fighting is for the young, I'm sure you will manage. Just slash her after she stops to breath."

Adaptation

A mentor can be offering advice, or they could be magically augmenting their allies.

First Facet★

Advice: As a minor action, you may give an ally within 12 hexes advice. The advice takes one of the following forms:

- **Let'em Have it:** The ally gains 2 BOOSTS. **Boost:** The ally gains another BOOST.
- **Hold Steady:** The ally gains a REFRESH. **Boost:** The ally becomes ON GUARD 1.

Second Facet★

Yield the Spotlight: When you give an ally Advice, they may forgo their major action on their next turn and allow another ally of your choice to take a major action instead. They may also forgo their minor action and allow that same ally to take a minor action. Additionally, they may give any BOOSTS they have to that ally.

Third Facet★

Coordination: When you give an ally Advice, they gain the ability to delay their turn slightly; they may skip their turn, and take it at the same time as an ally later in the round. Both allies may move and act intermixed with each other, but their actions still have an order between them.

Fourth Facet★

Advanced Advice: When you use Advice, you have the option of the following forms as well.

- **Watch your back:** The ally becomes ON GUARD 2. **Boost:** Increase the ON GUARD by 1.
- **There's an Opening:** The ally takes a SURGE. **Boost:** The SURGE gets a BOOST.

Fifth Facet★

Plan A [H]: When you give an ally Advice, they may DASH 3 hexes.

Sixth Facet★

Prodigy: At the beginning of the encounter, you may pick an ally to be your prodigy. When you give your prodigy advice, they may DASH 6 hexes instead of 3, and restore a lesser restorable condition.

Seventh Facet★

Perfect Plan: When you give an ally Advice, they do not provoke REACTIONS for 1 round, may take an additional REACTION this round, and are immune to [MENTAL] and [FEAR] effects for 1 round.

Potions

Minor Mixed

Potion users carry a variety of useful potions to augment their capabilities.

Patricia ran through the forest, a horde of angry monkeys chasing after her. She reached into her bag and pulled out a shimmering red bottle. She pulled out the cork, and downed it in a quick gulp. Nearly instantly, flames ran down her body. She grabbed a sparkling blue bottle, and drank it as well, and her eyes dilated as time seemed to slow. She pivoted, facing the monkeys. The first reached her, and burst into flames upon grabbing her, and fled screaming into the woods. She then threw out two fireballs, nearly back to back, which tore through the remaining monkeys.

Adaptation

This TRACK can represent buff spells cast throughout combat.

First Facet★

Potion Belt: *You have a variety of magical potions with various effects.*

Between encounters, you may prepare up to three potions, plus an additional potion for every odd facet you possess in this TRACK. You can prepare the same potion multiple times. Once per round, you can spend 3 STEPS to unprepare all potions you currently have prepared, and prepare your max number of potions.

Drinking: *Press Q to quaff.*

As a minor action, you can pull out a potion and finalize it, at which point it becomes unprepared. A finalized potion can be consumed by anyone holding it during their turn, or may be passed to adjacent allies. **Boost:** That potion gains a BOOST.

Second Facet★

Spit It Out: *Its a bit gross and unsanitary, but with the right technique it can work.*

Once per encounter, when you drink a potion, you may choose for that potion to remain prepared.

Third Facet

Fast Gifts: *You pass the potion with swift efficiency.* When you give an ally a potion, they may drink the potion immediately.

Fourth Facet★

Blank: *This potion could be anything.*

When you prepare potions between encounters, you may choose to prepare one less potion. If you do so, at any point during the encounter, without using an action, you may prepare one additional potion.

Fifth Facet

Potion Toss: *You can distribute potions from further away.*

When you pass a potion to an ally, that ally may be in any hex within 6 hexes.

Sixth Facet★

Immediate Potion: *Sometimes you need that potion now.*

Once per encounter, you can ready and drink a potion as an immediate minor action.

Seventh Facet★

Ultimate Versatility: *You work your potion making with awe inspiring speed.*

At the beginning of each encounter, you may choose to only prepare two potions. If you do, for the rest of the encounter, when you take a minor action, you may prepare a potion.

Champion Potions

Any character can prepare these potions.

- **Potion of Healing:** When a creature drinks this potion, that creature heals $2 \times C$ hit points. Any excess healing becomes TEMPORARY HIT POINTS. **Boost:** This potion heals another C hit points.
- **Shielding Potion:** When a creature drinks this potion, that creature gains $2 \times C$ BARRIER HIT POINTS. **Boost:** The creature gains another C BARRIER HIT POINTS.
- **Potion of Defense:** When a creature drinks this potion, that creature receives C TEMPORARY HIT POINTS and becomes ON GUARD. **Boost:** Increase the TEMPORARY HIT POINTS by C .
- **Potion of Might:** When a creature drinks this potion, that creature becomes ENERGIZED C and receives a BOOST. **Boost:** Increase the ENERGIZED by C .
- **Potion of Speed:** When a creature drinks this potion, when they next take a major action, they may also use a SURGE. **Boost:** That SURGE gains a BOOST.
- **Potion of Vengeance:** When a creature drinks this potion, the next time an enemy adjacent to that creature deals damage to that creature, the attacking enemy takes 6 damage that ignores

counters. Additionally, the potion-drinker may treat the attacking enemy's target priority as one higher during their next turn. **Boost:** Increase the damage by 3.

- **Refreshing Potion:** When a creature drinks this potion, they gain a REFRESH. **Boost:** That creature also becomes ON GUARD.

Hero Potions

Only Hero, Immortal, and Myth tier characters can prepare these potions.

- **Potion of Restoration:** When a creature drinks this potion, that creature may choose up to one greater restorable effect and up to one lesser restorable effect currently affecting it and end those effects. **Boost:** The creature removes a PENALTY if they have one, otherwise they become ON GUARD.
- **Potion of Elemental Vengeance:** When a creature drinks this potion, the next time an enemy adjacent to that creature deals damage to the that creature, the attacking enemy takes 8 damage that ignores counters and gains an ENERGY EFFECT. Additionally, the potion drinker may treat the attacking enemy's target priority as one higher during their next turn. **Boost:** Increase the damage by 4.
- **Potion of Haste:** Once per turn, when a creature drinks this potion, that creature gains an additional minor action. **Boost:** That minor action has a BOOST.
- **Potion of Dodge:** When a creature drinks this potion, they gain a primed minor action that can be used to DODGE an attack. If the attack is [O]verwhelming, it has a 50% DODGE CHANCE. If successful, the potion drinker gains 2 extra STEP during their next turn. **Boost:** the drinker becomes ON GUARD

Immortal Potions

Only Immortal and Myth tier characters can prepare these potions.

- **Potion of Para-Elemental Vengeance:** When a creature drinks this potion, the next time an enemy adjacent to that creature deals damage to the that creature, the attacking enemy takes 10 damage that ignores counters and gains

two ENERGY EFFECTS. Additionally, the potion drinker may treat the attacking enemy's target priority as one higher during their next turn. **Boost:** Increase the damage by 5.

- **Potion of Greater Haste:** Once per turn, when a creature drinks this potion, the next time that they would take a minor action, they may instead gain 6 STEPS and take a major action. **Boost:** That major action gets a BOOST.
- **Potion of Invisibility:** When a creature drinks this potion, it becomes INVISIBLE 4. and ON GUARD 2. **Boost:** Increase the ON GUARD by 1.
- **Potion of Flight:** When a creature drinks this potion, it gains $2 \times C$ TEMPORARY HIT POINTS and a pair of wings. The wings are EQUIPPED and have $2 \times C$ hit points. While the wings remain, the potion-drinker can fly. **Boost:** The TEMPORARY HIT POINTS and wing's HIT POINTS are increased by C .

Myth Potions

Only Myth tier characters can prepare these potions.

- **Potion of Omni-Elemental Vengeance:** When a creature drinks this potion, the next time an enemy adjacent to that creature deals damage to the that creature, the attacking enemy takes 12 damage that ignores counters and gains three ENERGY EFFECTS. Additionally, the potion drinker may treat the attacking enemy's target priority as one higher during their next turn. **Boost:** The damage is increased by 6.
- **Potion of Super Strength:** When a creature drinks this potion, they become ENERGIZED 6 and gain a BOOST. Additionally, for the remainder of its turn, that creature may spend a step to break a destructible object it is adjacent to. **Boost:** Increase the ENERGIZED by 6.
- **Potion of Blink:** Once per encounter, after drinking this potion, the drinker may TELEPORT up to 10 hexes away. If this is done in response to an attack, the attack misses the potion drinker. If the attack is [O]verwhelming, this teleporation requires an additional immediate minor action. **Boost:** The attacker is left OFF GUARD.

Trick Quiver

Minor Mixed

A quiver specializes in using a variety of special ammo types to produce different effects, switching between them on the fly for what they need at the moment.

Robin fired at arrow at the goon, who fell over convulsing as electricity arced through is body. His friends turned around and started advancing on Robin, but a net arrow quickly brought them to the ground. He notched a flash-bang arrow, and fired it at another group of goons. Their leader turned at the commotion, and tried to flee, but he couldn't outrun the deadly poison tipped arrow coming for him.

Adaptation

This can be used for any type of ammunition you may use, or it could be used with a magic track to represent augmenting your spells with additional effects, or with melee weapons to represent special oils, special magical martial arts techniques, or other methods of getting extra effects. It could also be used with a buffer to represent passing out ammo for other people to use.

First Facet★

Ammo: *An arrow for every occasion.*

Select 2 ammo types from the Basic Ammo list below. Each facet you may select an additional ammo type. These selections can be remade between encounters.

Reload: *Ready to aim and fire.*

As a minor action, you may pick one of your ammo types and gain a RIDER that inflicts the corresponding effect. **Boost:** Give that ammo type a BOOST.

Second Facet★

Surprise Factor: *They never know what random thing you will shoot at them next.*

The first time each encounter a given type of ammo is used, the target is OFF BALANCE. This will prevent a REACTION against the attack delivering the rider.

Third Facet★

Burst Ammo: *Some ammo can explode.*

Your ammunition may apply their burst effect, if it has one, as well. This affects every creature within 1 hex of the target of your ammo except the target. You may choose not to be affected by your own burst effect.

Aura Ammo: *Others radiate.*

Your ammunition may apply their aura effect, if it has one, as well. This is a persistent effect that affects creatures while they are within 1 hex of the target of your ammo. You may choose not to be affected by your own aura effects.

Fourth Facet★

Advanced Ammo: *You get more complicated types of ammo.*

You may also select ammo from the Advanced Ammo list.

Fifth Facet★

Widened Burst: *Bigger is better.*

You may choose to have the burst or aura effect apply to creatures within 2 hexes of your target.

Sixth Facet★

Stunning Arrow: *Dazed and confused.*

Once per encounter, you may use the following ammo type.

- **Stunning:** Target must make a defense roll or be STUNNED and WEAKENED 10|13|17|20.
- Boost:** Add 5|7|8|10 WEAKENED ().

Burst: Creature must make a defense roll or be SLOWED 3.

Seventh Facet★

Mixed Ammunition: *Mix and match arrowheads.*

You may apply the burst or aura effect of another ammo type to your ammo in addition to its normal burst or aura effect. This also effects the target of the ammo.

Basic Ammo Types

- **Armor Piercing:** The base attack this is attached to ignores COUNTERS. The target takes *C* damage, unless the attack already didn't trigger COUNTERS, in which case they take $2 \times C$ damage instead. The target is OFF BALANCE.
Boost: Increase the damage by *C*.
Burst: Creatures are OFF BALANCE.
- **Boxing Glove:** On a hit, target is FORCED back 1 hex, takes a PENALTY, and 7|9|12|14 damage.
Boost: 5|7|8|10 extra damage.
Burst: Creatures are FORCED away from the target on a hit.
- **Corrupting:** The target must make a defense roll with a +2 modifier or become CORRUPTED 4 and SLOWED 2 for 3 rounds. **Boost:** Add 2 more CORRUPTION.

Aura: For 3 turns, creatures are slowed 2 on a failed defense roll at the start of their turn.

- **Elemental:** The target takes $Cd4$ damage and a chosen ENERGY EFFECT. A defense roll halves the damage and prevents the ENERGY EFFECT. **Boost:** 4|5|6|8 extra damage.

Burst: Creatures must make a defense roll or take the chosen ENERGY EFFECT.

Special: This ammo type may be selected multiple times with a different ENERGY EFFECT each time.

- **Poison:** The target gains 5|6|8|9 ONGOING damage and must make a defense roll or be [SICKENING] DIZZY 2. **Boost:** 2|3|4|5 extra ongoing.

Aura: For 3 turns, creatures become [SICKENING] DIZZY 1 on a failed defense roll at the start of their turn.

- **Sapping:** Target must make a defense roll or become WEAKENED $Cd4$ and SLOWED 2. A defense roll halves the WEAKENED. **Boost:** Increase the WEAKENED by 4|5|6|8

Burst: Creatures are SLOWED 2.

Advanced Ammo Types

- **Barbed:** On a hit, target gains 8|10|13|15 ONGOING damage and begins BLEEDING C . **Boost:** Increase the ONGOING by 4|5|6|8.

Burst: Creatures must make a defense roll or start BLEEDING 6.

- **Disruption:** On a hit, target is WEAKENED 10|13|17|20 and DISABLED. **Boost:** Increase the WEAKENED by 5|7|8|10.

Burst: Creatures must make a defense roll or be DISABLED.

- **Flare:** Target becomes VULNERABLE $2 \times C$ and has its target priority raised. **Boost:** Increase the VULNERABLE by C .

Aura: For 2 turns, creatures cannot use STEALTH or INVISIBLE.

- **Flash-bang:** Target is BLINDED 6 and takes $Cd4$ WEAKENED. A defense roll prevents the blindness and halves the weakened. **Boost:** Increase the WEAKENED by 4|5|6|7

Burst: Creatures must make a defense roll or be BLINDED 6.

- **Harpoon:** On a hit, the target is TETHERED to you at your current distance, and becomes VULNERABLE 10|13|17|20. **Boost:** Increase the VULNERABLE by 5|7|8|10

Burst: Creatures must make a defense roll or be TETHERED 3 to the target of the ammo for one round.

- **Magnetic:** Target must make a defense roll with a +2 modifier or take 4 PENALTY. For the next 3 rounds, any creature that moves next to it becomes Magnetized to it and visa versa. Magnetized functions like GRAPPLED, except it doesn't restrict who you may attack. **Boost:** Add 2 PENALTIES.

Aura: For 3 turns, creatures that start their turn in or enter this aura must make a defense roll or be FORCED adjacent to this creature.

- **Net:** Target is knocked PRONE and gains a PENALTY and OFF GUARD. Before standing, they must make a defense roll. On a failed roll, they cannot use the option to stand with 1 STEP. **Boost:** Increase the OFF GUARD by 1.

Burst: Creatures are knocked prone. Before standing, they must make a defense roll. On a failed roll, they cannot use the option to stand with 1 STEP.

Virtuoso

Minor Mixed

A virtuoso is a master of song, able to inspire their allies, choreograph their movements, and revitalize them.

Will's fingers ran along his lute strings, plucking out a complex melody. His teammates started humming it under their breath, caught up in the music, and their fighting became a dance, choreography to his tune. Suddenly an ogre landed a blow on Henry, and he went down. The music shifted, becoming more personal, rooting for Henry. Inspired, he rose to his feet and plunged his sword triumphantly into the ogre, slaying it on the spot.

Adaptation

This can also be used for a commander, who shouts orders and encouragement rather than singing songs.

First Facet★

Song: *You can create music to bolster your allies.*

Earshot of your music is anyplace within 12 hexes with indirect LINE OF EFFECT.

Chorus: *Your allies are inspired to greater acts of heroism.*

As a minor action, up to 2 allies within earshot gain a BOOST. **Boost:** One ally gets another BOOST.

Leitmotif: *This one's for you.*

As a minor action, one ally within earshot gains 2 BOOSTS. **Boost:** That ally gets another BOOST.

Harmony: *Music has a magic all its own.*

As a minor action, up to 3 allies within earshot are healed *C* hit points. **Boost:** Increase the healing by 1|2|3.

Melody: *Your music resonates with a particular ally.*

As a minor action, one ally within earshot is healed $2 \times C$ hit points. **Boost:** Increase the healing by *C*.

Second Facet★

Rhythm[H]: *Move to the groove.*

When using Chorus or Harmony, you may DIRECT the affected allies one hex.

Choreography[H]: *Feel the beat.*

When using Leitmotif, Rejuvenating Song, or Melody, you may DIRECT the affected ally 2 hexes.

Third Facet★

Diss Chord[SENSELESS]: *Your instrument lets out an ear piercing screech.*

As a minor action, all enemies within earshot are OFF BALANCE and you gain $2 \times C$ TEMPORARY HIT POINTS.

Boost: You gain another *C* TEMPORARY HIT POINTS.

Rejuvenating Song: *Music soothes the soul.*

As a minor action, one ally within earshot gains a REFRESH. **Boost:** Also grant that ally a BOOST.

Fourth Facet★

Anthem: *Your song inspires courage.*

When an ally is affected by your song, they gain immunity to [FEAR] for 1 round, and any [FEAR] effects on them are removed.

Entrance[H]: *Your song is hypnotic.*

As a minor action, you may cause up to 2 enemies within earshot to become entranced. They are

STOPPED for 1 round, and they get a PENALTY. This can only affect a given enemy once per encounter. A successful defense roll negates the STOPPED. **Boost:** One of the enemies gains another PENALTY.

Fifth Facet★

Funeral Dirge: *You play a tune to mourn an ally's fall.*

You may use one of the following songs once per encounter after an ally becomes WOUNDED during this encounter.

➤ **Rallying Call**[H]: As a minor action, you may grant 2 allies within earshot the effects of Chorus and DIRECT them an additional 2 hexes. **Boost:** Give the effect of a BOOSTED chorus.

➤ **Requiem**[H]: As a minor action, you may give one ally within earshot the effects of Leitmotif and move them an additional 4 hexes. **Boost:** Give the effects of a BOOSTED leitmotif.

Sixth Facet★

Siren's Call: *Few can resist the call of your song.*

When using Entrance, you may DIRECT each enemy who fails their defense roll 3 hexes before they are STOPPED.

Seventh Facet★

Grand Finale: *You bring your song to a rising crescendo, bringing together everything that has already been played.*

Once per encounter, as a minor action, you gain all of the following effects:

➤ If you have already used Entrance this encounter, 3 enemies within earshot are DIRECTED 3 hexes and STOPPED for 1 round.

➤ If you have already used Diss Chord this encounter, all enemies within earshot are [SENSELESS] OFF BALANCE.

➤ You may then use Leitmotif or Melody and DIRECT the target an additional 4 hexes or use Chorus or Harmony and DIRECT the targets an additional 2 hexes, but you must have used the chosen ability previously this encounter. **Boost:** You BOOST the chosen effect.

Beastly

Minor Varies

You are a monstrous race, or have some non-human ancestry, which you use to compliment your primary fighting style.

Sven sniffed the air, the smell of blood sharp and clear. He followed the scent down an alley, and found a vampire standing over a young woman. The vampire turned towards him, and gave him a look that said "She's mine, back off". Sven smiled, revealing his own fangs.

Adaptation

This can represent any concept that utilizes the monster rules.

First Facet★

Beastly Skill: *You have special abilities from your race.*

Pick two non-unique monster minor abilities. (pg. 152). As a minor action, you may use one of these abilities. If they have the [Surge] tag, you may use that ability in place of a surge. **Boost:** The selected action gains a BOOST.

Second Facet★

Beastly Stats: *Your bestial nature enhances your attributes.*

Pick Speed, Strength, or Wit:

- **Speed:** +2 speed
- **Strength:** Once per round, strike adjacent opponent to FORCE them one hex
- **Wit:** Once per round, Raise or lower your target priority for one opponent for one round. Attacks that violate this priority get a PENALTY.

Bestial Senses: *You have enhanced senses.*
Pick one of the following abilities:

- **Bestial Scent:** Gain SCANNER 12.
- **Bestial Vision:** Ignore cover.
- **Bestial Hearing:** Double the range of stealth of enemies to you, or any BLINDED you get.

Third Facet

Monster Tactical: *You gain an ability from your background.*

You gain a monster tactical from the monster tactical list (pg. 160).

Fourth Facet★

Bestial Prowess: *Your attacks increase in ferocity.*
Pick one of the following abilities:

- **Bestial Strength:** When you use Beastly Skill, gain a RIDER that FORCES the target back 1 hex

➤ **Bestial Precision:** When you use Beastly Skill, gain a RIDER that gives that target DISABLED on a successful STRIKE.

➤ **Bestial Rend:** When you use Beastly Skill, gain a RIDER that inflicts C BLEEDING on a successful STRIKE.

Fifth Facet★

The Beast Within: *You have learned new ways to attack with your innate abilities.*

Pick one of the following abilities:

- **Expanded Repertoire:** Pick an additional non-unique monster minor. You may use this ability with Beastly Skill.
- **True Heritage:** Pick a monster major ability. If you have a primed minor action, you may expend it, in addition to a regular minor action, to use this ability. This counts as using Beastly Skill.

Sixth Facet

Monster Tactical: *You have tapped into new abilities.*

You gain another monster tactical.

Seventh Facet★

Unleash the Beast: *You unleash your natural impulses.*

You gain the ability to enter a bestial rage once per encounter. You can gain one of the following effects for 1 round:

- Double your movement speed and ignore difficult terrain.
- Avoid provoking any reactions.
- Become immune to lesser conditions.
- Raise your target priority. You may use Beastly Skill against any enemy that violates this priority.

Cantrips

Minor Varies

You know a variety of smaller spells. They may not be the most impressive, but having the right spell for any situation is not to be underestimated.

Carl opened the treasure room, and heard the sarcophagus behind him creak open. He turned to see the mummy step out. With a quick gesture, Carl created a flash of light in its face. Recoiling, ancient eyes covered, the mummy started uttering a curse in an ancient language, and Carl felt a wave of sickness wash over him. Struggling to focus, he fumbled through the gesture to ignite the mummy on fire.

Adaptation

You may have a utility belt of gadgets with varied effects.

First Facet★

Cantrips[Rm]: *You cast a quick spell that fits into your overall fighting style.*

You know 3 cantrips. These 3 cannot all have [MENTAL] or [FEAR] tags. Whenever you gain a new facet in this track, learn a new cantrip. Cantrips are cast as a minor action. You do not yet gain the secondary effects of your cantrips. If you cast the same cantrip again before the end of your next turn, you become DISABLED 1 after you cast it.

Second Facet★

True Cantrip: *Your cantrips are even more powerful.*

You gain the secondary effects of the cantrips you cast. You cannot gain the secondary effects while DISABLED, and trying to do so will clear 1 DISABLED.

Third Facet★

Cantrip Surge: *You can cast a cantrip in a spare moment.*

When you would take a SURGE, you may instead cast a cantrip. This counts against your rate limit.

Channel Cantrip: *You infuse the power of your cantrip into your other abilities.*

You may gain the effects of a cantrip as a RIDER instead.

Fourth Facet★

Dual Cantrips: *You can cast 2 cantrips, but each will be weaker.*

You may cast two different cantrips as a minor action, but each takes a PENALTY. You may not use this if you already have a PENALTY.

Fifth Facet★

Quick Cantrips: *You can cast a cantrip instantly.* You may cast a non [H]eavy cantrip as an immediate minor action.

Sixth Facet

Preferred Cantrip: *You have mastered the use of one cantrip*

Choose a cantrip you know. You never gain DISABLED from casting this cantrip.

Seventh Facet★

Improvisation: *Its tricky, but you can make up new spells on the fly.*

You may cast cantrips you don't know, but become DISABLED when you do so.

Cantrips

- **Daze**[MENTAL]: An enemy within 12 becomes PERSISTENT OFF GUARD for 2 rounds. **Secondary:** The target is OFF BALANCE for 2 rounds. **Boost:** Increase duration by 1 round.
- **Chill:** An enemy within 12 becomes WEAKENED $2 \times C$. **Secondary:** The target is FROZEN. **Boost:** Increase WEAKENED by C .
- **Burst** [H]: An adjacent enemy takes $3 \times C$ damage. **Secondary:** The target is FORCED 1 hex back. **Boost:** Deal an additional C damage. **Rider:** If used as a RIDER, the target instead takes $2 \times C$ damage.
- **Bleed:** An enemy within 12 takes $3 \times C$ damage. **Secondary:** The target begins BLEEDING C . **Boost:** Deal an additional C damage. **Rider:** If used as a RIDER, the target instead takes $2 \times C$ damage.
- **Mend:** An ally within 12 heals $2 \times C$ HIT POINTS. **Secondary:** The target removes a lesser restorable condition. **Boost:** Heal an additional C HIT POINTS.
- **Calm**[MENTAL]: An opponent within 12 receives 2 PENALTIES. **Secondary:** The target treats your target priority as 1 step lower for 1 round. If they violate this target priority, their attack receives a PENALTY. **Boost:** Inflict an additional PENALTY.
- **Poison:** An opponent within 12 takes 5|6|8|9 ONGOING for 3 rounds. **Secondary:** The target

takes PERSISTENT SLOW 1 for 3 rounds. **Boost:** Increase ongoing by 2|3|4|5.

- **Flare:** An opponent within range 12 receives 2 PENALTIES. **Secondary:** The target becomes BLIND 6 for 2 rounds. **Boost:** Inflict an additional PENALTY.
- **Frighten**[FEAR][Rider]: An opponent within 12 receives 2 PENALTIES. **Secondary:** The target treats your target priority as 1 step higher for 1 round. If they attack a lower priority target, their attack receives a PENALTY. **Boost:** Inflict an additional PENALTY.
- **Ignite:** An opponent within 12 takes $3 \times C$ damage. **Secondary:** The target begins IGNITED C . **Boost:** Increase damage by C . **Rider:** If used as a RIDER, the target takes $2 \times C$ damage instead.
- **Jolt**[Rider]: An opponent within 12 takes $3 \times C$ damage. **Secondary:** The target becomes SHOCKED. **Boost:** Increase damage dealt by C . **Rider:** If used as a RIDER, the target takes $2 \times C$ damage instead.
- **Speed:** An ally within 12 receives 2 BOOSTS. **Secondary:** The target gains 3 STEPS. **Boost:** Grant an additional BOOST.
- **Seek:** An ally within 12 gains 2 BOOSTS. **Secondary:** The target may ignore cover for 1 round. **Boost:** Grant an additional BOOST.
- **Shield:** An ally gains $2 \times C$ BARRIER HIT POINTS. **Secondary:** The target may choose one of their

hex edges. The affected creature has cover from ranged attacks that draw LINE OF EFFECT through that hex edge while these BARRIER HIT POINTS remain. This moves with them and may be changed on their turn. **Boost:** Grant an additional C BARRIER HIT POINTS.

- **Subdue:** An opponent within 12 becomes DEPLETED. **Secondary:** The target must make a defense roll or be DISABLED. **Boost:** Target also receives a PENALTY.
- **Harden:** An ally within 12 gains $2 \times C$ RESISTANCE. **Secondary:** The target gains immunity to BLEEDING while this resistance persists. **Boost:** Grant an additional C RESISTANCE.
- **Enhance:** Choose a weapon within range 12. The next three rounds that weapon is wielded, the wielder gains ENERGIZED C . **Secondary:** The next attack made with this weapon causes the target to be OFF BALANCE and [SENSELESS] DIZZY 2. **Boost:** Increase ENERGIZED per round by 1|2|2|3.
- **Blur:** As an immediate minor action, an ally within 12 DODGES against the current attack made against them. If an attack is [O]verwhelming, this has a 50% DODGE CHANCE. **Secondary:** They additionally have reduced target priority to enemies who are 6 or more hexes away until your next turn. If attacked in violation of this, the attack receives a PENALTY. **Boost:** The target is also ON GUARD. **Special: Must have Quick Cantrips**

Dual Style

Minor Varies

Dual style lets you combine the powers of two major tracks.

Harry's left hand worked through the complex set of sigils required to summon a blazing inferno, whilst his right wielded a rapier with dizzying speed. He parried and lunged, then spoke the incantation, "Fuergo!" An explosion erupted behind his foe, sending them tumbling to the ground.

Adaptation

This track doesn't need much adaption, as its the tracks you choose to pair with it that would be adapted.

First Facet

Dual Tracks: *While you were studying the blade, I was also studying the blade, but when you went home to rest I studied magic.*

Pick any major track other than your current major track that does not grant another track. You gain new facets from that track as you gain facets in this track. You gain perk points from this track based on whether your second major track grants a perk point for that facet.

Quick Move: *You can use quick attacks from one style while you focus on the other.*

As a minor action, use a SURGE. This surge and your major action cannot be from the same track in a given turn. **Boost:** The SURGE receives a BOOST.

Second Facet

Second Hand: *You wield both styles together, albeit somewhat worse then normally.*

As a major and minor action, if you have no penalties, receive two PENALTIES and take a major action with both of your major tracks, the PENALTIES divided between the two as you see fit. **Boost:** Receive one less PENALTY.

Recover: *Sometimes you need to focus on regaining your balance.*

As a minor action, gain two BOOSTS. **Boost:** Gain another BOOST.

Third Facet

Double Slash: *You split your attention between two foes, finding openings against each.*

As a major and minor action, choose a non-[S]pecial SURGE from each of your major tracks. You may use both of these SURGES twice, as long as the same SURGE is not used twice against the same enemy.

Boost: Give ones of the surges a BOOST.

Fourth Facet

Linked Powers: *You fuse your two styles into a single one.*

As minor action, you can apply 2 PENALTIES to one of your major actions and make it into a RIDER attached to a major action from your other track. This

RIDER still triggers COUNTERS if the ability did so before. **Boost:** Apply 1 fewer PENALTY

Fifth Facet

Combined Power: *The onslaught from both styles together keeps others at bay.*

If you use an ability from both of your major tracks that targets an enemy, you may FORCE that creature 1 hex.

Push On: *Your focused attention can invigorate your allies.*

If during your turn, you use abilities from both your major tracks on the same ally, that ally may immediately DASH 1 hex.

Focus: *Hammer meet nail.*

If during your turn, you use an ability from one of your major tracks on an enemy, and an ability from one of your major tracks on an ally, you may have those creatures treat each others target priority as one higher.

Sixth Facet

Double Slam: *Time to unleash your full might.*

As a major and minor action, use a non-[S]pecial major action from both of your major tracks. Both actions must target different enemies. **Boost:** Give one of the actions a BOOST.

Overflow: *I'll need to borrow your strength for this one.*

As a major and minor action, you can use a major action from both tracks, as long as one of those abilities targets an ally. That ally becomes WEAKENED $2 \times C$.

Boost: Give one of the actions a BOOST.

Seventh Facet

Retaliate: *I'll take advantage of your killing intent to find an opening.*

As an immediate minor action when an enemy attacks you, become OFF GUARD 2 against that attack. After the attack, choose randomly between your major tracks. You may use a major action from the chosen track. (You may use [H] abilities for this ability)

Boost: Give the major action a BOOST.

Initiate

Minor Varies

Initiates possess extra innate qualities, allowing them to have an extra innate track.

Jackie appeared behind the hag, quickly striking in a flurry of attacks, before vanishing again. He practically quivered with barely restrained speed, speed which was unmatched, faster than the eye could track.

Adaptation

It is the combination of two innate tracks that really opens up the possibilities of how to describe the pairing.

First Facet

Extra Innate: *You possess an unusual breadth of innate talent.*

Pick any innate track other than your current innate track that does not grant a track. This is your extra innate track. You gain perk points from this track based on whether your extra innate track grants a perk point for that facet. You start each encounter DEPLETED 4.

Starting Facet: You gain the first facet of your extra innate track.

Recharge: *You can use the extra effort others spend on fighting to enhance your innate abilities.*

As a minor action, you gain a REFRESH. **BOOST:** Gain a half recharge token. Two half recharge tokens can be used for a refresh. **PENALTY:** Only gain half a recharge token, no REFRESH.

Second Facet

Additional Facet: You gain the second facet of your extra innate track.

Greater Counter: *You can combine your counters against a single attack.*

As an immediate minor action, You may apply 3 counters to an attack instead of 1, at least one of which must be different from the others. Add together all dodge chances and roll once. **Boost:** Apply an extra counter.

Third Facet

Additional Facet: You gain the third facet of your extra innate track.

Greedy Recharge: *You turn your advantage into more power.*

If you have at least 2 BOOSTS, you can lose 2 BOOSTS to gain a REFRESH.

Fourth Facet

Additional Facet: You gain the fourth facet of your extra innate track.

Immediate Recharge: *You are ready to go.*

At the start of combat, you may use Recharge as an immediate action, consuming the minor action from your first turn.

Fifth Facet

Additional Facet: You gain the fifth facet of your extra innate track.

Vital Recharge: *You can enhance your powers at a cost to your well being.*

At the start of combat, you may take $2 \times C$ damage to gain a REFRESH.

Sixth Facet

Additional Facet: You gain the sixth facet of your extra innate track.

Balanced Recharge: *You can gain even more power at the cost of some of your attention.*

You may gain a PENALTY and be OFF GUARD to gain a REFRESH whenever you don't already have a PENALTY nor OFF GUARD.

Seventh Facet

Final Facet: You gain the seventh facet of your extra innate track.

Equivalent Exchange: *Your innate abilities are even more flexible.*

You may DEplete one of your innate tracks that is not FULLY DEPLETED to REFRESH your other innate track.

Paragon

Minor Varies

Paragons take something that others can do, and do it harder and longer. An ice elemental is covered in a protective layer of ice, a paragon ice elemental is covered in more ice and regenerates it. A rager is angry and attacks people, a paragon rager rages harder and longer. A hunter marks his quarry, a paragon hunter continues marking tirelessly.

Logan strode through the battlefield, completely unconcerned about the danger. He was, after all, a paragon undying. He was cut down, and came back to life. Over and over, an attack would come his way, and he would fall, only to stand back up, refreshed.

Adaptation

While this aspect itself doesn't bring a lot of flavor, it can be combined with your innate track to create many different concepts.

First Facet★

Paragon Heart: *Your innate talents are raised to new heights.*

As a minor action, you may gain a REFRESH. **Boost:** Become ON GUARD ;

Exemplar: *You possess extra talents.*
Gain a bonus feature.

Second Facet★

Paragon Attribute: *You exemplify one attribute.*
Pick Speed, Strength, or Wit:

- **Speed:** +4 speed
- **Strength:** Once per round, strike adjacent opponent to FORCE them two hexes
- **Wit:** Once per round, raise or lower your target priority for one round. Attacks that violate this priority get a penalty.

Third Facet★

Paragon Swiftess: *You are faster than others.*
When you use Paragon Heart, you may gain 3 STEPS.

Fourth Facet★

Paragon Resilience: *You shrug off effects that would debilitate lesser creatures.*
You gain immunity to one of the following conditions:

- SLOWED
- STOPPED

- PRONE
- DIZZY
- GRAPPLED
- BLIND
- BLEEDING
- FORCED movement
- STUNNED
- an ENERGY EFFECT

Fifth Facet★

Paragon Talent: *Your talents are diverse.*
You gain another bonus feature.

Perfected Counter: *You can counter enemy attacks extremely well.*

As an immediate minor action, you can triple the effect of your COUNTER. **Boost:** Become ON GUARD .

Sixth Facet★

Greater Paragon Resilience: *You shrug off effects with both shoulders.*

You gain immunity to another condition from Paragon Resilience.

Seventh Facet

Ascension: *You are no longer merely mortal.*

You gain a monster tactical, have +3 speed, gain an additional +2 to a chosen stat for determining its combat uses, and you do not die from HIT POINTS damage, though you are still WOUNDED normally.

Combat Teleporter

Innate Offensive

You teleport around the battlefield, dazing and confusing your opponents for a while, until they acclimate to your antics.

Kurt watched the mob come, waving their torches and pitchforks. He sighed. Not again. The mob reached him, as as they tried to impale him on a pitchfork, he dissapeared. Before they knew what was going on, Kurt was behind them, clubbing Johnny over the head, then he was to the right stabbing Paul, then on the left killing Charlie. As much as they tried, they couldn't keep track of him as he kept dissapearing into thin air.

Adaptation

This TRACK can represent teleportation from many sources, magical, technological, a superpower, and others.

First Facet

Bamf: *You teleport as if it were second nature.*

All movement you make may be TELEPORT.

Surprise!: *You are a master of using your teleportation to surprise others.*

You have 8 surprise tokens. Before or after you TELEPORT, you may spend a surprise token to give an opponent within your melee range OFF GUARD.

Blink Blade: *You concentrate your teleportation ability into your weapon, teleporting it past enemy defenses.*

If you do not use Bamf or spend other surprise tokens during your turn, you may spend up to 2 surprise tokens to give yourself a BOOST per token.

REFRESH: Gain 2 surprise tokens. **DEplete:** Lose 2 surprise tokens. You are FULLY DEPLETED if you have less than 2 surprise tokens.

Flicker[C]: *You have a chance of flickering out of the way of an attack, allowing it to pass through you.* As a counter, you get a 35% DODGE CHANCE against that attack. If the attack is [O]verwhelming, you instead get a 20% DODGE CHANCE. If its an area of effect, you instead gain a BOOST.

Final Surprise: If you have surprise tokens when you become WOUNDED, you may immediately spend them to TELEPORT adjacent to an enemy and strike them one time per token for $2 \times C$ damage with a -2 accuracy

Second Facet★

Unsettling: *After you surprise an enemy, its hard for them to focus on anything.*

When you use Surprise!, the target is OFF BALANCE.

Afterimage: *Even though you aren't still there, you distracted the enemy enough to give your allies an edge.*

Once per round, after you TELEPORT, you may leave an afterimage in your old hex. Until the start of your next round, your allies other than yourself may flank with the after image.

Third Facet

Opportune Strike: *Telestab!*

Once per round, you may spend 2 surprise points after teleporting to take a SURGE.

Unstoppable Blink: *Your mastery of teleporation is sufficient to overcome most barriers to it.*

If you would be prevented from TELEPORTING, you may still TELEPORT, but only half the distance.

Fourth Facet★

Startle: *You can cause an enemy to jump back in surprise.*

When you use Surprise!, you may DIRECT the subject 2 hexes away from you. This movement may occur after you take an action.

Fifth Facet★

Unexpected Opening: *You ruthlessly exploit your opponent's surprise to further hinder them.*

When you use Surprise! Or Opportune Strike, you can use strike the opponent to either make them PRONE or FORCE them 1 hex in any direction.

Sixth Facet

Team Bamf: *You can move allies with you as you teleport.*

You may move an adjacent ally or GRAPPLED enemy with you when you TELEPORT.

Seventh Facet

Blind Jump: *You no longer need to see where you are going.*

When you use Bamf, the movement is WARP, unless you would normally be prevented from TELEPORTING.

Drones

Innate Offense

Activate small, automatic weapons to attack your foes.

Phil tapped a few icons on his tablet, and a drone detached from his backpack and started hovering over his shoulder. A giant insect alien burst through the wall, and the drone started unleashing plasma rifle fire into it, as Phil did the same with his own rifle. Another button, and a second drone deployed, and started launching missiles at the beast.

Adaptation

The drones need not be mechanical. They function perfectly well as summons or floating magical crystals.

First Facet★

Deploy: *You employ a variety of floating weapons platforms.*

At the beginning of each encounter, choose 4 Drones, which start inactive, and *C* Modules. Once per round, you may activate half of your inactive Drones, rounding up, and 1 Module. At the end of your turn, select an additional module. Activated drones are attached to yourself and activated Modules are attached to an adjacent hex. Drones that are attached to a creature share its hex and possess any movement modes possessed by the creature it is attached to. Drones and Modules not attached to creatures have hover. Drones and Modules cannot be targeted, unless specified otherwise. When you become WOUNDED, you may activate any inactive Drones.

Ammo: *You must supply your drones.*

You begin each encounter with 4 ammo. At any point during your turn, an active Drone may use one ammo to fire, once per round per drone.

Counter [C]: As a COUNTER, gain a partial ammo. Two partial ammo become one ammo.

REFRESH: When you use a REFRESH, gain one ammo. **DEplete:** Lose 1 ammo. You are FULLY DEPLETED if you have no ammo.

Initial Loadout: You have access to all drones and Smoke, Oilslick, and Medic modules.

Second Facet★

Patrol: *Your drones can move around on their own.* When you activate a Drone, you may attach it to an adjacent hex. When an ally moves within 1 hex of a Drone, it may attach the Drone to itself. An ally with an attached Drone may attach it to an adjacent hex at any point during its turn. At the beginning of your turn, Modules and any Drones not attached to creatures may move 6 hexes.

Shackle: You gain access to the Shackle module.

Third Facet★

Enhanced Mobility: *Your drones are more useful in the air.*

Drones and Modules can fly when not attached to a creature.

Platform: You gain access to the Platform module.

Fourth Facet★

Telemetry: *The drones have a camera system and networking capabilities.*

All active Drones, and creatures they are attached to, may draw line of sight from all other active Drones.

Massive: You gain access to the Massive Module.

Fifth Facet

Enhanced Sensors: *Your drones have sensor arrays and feed that information to people they attach to.*

All active Drones, and creatures they are attached to, have scanner 12.

Cloak: You gain access to the Cloak Module.

Sixth Facet

Jury Rig: *Drone Camouflage.*

Once per encounter, when you would activate a drone or module, you may change it into a different drone or module before activating it.

Warp: You gain access to the Warp module.

Seventh Facet

Hunter drones: *Your drones are faster to better hunt down targets.*

The distance Drones and Modules may move with Patrol is increased to 12 hexes.

Hologram: You gain access to the Hologram Module.

Drones

Attack Drone: When this drone fires, make *C* STRIKES within 6 hexes that deal 5 damage and BLEEDING 2.

Blaster Drone: When you activate this drone, choose an ENERGY EFFECT. When this drone fires, it makes a creature within range 6 to make a defense roll. If they fail, they take *Cd6* damage and suffer the chosen ENERGY EFFECT. A successful defense roll results in half damage.

Beam Drone: When this drone fires, all creatures within a 12 hex line must make a successful defense roll with a -1 modifier or take $3 \times C$ damage. Additionally, all hexes affected become afflicted for 1 round. Creatures that end their turn in one of these hexes take *C* damage.

Sniper Drone: When this drone fires, a creature within range 12 takes $3 \times C$ damage and becomes SLOW 1 for 1 round.

Pulse Drone: When this drone fires, all enemies within range 2 take $2 \times C$ damage and are FORCED back 1 hex.

Toxic Drone: When this drone fires, a creature within range 6 gains 6|8|9|11 ONGOING damage and become [SICKENING] DIZZY 1 for 1 round. A successful defense roll halves the ONGOING and negates the DIZZY.

Generator Drone: When this drone fires, a creature within range 3 gains ENERGIZED $2 \times C$ and 1 STEP.

Tracer Drone: When this drone fires, an enemy within range 12 gains VULNERABILITY $2 \times C$. For the next 2 rounds, it has its target priority raised and creatures targeting that enemy treat its MISS CHANCE as 20% lower.

Rocket Drone: When this drone fires, all creatures within a radius 1 blast within range 12 take 8|11|13|16 damage. A successful defense roll halves the damage. All hexes within the blast become difficult terrain for the rest of the encounter.

Modules

Smoke Module: When you activate this module, and at the beginning of your turn, all hexes within range 2 of this module become cloudy (pg. 38) until the end of your next turn.

Oilslick Module: Once per round at any point on your turn, this module may cause up to 3 hexes within range 3 to become fast terrain. If a creature is occupying a hex that becomes afflicted this way, they must succeed a defense roll or become PRONE.

Medic Module: Once per round, at any point during your turn, this module may restore one lesser restorable condition from a creature within range 3.

Shackle Module: When you deploy this module, it becomes TETHERED 3 to a creature within range 3. It counts as a normal size creature for this purpose. This module may be targeted and has C hit points.

Platform Module: At any point during your turn, the module may move 3 hexes in any direction.

Creatures sharing its hex may choose to move with it whenever it moves. This module has the fly movement mode.

Massive Module: This module blocks LINE OF SIGHT and LINE OF EFFECT through the hex it is attached to. This module is destructible with $2 \times C$ hit points.

Cloak Module: Allies within 2 of this module have their target priority lowered. Enemies take a PENALTY if they violate this target priority. Creatures may only gain one PENALTY per action in this manner.

Warp Module: When you deploy this module, choose a hex within range 6 of the drone. A creature sharing its module's hex may WARP to the chosen hex by spending 2 STEPS.

Hologram Module: When you activate this module, choose one of the following effects:

- **Holographic Wall**[ILLUSION]: Choose up to 6 contiguous hexes within range 3 of the hologram module. They block LINE OF SIGHT for anyone who believes the ILLUSION. If any part of the ILLUSION would be outside of range 4 of the drone at any time, that part disappears. You may choose new additional hex edges when this happens, up to a total of 6 active edges. Moving through the wall, seeing part of the wall disappear, or using lines of effect that pass through the wall is inconsistent with the illusion.
- **Holographic Impediment**[ILLUSION]: Choose any number of hexes within range 3 of the Hologram Module. They count as difficult terrain for anyone who believes the ILLUSION. If any part of the ILLUSION would be outside of range 3 of the drone at any time, that part disappears. You may choose new additional hexes when this happens, up to the number of hexes that disappeared. Seeing an affected hex disappear and not using extra STEPS to move through an affected hex without an ability to mitigate difficult terrain are inconsistent with the ILLUSION.

Electric Elemental

Innate Offense

You are a being of electricity.

These were bad parts, Franklin had heard. Those rumors were confirmed when, nearly as one, a group of berserk robots charged him. He let him gather, and then unleashed a giant shock that ran through them, jumping from robot to sparking robot. He wasn't done yet - he transformed into a bolt of lightning, and shot through them, overloading the survivors.

Adaptation

This could be a combat transformation into an energy being, or channeling the overwhelming power within. Instead of electricity this could represent cosmic energy.

First Facet★

Charged: *You possess electrical charges which you can discharge for various effects.*

You begin each encounter with 4 Charge. You may spend 1 charge per round.

Electric Body: *You can't shock what is already shocking.*

You are immune to SHOCKED.

Induction [C]: As a counter, you have a 50% chance to gain one Charge. If you gain a Charge, you may use an additional Charge next round.

Arc: *You discharge a bolt of lightning which can jump from target to target.*

You may spend one Charge to inflict $2 \times C$ damage and SHOCKED to a creature within range 12. When you become WOUNDED, you may use this a number of times equal to your remaining Charge. You may spend up to 2 BOOSTS when you use Arc. For each boost spent, you may inflict $2 \times C$ damage and SHOCKED to another creature within 3 hexes of the original target. This damage ignores counters.

REFRESH: As a refresh, gain one Charge. You may use an additional Charge next round. **DEplete:** Lose one Charge. You are FULLY DEPLETED if you have no Charges.

Second Facet

Ride the Lightning [H]: *You teleport across the battlefield in a flash of lightning.*

Once per round, you may TELEPORT up to 6 hexes by spending 3 STEPS. You may inflict SHOCKED to creatures in a line between the origin and end of the TELEPORT. You may spend one Charge to activate one of the following effects at the end of this teleport:

➤ **Discharge:** Inflict SHOCKED and 2 OFF GUARD to an adjacent creature.

➤ **Overcharge:** Grant an adjacent creature $2 \times C$ ENERGIZED and a RIDER that inflicts SHOCKED.

Third Facet★

Thunderclap: *You appear with deafening crash of thunder.*

When you use Ride the Lightning, at the end of your TELEPORT, you may cause creatures other than you within range 2 to make a defense roll or become [Senseless] OFF BALANCE for 1 round.

Fourth Facet★

Lightning Rod: *You can move further when you have a target.*

When you spend a Charge as part of Ride the Lightning, the maximum range of the teleport increases by 3.

Fifth Facet★

Thunderstruck: *Your thunder is louder and more debilitating.*

Once per encounter, when you use Discharge you may inflict STUNNED instead of SHOCKED.

Sixth Facet★

Return Stroke: *You can teleport out and back in one motion.*

When you use Ride the Lightning, you may TELEPORT back to your original position at no additional cost.

Seventh Facet★

Greased Lightning: *You can teleport more frequently.*

You may use Ride the Lightning twice per round. The normal use limits for Charge still applies.

Fire Elemental

Innate Offense

You are a being of fire.

Infernus strode across the battlefield, flames erupting from his footsteps. Enemy foot soldiers burst into flame as he drew near, unable to stand the heat radiating from his body. A brave soldier rushed forward, driving a spear into Infernus's side, only to be met with a gout of flame that melted his face.

Adaptation

This TRACK can also represent a wizard's fire shield, or an engineer's flame armor, or the results of channeling elemental power.

First Facet★

Flame on: *You have extra fuel to burn hotter.*

At the beginning of each encounter, you gain eight flame emblems.

Searing Shield[C]: As a COUNTER, when an adjacent enemy damages you, you may spend a flame emblem to inflict BURNING *C*.

Stoke the Flames[C]: As a COUNTER, you may gain a flame emblem.

Fiery Explosion: *Killing you unleashes all of your energy.*

When you become WOUNDED, you may spend any number of flame emblems to deal *C* damage to the nearest enemy to you for each flame emblem spent. That enemy is IGNITED for the amount of damage dealt with this ability.

Blazing Glory: *Every fist is a hotfist.*

Twice per round, you may spend a flame emblem to gain a RIDER. The RIDER has a -2 modifier to hit, and inflicts BURNING *C*.

Flame Body: *Can't burn what is already fire.*

You are immune to IGNITED.

REFRESH: You may use a REFRESH to gain 2 additional flame emblems. **DEplete:** Lose 2 flame emblems. You are FULLY DEPLETED if you have less than 2 flame emblems.

Second Facet★

Blazing Path: *Painful pursuit of a pyro.*

When you leave a hex during your turn, you may spend an additional STEP. If you do, that hex becomes difficult terrain for the rest of the encounter and afflicted until the end of your next turn. During that time, the first time that a creature other than you enters that hex, that creature is IGNITED *C*.

Third Facet★

Flame Aura: *Now that's hot.*

At the beginning of your turn, each enemy within radius 3 of you gains IGNITED *C*. Additionally, up to two hexes within the affected area become cloudy (pg. 38).

Fourth Facet★

Dancing Flame: *You manipulate your flame to move enemies.*

Once per turn, when an enemy takes damage from this TRACK or from IGNITED or BURNING gained by this TRACK, you may DIRECT that enemy one hex.

Fifth Facet★

Noxious Fumes [SICKENING]: *You leave poisonous fumes behind.*

For each enemy, the first time each turn that enemy enters a hex afflicted by Blazing Path, the become DIZZY 1 on their next turn.

Intense Flames: *Your presence makes fires burn hotter.*

Enemies adjacent to you must take an additional stack of DISABLED when ending IGNITED. Additionally, enemies adjacent to you take *C* additional BURNING from the IGNITED conditions.

Sixth Facet★

Feed the Flames: *You can harness other forms of energy to fuel your fire.*

Whenever you would be healed by *C* or more, you may reduce the amount of healing by *C* and gain a flame emblem. Additionally, when you would receive a BOOST, you can instead gain a flame emblem.

Seventh Facet★

Living Inferno: *You become a raging inferno.*

Once per encounter, at the beginning of your turn, you can turn into a living inferno until the start of your next turn. For that turn, you gain PHASING and 6 additional STEPS, and if you move through a destructible object, you may spend an additional STEP to destroy that object. If you do not spend a STEP this way, you instead deal 18 damage to that object. If you move through a creature, that creature begins IGNITED 6.

Form Shift

Innate Offense

You have extra reserves of spiritual energy which you tap into to strengthen yourself, becoming stronger as the battle wears on.

Korril faced down the alien invader floating in front of him. He was outmatched, it was clear... but that could change. He focused inwards on his spirit, and opened a metaphorical door. His spiritual energy began to suffuse his body, and he ran at the invader, moving faster than normal. The invader fired a laser blast at him, and he darted to the side. He continued to focus, and more energy began pouring through. He leapt into the air and began flying. The spiritual energy began overflowing out of his body, giving him a distinct glow, and he slammed his fist into the invader's face.

Adaptation

This can also be a shapeshifter which takes on stronger forms, or a fighter that builds up strength over the course of the battle.

First Facet★

Form Change: You tap into your soul to achieve greater forms of power.

You begin each encounter in your base form, form 0. At the start of each turn after your first, your form increases by 1, up to the highest form you possess. You have all benefits of forms preceding your current form.

Chi: You can spend your spiritual energy to enhance your attacks.

You start each encounter with 8 chi. You may spend 1 chi per round. Your limit on chi per round increases by 1 whenever you increase form.

Form 1 - Enhanced Form: Your first form enhances your physical abilities.

You gain +1 speed per form level, and can jump 1 per form level once per round. You may use Bolster.

- **Bolster:** You may spend 1 chi to become Energized C.

For each form level, pick one of the following effects. You may pick the same effect multiple times, and its effect stack

- **Speed:** +2 speed
- **Strength:** Once per round, strike adjacent opponent to FORCE them one hex per stack.
- **Wit:** Once per round, Raise or lower your target priority for one opponent per stack for one round. Attacks that violate this priority get a PENALTY.

Increased Resolve[C]: As a COUNTER, you may gain 1 chi.

Refresh: As a REFRESH, you may gain 2 chi. **DEplete:** Lose 2 chi. You are FULLY DEPLETED if you have less than 2 chi.

Final Determination: You can use your chi to avoid death.

If you would be WOUNDED while you have chi left, you lose all of your chi and gain C HIT POINTS per chi.

Second Facet

Absorb Strength: You can enhance your chi.

If you have BLOODLUST or TEMPORARY HIT POINTS, you may reduce it by C to gain 1 chi. This can be used any number of times.

Form 2 - Super Form: Your second form gives you superpowers.

Pick a monster tactical (pg. 160). You gain this ability when you reach form 2.

Third Facet

Form 3 - Hyper Form: Your third form lets you tap into arcane powers.

Create a 4 point Artifact. You gain the benefits of this artifact in form 3. You may use Enhance.

- **Enhance:** You may spend 1 chi to gain a BOOST.

Fourth Facet★

Jumpstart: You can spend your chi to elevate your form faster.

Once per encounter, you may increase your form by an additional 1 by spending 2 chi. If you do so, every enemy adjacent to you is forced back 1 hex and takes Cd4 damage.

Form 4 - Extreme Form: Your fourth form is highly resistant.

Pick 3 of the following effects to be immune to.

- SLOW
- STOPPED
- PRONE
- DIZZY
- GRAPPLED
- BLIND
- BLEEDING
- FORCED movement
- STUNNED
- an ENERGY EFFECT

Fifth Facet

Enhanced Base Power: *You have learned to tap into your power faster.*

You begin each encounter in Form 1. This does not count as increasing your form.

Form 5 - Ascendant Form: *Your fifth form gains new abilities.*

Pick another monster tactical. You gain its benefits in Form 5. You may use Swiftess.

- **Swiftess:** You may spend 2 chi to take a SURGE.

Sixth Facet

Super Base Power: *Your base power is even greater.* You begin each encounter in Form 2. This does not count as increasing your form.

Form 6 - Not Even My Final Form: *Your sixth form possesses legendary power.*

Create an 8 point Artifact. You gain its benefits in Form 6.

Seventh Facet★

Hyper Base Form: *You can trivially reach power levels most only dream of.*

You begin each encounter in Form 3. This does not count as increasing your form.

Form 7 - Final Form: *Your final form unlocks your true potential.*

You no longer have a limit on how much chi you can spend per turn. The extra speed and jump from Form 1 are doubled. Pick another 3 effects from form 4 to be immune to. You may use Spirit Blast once per turn.

- **Spirit Blast:** Deal *C* damage per chi point spent to a target in 24 hexes. This ignores COUNTERS, and is [O]verwhelming if 4 or more chi are spent. The target must make a defense roll or be STUNNED, DIZZY 2, and FORCED back 3 hexes. This defense roll has a -1 modifier for every chi point spent.

Hunter's Marks

Innate Offense

A hunter picks out their prey, and hunts it relentlessly.

Artemis crept through the undergrowth, eyeing the pigman carefully. Others wandered by, but they were of no consequence, only his chosen prey mattered. He loosed an arrow, burying it in their center. The pigman squealed and started running. Artemis gave immediate chase, matching step for step. As much as the pigman ran, they couldn't escape Artemis. Arrow from the other pigmen zinged by Artemis, but he barely took notice, and instead sent another arrow to finish his quarry.

Adaptation

This TRACK can also be used to represent somebody directing their allies in how to kill their target.

First Facet★

Magic Markings: *You select your prey.*

At the beginning of each encounter, you gain eight hunter's marks. At the beginning of each turn, you may spend a hunter's mark to choose a creature within radius 24. That creature becomes marked until the end of your next turn, and becomes vulnerable C to the next damage they receive from a creature with your hunter tag. Additionally, creatures with your hunter tag ignore target priority when attacking creatures with the [Marked] tag. This ability ignores target priority. You may use this twice to apply 2 marks at once.

REFRESH: You may use a REFRESH to gain 2 hunter's marks and may apply two extra marks on your turn. **DEplete:** Lose 2 hunter's marks. You are FULLY DEPLETED if you have less than 2 hunter's marks.

Guided Kill: *While many hunters stalk their prey personally, a select few prefer to direct others to do their killing.*

At the beginning of your turn, if none of your allies have your hunter tag, you may choose an ally within radius 24. That ally receives your hunter tag until they become WOUNDED or until they choose to end the status. If no other ally has the hunter tag, you have it.

Hunter's Traps: *You can leave a trap to ensnare your quarry.*

When you leave a hex, you may spend an additional STEP. If you do, that hex becomes afflicted. When an enemy enters a hex afflicted this way, that enemy becomes STOPPED until the end of their turn.

Dying Shot: *Even in death, you seek your quarry.* When you become WOUNDED, you may spend any number of hunter's marks. For each hunter's mark spent this way, the enemy that last damaged you becomes VULNERABLE C to the next source of damage dealt by an ally with your hunter tag. If you have your hunter's tag, you may pass it to another ally at this time. Additionally, you may spend 2 single hunter's marks after doing this. If you do, the ally with your hunter tag may take a SURGE on the creature who last damaged you.

Hunter's Revenge[C]: As a COUNTER, give the attacker a hunter's mark. This does not count against your limit on hunter's marks.

Second Facet★

Prowling Hunter: *You move swiftly through even the thickest jungle.*

You gain an additional two STEPS each turn and ignore difficult terrain.

Third Facet★

Hunter's Strength: *Nothing shall deter you from reaching your prey.*

You are immune to SLOW.

Hunter's Presence[FEAR]: *They know they can't outrun death.*

Enemies with the marked tag are inflicted with SLOW 1 for as long as they are marked.

Fourth Facet★

Hunter's Endurance: *You cannot be deterred by mere flesh wounds.*

You are immune to BLEEDING.

Hunter's Knowledge: *Brushbeat veteran.*

You can spend an extra STEP before you enter a hex that is afflicted and remove afflicted from it.

Fifth Facet★

Hunter's Gaze [FEAR]: *Your steely eyed gaze shoots fear into your prey.*

Once per encounter, you may choose a creature with the marked status. That creature becomes STOPPED for one turn.

Hunter's Concentration: *Your focus is unwavering.*

You are immune to DIZZY.

Sixth Facet

Hunter's Stealth: *You stalk your prey with ruthless efficiency.*

At the end of their turn, all allies with your hunter tag are treated as STEALTH 2 to creatures that are marked.

Seventh Facet★

Ultimate Mark: *No place to hide.*

Once per encounter, choose a creature. You may ignore cover and concealment when using Magic Markings on that creature for one round. Allies with

your hunter tag may ignore cover and concealment when attacking that creature for one round.

Hunter's Poison: *Your traps are laced with poison.* When you use Hunter's Trap, enemies who enter the afflicted hex receive *C* ONGOING damage.

Rage

Innate Offense

Characters with the rage aspect have learned to master their rage and use it to annihilate their enemies.

Bruce was upset at the crowd, but handling it. that is, until they threw a rock at this head. He screamed in fury, nostrils flaring, looking around until he spotted the young brave with a sling. He pounced on him, and started pummeling him. An arrow struck his side, and he whirled around and charged this new foe.

Adaptation

Oddly enough, in some ways, this TRACK rewards a sense of “honor”. You attack people who attacked you first. As a result, this can be used to represent an honorable fighter. This could also be used to represent the result of a demonic pact.

First Facet★

Don't Tick Me Off: *You get angry at the slightest grievance.*

Whenever an enemy tries to target you with an offensive ability or you make a REACTION against an enemy, you may treat that enemy as a victim until the end of your next turn. If, at the beginning of your turn, there are no victims within 12 hexes, the nearest enemy to you becomes a victim until the end of your turn. You may treat victims as though their target priority was one stage higher.

Anger: *This level of hatred is emotionally draining.* You begin each encounter with 4 anger. Once per round, you may spend 1 anger to use the following ability: **Angry Attack:** You gain a RIDER that can only be triggered against a victim. It deals $2 \times C$ damage. The enemy must make a defense roll or be FORCED up to 1 hexes away from you for each anger you had when activating this ability. You may choose to move with your target. If this RIDER is not attached to a melee attack, the distance is halved and you cannot move with them.

REFRESH: You may use a REFRESH to gain a 1 anger. Additionally, you may use Angry Attack an additional time this turn. If you have more than 4 anger, you must use angry attack. **DEplete:** Lose 1 anger. You are FULLY DEPLETED if you have no anger.

Fuel the Fury[C]: As a COUNTER, you gain a pain point. You can spend a pain point to increase the damage of angry attack by C , or spend 2 pain points to make an extra Angry Attack without spending an anger.

Final Ferocity: *Even as you go down, you tap into your rage to harm those you hate.*

When you would become WOUNDED, you may spend all your anger to use one SURGE per anger against the last enemy to deal you damage.

Second Facet★

No Escape: *When you're ticked off, there is no escape from your wrath.*

For each victim, the first time each round that that victim would move away, you may DASH one hex per anger you possess and use a SURGE against them. If a creature moves away from you, becomes a victim, and then moves away from you again, that still triggers this ability. Enemies are aware of this effect, even before any enemy becomes a victim.

Third Facet★

Choose one of the following abilities:

- **Hulk Out:** *You won't like me when I'm angry.* While you have anger, you may become large.
- **Adrenaline Rush:** *Your anger speeds your movements.* While you have anger, you gain +3 speed and can jump 3 hexes when on solid ground for no action cost.

Fourth Facet★

Fear the Beast: *If someone hasn't drawn your ire, it is in their best interest to keep it that way.*

Whenever an enemy who is not a victim moves into or out of a hex adjacent to you, that enemy may become SLOW 2. If they do not, that enemy becomes a victim and becomes VULNERABLE C to you.

Fifth Facet★

Beg for my Forgiveness, Scum: *Enemies who have slighted you should be down on their knees, begging for your mercy.*

If the target fails their defense roll against angry attack, they fall PRONE.

Sixth Facet★

Reckless Abandon: *You care more about hurting them than not being hurt in return.*

Once per round, when someone uses the angry attack rider, they may choose to gain a BOOST. If they do, they become VULNERABLE C .

Seventh Facet★

Eternal Anger: *My Rage knows no bounds, my hate for you is unending.*

You may always DASH up to 6 hexes when using No Escape. Angry attack always FORCES your opponent back up to 4 hexes regardless of anger, though it's still halved if not on a melee attack. Hulk Out or Adrenaline Rush no longer requires you to have anger.

Scout

Innate Offense

Scouts are mobile and try to act as a forward unit to give their allies information about what is coming up.

Laura moved ahead of her squad, hiding in the bushes. She spotted the demon bear rummaging through the remains of a campsite. "I have visual on the target," she radioed. "Roger that. Ready for remote strike." Laura eyed the demon bear through her scope, and read off a series of coordinates. Suddenly mortar shells rained down from above, landing on the bear. "Direct hit," she reported.

Adaptation

This can be a ranger who is using excellent woodcraft to get around, or a military scout.

First Facet★

Scouts Grace: *You move ahead of others to scout out areas.*

You gain 3 speed and are immune to difficult terrain.

Tag: *You're it.*

4 times per encounter, no more than once per round, you may make a target within your LINE OF SIGHT VULNERABLE $2 \times C$ to a specified ally. Their target priority is raised for that ally until this VULNERABILITY is triggered. If you are WOUNDED, you may use any remaining uses against the creature who WOUNDED you.

REFRESH: You may use Tag an additional time, bypassing the per round limit. **DEplete:** Lose a use of Tag. You are FULLY DEPLETED if you have no more uses.

First Hand Knowledge[C]: As a COUNTER, you may have the attacker become VULNERABLE C to a specified ally.

Second Facet★

Relay: *You communicate the location of enemies.* Allies may draw LINE OF SIGHT from your hex.

Subterfuge: *You are adept at staying hidden.*

You may use STEALTH on turns you use offensive actions, but using an offensive action still ends your STEALTH. Major and minor actions taken while not in STEALTH or which end your STEALTH do not inflict a STEALTH penalty.

Third Facet★

Don't Mind Me: *You can become the least conspicuous target.*

You can lower your target priority at the start of each round. You gain a 50% DODGE CHANCE against attacks taken against you which violate target priority.

Tactical Readout: *You can learn about your enemies as you mark them.*

When you use Tag on an enemy, you may ask a question about them.

Fourth Facet★

Greater Grace: *You move faster and quieter.*

Your speed increase from Scout's Grace is now 1 per facet in this TRACK. Your STEALTH is only penalized by 1 for every 2 hexes you move.

Fifth Facet★

Call the Storm: *You can guide your allies attacks home.*

Allies may draw indirect LINE OF EFFECT to targets you have LINE OF EFFECT to. Doing so counts as you attacking for the purposes of breaking STEALTH and INVISIBLE.

Sixth Facet

Active Cameo: *You blend in perfectly with your surroundings.*

You may turn INVISIBLE 6 once per round.

Seventh Facet★

Slippery: *Your movements are graceful.*

The extra movement granted by Scout's Grace may be DASH.

Adaptive Defenses

Innate Defense

You have defensive systems that are capable of reacting to the threats around you and adapting to them

The alien drone threw a car at The Human Sparkler. He dodged under it, and unleashed a bolt of lightning directly into its chest. It started convulsing, sparking flying from it. "I found a weakness!" he proclaimed triumphantly. He fired another bolt at it, but it's armor plating suddenly reconfigured, and diverted the lighting into the ground. "Uh oh, scratch that." Kid Blitz dashed in, knocking it off its feet. The drone righted itself, then 4 more legs deployed from it, stabilizing it.

Adaptation

This can represent a technological defense that analyzes your environment and responds to it, or a magical shield that shifts phase, a shape-shifting ability leveraged for defense, or simply a very adaptable fighting style.

First Facet★

Adaptability: *You analyze every part of the opponent's attack.*

You start each encounter with 8 adaptability, which can be used to fuel certain abilities.

REFRESH: You may use a REFRESH to gain 2 adaptability. **DEplete:** Lose 2 adaptability. You are FULLY DEPLETED if you have less than 2 adaptability.

Adapting Counter[C]: *You learn from being attacked.*

Gain 1 adaptability.

You can also use the following counter, which can only be used when you have been targeted by the same ability before. **Adapted Counter**[C]: *You respond effectively to negate known attacks.*

Reduce the damage taken by C. You may spend any amount of adaptability to increase this reduction by C per adaptability spent. If this reduces the damage taken to 0, you dodge the attack entirely.

Auto-Calibration: *You won't be fooled the same way twice.*

The first time each encounter you are subjected to a lesser condition, you become immune to that condition for the rest of the encounter. You may only be immune to one such condition at a time.

Adaptive Overload: *As a last ditch effort, you can use what you learned to lash out at attackers*

. If you still have adaptability when you are WOUNDED, you may deal C damage to a target without provoking a COUNTER for each adaptability you had.

Second Facet★

Environmental Compensation: *You can adapt to your environment.*

At the beginning of your turn, you may choose to be immune to difficult terrain or afflicted terrain until your next turn.

Third Facet★

Multi-Calibration: *Your strategy evolves to handle*

multiple effects simultaneously.

You may now be immune to two conditions from Auto-Calibration at a time.

Fourth Facet★

Learn by Example: *Its best to learn from other people's mistakes.*

You may also use Adapted Counter against abilities you have seen your allies be attacked by.

Heightened Calibration: After you are attacked, you may choose to calibrate to that attack. You have an EDGE against that attack if it is used against you again. Calibrating to a new attack loses your prior calibration.

Fifth Facet★

Phase Shield: *Careful analysis of the battlefield helps you avoid being attacked.*

After an enemy attacks you, you may retroactively declare your target priority to be lowered. The attacker may switch their attack to a new target, retaining anything else about that attack that has already been rolled or decided. If this attack still targets you in violation of target priority, you gain a 50% dodge chance against the attack. You still count as having been attacked by this ability.

Sixth Facet★

Full-Calibration: *You adapt to cover every weakness.*

You have no limit to the number of immunities Auto-Calibration can grant at once.

Seventh Facet★

Preemptive Adaptation: *You adapt so quickly only the most determined onslaughts can penetrate your defenses.*

You gain 1 SHIELDED each turn.

Aerial Superiority

Innate Defense

You are the king of the skies. While others scramble around on the ground, you soar. When others dare to share your skies, you show them why that was a mistake.

Peggie soared through the air, a flock of pterodactyls ahead of her. She charged one head on, twisting aside at the last minute to run her sword along its wing, sending it crashing to the ground below. She banked upwards, getting a better view of the situation, before diving straight down, building up a lot of speed before leveling out and stabbing another dinosaur before it can grab a kid.

Adaptation

This can be used to represent a wide range of flying characters, including a dragon or a hawkman or an air elemental.

First Facet

Wings of Glory: *You are most at home in the air.* You can fly. If you are prevented from flying, you may instead hover.

Barrel Roll: *You perform a tricky aerial maneuver to dodge attacks.*

You start each encounter with 8 air tokens. You may spend air tokens to be ON GUARD against creatures on the ground, or to gain a BOOST against a creature in the air.

REFRESH: You may use a REFRESH to gain 2 air tokens. **DEplete:** Lose 2 air tokens. You are FULLY DEPLETED if you have less than 2 air tokens.

Aerial Evasion[C]: As a COUNTER, you may gain a 35% DODGE CHANCE against the attack. If its [O]verwhelming, instead gain a 20% DODGE CHANCE. If it is an area of effect, you instead become ON GUARD.

Second Facet★

Free of the Ground: *You are a fast flier.* While in air, your speed increases by 3.

Third Facet★

King of the Sky: *No one else deserves to share the sky with you.*

Once per round, if you move through a hex adjacent to a flying opponent, you may STRIKE them to remove their ability to fly for 1 round. If it misses, they are instead reduced to having hover for 1 round.

Fourth Facet★

Quick Ascent: *You can reach higher altitudes quicker.*

You may jump 4 by spending 2 STEPS. In addition, 1 round per encounter, you may fly vertically without spending the extra STEP for ascending.

Ruler of the Air: *None shall challenge you in your domain*

You have An Edge against attacks from enemies that are In Air.

Fifth Facet★

Swoop: *You can turn your altitude into more speed.* You gain 2 STEPS for every hex you have descended while in air. This cannot gain you more than 12 STEPS in one round. You cannot use this while quick ascent is active. Attacks you make after descending can be MOMENTUM ATTACK.

Sixth Facet★

Lifting Capacity: *You can drag your opponent into the air.*

Once per round, while in air, you may STRIKE an opponent within melee range. If it hits, you can move them with you up to 3 hexes as you move.

Seventh Facet★

Supersonic Boom: *You can travel at shocking speeds.*

Once per encounter, you may double your speed for 1 round while in air. In this round, you can gain up to 24 STEPS from Swoop, instead of the usual 12.

Death Armor

Innate Defense

You protect yourself with the souls of your enemies.

Grindle stood unflinching as a bolt of energy streaked towards him. An instant before impact, a soul manifested, absorbing its energy with a wail of agony. Grindle stared at the wizard, who started quaking with fear. He held out his claymore, and souls manifested along it, creating a jagged, ethereal blade. Without a word, he cut down the wizard.

Adaptation

This can be used to represent a more mundane set of armor, with focus on intimidating the enemy. It could also be the result of a pact formed with an infernal ally.

First Facet★

Death Armor: *You have learnt to manipulate the souls of your past enemies, and can manifest them to form armor.*

You begin each encounter with $8 \times C$ BARRIER HIT POINTS.

Soul Release [FEAR]: *When an enemy attacks you, you can release a soul to hinder your enemy.*

Once per round, when an enemy attacks you, you may have that enemy become BLIND 5.

Soul Leech[C]: As a COUNTER, gain C BARRIER HIT POINTS.

REFRESH: You may use a REFRESH to gain an additional $2 \times C$ BARRIER HIT POINTS. **DEplete:** Lose $2 \times C$ BARRIER HIT POINTS. You are FULLY DEPLETED if you have less than $2 \times C$ BARRIER HIT POINTS.

Second Facet★

Big: *The souls of your armor lash out at the surrounding area.*

You may treat your reach as one hex greater when making REACTIONS, but if you do, in place of your normal SURGE, you inflict VULNERABILITY C and WEAKENED C . **Boost:** Increase either the VULNERABILITY or WEAKENED by C .

Scary[FEAR]: *You have infused the souls of your enemy into your own, and your mere presence is frightening.*

Enemies within 3 hexes of you must spend an additional STEP to move towards you. This is a SLOW effect.

Third Facet★

Intimidating Gaze [FEAR]: *You have learnt how to use fear to distract your enemies.*

Enemies who attack you become OFF BALANCE.

Fourth Facet★

Gain one of the following abilities

➤ **Spikes:** *You have learnt to shape the souls that form your armor into spikes.*

Twice per encounter, when you attack an enemy, you may attach the spikes to your attack. When you do this, sacrifice 4 BARRIER HIT

POINTS and gain a RIDER with a -2 modifier to hit that does 8 damage and makes the target STOPPED for one turn on a hit.

➤ **Gift of Spikes:** *You can gift an ally with your spikes*

. Once per encounter, when you are adjacent to an ally, you may sacrifice 4 BARRIER HIT POINTS. The next time an enemy attacks that ally while they are within their melee reach of that ally, they take 4 damage and become GRAPPLED by that ally.

Fifth Facet★

Absorb Soul: *You can absorb the souls of your enemies to cleanse your own.*

For each WOUNDED enemy, once per encounter while you are adjacent to that enemy, you may remove any number of lesser restorable effects currently affecting you.

Sixth Facet★

Grasping Souls: *The souls you have used to protect yourself seek the company of others.*

Whenever an enemy successfully attacks you in melee, if you have BARRIER HIT POINTS remaining, your target priority may be raised against that enemy until after their next turn. That enemy takes C damage at the end of their next turn if they violate target priority.

Concealing Souls: *The souls you have used to protect you make it harder for enemies to see you.*

Whenever an enemy attacks you, if that attack is not a melee attack and you have BARRIER HIT POINTS remaining, you may have a hex adjacent to you become misty for the rest of the encounter at the end of the attacking creature's turn.

Seventh Facet★

Death Aura [FEAR]: *You have mastered the ability to infuse souls into your soul, and your enemies are terrified of you.*

On each enemies turn, if its the first time this encounter they have LINE OF SIGHT to you, they must make a defense roll. If they fail, they cannot move towards you this turn.

Dense Muscles

Innate Defense

Giving Abdominal Muscles!

You are exceptionally strong and fit, making you tougher than others.

Mike's head exploded in pain as a fist drove itself into his face. He grit his teeth and fought through the pain, regaining focus in time to block the next punch. He returned a few blows of his own, before catching an uppercut with his chin. He kipped back to his feet, and spit out a mouthful of blood. The crowd cheered, amazed he was still going.

Adaptation

This can represent a tough barbarian, or the exceptional musculature of an orc or alien.

First Facet★

Healthy Body: *Your body is so healthy and your muscles so strong that you have more life force than others.*

You have $8 \times C$ more maximum hit points.

REFRESH: You may use a REFRESH to gain $2 \times C$ TEMPORARY HIT POINTS. **DEplete:** Lose $2 \times C$ TEMPORARY HIT POINTS or HIT POINTS. You are FULLY DEPLETED if you have no TEMPORARY HIT POINTS and less than $16 \times C$ HIT POINTS.

Strong Body: *Your body is so strong and your muscles so healthy that you can withstand forces that no normal man could.*

When you would be moved against your will, you can subtract 2 from the number of hexes that you would be required to move.

Extreme Fortitude[C]: As a COUNTER, you may reduce the damage taken by C . If the attack dealt no damage before this reduction, gain a BOOST.

Second Facet★

Suck It Up: *You have strengthened your determination through your constant training of your body.* You can move normally on difficult terrain

Push Up: *Your exercises have given you more mobility than others.*

You can recover from PRONE automatically at the beginning of your turn without provoking.

Third Facet★

Muscle Charge: *Your muscles are so large that when you move, you can knock others away from you.* For each enemy, the first time each round that you move adjacent to that enemy, you may FORCE them one hex in any direction.

Fourth Facet★

Marathon Runner: *Your legs are so strong that you make even the most ferocious predators jealous.* Your speed increases by 3.

Sprinter: *Your muscles are now so efficient that even though you are larger than most, you are also able to move more easily.*

You may use one STEP to move over three hexes of fast terrain.

Fifth Facet★

Feet of Steel: *Your muscles are now as hard as steel, especially on your feet from the heavy training they have endured.*

You now have an immunity to afflicted hexes.

Sixth Facet★

Weighted Training: *Thanks to your constant pushing of boundaries using weights, enemies can no longer halt your progress.*

You are immune to SLOW.

Seventh Facet

Ultimate Muscles: *Thanks to your constant training and dedication, you have reached the peak of fitness. Not even walls can stop your body from catching your enemies.*

You can break destructible terrain in adjacent hexes by spending 1 STEP.

Intimidating Muscles[FEAR]: *Your enemies are so scared of facing your perfect and towering body that they have trouble getting close to you.*

All enemies gain SLOW 1 when moving towards you.

Earth Elemental

Innate Defense

Earth Elementals aren't just in tune with the earth, it's a part of them and they're a part of it. When pushed, it's hard to tell where the elemental begins and the earth ends.

Grantice rose from the ground, looming over the opposing army. Arrows bounced off his rocky hide. He flexed, and a boulder rose from the ground nearby. He lifted his massive foot, and slammed it into the ground. An earthquake erupted out from him, tossing the soldiers to the ground.

Adaptation

Earth Elementals can be scrap-masters of the junkheap; bending spare parts to their whim, or a powerful telekinetic. Earth can be crystal themed, and a sci-fi theme could be combining/splitting orbiting pods that can attack or defend.

First Facet

Rock On: *You have a layer of rocky armor.*

Create a layer of earthen armor that gives $8 \times C$ RESISTANCE.

REFRESH: Gain $2 \times C$ RESISTANCE. **DEplete:** Lose $2 \times C$ RESISTANCE. You are FULLY DEPLETED if you have less than $2 \times C$ RESISTANCE.

Rock like Water: *You can move through the ground.*

You can burrow.

Granite Skin[C]: As a COUNTER, reduce the damage by C . If this did no damage before the reduction, the opponent takes a PENALTY.

Second Facet★

Solid Connection: *You can anchor yourself to the ground.*

While standing or climbing on a solid surface, you can choose not to be moved from it. While standing on it you have scanner [ground] to Range 12, plus 2 for each facet you have in this track.

Strength of the Earth: Choose one of the following abilities. This is a permanent choice until Flexible Strength.

- **Presence:** *You cover yourself in more rocks to bulk up.*
You may increase your size once per encounter.
- **Deflection:** You pull a defensive rock field to you when you act. When you cast an ability with the [R] or [Rm] tag, you can remove that tag.
- **Groundshot:** As a [ground] effect, when you succeed on a ranged attack you may make the targets hex and all their immediately adjacent hexes become difficult terrain.

Third Facet★

Pillar of the Earth: *Bouldercraft!*

You can create C boulders per encounter. A boulder is a destructible object with $2 \times C$ HIT POINTS that takes up 1 hex and is height 1. They must be placed on a solid surface, or on top of another boulder. You

can only build one column at a time per turn, so additional boulders placed each turn must be placed on the prior one.

Stalagomighty!: *The mightiest stalagmite.*

Sacrifice $2 \times C$ Resistance and create a height 3 spike within range 12 as a [ground] effect. The spike deals 11|15|19|23 damage to all targets within height three of that hex. A successful defense roll reduces the damage by half. A failed defense roll from the target adds Bleeding $C \times TargetsHeight$.

Fourth Facet★

Slow and Steady: Upgrade the choice from Strength of the Earth:

- **Presence+:** If you haven't taken any damage since the end of your last turn, you can choose to increase your size one step (up to a max of Huge).
- **Deflection+:** When you use an ability without [W], you can raise or lower your own target priority by 1. Violation of this target priority allows a free use of Stalagomighty against the violater.
- **Groundshot+:** You can imbue your projectiles with enough earth power that obstacles shy from its path. The first destructible object your ranged attacks would hit each round are destroyed before determining if the attack has line of effect to its target.

Fifth Facet

Flexible Strength: Strength of the Earth and Slow and Steady can be changed in between encounters.

Seismographic [Ground]: *They're gonna see this one.*

If you've taken damage since the end of your last turn, you can create a local earthquake, causing everyone except you within range 12 to fall PRONE. A successful defense roll negates the effect.

Water like Rock: *You can create traversable tunnels as your burrow.*

When you Burrow, you can choose to leave the hexes you pass open or closed.

Sixth Facet★

Shuffling Rock Garden no Jutsu *Rock, paper, rock.*
If there are any boulders from Pillar of the Earth within your scanner range, whenever you take damage, you can WARP to that boulder and replace it. This destroys the boulder you replace. If the hex you came from is a valid location to place a boulder, you may create a new boulder there.

Seventh Facet★

Pulverize: *You surround yourself with floating*

rocks.

You can create a cloud of orbiting comets. Sacrifice $2 \times C$ RESISTANCE per comet you create. When you or an ally within 3 hexes is attacked, you may sacrifice a comet to block the attack as an immediate non-action. If the attack is [O]verwhelming, this has a 50% chance to fail, and functions as DODGE CHANCE. You can throw comets at range 12 with a STRIKE (each one rolled separately); a hit deals $5 \times C$ damage and DIZZY 3. The attack consumes the comet. You may also retrieve a comet to regain $2 \times C$ RESISTANCE.

Fast Healing

Innate Defense

You are adept with parrying your opponent's blows and maneuvering among opponents.

Paul stride forward, undeterred by the jail of arrows impacting his chest. He tore them out, and the wounds swiftly closed. He rushed forward, raising his sword high to strike a deadly blow. The goblin took this chance to stab him while his guard was down, but Paul just powered through the attack to crush the goblins skull. He turned towards the rest of the tribe, his eviscerated belly sealing itself back closed.

Adaptation

This could represent someone with an innately high healing factor, someone with nano machines that continually repair them, or a monk whose meditation has transcended normal mortal limits.

First Facet★

You are immune to [Fear].

Regeneration Pool: *Your wounds close on their own.*

You have a regeneration pool that starts with $8 \times C$ hp. Each round, you may heal for up to half your regeneration pool, even if WOUNDED, and reduce the regeneration pool by that amount. You cannot die due to hp damage while you have hp in your regeneration pool.

REFRESH: You may use a REFRESH to add $2 \times C$ to your regeneration pool. **DEplete:** Lose $2 \times C$ from your pool. You are FULLY DEPLETED if you have less than $2 \times C$ hp in your regeneration pool.

Responsive Healing[C]: As a COUNTER, add C to your regeneration pool.

Automatic Recovery: : Once per round, restore a lesser restorable condition.

Second Facet★

Sealed Wounds: *You scoff at the idea of blood loss.* You are immune to BLEEDING.

Careful Carelessness: *You absorb blows that would kill other men in order to land your attacks.* Once per round you may become OFF GUARD to an attack against you to gain a BOOST.

Focused Healing: *You can those brief moments to focus on your healing powers.* You may spend BOOSTS to gain C HP in your regeneration pool per BOOST.

Poison Purge: *You process poisons faster than others.*

During your turn. you may remove ONGOING by spending 1 point from your regeneration pool per point of ONGOING damage.

Third Facet★

Peak Fitness: *When your body doesn't have to devote resources to patching you back together you can move faster.*

While you are at max hp, gain +3 speed.

Rational Bravery: *Things aren't nearly so scary when you are nigh unkillable.*

Fourth Facet★

Surprise Resuscitation: *Your enemies aren't expecting you to stand back up.*

You gain an EDGE on your actions on a round you stop being WOUNDED. Healing effects can be used on you even while you are WOUNDED.

Time To Recover: *You move with every exchange of blows.*

If you have less than $4 \times C$ hp, you may lower your target priority until you have more than $4 \times C$ hp. Violating this priority adds $2 \times C$ hp to your regeneration pool.

Fifth Facet★

Healing Swell: *You increase the rate you regenerate briefly.*

Once per encounter, you may heal an additional $2 \times C$ hp from your regeneration pool and remove all lesser conditions affecting you.

Fake Death: *You willingly take a lethal blow, knowing you will recover.*

Once per encounter when you take damage, you may transfer your current hp to your regeneration pool, leaving you at 0 hp and becoming WOUNDED. Your target priority is lowered while you are WOUNDED, violating this adds $4 \times C$ hp to your regeneration pool.

Sixth Facet★

Greater Automatic Recover: *Your regeneration cleanses more.*

Automatic Recovery can remove 2 conditions.

Seventh Facet★

Healing Rush: *Nothing is going to keep you down.*

Once per encounter, while WOUNDED, you may spend your major and minor actions to add $6 \times C$ to your healing pool.

Fencer

Innate Defense

You are adept with parrying your opponent's blows and maneuvering among opponents.

Yoi raised his rapier and caught his opponents thrust. With a flick he diverted it away, and their swords blocked and clacked as they exchanged blows. Yoi found an opening, and snuck his blade through to draw blood. His parries were fierce, and he drove his attacker back, until he was against a wall and couldn't escape.

Adaptation

This can be used for anyone capable of blocking their opponents attacks, whether with a rapier or laser sword, or shooting their attacks out of the air

First Facet★

Parry[C]: As a COUNTER, when you are attacked, make an attack roll with a +1 bonus. If this succeeds, you block 5|6|8|9 damage. If this is more than the attack dealt, you may damage the attacker by the extra amount. **Boost**: On a successful parry, you may spend a BOOST to block an additional *C* damage.

Grand Parry: You parry your enemies attacks with great skill.

Four times per encounter, you may increase the amount blocked by Parry by $3 \times C$, or use Parry against an attack that doesn't allow counters, even if it doesn't deal damage, for $3 \times C$.

REFRESH: You may use a REFRESH to use Grand Parry an additional time. **DEplete**: Lose a use of Grand Parry. You are FULLY DEPLETED if you have no more uses.

Footwork: After you use Grand Parry against an attack, you may DASH 1 hex. The opponent who attacked you may move 1 hex in the same direction.

Second Facet★

Guarding Blade: Your sword is all the protection you need.

You may use Grand Parry against REACTIONS without counting against your use limit.

Third Facet★

Circle: Your footwork allows you to move around an enemy.

Once per round, while adjacent to an opponent, you may DASH 3 hexes while staying adjacent to that opponent.

Fourth Facet★

Dizzying Swirl: Your movements trick your opponent.

When you use Circle, the opponent you circled is OFF BALANCE.

Light Footwork: You move with every exchange of blows.

You may use footwork when using Parry.

Fifth Facet★

Fast Disarmament: You do a special little flick with your sword to send your opponent's weapon flying.

Once per encounter, when using Grand Parry against an opponent within melee range, make a STRIKE against the opponent that disarms them after the attack.

Sixth Facet★

Fancy Footwork: Your footwork carries you further.

When you use Footwork, you may DASH 2 hexes and allow your opponent to move 2 hexes in the same direction.

Seventh Facet★

Weave: You can maneuver around many opponents at once, confusing all of them.

Once per round, you may use Circle up to 7 times in succession, and may DASH up to 6 hexes each time.

Guardian Spirit

Innate Defense

You have a benevolent spirit aiding you and hindering your enemies.

Mary had a little angel, it's wings as white as snow. And everywhere Mary went, the angel was sure to go. It followed her to battle one day, which everyone thought rules. It made her friends laugh and pray, to see an angel in war. It made their enemies quite irate, but still it hovered near. As enemies struck down her friends, Mary the angel did heal.

Adaptation

For the less supernaturally inclined, you may choose to view this as a contingency spell, or even inspiring your allies and intimidating your foes with your martyrdom. This could also be the result of a pact with an angelic being

First Facet★

Unseen Guardian[C]: As a COUNTER, you may heal an ally within 6 hexes *C* hit points.

Guardian's Strength: *Your guardian angel taps into its spiritual reserves.*

Four times per encounter, you may increase the healing of Unseen Guardian 6|6|8|8, and have the attacker become WEAKENED 0|2|2|4.

REFRESH: You may a REFRESH to use Guardian's Strength an additional time. **DEplete:** Lose a use of Guardian's Strength. You are FULLY DEPLETED if you no more uses.

Unfinished Business: *Just a parting gift.*

When you become WOUNDED, choose an ally. That ally may use Guardian's Strength a number of times equal to your remaining uses of Guardian's Strength, with just the healing and WEAKENING of Guardian's Strength effecting an ally withing 6 hexes of them, as an addition to their own COUNTER.

Second Facet★

Bolstering Guardian: *It'll cure what ails ya.*

Allies affected by Unseen Guardian become immune to [SICKENING] for two rounds, and any [SICKENING] effects currently affecting those allies are suppressed for two rounds.

Vengeful Guardian: *Your guardian looms over the battlefield.*

When you use Unseen Guardian, you may treat your reach as one hex greater until the start of your next turn when making REACTIONS, but if you do, in place of your normal SURGE, you instead deal 2×*C* damage (This damage bypasses COUNTERS). **Boost:** Increase the damage by *C*.

Third Facet★

Curing Guardian: *Your guardian cleanses those it heals.*

You may restore one lesser restorable condition from your target when you use Unseen Guardian.

Fourth Facet★

Guardian Stance: *Your guardian draws in attackers*

You may choose to have our target priority be raised for 1 round. If you do, Unseen Guardian will reduce the damage instead of healing, unless the attack would do no damage. If the target priority is violated, you may immediately use guardian's strength without counting against your limit.

Fifth Facet★

Sudden Explosion: *The guardian explodes forth with righteous might.*

The enemy that triggers Unseen Guardian becomes OFF BALANCE for 1 round. Allies affected by Unseen Guardian may DASH 2 hexes.

Sixth Facet★

Blinding Guardian: *The brilliance of the guardian blinds foes.*

The enemy that triggers Guardian's Strength becomes BLIND 4 for 1 round.

Purging Guardian: *Your guardian further cleanses your allies.*

You may restore up to two lesser restorable conditions from among those affected by Unseen Guardian.

Seventh Facet★

Guardian Explosion: *The guardian throws your attacker back.*

Once per encounter, when you use Unseen Guardian, you knock the enemy that triggered it back 2 hexes and render it PRONE.

Ice Elemental

Innate Defense

You are a being of solid ice, and freeze those around you.

Cryon lumbered across the battlefield. Arrows hit his icy shell and bounced off. He stomped his foot, and a sheet of ice forced along the ground, and he slid across it. He slid into a group of soldiers, and unleashed a burst of freezing cold. They started shivering as ice formed over them.

Adaptation

This can be used to represent an ice shell formed by magic, or underlying ???

First Facet★

Ice Shell: *You are surrounded by a thick shell of ice.* You have $8 \times C$ BARRIER HIT POINTS.

REFRESH: You may use a REFRESH to gain another $2 \times C$ BARRIER HIT POINTS. **DEplete:** Lose $2 \times C$ BARRIER HIT POINTS. You are FULLY DEPLETED if you have less than $2 \times C$ BARRIER HIT POINTS.

Chilly Aura[C]: As a COUNTER, when attacked in melee, the attacker is WEAKENED C .

Growing Ice[C]: As a COUNTER, gain C BARRIER HIT POINTS.

Slippery Path: *You create fields of ice near you.* Once per round, you may have a hex adjacent to you become fast terrain for the rest of the encounter.

Frozen Body: *You cannot freeze ice.* You are immune to the FROZEN condition.

Second Facet★

Frozen Path: *You can freeze the path you walk over.* Three times per round, when you leave a hex on your turn, you may spend an additional STEP. If you do, choose one of the following:

- Each enemy within radius 1 of the hex you left becomes FROZEN.
- Each hex within radius 1 of the hex you left becomes fast terrain.

Third Facet★

Chilling Approach: *Its hard to approach you through the chill you exude.*

Whenever an enemy within 2 hexes spends a STEP to move closer to you, they may spend an additional STEP. If they do not, they become FROZEN.

Fourth Facet★

Slip and Slide: *You move over ice with increases agility.*

You may spend 1 STEP to move over 3 hexes of fast terrain.

Fifth Facet★

Cool Friends: *You grant your allies the ability to freeze the ground.*

For each ally, once per round, that ally may have a hex adjacent to them become fast terrain.

Sixth Facet★

Frost Nova: *You unleash an even fiercer storm of cold.*

Once per encounter, when you use Frozen Path, you may use both abilities. When you do so, increase the radius to 3.

Seventh Facet★

Blizzard: *You create a fierce storm.*

At the beginning of each encounter, you may choose for each creature within radius 24 of you, other than you, to become BLIND 6 for one round and FROZEN.

Jinx

Innate Defense

People around you have bad luck.

Larl ran after the young girl, and followed her around a corner down an alley. Suddenly, he was struck in the face. He recoiled, waving his sword at the attacker, only to realize he was a rake he had stepped on. Cursing, he resumed his pursuit, and found her climbing a fence at the end of the alley. He drew his crossbow, took careful aim, then as he pulled the trigger, the bowstring snapped. He cursed his bad fortune, then ran to the fence, scaling it quickly. As he reached the top, his boot slipped, sending him falling backwards. He could only watch resentfully as she disappeared around another corner and rub his sore behind.

Adaptation

You could be actively manipulating luck, or otherwise intentionally causing these effects, rather than being a conduit of misfortune.

First Facet★

Slip and a Miss[C]: *Enemies just happen to miss you.*

As a COUNTER, you get a 35% DODGE CHANCE against that attack. If the attack is [O]verwhelming, you instead get a 20% DODGE CHANCE. If its an area of effect, the attacker instead gains a PENALTY.

Bad Luck Rising: *Being near you is hazardous to one's health.*

You start each encounter with 8 strokes of luck. Abilities that require strokes of luck can still be used while wounded.

REFRESH: Gain 2 strokes of luck. **DEplete:** Lose 2 strokes of luck. You are FULLY DEPLETED if you have less than 2 strokes of luck.

Pratfall: *They just slipped, honest.*

When an enemy within 12 hexes would make an attack, you may spend a stroke of luck to have them suffer a 50% DODGE CHANCE on that attack. If their attack is [O]verwhelming, this requires 2 strokes of luck. If it targets multiple targets, this cost doubled, but they roll a single chance for every target collectively. If this DODGE CHANCE causes them to miss, they fall PRONE.

Second Facet★

Environmental Hazard: *Random things happen to those around you, causing them to stumble.*

Once per round, you may spend a stroke of luck. This has a 50% chance of causing a random enemy within 12 hexes to take $2 \times C$ damage, ignoring COUNTERS, from a random mishap - a stone shaking loose from the ceiling, them fumbling their weapon, twisting their ankle as they move, etc. They are DIZZY 1 if this succeeds.

Third Facet★

Jam: *Your enemy's weapon randomly jams, interfering with what they were trying to do.*

When an enemy within 12 hexes would make an attack, you may spend a stroke of luck to have them suffer a 50% DODGE CHANCE on that attack. If their attack is [O]verwhelming, this requires 2 strokes of luck. If it targets multiple targets, this cost doubled,

but they roll a single chance for every target collectively. If this DODGE CHANCE causes them to miss, they are DISABLED 1 for each stroke of luck spent. This cannot be used on the same attack that you use Pratfall on.

Backlash: *It is dangerous to mess up with dangerous abilities.*

If an enemy misses due to Pratfall or Jam, they are subjected to any lesser condition that attack would have inflicted.

Fourth Facet★

Unlucky Stumble: *They just can't get a break.*

Whenever an enemy within 12 hexes of you would roll a direction for DIZZY, they instead roll twice and you pick which dice they follow.

Precarious Position: *He really shouldn't have stood so close to the edge.*

One per round, if an enemy is in a hex, even in the middle of moving, that is adjacent to a fall, hazardous terrain, or afflicted hex, they have a 50% chance of slipping and moving into that hex.

Fifth Facet★

Luck's Favor: *Quick reactions seem more prone to being messed up.*

Slip and a Miss has a 100% chance of working against a REACTION.

Sixth Facet★

Poor Unfortunate Soul: *That's not what they meant to do.*

Whenever an enemy within 12 hexes would raise or lower their target priority, it may have a 50% chance of changing in the opposite direction.

Seventh Facet★

Domino Effect: *Bad luck has a cascading effect.*

Whenever an enemy is successfully subjected to an effect when you spend a stroke of luck, you may have the nearest enemy to them that has not been affected by domino effect during this chain suffer one of the following effects based on a d6 roll:

➤ 1,2 -They fall PRONE.

➤ 3,4 - They become DIZZY 1.

➤ 5,6 -They become DISABLED.

Each time this triggers, there is a 50% chance it will trigger again based on the new enemy.

Martial Disciple

Innate Defense

You have devoted your life to the study of martial combat. This has given you an adaptable approach to combat.

Bruce saw the charging bull, and dropped into Immobile Rock Stance. When the bull reached him, he stuck out a hand and stopped it dead in its tracks. He shifted stances to Flowing River Stance, and quickly moved past the bull and approached it's handler. The handler tried to whip him, but Bruce caught it midwhip. With a yank, he pulled the whips wielder closer and shifted to Viper Stance, ready to ensure the man would not escape.

Adaptation

Martial Disciple can be used for anything that can block attacks and adapt to their opponents.

First Facet★

Block [C]: As a COUNTER, you may prevent *C* damage. If the attack does no damage before this reduction, you may make a SURGE against the attacker with a 50% DODGE CHANCE. If you are unable to attack them with a surge, you are instead ON GUARD.

REFRESH: Gain $2 \times C$ TEMPORARY HIT POINTS. **DEplete:** Lose $2 \times C$ TEMPORARY HIT POINTS or HIT POINTS. You are FULLY DEPLETED if you have no TEMPORARY HIT POINTS and less than $16 \times C$ hp.

Manly Toughness: *You are tough and grizzled from your experiences.*

Your hit points increase by $8 \times C$

Be Water: *You adapt your fighting style to suit the situation.*

At the beginning of your turn, you may adopt one of the following stances and gain its benefits for the round. Weapons you wield also gain an extra property while in this stance; if not wielding a weapon, your unarmed attacks gain this property.

- **Immobile Rock Stance:** You cannot move but are immune to FORCED movement and cannot be a SITTING DUCK. Your weapons have bayoneted
- **Flowing River Stance:** Your speed increases by 2. Your weapons have deft.
- **Viper Stance:** Your REACTIONS do an additional *C* damage. Your weapons have reactive.
- **Chivalrous Stance:** Your target priority is raised. You may take a SURGE against enemies you violate this target priority. Your weapons have grabbing.
- **Adaptation Stance:** Pick a lesser condition. You may make a defense roll to negate that condition when you receive it. Your weapons have shield.

Second Facet★

Kip-Up: *You can flip to your feet easily.*
You may stand from PRONE for free without provoking.

Always Vigilant: *You are always ready for a fight.*
You may begin each encounter in a stance, selecting a new one on your first turn.

Third Facet★

Formless: *If you are ever changing, you cannot be stopped.*

Your stances become more refined and gain additional benefits.

- **Immobile Rock Stance:** You are also immune to PRONE, SLOWED, and STUNNED.
- **Flowing River Stance:** Your speed increases by another 2 and you may avoid 1 REACTION per round.
- **Viper Stance:** You may take an additional REACTION each round.
- **Chivalrous Stance:** Pick an ally. You may choose to take any damage they would take in their place.
- **Adaptation Stance:** If your defense roll stops the condition, you may inflict it on the attacker.

Fourth Facet★

Complete Block: *You can block more effects of attacks.*

Once per round, you may ignore a lesser condition that would be afflicted on you.

Fifth Facet★

Shapeless: *By having no shape, you have every shape.*

Your stances become more refined and gain additional benefits.

- **Immobile Rock Stance:** You may now move yourself and choose if you want to be moved by any given effect.
- **Flowing River Stance:** Your speed increases by another 2 all your movement is DASH.
- **Viper Stance:** Your threatened area is increased by 2 hexes and you may DASH 2 hexes before taking the reaction.
- **Chivalrous Stance:** You may immediately set your target priority to lowered during this round. If this target priority is violated, you may take a surge against the attacker.

➤ **Adaptation Stance:** You automatically succeed the defense roll for adaptation stance.

lesser restorable conditions affecting you.

Sixth Facet★

Nirvana: *You find inner peace and cleanse yourself of conditions.*

Once per encounter, you may remove any number of

Seventh Facet★

Stance Mastery: *You are such a master that you can create new stances with more benefits.*

You may use 2 stances at the same time.

Medic Tent

Innate Defense

Patch yourself up in your medical tent.

A few too many scrapes, and Doctor Smith returned to his tent. A quick patch-up later, he returned, ready to fight again.

Adaptation

Instead of representing a medic tent, this track can represent sanctified ground or areas set up with nanobots.

First Facet★

Medic Tent: *You deploy a field hospital.*

At the beginning of each encounter, choose a hex. That hex and each hex adjacent to it are your Medic Tent. The Medic Tent starts with 4 doses of Medical Supplies.

REFRESH: Your Medic Tent gains an extra dose of Medical Supplies. **DEplete:** Lose a dose of Medical Supplies. You are FULLY DEPLETED if you have no doses of Medical Supplies

Treatment: *Your tent has the supplies to cure a wide range of conditions.*

Once during each ally's turn, when that ally is in your medic tent, they may remove a Lesser Restorable condition. Additionally they may use a Minor action or a dose of Medical Supplies to heal $2 \times C$ HIT POINTS or remove a Greater Restorable condition.

Boost: Heal an additional C HIT POINTS.

Mobility: *You can relocate your tent, but it takes time to fully set up everything.*

At the beginning of each of your turns, choose one of the following:

➤ **Restock:** Your Medic Tent gains a point of Vigor. Whenever an ally uses Treatment, they gain a STEP for each point of Vigor that your medic tent has.

➤ **Redeploy:** Move your Medic Tent to any hex in your LINE OF SIGHT. Lose all points of Vigor.

Counter [C]: As a COUNTER, you have a 50% chance to gain an additional dose of Medical Supplies.

Second Facet★

Nurse Training: *You can equip others with useful medical supplies.*

: When an ally ends their turn in a Medic Tent, until the end of their next turn, adjacent allies may be affected by Treatment as though they were in the Medic Tent.

Safe Environment: *Your tent is set up to make all healing more efficient.*

When an ally would be affected by an ability that heals him while in a Medic Tent with Vigor, that ally may have that ability receive an EDGE.

Third Facet★

Vaccines: *Your supplies can help protect against future ailments.*

Once per encounter per ally, when Treatment is used on that ally, they may gain Immunity from a Lesser Condition for one round per point of vigor that your tents have.

Security Tent: *You have fortified your tent, making it harder to attack your patients.*

Allies have their target priority lowered while they are in a Medic Tent. Attacks that violate this target priority receive two PENALTIES.

Fourth Facet

Advanced Nurse Training: *You give your nurses extra supplies to reach their patients.*

When you gain this Facet, choose a Monster Tactical Ability (pg. 160). When an ally ends their turn in a Medic Tent, until the end of their next turn, they gain that Monster Tactical Ability.

Fifth Facet★

Emergency Tent: *You have a backup ready to go.*

Once per encounter, you can create a second Medic Tent, as if you used Medic Tent. When you use Mobility-Restock, the points of Vigor are shared between the tents. When you use Redeploy, you move both tents, and lose all points of Vigor from both tents.

Sixth Facet★

Nurse Sterilization: *You protect your nurses.*

When an ally ends their turn in a Medic Tent with Vigor, until the end of their next turn, they are SHIELDED.

Seventh Facet★

Resuscitation Team: *Clear!*

You may spend a dose of Medical Supplies on a WOUNDED ally in a Medic Tent to heal them $2 \times C$ HIT POINTS. Additionally, you and your allies may use healing abilities on WOUNDED allies in a Medical Tent with Vigor. If a WOUNDED ally would be brought to 1 or more HIT POINTS with either of these abilities, they are no longer WOUNDED.

Ninja

Innate Defense

A Ninja only attains their true power unseen; their secret arts are not meant for sight. A ninja that does not conceal themselves is no ninja at all.

Mark cast his eyes about frantically, trying to find the ninja. The ninja appeared behind him, slashing his legs with a katana, but was gone in a flash. Mark thought, trying to figure out how to defeat an opponent he couldn't see. He nocked an arrow, and waited for the ninja to show himself. He did, darting out from behind a bush. The arrow flew true, set to hit the ninja, but he twisted out of the way at the last moment. Mark cursed, and died.

Adaptation

This does not have to be a literal ninja. It can also be used for any character which has a strong emphasis on stealth, such as a primal hunter or a special ops agent.

First Facet★

Blade in the Dark: *Your skills allow you to strike from the shadows, then melt back into them.*

You may use STEALTH on turns you use offensive actions, but using an offensive action still ends your STEALTH. Major and minor actions taken while not in STEALTH or which end your STEALTH do not inflict a STEALTH penalty.

Flash of Shadow: *After striking someone up close, you quickly and silently retreat.*

After attacking an opponent in melee range, you may TELEPORT 6 hexes.

Embrace of Darkness: *Your ninja skills allow you to dodge attacks.*

You start each encounter with 4 ninjitsu. You may spend ninjitsu to DODGE an attack against you. If the attack is [O]verwhelming, it requires 2 ninjitsu.

Ninja Dodge[C]: As a COUNTER, you get a 35% DODGE CHANCE against that attack. If the attack is [O]verwhelming, you instead get a 20% DODGE CHANCE. If its an area of effect, you instead become ON GUARD.

REFRESH: You may use a REFRESH to gain a ninjitsu. **DEplete:** Lose a ninjitsu. You are FULLY DEPLETED if you have no ninjitsu.

Second Facet

Swift Stealth: *You can move quickly in stealth without revealing yourself.*

Instead of the normal penalties for moving, you increase the range of your STEALTH by 1 for every 2 hexes you move.

Smoke Bomb: *If no cover is readily available, you can create your own.*

Once per round, you may use a STEP to make your hex(es) and each adjacent hex cloudy (pg. 38) for 1 round. You may initiate STEALTH when you do so, but you must end your turn outside of these hexes for it to work.

Scanner Jammer: *You can even evade enhanced senses.*

The range of SCANNER is halved for the purposes of detecting you, to a maximum of 12 hexes.

Third Facet★

Choose one of the following abilities

➤ **Blinding Dart:** *You use a dart to blind your opponent and slip away.*

Once per encounter, you may gain a RIDER that inflicts BLIND 6 for the encounter on a hit.

➤ **Shadow Kidnapping:** *You steal away your target to dispatch them elsewhere.*

Once per encounter, after you damage an adjacent enemy, GRAPPLE that enemy. Enemies you are grappling do not count for determining if you can use STEALTH. If you use STEALTH while grappling an enemy, that enemy also has STEALTH for as long as you are grappling them, and attacking that enemy does not penalize or end your STEALTH. You may move this GRAPPLED enemy with you when you activate Flash of Shadow.

Fourth Facet★

Caltrops: *You can scatter caltrops to hinder others when you create a smokecloud.*

When you use the Smoke Bomb ability, you may also have the affected hexes become afflicted. For each creature other than you, the first time each round that that creature enters a hex afflicted this way, that creature is SLOWED 1 for the encounter.

Assassin: *Even when combat starts unexpectedly, you can find cover.*

You may TELEPORT 4 hexes and use STEALTH at the beginning of combat if you are not the initial target of the encounter.

Fifth Facet

Hide in Plain Sight: *You can hide without even being hidden.*

You may use STEALTH without cover, and it does not end if enemies can see you. Your target priority is lowered for 1 round when you use Smoke Bomb, and enemies take a PENALTY when attacking you in violation of target priority.

Sixth Facet

Shadowport: *You can slip between the shadows.*
Once per encounter, while in STEALTH , you may treat your movement as WARP if both your current location and the destination would be someplace you could activate STEALTH without Hide in Plain Sight.

Seventh Facet★

Ultimate Ninja: *You can attack without revealing yourself.*
Once per encounter, for one round, you may make offensive actions without ending STEALTH and do not take STEALTH penalties for using major or minor actions.

yes

Steel Mountain

Innate Defense

A steel mountain isn't just wearing armor. Armor of a level appropriate to one's skillset is expected and normal. A steel mountain has excessive amounts of armor.

Gregory stood tall above the other knights. His armor shining in the sunlight. They started their charge in unison, and Gregory crashed forward, an imposing wall of steel. They met the enemy line, and the sheer momentum of Gregory's charge sent his opponent flying backwards. Blades bounced off his immense armor.

Adaptation

A steel mountain can be any character in extremely heavy armor, from a knight to a space marine

First Facet★

Skin of Steel: *Your armor protects you from harm.*
You have $8 \times C$ RESISTANCE.

Ironhide[C]: As a COUNTER, reduce the damage taken by C . If the attack dealt no damage before this reduction, become ON GUARD.

REFRESH: You may use a REFRESH to gain $2 \times C$ RESISTANCE. **DEplete:** Lose $2 \times C$ RESISTANCE. You are FULLY DEPLETED if you have less than $2 \times C$ RESISTANCE.

Stand Firm: *You plant yourself in place, not to be moved.*

At the end of a turn, you may declare yourself as standing firm. You cannot move or be moved from your hex by any means until the end of your next turn, and cannot be a SITTING DUCK.

Second Facet★

Base Archetype: Choose one of the following abilities

- **Juggernaut:** *You use the sheer mass of your armor to knock around enemies.*
When you charge, the target of the attack is knocked back 3 hexes.
- **Defender:** *You become the center of attention.*
Your target priority is raised, and enemies cannot violate target priority. This can be suppressed on any round.
- **Runed:** *Your armor is inscribed with protective runes.*
Pick an ENERGY EFFECT. You are immune to that effect.
- **Spiked:** *Your armor is covered in dangerous spikes.*
Opponents who attack you with melee attacks begin BLEEDING C

Third Facet★

Secondary Archetype: *You have a more nuanced understanding of your armor.*
Pick another option from base archetype

Fourth Facet★

Protective Shell: *Your armor lets you shake off strong blows.*

You are immune to STUNNED. **Enhanced Mobility:** *You can adjust your location without compromising your resistance.*

You may move 1 hex while using stand firm.

Fifth Facet★

Greater Archetype: *You have enhanced your armor.*

Gain an ability based on your base archetype.

- **Juggernaut:** You may smash through anything that requires less than $8 \times C$ damage without taking damage. You do not provoke while charging.
- **Defender:** You may choose to block LINE OF EFFECT through your hex for any effect.
- **Runed:** You gain 2pt magic armor as a BOUND bonus item, or make an existing set of magic armor BOUND to you and upgrade it 2pts, as per the Attuned Item feature.
- **Spiked**[FEAR]: Opponents within 3 hexes of you are SLOWED 1.

Sixth Facet★

Enhanced Archetype: *You have the perfect set of armor.*

You gain a Greater Archetype ability based on your Secondary Archetype.

Seventh Facet★

Master of Steel: *You can resist movement while moving.*

You can move freely while using stand firm. Once per round, when afflicted by a lesser effect, you may ignore that effect.

Undying

Innate Defense

Useful for pretty much anything that won't stay dead.

Susan struggled as the mob carried him to the stake. "Burn the witch!" they cried, and lashed her in place. A torch hit the kindling beneath her, and before long she was engulfed in flame, screaming in agony. The villagers cheered as she burned to death. Satisfied that the deed was done, they returned home. Susan crawled out of the ashes and dusted herself off. They were going to pay for that.

Adaptation

Alternatively, you could just be pretending to die.

First Facet★

Rejuvenation Pool: *You possess hidden reserves.*

You have a rejuvenation pool with $8 \times C$ hit points in it.

Extra Life: *Death has no hold on you.*

When it becomes time for you to act and you are WOUNDED, if your rejuvenation pool is not empty, you may gain one hit point for every hit point in your rejuvenation pool and empty the pool. This can trigger even though you are incapable of acting due to being WOUNDED and can heal you despite being WOUNDED. Any points in your rejuvenation pool that would bring you above max health remain in the pool.

REFRESH: You may use a REFRESH to add another $2 \times C$ hit points to the rejuvenation pool. **DEplete:** Lose $2 \times C$ hit points from your rejuvenation pool. You are FULLY DEPLETED if you have less than $2 \times C$ hit points in your rejuvenation pool.

Vengeful Resurgence[C]: As a COUNTER, add C hit points to your Rejuvenation Pool.

Second Facet★

Renew Body: *Your rebirth is cleansing.*

When you use Extra Life, you may remove all lesser restorable conditions affecting you.

Third Facet★

Surprise!: *Nobody expects a body to attack them.*

When you use Extra Life, you also gain STEALTH 1.

Fourth Facet

Spawn Point: *You can return to a new location upon rebirth.*

At the beginning of each encounter, choose a creature or hex within 12 hexes. When you use Extra Life, you may choose to WARP to your chosen hex or adjacent to your chosen creature.

Fifth Facet★

1-up: *You can undergo rebirth more frequently.*

At the beginning of the encounter, you may reduce your hit points by $8 \times C$. If you do, the first time you use Extra Life, your rejuvenation pool refills with $8 \times C$ hit points.

Sixth Facet★

As the Phoenix: *You revive in a flash of fire and light.*

When you use Extra Life, you can have all enemies within 12 hexes make a defense roll or be BLIND 6 for 1 round. You may also FORCE any adjacent creatures back one hex.

Seventh Facet★

Vengeance: *You can avenge yourself.*

When you use Extra Life, for the rest of the encounter, you ignore concealment, cover and target priority against the creature that caused you to be WOUNDED, and always have an EDGE against them. Additionally, you may reduce the amount healed by Extra Life by $2 \times C$ to cause that creature to become VULNERABLE to you by an equal amount.

Cheetah

Innate Mixed

You are a master of mobility. You run faster, jump higher, and your speed makes you hard to hit.

Leo dashed forwards, leaving his teammates behind. The Mongols tried to attack him as he approached, but he was too fast and their arrows landed behind him. He leapt over their heads, easily clearing them, and hit the ground on the far side of their group. He paused only to give them a taunting face, then was off like a rocket.

Adaptation

This TRACK can be used for anything which is fast and mobile.

First Facet

Fleet of Foot: *You are extremely fast.*

You have +6 speed

Too Fast to Hit [C]: As a COUNTER, gain a 35% DODGE CHANCE. If it's [O]verwhelming, instead gain 20%. If it's an aoe, you are instead ON GUARD against it.

Momentum: *You use your speed to defend yourself.* You begin each encounter with 8 momentum points. You may use a momentum point to be ON GUARD against an attack.

REFRESH: You may use a REFRESH to gain 2 momentum points. **DEplete:** Lose 2 momentum points. You are FULLY DEPLETED if you have less than 2 momentum points.

Momentous Charge: *You can use your speed to target enemies.*

If you move at least 3 hexes towards your target, you may spend momentum points to get BOOSTS on your action. Additionally, you can make the attack as a MOMENTUM ATTACK.

Second Facet★

Leap of the Heavens[H]: *You can use your speed to leap higher.*

Once per round, you may jump up to 2 hex high per odd facet in this track. You may end your movement in the air if you are adjacent to a wall or ceiling

Third Facet★

Perfect Balance: *You have perfect control over your balance.*

You may ignore the penalties for moving through difficult terrain, and can stand on anything solid regardless of its thickness or ability to support your weight. You may MOUNT any willing creature by standing on their head

Up the Wall: *Your speed can carry you up walls without falling.*

While you are adjacent to a wall, you can move up or down in altitude by 1 for each movement, and do not fall.

Fourth Facet★

No Bonds May Hold: *Nothing is gonna slow you down.*

You are immune to SLOW.

Chain Jumping: *You can jump off multiple things to reach higher heights.*

When you use leap of the heavens, if there is ground a hex beneath you, or an enemy a hex beneath you, at any point during your movement, you may use leap of the heavens again

Fifth Facet

Across the Water: *You run faster than you sink.*

You may walk on water or other fluids without sinking.

Double Jump: *You can jump off of midair.*

Once per round, you can use chain jumping with nothing to leap off of

Sixth Facet★

Sly: *You move faster than people can react.*

All of your movement is DASH.

Seventh Facet

Instant Blink: *Suddenly, you are elsewhere.*

Once per round, you may WARP up to 4 hexes away by spending 6 STEPS.

Companion

Innate Mixed

You have a loyal companion, be it a pet, a construct, or a fellow warrior.

Tonia's wolf leapt into the fray, biting and tearing at the dire wolves. Tonia moved to the opposite side of one of the wolves, and started stabbing it. One of the dire wolves turned around and but at her ankle. She fell to the ground, and her wolf growled in fury and tackled the offending wolf.

Adaptation

This TRACK can be used to represent any non-legendary creature that you would work closely with. Animal companions, familiars, and MOUNTS are common uses.

First Facet

You and Me: *There is another creature that fights alongside you.*

You gain a companion. It has $16 \times C$ hit points and can move up to 6 hexes each round, and can take a major action each round. It has two mook major action abilities(pg. 146) with your tier. If it has a [W]eapon ability, you may either choose for it to have 3 wielded weapons it can switch between, or 2 natural weapons, one of which is ranged unless its other ability is ranged. It has the Fighting Spirit counter.

Fighting Spirit[C]: As a COUNTER, your companion may take C less damage and lose C less morale, or gain C morale if no damage is taken before this counter.

Morale: *Your companion is not as heroic as you are, and hence takes a more cautious approach to self preservation.*

It begins each encounter with $8 \times C$ morale. Whenever it would fall below 0 morale, it begins cowering. While it is cowering, it cannot take actions, but can still move. If it would gain morale to bring it above 0, it stops cowering. While cowering, a companion has lowered target priority that cannot be violated.

When the companion is damaged, it loses morale equal to the amount of damage dealt. When it is healed or gains TEMPORARY HIT POINTS, it gains an equal amount of morale. When it would become ENERGIZED, it may instead gain an equal amount of morale. When it would gain a BOOST, it may instead gain C morale. At the end of each of your turns, if your companion takes an action and at least one enemy remains, the companion loses $2 \times C$ morale.

Protective Instincts[C]: As a COUNTER, your companion gains C morale.

Features: *You can spend your time training your companion.*

When you would gain a feature, you may have your companion gain a feature instead. Additionally, when you would gain a perk, you may have your companion gain that perk instead.

Spellbound: *You have an arcane connection with your companion.*

You may attach RIDERS to your companion's actions. If you have a BOOST, you may give it to your companion.

REFRESH: You may use a REFRESH to heal your companion $2 \times C$, and they consequently gain that much morale. If this would heal them over full, they

become ENERGIZED for the extra amount. **DEplete:** Your companion loses $2 \times C$ morale. You are FULLY DEPLETED if your companion has less than $2 \times C$ morale or is WOUNDED.

Surge: Your companion can use one of its major abilities As a SURGE.

Mourner's Lament: If your companion would gain morale but is downed, you instead gain that much BLOODLUST.

Second Facet

Suffer For Us Both: *Your companion and you can protect each other.*

If both you and your companion would be subject to an ability, you may choose to negate the effect to either yourself or your companion, but not both.

Evolution: *Your companion has more abilities.* Your companion gains one tactical ability from the monster tactical ability list(pg. 160) or two features(pg. 63).

Cheer On: *You can tend to your companion's morale.*

When you would use a SURGE that isn't a REACTION, you may instead give your companion $2 \times C$ morale.

Third Facet★

Expanded Skillsets: *Your companion gains new talents.*

Gain one of the following abilities:

- **Destructive Aura:** At the beginning of your turn, every enemy adjacent to your companion gains BLEEDING C .
- **Skitter:** Once per round, after being attacked, your companion may DASH 3 hexes.
- **Restorative:** Once per round, you may remove a lesser restorable condition from your companion.
- **Web:** Once per round, you may create a 1 hex burst within 6 hexes of your companion that afflicts the hexes for 2 rounds. Creatures entering hexes afflicted this way are SLOW 2 for one round.
- **Venomous:** Each round, the companion gains a RIDER that inflicts DIZZY 1 for 3 rounds on a hit.

- **Energy Attacks:** Select an ENERGY EFFECT . Each round, your companion gains a RIDER that inflicts the chosen effect.
- **Enhanced Weapon:** Your companion may gain a bonus 2 point artifact weapon.

Fourth Facet

Evolution: *Your companion develops even more abilities.*

Your companion gains one tactical ability from the monster tactical ability list or two features.

Laugh in the Face of Danger: *By putting on an unflinching brave front, you can inspire your companion.*

When an enemy attacks you, you may have that enemy gain a BOOST. If you do, your companion gains C morale.

Fifth Facet★

Extreme Talents: *Your companion grows ever deadlier.*

You gain 1 of the following abilities

- **Retributive:** Choose an ENERGY EFFECT . When your companion is targeted by a melee attack, the attacker gains the chosen ENERGY EFFECT .
- **Fear Aura**[FEAR]: Your companion's target priority is reduced by 1. Your enemies cannot attack your companion in violation of target priority.
- **Eldritch Body**[MENTAL]: The first time each encounter an opponent has LINE OF SIGHT to your companion, they become DIZZY 2 for one round.

- **Invisible:** Once per encounter, your companion may become INVISIBLE 3. This effect does not end when your companion attacks a creature if it is within 3 hexes of it.

- **Glorious Form:** You may chose to cause all hexes within 6 hexes of your companion become lit. Allies within this area may make a defense roll when subjected to a [FEAR] effect to negate it.

Sixth Facet

Evolution: *Your companion unlocks its full potential.*

Your companion gains one tactical ability from the monster tactical ability list or two features.

Winning Move: *The edge you gain from a reaction inspires your companion.*

When you or your companion uses a REACTION, your companion gains C morale.

Seventh Facet★

Sacrifice: *You can sacrifice your companion to keep yourself alive.*

Once per encounter, when you would become WOUNDED, you may have your companion become WOUNDED. If you do, you heal hit points equal to your companion's current morale. If then would raise your hit points to more than 0, you do not become WOUNDED. If your companion stops being WOUNDED, it loses all morale.

Swift Striker: *You companion can attack faster.*
If your companion does not have a PENALTY, you may have your companion take two major actions in a turn instead of one. If you do, each of those actions takes a PENALTY.

Reactor

Innate Mixed

You have a self-contained power source which has harmful effects when disrupted.

Atomic Steve stomped across the deck, the boots of his power armor clanging noisily. He directed more power to his plasma rifle, and blew a Scryllaxian's head off. Its partner let out a warbling noise, and swung a vibrowrench at Steve. The blow cracked open his Reactor momentarily, and deadly radiation streamed out and melted the Scryllaxian's face.

Adaptation

Although the default flavor is a nuclear reactor, unstable magic and vengeful spirits are also options for this aspect.

First Facet★

Armored Reactor: *Your power source is covered in armor.*

You have $4 \times C$ RESISTANCE and begin each encounter with 4 fuel points. On your turn, if you have not used fuel since the end of your last turn, you may use 1 fuel and gain a BOOST.

REFRESH: Gain 1 fuel and C RESISTANCE. You may use an additional fuel this round. **DEplete:** Lose 2 fuel, $2 \times C$ RESISTANCE, or 1 fuel and C RESISTANCE. You are FULLY DEPLETED if you have no fuel and less than C resistance unless you have at least 2 fuel or at least $2 \times C$ resistance.

Extra Armor[C]: As a COUNTER, reduce the damage taken by C . If the attack dealt no damage before this reduction, gain a fuel point.

Reactor Breach: *Attacking a nuclear reactor is not wise.*

Whenever you take more than $2 \times C$ damage from a single source, you immediately use 1 fuel and make an opponent within 12 hexes to make a defense roll with a -1 modifier or take 5|6|8|9 damage. You may not use more than 1 point of fuel in any given round. This does not trigger [C]ounters.

Critical Breach: *Becoming wounded can compromise the integrity of your reactor.*

When you would become WOUNDED, choose one of the following effects:

- **Meltdown:** You may use Reactor Breach a number of times equal to the amount of remaining fuel. This bypasses the normal fuel use restriction.
- **Critical Mass:** You may spend all your remaining fuel to FORCE all creatures within 4 hexes of you to make a defense roll or take C damage for each point of fuel spent. This counts as a use of Reactor Breach and bypasses the normal fuel use restriction.

Second Facet★

Power Station: *You can provide power to enhance others.*

When you use fuel as part of Armored Reactor, you may instead grant an ally within 3 hexes a BOOST.

Third Facet★

Afterburners: *Your reactor powers your mobility.* You have 1 extra speed for each point of fuel you begin your turn with.

Fourth Facet★

Reactor Leak: *It's not healthy to be near your reactor.*

When you use Reactor Breach, all opponents within 3 hexes become SLOW 2 for 1 round.

Maintenance Mode: *You can use your power to repair your armor.*

When you use fuel with armored Reactor, instead of granting a BOOST, you may instead increase your RESISTANCE by C .

Fifth Facet★

Power Reflexes: *Your power source enhances all of your abilities.*

You are always able to take immediate actions and REACTIONS while you have fuel.

Sixth Facet★

Charged Attacks: *Burning fuel can empower your attacks.*

At the beginning of your turn, you may gain a RIDER than inflicts BLEEDING C on a hit for every point of fuel spent in the last round.

Radiation Poisoning[SICKENING]: *You run a bit hotter than you used to.*

Enemies targeted by Reactor Breach become DIZZY 1 for 2 rounds.

Seventh Facet★

Fallout[SICKENING]: *The EPA will have a fit.*

When you use Reactor Breach, you may cause the hex you occupy and any adjacent hexes to become afflicted for the rest of the encounter. Creatures other than you that end their turn in a hex afflicted in this manner become SLOW 1 for the rest of the encounter.

Regal

Innate Mixed

You are born to rule, and even if you don't have your throne yet, it is your birthright. Even your foes instinctively bend to your authority.

Queen Malthina remained on her throne, giving the would-be assassin a cool look. In a clear voice, she commanded them, "Announce yourself." Such was the assurance that they would comply that the assassin did, stepping forward. "Assassin Cilvach, of the Sand Viper tribe." The Queen nodded to one of her Guardsmen, keeping her attention upon the assassin. "Off with his head."

Adaptation

This could also represent mind control, or being That Famous.

First Facet★

I Command Thee: *People bend to your will.*

You start each battle with 8 Regality. You may spend this Regality to issue Commands to others. Pick one Command from the Command list you know. You may only issue one Command to any given target each round.

REFRESH: Gain 2 Regality **DEplete:** Lose 2 Regality. You are FULLY DEPLETED if you have less than 2 Regality

Heir: If you have Regality remaining when you are WOUNDED, you may designate one ally as your heir. They gain your remaining Regality and may issue any Command you know. They in turn can designate their own heir, and so on, until the Regality is used up

Royal Under Fire[C]: As a COUNTER, gain a Regality.

Second Facet★

You learn an additional Command.

Royal Bearing: *A true leader shows no weakness.*
You are immune to [Fear].

Third Facet★

You learn an additional Command.

Natural Charisma: *Your presence carries a sense of gravitas.*

You can raise or lower your target priority for a specific enemy each round. If this target priority is violated, you can have an ally take a surge against them.

Fourth Facet★

You learn an additional Command.

Inspiring Presence: *They have no fear for you are here.*

Allies within 6 hexes of you are immune to [Fear].

Royal Resolve: *You don't buckle under the stress.*
Once per encounter, you may remove all lesser removable conditions from yourself.

Fifth Facet★

You learn an additional Command.

Distracting presence[Mental]: *Your opponents are so awed by your presence that they can't take their eyes off of you.*

Allies may flank with you as if you were wielding a melee weapon with a reach of 6 hexes at all times.

Sixth Facet★

You learn an additional Command.

Royal Decree: *I said no.*

You may raise or lower anyone's target priority when you use Natural Charisma

Seventh Facet★

You learn an additional Command.

High King: *Your ability to command respect in unmatched.*

You may issue two different commands to the same target each round. Inspiring Presence extends to 12 hexes and also makes allies immune to [Mental] effects.

Commands

I Command Thee: Kneel: *Your opponent falls to their knees before you, and if nobody takes advantage of this, their conviction to fight you wavers.*

By spending 1 Regality, you command one opponent within 12 hexes to kneel before you, becoming PRONE and OFF GUARD. If this OFF GUARD is still present on their next turn, it is removed and they instead have a PENALTY.

I Command Thee: Protect: *Your royal personage must be protected*

By spending 1 Regality, you may have an ally within 6 hexes DASH 3 hexes towards you and become ON GUARD. Your target priority is lower than this ally's, and if you are attacked in violation of it, they may take a STRIKE against the attacker.

I Command Thee: Off With Their Head: *It is your royal right to declare who lives and dies.*

By spending 2 Regality, you may have an ally within 12 hexes make a SURGE. If this drops its target, that ally becomes SHIELDED 2. This counts as using a Command on both the ally and their target.

I Command Thee: Swear Fealty or Die: *Fealty, or Else.*

By spending 2 Regality, you command an enemy

REGAL

within 12 hexes to take a surge against a target of your choice. If they do so, their target priority is lowered for one round. If they do not, they become VULNERABLE $2 \times C$ and have a raised target priority. This counts as using a command on both the enemy and their target.

I Command Thee: Halt: *Your tone of command is enough to make anyone halt in their tracks.*

By spending 1 Regality, you can cause an opponent within 12 hexes to be STOPPED for 1 round and be WEAKENED 5|7|8|10. A defense roll negates this effect.

I Command Thee: Procession: *With one step, many move.*

By spending 1 Regality per ally, you may have any of your allies within 6 hexes of you move with you as you move. They are DIRECTED the same number of hexes you move in the same direction, unless there are obstacles in their way in which case they can move around it. Each ally gains a BOOST.

I Command Thee: Announce Yourself: *Make your presence known to me.*

By spending 1 Regality, you may DIRECT an opponent within 12 hexes to the nearest hex in your LINE OF SIGHT, and answer one question as if you had a relevant role (pg. 31). They become VULNERABLE C to you and your allies.

Support Battery

Innate Mixed

You stand at the center of your team as a bastion of energy for them to draw upon.

Alara stood in the center of a metaphorical web of life force. Strands ran between her and her teammates, and she controlled the flow of energy along them. She took some from where it was most plentiful, and moved it towards where it was most needed. She always found it fascinating how different people used the surplus, from using it to cling to life, to pouring it into more vigorous attacks.

Adaptation

This could represent a magical reservoir of energy that you share with your teammates, or a power battery to supercharge their technology

First Facet★

Energy Bank: *You stand ready to power your allie's abilities.*

You begin each encounter with 4 charges. At any time, no more than once per round per ally, another ally within 6 hexes may spend one of your charges to gain a REFRESH, with your permission.

REFRESH: You may use a REFRESH to gain an additional charge. **DEplete:** Lose a charge. You are FULLY DEPLETED if you have no charges.

Absorption[C]: As a COUNTER, you have a 50% chance of gaining a charge.

Trickle: *You can absorb your own energy to stay alive.*

You may spend a charge to heal yourself $2 \times C$ hit points at any time, even between being attacked and taking damage.

Second Facet★

Life Reservoir: *You stand ready to give for the greater good.*

Once per round per ally, that ally may choose to lower your hp by $2 \times C$ and heal themselves $2 \times C$ hit points, with your permission.

Third Facet★

Relay: *You can redirect your allies attacks to each other.*

If you can be targeted by an ally, you may allow that ally to target an ally within 24 hexes that you have LINE OF EFFECT to instead.

Transfer RIDER: *You can transfer riders to your allies.*

If you have a RIDER, you may give it to an ally within 24 hexes.

Fourth Facet★

Reverse Flow: *You can absorb health from your allies to better distribute it.*

Once per round, with an allies permission, you may deal $2 \times C$ damage to that ally to heal yourself $2 \times C$ hit points.

Recharge: *Reverse polarity.*

At any time, no more than once per round per ally, an ally within 6 hexes of you may become DEPLETED to give you a REFRESH.

Fifth Facet★

Soul Burn: *You give and you give.*

Once per round, you may take $2 \times C$ damage and gain an additional charge.

Sixth Facet★

Clean Burn: *The extra energy is quite invigorating.*

When an ally spends a charge from Energy Bank, they may DASH 3 hexes.

Seventh Facet★

Reshuffle: *With one massive surge of effort, you put your teams health wherever its needed.*

Once per encounter, for 1 round, you and your allies may use reverse flow and life reservoir any number of times.

Temporal Agent

Innate Mixed

You are a master of time's flow over you, able to twist it to your advantage.

Jack faced the kill squad. He thumbed his chronocharger, and felt the world seem to speed up as it stored up excess time. The firing squad raised their guns, and he eased off the Temporal charger to make it easier to time. He heard the command to fire, and activated a time jump. His world lurched, and he found himself standing behind the firing line, with them shouting in confusion about where he went. He accelerated his time as he tackled one of them and grabbed their rifle. He time jumped again, landing to the side. He saw himself appear on the other side. They raised their guns in perfect sync and started firing.

Adaptation

This can be used for a futuristic time cop, a time wizard, a hapless fool who stumbled upon a device of mysterious power, or wild-haired inventor with a new gadget.

First Facet

Bend Time: *You store up spare moments for future use.*

You may spend 1 STEP that you could spend on movement to gain 1 temporal point. At any time during your turn, you may spend any number temporal points to get an equal amount of STEPS. Temporal points expire at the end of the encounter

Chrono Charge: *You accelerate yourself to fight better.*

You begin each encounter with 8 chrono charges. You cannot spend more than 2 chrono charges each round. You may spend 1 chrono charge to get a BOOST.

REFRESH: You may use a REFRESH to gain 2 chrono charges. **DEplete:** Lose 2 chrono charges. You are FULLY DEPLETED if you have less than 2 chrono charges.

Temporal Escape Hatch: *You escape through a loophole in time.*

If you would be WOUNDED, you may spend your remaining chrono charges to gain C HIT POINTS for each one. If you are no longer WOUNDED, you may TELEPORT 6 hexes.

Time Slip[C]: As a COUNTER, you may gain a 35% DODGE CHANCE against the attack. If its [O]verwhelming, instead gain a 20% DODGE CHANCE. If it is an area of effect, you instead gain a chrono charge. If this DODGE CHANCE succeeds, you may spend a temporal point to TELEPORT one hex.

Second Facet★

Time Skip: *You bend time and jump to the future.*
At the end of your turn, if you do not possess paradox, you may time skip. Mark your location on the map; you disappear from the map, and cannot be targeted by any effect. At the start of your next turn, you re-appear where you disappeared from. You gain paradox when you use this ability.

Paradox Correction: *The timestream can withstand a little abuse.*

Paradox disappears at the end of your next turn

Third Facet★

Temporal Transfer: *You can give your stored time to others.*

You may spend your temporal points to grant an ally STEPS instead of yourself during that allies turn.

Accelerate: *You find a larger moment in which you can act.*

You may spend 2 chrono charges to take a SURGE.

Fourth Facet

Time Jump: *Time and space are linked, travelling in one can allow travelling in the other.*

When you use time skip, you may spend any number of temporal points to TELEPORT that number of hexes before re-appearing.

Fifth Facet★

Extra Moments: *You can find even larger slices of extra time.*

Once per round, you may spend 2 chrono charges to take a minor action.

Sixth Facet

Time Loop: *You can travel backwards in time to aid yourself in battle.*

At the start of your turn, if you do not possess paradox, you may disappear for a round. Mark your location on the map. At the start of your next turn, re-appear where you disappeared from, twice. You may spend any number of temporal points to TELEPORT that number of hexes before re-appearing. One of you must do so, such that you do not appear in the same hex twice. Declare one as the past and one the future. Anything that affects the past you will also affect the future you, with 1 round of duration ticked. Any damage taken by the past you is also taken by the future you. After 1 round, the past you disappears. You gain paradox when using this ability.

Seventh Facet

Time Freeze: *You freeze time around you.*

Once per encounter, you may perform a time freeze.

Time freezes for 1d4 rounds. You may spend STEPS while time is frozen, and durations on you tick down, but you cannot take actions.

Temporal Mastery: *Your mastery over time lets you act faster.*

You may spend 4 chrono charges in a round if you did not spend any in the previous round. You may spend 4 chrono charges to take a major action

Wrangler

Innate Mixed

A Wrangler is the cowboy of the wilds, adept at controlling frenzied monsters as a normal cowboy managed a herd of cattle.

The eldar dragon rose up from its tomb, towering over the adventurers. Chuck tossed a lasso around its neck as it took to the air, and was yanked off the ground. Dangling beneath it, he began climbing up the rope, until he reached its back and took a seat. Enraged, the dragon started thrashing about and flipping upside down, but Chuck held on and rode out the tantrum. He tossed another rope around its head, and used it to start pulling its head to the side, causing it to veer over. He was in charge now.

Adaptation

This could also represent someone using an energy tether, or who binds the fate of creatures.

First Facet

Lasso: *You are extremely skilled with your rope.*

Once per round, you may make an attack roll against an opponent within 12 hexes. If it hits, that opponent is TETHERED 12 to you.

Cut the Line: *When necessary, you can cut the rope.* You may end the TETHERED condition between you and an opponent on your turn.

Grit: *You are filled with manly grit and determination.*

You start each encounter with 8 grit. When you would be dealt damage, you may spend grit to block C damage per grit.

REFRESH: You gain 2 grit. **DEplete:** Lose 2 grit. You are FULLY DEPLETED if you have less than 2 grit.

Trip Up: *A quick yank on the rope can be enough to throw off your attacker.*

When a creature you are TETHERED to attacks you, you may spend a grit to give that attack a penalty.

Rope Mastery: *You tug on the rope to create an opening.*

When you attack a creature you are TETHERED to, you may spend a grit to give that attack a boost

Determination[C]: As a counter, you may gain another grit.

Second Facet★

Tighten It Up: *You reel in your rope to close the distance.*

At any point, you may set the TETHERED distance of a creature that you're roping to its current distance to you. You may move closer to the target by 1 hex per STEP even if you do not normally have an ability to move in that direction (such as climbing up into the air when you don't have flight) or there is a push effect slowing you.

Hunter's Eye: *You can quickly assess the abilities of monsters.*

At the beginning of combat, you may ask 1 question about each type of monster present.

Third Facet★

Ride'em Cowboy: *They don't want you to ride them. You don't care.*

You may MOUNT any creature larger than yourself that you have TETHERED. On their turn, you may

make an attack roll against them. If successful, you can direct their movement for that round.

Directed Mount: *You are in charge.*

Once per round, when you successfully direct the movement of a monster with Ride'em Cowboy, you may spend 4 grit to have the creature attack a target of your choice with a major action. If this triggers a COUNTER that would target the monster, that COUNTER targets you.

Fourth Facet★

Quick Release: *You can release your knots in an instant.*

You may end the TETHERED condition between you and an opponent at any time

Cat Herder: *You can work on steering herds of monsters.*

Once per encounter, on a round you don't use Lasso, you may create a 6x6 area of hexes within 12 hexes with directional push away from you for 1 round.

Fifth Facet★

Show 'Em Who's Boss: *Your skill on your side of the rope is amazing.*

You count as 1 size larger for the purposes of being TETHERED.

Dimensional Rope: *Nobody is sneaking away from your rope.*

A creature TETHERED by you cannot TELEPORT or WARP.

Sixth Facet★

Reel Them In: *You pull the monsters closer to you.*

When you are TETHERED to a creature of your effective size or smaller, you may spend 1 STEP to move them a hex closer to you.

Seventh Facet★

Tie Them Off: *You can tie multiple monsters together to hinder them both.*

You may attach a TETHERED creature to another creature you have TETHERED. If one is TETHERED X, and the other is TETHERED Y, then you cease to be TETHERED to either, and instead they are TETHERED To each other $x + y$

Artificer

Innate Varies

Artificers are masters of enchantment, making and remaking artifacts.

Special: This track cannot be replaced with other tracks, such as with trackformer

Paulina slaved over her workbench. She tightened bolts, wired up electronics, added runes, and finally stood back, finished. "Joe, come over here, I have something for you!" Joe came over, and she had him put on the new device. "Just put your arm through here, grip this over here, and use your thumb to control it." He did so, and the jetpack roared to life, lifting him into the air. She smiled in satisfaction, and turned to her drawing board, thinking up the next device to create.

Adaptation

Can also represent an engineer or mad scientist. It could also represent someone with an unusual set of innate powers, with their artifacts instead being used as innate abilities. Different themes to the items you create can yield other types of characters.

First Facet★

Item Creation: *You invent new items.*

Between encounters, you may create artifacts (pg. 114). You have a pool of creation points, which you can invest in new artifacts of your choice. You can make general items of up to 2 pts each, and start with a pool of 2pts. You cannot make trackformer items that grant a track you do not have access to. It should be considered to take a non-trivial amount of time to recraft items, but when you get new points from leveling you can assume that they have been working on the item beforehand and it is just finished as they level.

Inscriptions: *You won't see your average artifacts do this.*

You can also create special enchantments that take power, known as potentia. You can create inscriptions that have a total capacity of 8 potentia, which can either be added to other items you create or fashion into their own items with no other effects. It takes a minimum amount of potentia to create an inscription, but you can create inscriptions with higher capacities. These items use up potentia when used. Recharging these items gives then another unit of potentia. Between encounters you can recharge all your items to have as many units of potentia as their capacity. You do not need to be the one using these items to recharge them.

You have access to the following inscriptions

➤ **Bolstering** - 1 capacity

Each potentia can be used at any time to increase the user's current and maximum hit points by C

➤ **Empowering** - 2 capacity

Two potentia can be activated to give the user PERSISTENT ENERGIZED C for 2 rounds

REFRESH: You may use a REFRESH to recharge an item twice. **DEplete:** remove 2 potentia from your items.. You are FULLY DEPLETED if none of your items have potentia.

Kinetic Recharge[C]: As a COUNTER, you can recharge an item. If no inscription items are available, you may cause a potentia explosion dealing C damage, ignoring COUNTERS, to the nearest enemy.

Potentia Transfer: If someone with an inscription artifact is dropped, their unused potentia can be transfered to another person's inscriptions. If there are no others with spare capacity, their potentia explodes, dealing C damage per potentia, ignoring COUNTERS, to the nearest enemy

Second Facet★

Enhanced Crafting: Your creation point pool now has a total of 4pts

Weapon Crafting: *You have learned to make magic weapons.*

You can create enchanted weapons

Remove Inscriptions: *You reclaim the resources you spent.*

You may remove inscriptions from items, allowing you to enchant new items with inscriptions

Warmup: *Just give it a minute.*

Some inscriptions must warm up. They cannot be used on the first round of combat.

More Inscriptions:

➤ **Wand blast** - 2 capacity

This inscription must warm up. Once per round it's wielder may spend 2 potentia to deal 11|15|19|23 damage to a target within 12 hexes. A defense roll halves the damage.

Third Facet

Enhanced Crafting: Your creation point pool now has a total of 6pts

Unmake: *Its called recycling.*

You can destroy any artifact, your own or found, and add its point total to your crafting pool. If you unmake a BOUND item, or one that is otherwise attached to a creature, you must use those points on making an item that will also be BOUND to that creature in the same way.

Uncommon crafting: *You can work on more complex creations.*

You may make uncommon items

More inscriptions:

➤ **Guiding** - 2 capacity

Two potentia can be activated to give the user
PERSISTENT BOOST for 2 rounds

You may activate a potentia to become ON
GUARD .

Fourth Facet

Enhanced Crafting: Your creation point pool has
a total of 8 pts

Armor Crafting: *You trust your work enough to let
people wear it now.*

You may make magical armor.

More Inscriptions :

➤ **Free Activation** - 2/4 capacity

This inscription must warm up. It must be at-
tached to an item which can use an action to
activate. If it is a minor action, 2 potentia can
be used to activate the item without spending
an action. If it is a major action, 4 potentia can
be used to activate the item without spending
an action. Activating an item in this way does
not count against it's use limit

Fifth Facet

Enhanced Crafting: Your creation point pool has
a total of 10 pts

Rare Crafting: *You can handle very complex items.*
You may make rare items

More Inscriptions:

➤ **Defending** - 1 capacity

Sixth Facet

Enhanced Crafting: Your creation point pool has
a total of 12 pts

Overcharge: *Trust me, it won't explode. Probably.*
You may recharge inscriptions to up to twice their
max capacity with in combat charging

More Inscriptions:

➤ **Reactive** - 2 capacity

This inscription must warm up. It can be acti-
vated once per round with 2 potentia to grant
the user a SURGE.

Seventh Facet

Enhanced Crafting: Your creation point pool now
has a total of 14 pts

Legendary Crafting: *Your skill at artifact creation
will be talked about for ages.*

You may make legendary items

More Inscriptions

➤ **Celerity** - 2 capacity

This enchantment must warm up. It can be ac-
tivated once per round for 2 potentia to grant
the user an extra minor action

Battle Bonds

Innate Varied

You and your partner can face any foe, as long as you're together.

Kyle and Kaylie ran alongside each other, breaking away to flank the mechabear. Kyle grabbed it and twisted, and Kaylie took the opening to shove a thermal charge into a joint. They took off running again, movements perfectly in sync, and pulled out their plasma pistols. They focused fire on the mechabear's head, shots hitting it together and melting through its armor. It went down, and Kyle and Kaylie high fives.

Adaptation

This TRACK can be used to represent the power of true love, an oath to protect your partner, or linked twins.

Some of the abilities are shared by both, such as Share HP and it's effects, and others are usable only by the character with this TRACK, not the partner - the one with this TRACK has a higher investment in the partnership and has more abilities relating to that.

First Facet★

Thick and Thin: *You and your partner are inseparable.*

When you gain this facet, choose an ally. That ally becomes your partner. You are not their partner unless they also possess this facet and designate you as their partner.

Right Behind You! *Your fighting style works in sync to direct the enemy's attacks.*

Twice per encounter, you can raise or lower the target priority of your partner by 1 until the start of your next turn. If an enemy violates this target priority, they gain VULNERABLE C to the next attack made by you or your partner.

Got Your Back[C]: As a COUNTER, your partner gains a BOOST. If your partner already has a BOOST, they may spend that BOOST to instead take a SURGE. If your partner is dropped, you gain a BOOST instead.

Partnered Benefits: Choose one of the following. You gain that ability. This choice is permanent.

- **Shared Skills:** You begin each encounter with four partner tokens. Once per round, you may spend a partner token to use a SURGE, or to allow your partner to use a SURGE. When using this ability, you may use your ally's SURGE ability, and they may use yours. This can be done during either your turn or your partner's turn. Additionally, you may choose a vengeance ability.

REFRESH: You may use a REFRESH to gain an additional partner token. You may use this ability an additional time during your next turn. **DEplete:** Lose a partner token. You are FULLY DEPLETED if you have no partner tokens.

- **Duo:** You begin each encounter with four partner tokens. Once per round, you may spend a partner token to give you and your ally a BOOST. Additionally, you may choose a vengeance ability.

REFRESH: You may use a REFRESH to gain an additional partner token. You may use this ability an additional time during your next

turn. **DEplete:** Lose a partner token. You are FULLY DEPLETED if you have no partner tokens.

- **Warmth:** For times per encounter, you may heal your partner by $2 \times C$, or your ally may heal you by $2 \times C$. Excess healing becomes Temporary Hit Points. You do not gain a vengeance ability.

REFRESH: You may use a REFRESH to gain an extra use of Warmth. **DEplete:** Lose a use of warmth. You are FULLY DEPLETED if you have no use of Warmth.

- **Shared Stoneskin:** At the beginning of each encounter, you and your partner each gain $4 \times C$ RESISTANCE.

REFRESH: You may use a REFRESH to gain $2 \times C$ RESISTANCE, or you may have your ally gain $2 \times C$ resistance. **DEplete:** You or your partner loses $2 \times C$ RESISTANCE. You are FULLY DEPLETED if neither of you has at least $2 \times C$ RESISTANCE.

Vengeance: *You won't like me if you hurt my friend.* If you have the Shared Skills ability or the Duo ability, choose one of the following. You gain that ability. This choice is permanent.

- **Retribution:** While your partner is WOUNDED, you may spend a partner token to use a SURGE. You may use your partner's SURGE ability instead of your own. While you are WOUNDED, your partner may spend one of your partner tokens to use a SURGE. They may use one of your SURGE abilities instead of their own.

- **Fury:** While your partner is WOUNDED, you may spend a partner token to become ENERGIZED $2 \times C$. While you are WOUNDED your partner may spend a partner token to become ENERGIZED $2 \times C$.

Second Facet★

Share HP: *You can rely on your partner to keep you alive.*

Once per turn, you may take an amount of damage not exceeding a quarter of your current HIT POINTS. Your partner heals an amount equal to the damage you took this way. Once per turn, your partner may take an amount of damage not exceeding a quarter of their current HIT POINTS. You heal an amount equal to the damage they took this way.

Lockstep: *Your movements are completely in sync.* You and your partner may decide to move in lockstep when they move a hex. If either of you do this, the other may move one hex in the same direction, but you must pay the cumulative STEP cost for both hexes of movement. Additionally, choose either DIZZY, STOPPED, SLOW or PRONE. This choice is permanent. While you are within radius 3 of your partner, you and your partner are both immune to the chosen condition, as well as FORCED movement.

Third Facet★

Furious Vengeance: *If your partner falls, someone will pay.*

You only gain this ability if you possess either Retribution or Fury. Once per round, while your partner is WOUNDED, when you would make an attack, that attack gains a RIDER. Once per round, while you are WOUNDED, when your partner would make an attack, that attack gains a RIDER. In both circumstances, the RIDER automatically hits and either inflicts PRONE or FORCES the enemy one hex.

Two Hearts: Choose one of the following:

- **Pull It Together:** *You keep your partner going through all adversity.*

When you or your partner uses Share HP, choose a lesser restorable condition affecting the creature healed through Share HP. End that condition.

- **Scissor:** *You attack in concern to brutalize your opponent.*

When you deal damage to an enemy, if your partner has also dealt damage to that enemy since the beginning of your last turn, that enemy begins BLEEDING C. When your partner deals damage to an enemy, if you also dealt damage to that enemy since the beginning of your partner's last turn, that enemy begins BLEEDING C.

- **Take My Hand:** *You carry your partner wherever you go.*

If you have a movement type (swim, fly, burrow, jump, TELEPORT) you can allow your partner to also have it while adjacent to them.

Fourth Facet

Anything For You: *Self sacrifice is the sincerest form of love.*

Once per round, when your partner would take damage, you may choose to take that damage instead. This counts as a use of Share HP.

Perfect Communication: *When you have worked together this long, you know what the other is thinking.*

You and your partner can always communicate perfectly and, if willed, without being overheard, as long as you have line of sight to each other. This can be telepathy, hand signs, code phrases, or other.

Shared Senses: *You can communicate what you are seeing to each other.*

You and your partner may draw LINE OF SIGHT as though you were in either your hex or your allies hex, so long as you are able to use Perfect Communication with each other.

Fifth Facet

Choose one:

- **Shooting Star:** *You shall not be kept apart.*

Once per encounter, you may WARP to any hex within range 3 of your partner, or your partner may WARP to a hex within range 3 of you.

- **Fearless:** *How can I be scared when you are with me?*

While you and your partner are within radius 6 of each other, you and your partner are both immune to [FEAR].

Sixth Facet

Riotous Vengeance: *They shall pay.*

If you or your partner is WOUNDED and you possess a Vengeance ability, attacks made by you or your partner gain one of the following RIDERS.

- **Push:** This RIDER automatically hits. A creature hit by this RIDER is moved two hexes.

- **Trip:** This RIDER automatically hits. A creature hit by this RIDER becomes PRONE. At the beginning of their next turn, they become OFF BALANCE.

Not Alone: *Your teamwork is stronger than death.*

Once per encounter, when you are adjacent to your partner, you may use Share HP on them while they are WOUNDED. When used this way, if your partner's HIT POINTS increases to above 0, they stop being WOUNDED.

Seventh Facet★

Together Forever: *You can move with your partner.*

You may spend a STEP to give your partner a STEP. Your partner may spend a STEP to give you a STEP. You and your partner may both move during both your turn and your partner's turn.

Choose one:

- **Tag Team** *You can swap out with each other to allow the other to attack.*

Once per round, during your turn, you may WARP to your partner's hex. When you do, your partner WARPs to your hex without provoking REACTIONS. Once per round, during your partner's turn, your partner may WARP to your hex. When your partner does this, you WARP to your partner's hex. All movement made with this ability has is WARP.

- **Harmonic Movement:** *In perfect concert.*
When you or your ally would take their turn,
you may both take your turn simultaneously.

This counts as a use of both turns for turn order.

Buff Spells

Innate Varies

You are able to cast spells to protect and augment yourself and your allies. These spells can last a long time, but are time consuming to establish.

Justice flipped through her spellbook and considered her options. There are probably going to be fire elementals in the volcano, so she worked on a spell to protect herself from fire. She worked a second spell, this one allowing her to tap into ice powers at will. Another to create a magical shield around her. She always did prefer to be well prepared, rather than scrambling to put together effects on the fly.

Adaptation

This could be used as part of a wide range of spellcasters, but it can work for any type of long term boon.

First Facet★

Aegises: *You cast protective spells.*

You are capable of casting defensive spells known as Aegises on any creature. You may sustain 4 Aegises at a time. If you apply another past this limit, you must choose an existing one to negate. Aegises can stack with themselves. Between encounters, you may apply as many Aegises as you wish. It lasts until the end of the encounter. You start with the following Aegis:

- **Mage Armor:** You gain $2 \times C$ TEMPORARY HIT POINTS.

Armaments: *You can grant long term buffs.*

You are also capable of casting offensive spells known as Armaments on any creature. You may have up to 4 Armaments at a time, but they count against your limit for sustained Aegises. Armaments must be triggered by the creature possessing them, but triggering them ends their effect and no more than 2 of your Armaments may be triggered in the same round. If a creature with an Armament is WOUNDED, another ally may take up the Armament. You start with the following Armament:

- **Burning Fury:** You may trigger this Armament to gain ENERGIZED $2 \times C$.

Blessings: *You have an array of spells you can utilize.*

You are capable of casting helpful spells known as blessings on any creature. You can maintain 2 blessings per facet in this track. Between encounters, you may apply as many Blessings as you wish. You start with the following Blessings:

- **Swiftiness:** +2 speed.
- **Elemental Resistance:** Choose a single energy effect. You are immune to this effect.

Wards: *A ward can allow you to counter enemy attacks.*

You may also maintain a ward on yourself. You may switch wards between encounters.

- **Shield Ward**[C]: As a COUNTER, gain C BARRIER HIT POINTS.
- **Tesla Ward**[C]: As a COUNTER, when attacked in melee, the attack takes C damage. Otherwise, you gain ENERGIZED c .

REFRESH: You may use a REFRESH to cast an additional, but shorter lived Aegis on yourself or an ally within 6 hexes that lasts till the end of the encounter.

DEplete: One of your Aegis or Armaments. You are FULLY DEPLETED if you have no active Aegis or un-triggered Armaments.

Second Facet★

Aegis: You gain the following Aegis

- **Weakening Stare:** Once per encounter, you may gain a RIDER with a +1 modifier to hit that makes the target WEAKENED $3 \times C$ on a hit.

Armament: You gain the following Armament:

- **Vulnerable Spark:** You may trigger this armament to gain a RIDER with a +1 modifier to hit that makes the target VULNERABLE $3 \times C$ on a hit.

Blessings: You gain the following Blessing:

- **Heart of Stone:** You may halve the distance you are moved by FORCED movement.
- **Earth's Embrace:** You may gain a RIDER each round that inflicts SLOW 1. A successful defense roll negates this effect.

Third Facet

Aegis: You gain the following Aegis

- **Stoneskin:** You gain $2 \times C$ Resistance.

Armament: You gain the following Armament:

- **Victor's Courage:** You may trigger this armament to gain 2 BOOSTS.

Blessings: You gain the following Blessing:

- **Patron's Blind Eye:** You are INVISIBLE 6.

Fourth Facet★

Aegis: You gain the following Aegis:

- **Warden's Shield:** You gain $2 \times C$ BARRIER HIT POINTS.

Armament: You gain the following Armament:

- **Avenger's Blade:** You may trigger this armament when attacked to take a SURGE against the attacking creature.

Blessings: You gain the following Blessing:

- **Elemental Power:** Choose a single ENERGY EFFECT. Once per round, you may gain a RIDER that inflicts this ENERGY EFFECT. A successful defense roll negates this effect.
- **Rubberized Charge:** When attacked from within your melee range, the attacker must make a defense roll after their attack or be FORCED 1 hex away from you.

Fifth Facet★

Aegis: You gain the following Aegis:

- **Guardian Spirit:** You are ON GUARD 2.

Armament: You gain the following Armament:

- **Voodoo Link:** After you trigger this armament, the first 2 times you are attacked, the attacker takes C damage.

Blessings: You gain the following Blessing:

- **Heightened Awareness:** You have SCANNER 12.

Sixth Facet★

Aegis: You gain the following Aegis:

- **Lifebond:** Select one other creature. At any time, if the other creature is willing, you may deal $2 \times C$ damage to it and heal $4 \times C$

Armament: You gain the following Armament:

- **Deathbond:** Select one other creature. When you trigger this armament, if the other creature is willing, you may render them VULNERABLE $2 \times C$ to become ENERGIZED $4 \times C$. **Special:** This Armament may only be triggered once per round.

Blessings: You gain the following Blessing:

- **Guiding Protection:** You are immune to one of the following tags: [SENSELESS],[FEAR],[MENTAL], or [SICKENING].

Seventh Facet★

Aegis: You gain the following Aegis:

- **Phoenix Heart:** Once per encounter, while the subject of this is WOUNDED, they are healed $2 \times C$ on their turn. If this raises them above 0, they are no longer WOUNDED.

Armament: You gain the following Armament:

- **Stolen Moment:** Your max hit points is reduced by $2 \times C$. You may take an additional major action when you trigger this armament. **Special:** This Armament may only be triggered once per round.

Blessings: You gain the following Blessing:

- **Freedom:** You may become immune to reactions for 1 round per encounter.
- **Protector's Sword:** You may take an additional REACTION each round.

Haste

Innate Varies

You are fast. Not so much that you win foot-races, but more that your reflexes are amazing and your hands move in a blur.

Mike twitched nervously. He swore he never touches coffee, but people weren't sure if they believed him. A goblin leapt out of the woods, and before anyone else could react, Mike drew his dagger and stabbed it 8 times.

Adaptation

This can represent anything from a character that is innately fast, to being magical hastened with runes or using cybernetic augmentations to act faster.

First Facet★

Quick Blows: *You move fast enough to attack extra times.*

You start each encounter with 4 blur tokens. Once per round, when you take a major action, you may spend a blur token to also use a SURGE.

REFRESH: You may use a REFRESH to gain an additional blur token and can use quick blows an additional time on your turn. **DEplete:** Lose a blur token. You are FULLY DEPLETED if you have no blur tokens.

Blur of Death: *You go down swinging.*

When you are WOUNDED, you may spend your remaining blur tokens to use a SURGE for each token.

Painful Encouragement[C]: As a COUNTER, roll 1d20, on a 10 or less you may take a SURGE.

Second Facet★

Dial Up the Speed: *Your quick movements carry you across the battlefield faster.*

You gain 1 speed per even facet in this track.

Third Facet★

Choose one of the following abilities

- **Hyperreactive:** *You just twitch constantly.*
You may take an additional reaction each round
- **Quicker Draw:** *Your hands move in a blur when swapping weapons.*
You don't provoke from switching weapons, can do so without spending STEPS, and can draw weapons before combat starts
- **Reactive Spell:** *You can cast spells as fast as others can stab with a weapon.*
If you have a non-[W]eapon SURGE, you may threaten adjacent hexes as if you had a melee weapon.

Fourth Facet★

Slippery: *You just twitch backwards.*

When you are targeted by an attack, after the attack is resolved, you may DASH 1 hex as long as it's not towards the attacking creature.

Fifth Facet★

Twitch: *You act so quickly you preempt enemy attacks.*

When you are the next character on your side to act, you may take your turn before the enemy that would precede you. This will result in them going after you, then the next enemy after them taking their turn.

Sixth Facet★

Dare Ya: *You leave yourself open, ready to punish an attacker.*

If an enemy takes a REACTION against you, you may get a SURGE against them after they attack. They are aware of this before choosing to attack. If you have an ability to avoid provoking, you may elect to forgo its effects.

Seventh Facet★

Full Retaliation: *You can get a lot done in a short period of time.*

You may spend 2 blur tokens to take a major action. This is usable during blur of death, and counts as a use of Quick Blows. When you would take a SURGE, you may instead gain a blur token.

You gain one of these abilities based on your 3rd facet choice

- **Hyperreactive Drive:** *No opening shall go unpunished.*
You may take any number of REACTIONS a round; You may only target a given creature with a REACTION for moving once each round.
- **Quickest Draw:** *You are somehow always able to have and use the right weapon.*
When you switch weapons, you can use the weapon you draw as if you had attacked with it this round.
- **Greater Reactive Spell:** *You react quicker, and make the attack even with the added travel time.*
You threaten out to 2 hexes away with reactive spell

Upgraded Man

Innate Varies You are more than you once were. Your body has been changed. This augmentation is permanent, but changeable.

Murphy ran after the robber, his bionic legs propelling him at superhuman speeds. As he drew near, he held up his arm, and a pistol popped out of his wrist. A targeting overlay appeared on his vision, and he homed in on the thief's leg. A precise shot later, and the thief was on the ground clutching his wounded leg. Murphy extended his arm and cuffed the man.

Adaptation

This works well for a cyborg, but it also can cover a robot equally well, or someone who has grafted other parts onto themselves, or who has magical augmentations

First Facet★

Augmented: *You have a limited capacity to support augments.*

You have 2 augment points, which you can spend to install Augments. You may assign new augment points when you level up, and remove old systems to reclaim their augment points. *Optional Rule:* Under GM discretion, if you have access to appropriate resources, such as a lab, you may be able to reassign your augment points between levels.

Core Systems: You have *C* core systems. These can be changed like Augments. The same core system may be taken multiple times and their effects stack.

- **Shields:** *Your augments allow you to place a protective barrier over yourself.*

You gain 8 BARRIER HIT POINTS. **REFRESH:** You may use a REFRESH to gain 2 BARRIER HIT POINTS. **DEplete:** lose 2 BARRIER HIT POINTS. This system is depleted if you have less than 2 BARRIER HIT POINTS.

- **Toughness:** *Your augments improve your overall robustness.*

You gain 8 maximum hit points. **REFRESH:** You may use a REFRESH to gain 2 TEMPORARY HIT POINTS. **DEplete:** lose 2 TEMPORARY HIT POINTS or HIT POINTS. This system is depleted if you have no temporary hp and your hp is less than $16 \times C$

- **Overdrive:** *Your augments have boosted your strength, and can be used to empower your weapons.*

4 times per encounter per overdrive you possess, no more than twice per round per overdrive you possess, you gain ENERGIZED 2. If you would be wounded while you have uses remaining, you may use all of them to get the corresponding energized, then spend all of your energized to damage an enemy by that amount plus *C*. **REFRESH:** Gain an additional use of this. **DEplete:** Lose a use of this. This system is depleted if you have no more uses.

- **Armor:** *Your augments include armor plating.* You gain 8 RESISTANCE. **REFRESH:** You may use a REFRESH to gain 2 RESISTANCE. **DEplete:** lose 2 RESISTANCE. This system is depleted if you have less than 2 RESISTANCE.

Upgraded COUNTER[C]: Pick one of the following abilities. You must have at least one core system of the type you select.

- **Shields:** As a COUNTER, gain *C* BARRIER HIT POINTS.
- **Toughness:** As a COUNTER, reduce the damage by *C*. If the attack dealt no damage before this reduction, gain a BOOST.
- **Overdrive:** As a COUNTER, gain ENERGIZED *C*
- **Armor:** As a COUNTER, reduce the damage taken by *C*. If the attack dealt no damage before this reduction, become ON GUARD.

REFRESH: When you use a REFRESH, all of your core systems get their REFRESH. **DEplete:** Deplete *C* of your core systems that aren't depleted. You are FULLY DEPLETED if you don't have *C* undepleted core systems.

Second Facet

Upgrade: You have 4 augment points.

Third Facet★

Mark II: You have 7 augment points.

Fourth Facet

Improved Reactor: You have 10 augment points.

Fifth Facet★

Redesign: You have 14 augment points.

Sixth Facet

Mark III: You have 18 augment points.

Seventh Facet★

Perfect Design: You have 23 augment points.
Hotswap: You may change your augmentations with 1 minute of effort.

Augments

Targeting Systems(2 AP): The range of ranged weapons may be increased by 6. This does not stack with the Distant property.

Bionic Legs(X AP): + X speed. Maximum is 2 per facet of this track.

Jetpack(6 AP): You gain Flight.

Deep Bond(X AP): You gain a bonus artifact worth X pts (max of your highest facet in this track). This is integrated in your body and always available, and is BOUND. This augment may be taken multiple times to get multiple artifacts.

Superjump Legs(X AP): You can jump X hexes once per round. Maximum is 2 per facet in this track.

Reflex Enhancements(2 AP): You may take an additional REACTION each round

Cloaking System(4 AP): You may turn INVISIBLE 4

once per round.

Installed Weapon(1 AP): Pick one weapon you possess. This becomes a BOUND natural weapon and may always be wielded.

Scanner(X AP): You gain SCANNER out to $X \times 6$

Extra Senses(2 AP): You are immune to [SENSELESS].

Fireproofing(1 AP): You are immune to IGNITED .

Extendable Arms(2 AP): Once per round, you may extend or retract your arms. While extended, your maximum and minimum reach increases by 1.

Emotion Suppression(2 AP): You are immune to [FEAR].

Rocket Punch(1 AP): Once per encounter, you may attack a hex within 12 hexes as if it were in your melee range.

Synthetic Biology (6 AP): You gain a monster tactical ability(pg. 160).

Chapter 18

Conditions and Glossary

Stacking

Conditions from different sources stack; Energized, movement bonuses, temporary and barrier HP all stack.

Rules and Terms

xdy: When you see something like 1d20, 3d6, or C d6, it means to roll x dice of size y. a d20 is a 20 sided die, a d6 is a common 6 sided die. So 3d6 would be 3 6 sided dice. C d6 means the number of dice you roll is equal to your caliber.

Ability: Abilities are the capabilities of a character granted by the various build options they make. If there is a block of rules text explaining what it allows you to do, its an ability.

Attack: An ability which targets an enemy. May consist of several individual strikes or effects.

Damaging Attack: An attack that has the capacity to deal damage if successful.

Nondamaging Attack: An attack that does not deal HIT POINTS damage, even if successful.

STRIKE: Making a STRIKE against a target means rolling an attack roll to hit in order to achieve the stated effect.

Caliber (C): Caliber is a measure of your strength, used heavily in ability formulas. It is 3, 4, 5 or 6, depending on your tier.

RIDER Effects: When a creature posses a RIDER, they may attach it to any action they take. If this action targets an ally, they may give that ally the RIDER. If this action SUMMONS an ally, that SUMMON may have the rider. If it targets at least one enemy, they may trigger the RIDER to target one enemy that was targeted. A RIDER is consumed after being triggered. A RIDER may require its own attack roll or prompt a defense roll; this is its own roll, independent of the base ability. RIDERS do not trigger [C]ounters.

SURGE: A quick attack that a character can make when activated by specific abilities.

REACTION: The SURGE taken against an opponent who provokes.

REFRESH: When granted by abilities, allows a innate TRACK to recharge.

DEPLETED: Causes a innate TRACK to lose potency.

FULLY DEPLETED: When a track cannot be further DEPLETED. Being DEPLETED when all your innate

tracks are FULLY DEPLETED instead blocks a future REFRESH.

Area of Effect: An ability which targets every creature in a given set of hexes.

Radius: Areas of effect can measured by radius; "an ability that affects radius X of a specified hex affects all hexes within X hexes of the specified hexes". Radius 0 = single hex aoe.

Disarm: If a character is disarmed, they are no longer wielding their current weapon. If not otherwise specified, it lands in their hex and may be picked back up as a STEP.

Target Priority(TP): If you have multiple available targets you can select from that are not behind concealment, and they have differing target priorities, you may be restricted from selecting anything but the highest available, or may have to accept a drawback for attacking an enemy with a lower target priority than the highest available to you depending on the abilities used.

Abilities that target multiple opponents, such as area of effect abilities; use the highest target priority of those targeted by that ability.

Ability Tags

[C]ounter[C]: An ability that works in response to a damaging attack. Only one [C]ounter may be used against any given attack. An opponent may use a boost to negate the counter on their target; this is in addition to the normal limit on boosts applied to an action.

[W]eapon[W]: An ability that uses a weapon. Its range is dependent on the weapon, and whether the attack provokes is determined by the weapon rules.

[O]verwhelming[O]: An ability that is good at penetrating certain defenses. The defense will list how it interacts with [O]verwhelming attacks, if applicable.

[R]eckless[R]: An ability that will provoke reactions when used.

[R]eckless melee[Rm]: An ability that will provoke REACTIONS when used, unless used against an opponent within their melee range.

[H]eavy[H]: An ability which cannot be used with readied actions.

[S]pecial[S]: An ability which requires extra focus and cannot be used with certain other abilities.

Boosts

BOOSTS: Some abilities can be BOOSTED; if you apply a BOOST you will get the heightened effect of that ability. You can have a maximum of two net BOOSTS on any given use of a major ability, or one net BOOST on a minor action or SURGE. BOOSTS can be saved, they are not expended until used. BOOSTS and PENALTIES cancel, so if you have a boost and gain a PENALTY, you instead lose the BOOST. A BOOST granted while a role is being used can grant a +1 to the roll, up to a max of +2 from 2 simultaneous BOOSTS.

PENALTIES: Some abilities will inflict PENALTIES, you must apply the opposite effect of a BOOST on any ability than can use a BOOST. You can have a maximum of two net PENALTIES on any given major action, or one net PENALTY on any minor action or SURGE. Accrued PENALTIES do not expire until they are used or the encounter ends. PENALTIES and BOOSTS cancel, so if you have a PENALTY and gain BOOST, you instead lose the PENALTY. You must spend as many PENALTIES on each action you use as possible.

OFF GUARD X: If someone is OFF GUARD, anyone taking an action against them can gain a number of free BOOSTS equal to their OFF GUARD when targeting them, up to the maximum number of boosts their attack can gain, reducing the OFF GUARD by that much. OFF GUARD cancels with ON GUARD, so if you have OFF GUARD 1 and gain ON GUARD 1, it instead removes the OFF GUARD.

ON GUARD X: If someone is ON GUARD, anyone taking an action against them must take a PENALTY when targeting them for each ON GUARD they have, up to the maximum that attack can suffer, and reduce the ON GUARD by that much. For example, ON GUARD 4 would make the next two attackers with a major action both take 2 PENALTIES. ON GUARD cancels with OFF GUARD, so if you have ON GUARD 1 and gain OFF GUARD 1, it instead removes the ON GUARD.

EDGE: EDGE is an advantage you gain from various tactical situations. Having an EDGE on an attack lets you take a BOOST, having an EDGE against an attack means you are ON GUARD against the attack.

Movement

See the Maps and Movement chapter (pg. 33) for more details, this section covers the key terms, but that chapter explains the entire movement system in detail.

Burrowing: Burrowing allows creatures to move underground

DASH: Movement which does not provoke reactions.

FORCED Movement: FORCED movement will move a creature a given number of hexes by force, and does not care about the STEP costs to traverse those hexes, though it is blocked by obstacles unless otherwise specified. This movement does not provoke reactions, nor does it consume any of the creature's steps.

DIRECTED Movement: DIRECTED movement will allow a creature to move, and respects the STEP costs and movement abilities of the creature. This can be ignored by allies, but against enemies it forces or tricks them into moving. This movement does not provoke reactions, nor does it consume any of the creature's STEPS.

Hovering: Creatures who can hover only descent 1 hex per turn.

Jumping: Jumping allows creatures to move through the air for the turn

Flight: Flight allows creatures to move in the air.

MOUNTED: When you become MOUNTED, a creature will become your MOUNT. You occupy the same hex as your MOUNT. If you stop sharing the same hex as your MOUNT, you stop being MOUNTED. Whenever your MOUNT moves, you move with it. When you become MOUNTED, your MOUNT loses 1 STEP for each hex you moved during that turn. When you stop being MOUNTED, you lose 1 STEP for each hex your MOUNT moved during that turn.

PHASING: Allows a creature to walk through solid barriers/terrain.

STEPS: STEPS are spent to move hexes and perform other quick actions. You get a number of STEPS equal to your speed at the start of your turn and use 1 STEP per hex moved.

TELEPORT: Allows a creature to move from one hex to another without passing through any hexes in between. Must have LINE OF SIGHT to the destination.

WARP: A TELEPORT that does not need LINE OF EFFECT or LINE OF SIGHT

Bonds

EQUIPPED: EQUIPPED abilities use your defenses, and are BONDED to you, but they have their own hit points. They are attached to you and can only move or be moved by you moving as well. They can be targeted by attacks, but are immune to area of effect abilities.

BONDED: a BONDED creature is linked to another; called the master. When a BONDED creature is WOUNDED, the master takes damage equal to the BONDED creature's max hit points. This damage does not bypass any defenses you have. If the master is WOUNDED, all of its BONDED creatures are also WOUNDED without further damaging the master

SUMMONED: A SUMMONED creature disappears when WOUNDED. They move their speed and attack on the turn of the controlling creature. Damage dealt by a SUMMON is considered damage dealt by the controlling creature. A SUMMONED creature must be SUMMONED on solid ground, or in the water if it can swim.

BOUND: A BOUND item is tied to the character in a deeper way. The specifics of what this means may vary based on the ability making the item BOUND.

Vision and Illusions

LINE OF EFFECT (LoE): Drawn from any corner of the attackers hex to any part of the desired hex. If any

corner of that hex cannot be reached by the line, it has cover and has an EDGE against the attack. If none of them can be reached it is completely blocked. A creature always has LINE OF EFFECT to themselves.

Indirect LINE OF EFFECT (Indirect LoE): As LINE OF EFFECT, except you can curve the line arbitrarily when drawing between hexes.

LINE OF SIGHT (LoS): Drawn from any corner of the attackers hex to any part of the desired hex. If any corner of that hex can be reached by the line, you have LINE OF SIGHT and can see the hex. A creature always has LINE OF SIGHT to themselves. If you don't have LINE OF SIGHT to your target, you have a 40% MISS CHANCE unless you are using an Area of Effect

SCANNER X: This ability tells you where all targets are within your SCANNER range, which is X. This does not give LINE OF SIGHT or LINE OF EFFECT, but it does give the location to all creatures within that range. This allows you to target creatures using STEALTH and ignore INVISIBLE within your scanner range.

ILLUSIONS: ILLUSIONS alter the way the world appears. ILLUSIONS always seem real at first, but the first time on a creature's turn it enters LINE OF SIGHT, or the beginning of their turn if it is already within LINE OF SIGHT, it can make an defense roll to disbelieve an ILLUSION within LINE OF SIGHT; this is a reality check. A creature always disbelieves its own ILLUSIONS. Each ILLUSION specifies actions which are inconsistent with the ILLUSION. A creature that believes the ILLUSION may not take actions inconsistent with the ILLUSION. A creature that interacts with an ILLUSION in a way that is inconsistent with it gives all creatures with LINE OF SIGHT to that action a +2 modifier on all future reality checks against that ILLUSION. This includes the illusionist breaking their own ILLUSION.

Players are generally aware of what things are illusions, and in fact their character may suspect something is an illusion as well; however, it still takes an effort of will to act as though the reality you see is false.

[MENTAL] ILLUSIONS: These are ILLUSIONS which exist in the mind of their target, not the world, and only affect the target. Other creatures performing inconsistent actions can still help break them out of their hallucination.

INVISIBLE X: Enemies outside radius X do not have LINE OF SIGHT to you. This effect ends if you use an offensive action. You start with INVISIBLE X, where x is determined by the granting ability. It increases by 6 if you take a minor action and by 12 if you take a major action, and increases by 1 by each hex you move without TELEPORTING. This number resets each round to the original value at the beginning of your turn.

STEALTH X: Enemies outside radius X cannot target you. This effect ends if you target an enemy. You start with STEALTH X, where x is one greater than the number of hexes you moved this round. It increases by 6 if you take a minor action and by 12 if you take a major action, and increases by 1 by each hex you move without TELEPORTING. See (pg. 36)

MISS CHANCE: If a target has MISS CHANCE against a given attack, roll a d100. If it's less than the MISS

CHANCE, that attack is dodged. MISS CHANCE effects things even if they do not have an attack roll or if they are beneficial.

When rolling MISS CHANCE or DODGE CHANCE, you can use a d20 instead by dividing the DODGE CHANCE/MISS CHANCE by 5.

Defenses

DODGE: If an attack is DODGED that attack and any partial effects on a miss all miss. If the dodged attack has BOOSTS, PENALTIES, or RIDERS, the attacker retains those BOOSTS, PENALTIES or RIDERS. No [C]ounters can be used against an attack that is dodged.

DODGE CHANCE: If a target has DODGE CHANCE against a given attack, roll a d100. If it's less than the DODGE CHANCE, that attack is DODGED. DODGE CHANCE affects things even if they do not have an attack roll. If a character has more than one DODGE CHANCE, they can choose to use additional ones if their first ones fail, as long as they are not from the same ability, but a DODGE CHANCE from a COUNTER always occurs after all other dodges are attempted.

HIT POINTS(HP): Your base pool of health. Damage subtracts from your HP, and when you have no more left, you are WOUNDED.

TEMPORARY HIT POINTS (THP): When a creature takes damage, it loses TEMPORARY HIT POINTS before real HIT POINTS. TEMPORARY HIT POINTS go away after a short bit, effectively going away between encounters.

BARRIER HIT POINTS (BHP): Damage, VULNERABILITY, and WEAKENED, all deplete at a 1:1 ratio before being applied to the target. PENALTY deplete C BHP. If multiple are applied at the same time, the attacker may choose which ones apply first. BARRIER HIT POINTS go away after a short bit, effectively going away between encounters.

AREA BARRIER HIT POINTS(ABHP): This represents a barrier covering a region of the battlefield. Any time a creature not in the area attacks creatures or hexes protected by the AREA BARRIER HIT POINTS, first apply its damage, WEAKENED, and VULNERABILITY, to the AREA BARRIER HIT POINTS as if it was BARRIER HIT POINTS, then the remainder applies to the original target. If an area of effect hits the AREA BARRIER HIT POINTS, the barrier absorbs damage once, then the remaining damage targets the creatures under the AREA BARRIER HIT POINTS as above with the remainder.

RESISTANCE X: A creature with RESISTANCE blocks half the damage of attacks against them, until X damage has been blocked. If more damage would be blocked than remaining RESISTANCE, only the amount of the RESISTANCE is blocked. RESISTANCE resets to its base level after a short while, effectively resetting between encounters. If a blow would make a creature with RESISTANCE remaining WOUNDED, the RESISTANCE blocks additional damage until it is depleted.

Conditions

Conditions are status effects that are often applied from other abilities. They may come with a descriptor, which will govern their interaction with certain other abilities, such as immunities. Immunity to a descriptor means you are immune to any condition with that descriptor. For instance, [FEAR] SLOW is nullified by either immunity to SLOW or [FEAR]. You can never be immune to self-inflicted Conditions, such as drawbacks to using feats. Conditions can be lesser, greater, and/or restorable, which can effect how other abilities interact with them. If a condition is not given another duration, they end at the end of the encounter.

Condition Descriptors

[SENSELESS]: Descriptive tag for sense-targeted effects.

[FEAR]: Descriptive tag for fear-based effects.

[SICKENING]: Descriptive tag for queasy based effects.

[MENTAL]: Descriptive tag for mind-based effects.

[GROUND]: Descriptive tag for ground-based effects. In Air creatures are immune.

Standalone Conditions

TETHERED X [Lesser]: A TETHERED creature cannot move or be moved more than X hexes away from the creature tethering it, unless it is larger than that creature or that movement is a WARP or TELEPORT effect. If it is larger than that creature, it will instead move that creature in the direction it moves whenever it would move more than X hexes away from it, unless the creature cannot enter that hex in which case it cannot move. A creature being TETHERED X is likewise inflicting TETHERED X on the initiator. This dynamic holds even in air, such that a larger creature can fly with the smaller creature dangling beneath it, and the rope will prevent one from falling too far beneath the other creature. A WARP or TELEPORT effect to outside of the TETHERED range can end this effect. If either TETHERED creature is WOUNDED, the effect ends.

GRAPPLED [Lesser]: When you become GRAPPLED, the creature that inflicted this status is the grappler. You are moved adjacent to the grappler if not already there, and you remain GRAPPLED while the grappler remains adjacent to you. At the end of each of your turns, you may make a defense roll. This defense roll has a +4 bonus if the grappler is a different size from the grapplee. If this defense roll is successful, you stop being GRAPPLED. While you are GRAPPLED, you and the grappler cannot attack any creature other than each other, and neither of you can take REACTIONS unless the other creature provokes them. While you are GRAPPLED, you cannot use STEPS to move. If either side FORCES the other to move, they must move with them.

ENERGIZED X: The next time the creature successfully deals damage or provides healing, they may increase it by x. If the affected creature would damage or heal multiple creatures at the same time, it only applies to one of the targeted creatures, affected

creature's choice. If the creature targets an ally with an ability, it may give it any ENERGIZED it has. Gaining ENERGIZED can cancel out an equal amount of WEAKENED.

BLOODLUST X: BLOODLUST is gained when killing mooks or SUMMONS. It functions like ENERGIZED, but you can also spend $2 \times C$ BLOODLUST to take a SURGE, up to twice per round.

OFF BALANCE [Lesser]: Cannot take REACTIONS or use immediate actions. You automatically lose this status at the beginning of your turn.

PRONE [Lesser]: Can only use one STEP to move each turn, and are OFF BALANCE. Can spend 1 STEP to remove PRONE and provoke a REACTION. Alternatively, can spend half their STEPS or become DISABLED 2 to remove PRONE without provoking a REACTION.

FATIGUE X: The first time each round a creature with FATIGUE takes damage, it takes additional damage equal to $X \times 2 \times C$. This does not remove the FATIGUE.

PERSISTENT <status>: At the beginning of each of the affected creature's turns, that creature receives that status. This status is lesser, greater, and/or restorable based on the status it inflicts.

SHIELDED: The next time this creature is attacked, the attacker is DISABLED for that attack. Multiple stacks of this increase how many times this can trigger.

WOUNDED: A creature that is WOUNDED cannot be healed nor take actions.

Lesser Restorable Conditions

Lesser negative conditions that can be removed with restorative abilities.

DISABLED X [Lesser Restorable]: Whenever a disabled creature would attempt to inflict a lesser condition or a FORCED movement effect, it instead reduces its DISABLED by 1. This applies even if the condition is dependent on a hit, failed defense roll, or similar trigger. If you have more than 5 disabled you cannot voluntarily take on more. This effect stacks, if you are disabled 3 and become disabled again, you instead combine both to be disabled 4.

SLOWED X [Lesser Restorable]: X of the affected creature's STEPS cannot be used, to a maximum 1/2 of the available movement in the round, including any extra granted by abilities. This effect stacks, if you are SLOWED 2 and are SLOWED 1 these combine to be SLOWED 3.

STOPPED [Lesser Restorable]: The affected creature cannot use STEPS to move.

STUNNED [Lesser Restorable]: The affected creature is STOPPED until the end of their next turn or until they take a minor action to end this effect.

DIZZY X [Lesser Restorable]: At the end of that creature's turn it is DIRECTED X hexes in a straight line in a random direction.

BLIND X [Lesser Restorable [SENSELESS]]: The affected creature treats all hexes that are X or more hexes away from their current position as concealed.

BLEEDING X [Lesser Restorable]: When a creature with this status spends more than half their speed in STEPS, they take X damage. If they do not move on their turn, this condition is removed.

ENERGY EFFECTS : ENERGY EFFECTS are a group or type of effects that reflect a given theme that are added onto an abilities effects. If an ability uses an ENERGY EFFECT it uses the entire type of effect, and specific immunities can be had from one, multiple, or all ENERGY EFFECTS .

- **IGNITED X** [Lesser Restorable]: A creature with this status gains BURNING X at the end of its turn. While PRONE, they may spend a STEP or become disabled to remove this condition. If the amount of IGNITED is not specified, it is C
- **FROZEN** [Lesser Restorable]: A creature with this status must spend 2 steps to remove it or be SOLIDIFIED at the end of their turn.
- **SHOCKED** [Lesser Restorable]: A creature hit with this status may choose to become disabled 2 on their turn to remove it or start CONVULSING at the end of their turn.

Greater Restorable Conditions

Greater negative conditions that can be removed with certain restorative abilities. Removing a greater restorable condition may not always clear all of it.

BURNING X [Greater Restorable]: Take X damage at the end of each turn. When restored C BURNING is removed.

CONVULSING [Greater Restorable]: Have a 30% failure chance for all actions for one round.

CORRUPTED X [Greater Restorable]: When this creature would be healed, ENERGIZED , or granted TEMPORARY HIT POINTS or BARRIER HIT POINTS, the amount is reduced by C and a corruption is removed. If they would receive a boost or on guard, they do not and a corruption is removed. At the end of their next turn, any corruption becomes OFF GUARD . When restored, 2 CORRUPTED is removed.

ONGOING X [Greater Restorable]: Take X damage at the beginning of each turn, then half the amount of Ongoing. When restored, C ONGOING is removed

SOLIDIFIED [Greater Restorable]: Next minor action does nothing.

VULNERABILITY X [Greater Restorable]: When the affected creature is damaged, it takes X additional damage. This removes the VULNERABILITY . Will often state a specific type or source of damage that will trigger it. When restored, $2 \times C$ VULNERABILITY is removed.

WEAKEN X [Greater Restorable]: Prevent the next X damage or healing that the affected creature would deal. If the affected creature would damage or heal multiple creatures at the same time, it only applies to one of the targeted creatures, affected creature's choice. If the creature next deals less than X damage or healing, it instead reduces the WEAKEN by the amount dealt. If they target an ally, they must give that ally all of their WEAKENED . Gaining WEAKEN can cancel out an equal amount of ENERGIZED . When restored, $2 \times C$ weakened is removed.

Index

- Area barrier hit points, 61, 63, 210, 212, 246, 247, 339
- Barrier hit points, 24, 37, 61, 63, 88, 163, 164, 209, 241, 255, 257, 263, 272, 276, 283, 300, 306, 331, 332, 334, 339, 341
- Bleeding, 67, 87, 88, 115, 117, 120, 122, 125, 128, 129, 159, 170, 171, 173, 174, 177, 184, 185, 198, 206, 207, 222, 229, 234, 237, 241, 247, 253, 270, 279, 281–283, 286, 288, 292, 294, 314, 317, 319, 329, 340
- Blind, 66, 67, 89, 115, 117, 120, 123, 142, 143, 159, 170, 175, 183, 189, 198, 209, 210, 212, 218, 222, 230, 231, 234, 238, 239, 242, 244, 263, 264, 268, 270, 279, 281, 283, 286, 292, 300, 305, 306, 312, 315, 340
- Bloodlust, 23, 24, 88, 116, 119, 161, 195, 244, 251, 292, 317, 340
- Bonded, 65, 163, 164, 185, 211, 212, 214, 268, 269, 338
- Boost, 23–26, 30, 55, 67, 70, 88, 128, 129, 143–155, 161, 173, 181, 187, 191, 196, 197, 204, 206, 207, 209, 212, 214–216, 219, 220, 226–228, 232, 239–241, 256, 261, 265, 267–270, 274–278, 280, 281, 283–285, 287, 290–292, 296, 299, 301, 304, 316–319, 321, 323, 327, 328, 331, 334, 338, 339
- Bound, 63, 64, 66, 67, 110, 115, 207, 314, 326, 335, 338
- Convulsing, 341
- Corrupted, 115, 120, 123, 124, 147, 169, 189, 198, 211, 212, 217, 222, 231, 268, 270, 278, 341
- Counter, 25, 28, 30, 55, 88, 116, 117, 119, 121, 122, 125, 141, 146, 149, 152, 154, 155, 157, 173, 181, 182, 204, 206, 211, 212, 214, 219, 220, 223, 235, 247, 253, 265, 278, 284, 286, 288, 291–294, 296–302, 304–307, 309, 311, 312, 314–317, 319, 320, 322, 323, 325, 326, 328, 331, 333, 334, 339
- Dash, 24, 30, 35, 61, 62, 64, 67–69, 127, 128, 142, 148, 152, 153, 175, 176, 178, 184, 188, 191, 192, 200, 202, 208, 217, 220, 223, 225, 226, 228–230, 241–243, 246, 249, 253, 254, 258, 274, 275, 284, 296, 297, 304, 305, 309, 316, 317, 320, 322, 333, 338
- Depleted, 23, 55, 57, 152, 198, 217, 270, 283, 285, 287, 288, 290–292, 294, 296–302, 304–307, 309, 311, 312, 314–317, 319, 320, 322, 323, 325, 326, 328, 331, 333, 334, 337
- Direct, 26, 65, 68, 114, 123, 125, 126, 152, 174, 181, 191, 200, 220, 235, 260, 268, 280, 287, 291, 321, 338
- Disabled, 62, 64, 66, 116, 119, 120, 125, 142, 170, 192–194, 198, 199, 210, 217, 279, 281–283, 291, 307, 308, 340
- Dizzy, 67, 68, 87, 88, 115, 117, 120, 124, 128, 129, 142, 143, 159, 164, 173, 176, 178, 181, 187–189, 193, 198, 200, 220, 222–224, 227, 229–231, 234, 238, 244, 251, 257, 272, 274, 279, 283, 286, 289, 291–294, 303, 307, 308, 317–319, 329, 340
- Dodge, 89, 153, 155, 251, 277, 283, 312, 339
- Dodge Chance, 30, 89, 143, 152, 153, 157, 158, 173, 209, 212, 222, 255, 256, 262, 263, 273, 274, 277, 283, 287, 297, 299, 303, 307, 309, 312, 316, 323, 339
- Edge, 25, 26, 62, 64, 66, 69, 70, 142, 160, 161, 170, 179, 184, 192, 194, 195, 203, 298, 311, 315, 341
- Energized, 24, 87, 88, 128, 129, 147–150, 155, 157, 169, 181, 191, 194, 196, 200, 212, 214, 216, 217, 235, 249, 253, 254, 256, 263, 272, 273, 276, 277, 283, 289, 290, 317, 326, 328, 331, 332, 334, 340, 341
- Energy effect, 61, 63, 65, 114, 117, 123, 124, 142, 143, 159, 179, 180, 202, 214, 224, 227, 229, 235–237, 257, 268, 277, 279, 286, 288, 292, 314, 318, 332, 341
- Enhance, 144–153, 158
- Equipped, 117, 119, 121, 123, 198, 214, 268, 269, 277, 338
- Fatigue, 13, 29, 110, 340
- Fear, 68, 69, 88, 114, 115, 117, 121, 123, 126, 142, 159, 160, 170, 192, 195, 220, 224, 230, 233, 234, 244, 250, 251, 253, 256, 259, 260, 275, 280, 282, 283, 294, 300, 301, 314, 318, 329, 332, 335, 340
- Fire, 36, 158, 291, 341
- Force, 64, 67, 70, 71, 87, 88, 114–116, 118–120, 122–124, 126, 127, 142, 152, 158, 159, 163, 169, 171, 178, 180, 185–188, 191–193, 195, 198, 200, 203, 209, 211, 220, 225, 230, 232, 234, 237, 238, 240–242, 244, 246, 247, 250, 255, 257, 258, 263, 268, 274, 278, 279, 281, 282, 284, 286, 287, 289, 292, 293, 296, 301, 309, 315, 319, 329, 331, 332, 338, 340
- Frozen, 62, 66, 67, 116, 117, 119, 121, 122, 125, 158, 235, 263, 282, 306, 341
- Grappled, 67, 116, 117, 123, 129, 142, 149, 159, 170, 175, 186, 192, 193, 203, 221, 232, 241, 244, 247, 272, 273, 279, 286, 287, 292, 300, 312, 340
- Ground, 35, 37, 69, 117, 118, 137, 142, 159, 247, 340
- Ignited, 37, 61, 66, 67, 88, 89, 116, 117, 119, 121–123, 125, 127–129, 138, 183, 186, 200, 209, 211,

- 212, 235, 239, 244, 252, 263, 268, 270, 272, 283, 291, 335, 341
- Illusion, 102, 251, 252, 289, 339
- Invisible, 124, 127, 137, 159, 183, 212, 217, 220, 224, 225, 230, 234, 251, 256, 259, 264, 271, 277, 279, 297, 318, 331, 335, 339
- Line of Effect, 24, 33–35, 114, 120, 127, 128, 149, 164, 171, 177, 183, 186, 200, 206, 215, 222, 237, 242, 244, 247, 259, 260, 280, 283, 289, 297, 314, 322, 338, 339, 341
- Line of Sight, 24, 34–36, 65, 68–70, 88, 120, 123, 126–128, 149, 154, 170, 171, 173, 181–183, 186, 200, 211, 222, 224, 230, 234, 239, 246, 251, 252, 256, 259, 261, 265, 269, 271, 272, 289, 297, 300, 311, 318, 321, 329, 338, 339, 341
- Mental, 69, 88, 102, 114, 117, 120, 123–125, 142, 154, 159, 160, 185, 220, 230, 234, 244, 261, 275, 282, 318, 332, 339, 340
- Miss Chance, 217, 289, 339, 341
- Momentum Attack, 26, 30, 64, 68, 175, 203, 242, 274, 299, 316
- Mount, 19, 62, 65, 68, 74, 78, 119, 219, 221, 316, 317, 325, 338
- Off balance, 25, 30, 35, 61, 65, 67, 115, 118, 125, 142, 149, 170, 175, 180, 181, 185, 187, 189, 194, 198, 207, 212, 217, 220, 234, 241, 243, 257, 259–261, 263, 270, 274, 278, 280, 282, 283, 287, 290, 300, 304, 305, 329, 340
- Off Guard, 23, 25, 26, 65, 116, 125, 129, 151, 157, 161, 181, 187, 194–196, 198, 199, 207, 209, 211, 212, 217, 219, 233, 240, 242, 243, 251, 256, 257, 260, 263, 264, 269, 270, 273–277, 279, 282–287, 290, 299, 309, 312, 314, 316, 320, 327, 332, 334, 338, 341
- Ongoing, 36, 37, 62, 68, 116, 118, 121, 138, 148, 150, 156, 159, 185, 188, 189, 198, 212, 217, 231, 234, 237, 238, 241, 279, 282, 289, 295, 340, 341
- Penalty, 25, 30, 55, 64–67, 70, 79, 87, 115, 116, 118, 121, 125, 128, 129, 146, 149, 150, 152–154, 157, 161, 181, 194, 196–199, 203, 206, 207, 210–212, 215, 217, 220, 222, 227, 237, 239, 243, 244, 246, 247, 253, 256, 257, 259, 261, 263, 265–268, 270, 274, 277–285, 289, 292, 302, 307, 311, 312, 318, 320, 338, 339
- Persistent, 79, 148, 150, 169, 189, 190, 198, 212, 214, 217, 223, 228, 231, 232, 264, 282, 283, 326, 327, 340
- Phase, 35, 159, 210, 220, 273, 291, 338
- Prone, 24, 31, 34, 67, 68, 116, 117, 119, 138, 142, 159, 164, 169, 175, 176, 185, 187, 188, 192–195, 203, 210, 211, 224, 225, 227, 230, 241, 242, 244, 252, 253, 257, 272, 279, 286, 287, 289, 292, 296, 301, 302, 305, 307–309, 320, 329, 340, 341
- Reaction, 24, 26–28, 30, 31, 35, 46, 55, 57, 129, 138, 145, 152, 159, 170, 176, 185, 187, 189, 192, 200, 202, 223, 240, 241, 243, 244, 251, 270, 275, 278, 296, 300, 304, 305, 307, 309, 317–319, 329, 332, 333, 335, 337, 340
- Refresh, 23, 55, 57, 66, 87, 88, 128, 129, 151, 154–156, 217, 249, 267, 269, 270, 275, 277, 280, 285–288, 290–292, 294, 296–302, 304–307, 309, 311, 312, 314–317, 319, 320, 322, 323, 325, 326, 328, 331, 333, 334, 337
- Resistance, 37, 87, 88, 128, 129, 150, 155, 200, 219, 263, 272, 283, 302, 303, 314, 319, 328, 334, 339
- Rider, 30, 62, 67, 88, 89, 114–117, 119, 120, 123–126, 128, 129, 141, 150, 179, 191, 198, 212, 214, 223, 224, 227–231, 235, 241, 244, 256, 261, 268, 278, 281–284, 290, 291, 296, 300, 312, 317–319, 322, 329, 331, 332, 337, 339
- Scanner, 62, 68, 69, 88, 114, 119, 121, 123, 159, 173, 218, 244, 256, 261, 269, 270, 281, 312, 332, 335, 339
- Senseless, 159, 170, 175, 198, 221, 260, 280, 283, 332, 335, 340
- Shielded, 88, 143, 194, 255, 264, 298, 311, 320, 340
- Shocked, 62, 67, 69, 115, 117, 119, 122, 125, 126, 128, 159, 235, 237, 283, 290, 341
- Sickening, 88, 159, 253, 279, 289, 291, 305, 319, 332, 340
- Sitting Duck, 25, 160, 161, 195, 200, 222, 309, 314
- Slowed, 20, 37, 61, 64, 67, 68, 114, 115, 117–119, 123, 124, 126, 128, 129, 142, 154, 159, 169–173, 176, 178, 181, 189, 191, 193, 196, 198–200, 209–211, 214, 215, 222–225, 227, 229, 231, 237, 241, 242, 244, 247, 256, 261, 270, 272, 278, 279, 283, 286, 289, 292, 294, 296, 300, 301, 309, 312, 314, 316, 317, 319, 329, 331, 340
- Solidified, 341
- Stealth, 35, 124, 158, 159, 279, 294, 297, 312, 313, 315, 339
- Step, 24–27, 30, 31, 34–36, 62, 64–71, 88, 89, 106, 114, 116–120, 122–124, 126, 137, 145, 158, 159, 161, 163, 164, 169, 173, 174, 179, 180, 182, 185, 187, 188, 191–193, 195, 196, 198, 200, 201, 204, 211, 212, 216, 224, 229, 235, 243, 244, 246, 252, 253, 255, 259, 260, 263, 265, 267, 270, 272, 276, 277, 279, 283, 286, 289–291, 294, 299–301, 306, 311, 312, 316, 323–325, 329, 333, 337, 338, 340, 341
- Stopped, 67, 117, 121, 143, 159, 178, 191, 193, 194, 200, 212, 234, 235, 244, 269, 272, 280, 286, 292, 294, 300, 321, 329, 340
- Strike, 23, 30, 88, 115, 116, 119, 122, 125, 138, 143–150, 152, 161, 169–171, 173, 175, 176, 178, 181–188, 191–194, 198, 200, 202, 207, 209, 215, 220, 222, 225–227, 231, 234, 235, 237, 238, 240–242, 247, 263, 281, 288, 299, 303, 304, 320, 337
- Stunned, 67, 69, 70, 88, 115, 117, 119, 121, 124, 126, 143, 159, 175, 178, 194, 200, 206, 210, 226, 233, 235, 237, 244, 258, 259, 278, 286, 290, 292, 293, 309, 314, 340

- Summon, 23, 24, 88, 89, 115, 146, 182, 183, 204, 211, 212, 219, 223, 224, 244, 247, 268, 337, 338, 340
- Surge, 24, 26, 30, 55, 64, 67, 69, 125, 128, 129, 141, 144–146, 170, 176, 181, 185, 191, 195, 196, 204, 209, 214, 217, 220, 221, 223, 225, 227, 229, 230, 240, 244, 246, 253, 261, 268, 269, 272, 274–276, 282, 284, 287, 293, 294, 296, 300, 305, 309, 317, 320, 323, 327, 328, 332, 333, 337, 338, 340
- Teleport, 20, 28, 29, 35, 61–63, 66, 67, 69, 70, 75, 80, 87, 108, 114, 119, 120, 123, 127, 128, 137, 138, 143, 158, 164, 179, 180, 193, 210, 243, 244, 256, 263, 273, 277, 287, 290, 312, 323, 325, 329, 338–340
- Temporary hit points, 23, 24, 29, 37, 47, 65, 66, 88, 101, 115, 117–124, 145, 150, 155–157, 163, 164, 172, 181–183, 194, 198, 200, 204, 211–215, 217, 219, 222–224, 226, 243, 244, 247–250, 253, 260, 265–269, 272–274, 276, 277, 280, 282, 286, 292, 301, 302, 309, 311, 317, 323, 329, 331, 334, 337, 339, 341
- Tethered, 116, 121, 123, 142, 164, 198, 234, 279, 289, 325, 340
- Track, 13, 29, 43–47, 56, 62, 70, 87, 88, 141, 146, 151, 155, 170, 178, 183, 187–189, 191, 192, 200, 216, 222, 223, 225, 229–231, 235, 240, 243, 249, 261, 263, 269, 274, 276, 287, 291, 294, 296, 297, 316, 317, 328, 337
- Vulnerability, 129, 148, 154, 170, 181, 191, 198, 210, 216–218, 220, 223, 225, 226, 240, 243, 261, 264, 279, 289, 294, 296, 297, 300, 315, 321, 328, 331, 332, 339, 341
- Warp, 35, 63, 65, 69, 80, 89, 108, 114, 123, 149, 174, 183, 193, 196, 209, 210, 212, 239, 246, 287, 289, 303, 313, 315, 316, 325, 329, 338, 340
- Weakened, 62, 67, 128, 129, 145, 148, 150, 151, 153, 157, 189, 196, 198, 203, 206, 209, 214, 215, 217, 222, 231, 247, 256, 260, 261, 269, 270, 278, 279, 282, 284, 300, 305, 306, 321, 331, 339–341
- Wounded, 23, 24, 67, 69, 88, 105, 128, 129, 154, 155, 157, 161, 163, 170, 181, 191, 195, 197, 198, 201, 204, 205, 211, 212, 215, 219, 220, 229, 232, 234, 249, 253, 265, 268, 269, 272, 280, 286–288, 290–292, 294, 296–298, 300, 305, 311, 315, 317–320, 323, 328, 329, 331–333, 338–340
